Table of Contents

Session 1: Performance Analysis

Compositional Performance Verification of NoC Designs .......................................................... 1
Daniel E. Holcomb, Alexander Gotmanov, Michael Kishinevsky, Sanjit A. Seshia

A Correlation Preserving Performance Analysis for Stream Processing Systems .................. 11
Gideon Smeding, Gregor Gössler

Invited Talk 1

Clearing the Clutter: Unified Modeling and Verification Methodology for System Level Hardware Design .............................................................. 21
Yosinori Watanabe, Stuart Swan

Session 2: Test Coverage and Fault Localization

Improving Design Verifiability by Early RTL Coverability Analysis ...................................... 25
Kai-Hui Chang, Chia-Wei Chang, Jie-Hong Roland Jiang, Chien-Nan Jimmy Liu

FAST: Formal Specification Driven Test Harness Generation .............................................. 33
Jiong Gong, Yun Wan, Haihao Shen, Xu Deng, Wei Wang, Xiangning Ma

Model-Based Diagnosis versus Error Explanation ............................................................. 43
Heinz Riener, Goerschwin Fey

Session 3: High-Level Validation I

Preservation of LTL Properties in Desynchronized Systems ................................................... 53
Yu Bai, Jens Brandt, Klaus Schneider

Polynomial Datapath Synthesis and Optimization Based on Vanishing Polynomial over Z2m and Algebraic Techniques .................................................. 65
Samaneh Ghandali, Bijan Alizadeh, Zainalabedin Navabi, Masahiro Fujita

Interactive Verification of Synchronous Systems ................................................................. 75
Manuel Gesell, Klaus Schneider

Design Contest

MEMOCODE 2012 Hardware/Software Codesign Contest: DNA Sequence Aligner .................. 85
Stephen A. Edwards

Shepard: A Fast Exact Match Short Read Aligner ............................................................. 91
Chad Nelson, Kevin Townsend, Bhavani Satyanarayana Rao, Phillip Jones, Joseph Zambreno

Fast CPU-Based DNA Sequence Aligner Models ............................................................. 95
Aryan Arbabi, Milad Gholami, Mojtaba Varmazyar, Shervin Daneshpajouh
Session 4: High-Level Validation II

Interdependent Cache Analyses for better Precision and Safety ...................................................... 99
Kartik Nagar, Y.N. Srikant

A General Technique for Deterministic Model-Cycle-Level Debugging ........................................... 109
Asif Khan, Muralidaran Vijayaraghavan, Arvind

Direct Generation of Invariants for Reactive Models ................................................................. 119
Elizabeth I. Leonard, Myla M. Archer, Constance L. Heitmeyer, Ralph D. Jeffords
