## CONTENTS

### MATERIALS AND FABRICATION

### PART A

**A GLOBAL TRIBUTE – DAVID LIDBURY MEMORIAL SYMPOSIUM ON FRACTURE MECHANICS, FAILURE ASSESSMENT, AND INTERNATIONAL PROGRAMS IN STRUCTURAL INTEGRITY**

**Introduction** ........................................................................................................... 1

**PVP2012-78018** ................................................................................................. 3
The Fatigue Behaviour of a High Strength CrNi-Steel Regarding Fretting Fatigue
  Thomas Christiner, Johannes Reiser, István Gódor, Wilfried Eichlseder, Franz Trieb, and René Stühlinger

**PVP2012-78046** ................................................................................................. 11
Degradation of Moderator Graphite in Gas Cooled Reactors
  Robert Moskovic

**PVP2012-78125** ................................................................................................. 19
Scanning Electron Microscope of Fatigue and Creep-Fatigue From Stress Concentrations in Plates
  Osamu Watanabe, Marina Kikuchi, and Akihiro Matsuda

**PVP2012-78142** ................................................................................................. 29
The Combined Effects of Residual Stress and Warm Prestressing on Cleavage Fracture in Steels
  Karin Rosahl, Julian Booker, and David Smith

**PVP2012-78225** ................................................................................................. 37
Determination of the Interaction Between Primary and Secondary Stresses Using an Idealised Model
  Graeme Horne and David J. Smith

**PVP2012-78311** ................................................................................................. 47
Fatigue Limit Prediction of SUS630 Stainless Steel Matrix Based on Small Crack Mechanics
  Defu Nie and Yoshiharu Mutoh

**PVP2012-78404** ................................................................................................. 55
Quantifying the Constraint of Three-Dimensional Biaxially Loaded Specimens Containing Semi-Elliptical Cracks Using the J-A2 Method
  L. W. Sharpe and Y. J. Chao

**PVP2012-78500** ................................................................................................. 63
Estimation of Stress Intensity Factors due To Welding Residual Stresses for Circumferentially Cracked Pipes
  Chang-Young Oh, Ji Soo Kim, Yun Jae Kim, Young-Jin Oh, Kyoungsoo Lee, and Sungho Lee

EUROPEAN PROGRAMS IN STRUCTURAL INTEGRITY:
IN MEMORIAM OF DAVID LIDBURY
Introduction............................................................................................................. 405

PVP2012-78035........................................................................................................ 407
Effect of Pre-Strain on Mechanical Properties of Pressure Vessel Grades: Assessment of
Stress Relieving/Post Weld Heat Treatments Efficiency at Regenerating Properties
  Deborah Heritier, Sylvain Pillot, Stéphanie Corre, Cédric Chauvy, and Patrick Toussaint

PVP2012-78044........................................................................................................ 415
NESCVII: A European Project for Application of WPS in RPV Assessment Including
Biaxial Loading
  Dominique Moinereau, Stéphane Chapulot, Stéphane Marie, and Philippe Gilles

PVP2012-78077........................................................................................................ 427
Further Predictions of Fracture Experiments of a Pre-Cracked Pressurised Thermal Shock
Disk (PTS-D) Specimen Under Warm Prestressing Loading Cycles
  H. Teng, J. K. Sharpies, and P. J. Budden

PVP2012-78139........................................................................................................ 437
Mechanical Characterization for a Large Test Design of a Dissimilar Metals Welding
With a Narrow Gap Nickel Alloy Weld: Experimental and Numerical Analysis on Specimens
  Myriam Bourgeois, Olivier Ancelet, Stephane Marie, and Stéphane Chapulot

PVP2012-78182........................................................................................................ 445
The Importance of a Strong Training Element Within the European STYLE Project
  Adam Toft and John Sharpies

PVP2012-78286........................................................................................................ 453
STYLE: Transferability of Fracture Material Properties - Updated Experimental and
Analytical Results
  Tomas Nicak, Herbert Schendzielorz, Elisabeth Keim, Gottfried Meier,
  Dominique Moinereau, and Patrick Le Delliou

PVP2012-78344........................................................................................................ 465
NESCVII European Project: Demonstration of Warm Pre-Stressing Effect in Biaxial Loading
Conditions: Bending Tests on 18MND5 Cruciform Specimens and Their Interpretation
  C. Jacquemoud, T. Yuritzinn, S. Marie, D. Moinereau, M. Nédélec, and S. Chapulot

PVP2012-78464........................................................................................................ 475
R6 V and Proposed Vg Plasticity Correction Terms for Combined Loading Applied to
Experiments
  Peter James and Colin Madew

PVP2012-78518........................................................................................................ 487
Analysis of Ductile Crack Growth in Pipe Test in STYLE Project
  Shengjun Yin, Paul T. Williams, Hilda B. Klasky, and B. Richard Bass
A Dislocation-Based Cleavage Initiation Model for Pressure Vessel Steels
Kristine B. Cochran, Marjorie Erickson, Paul T. Williams, Hilda B. Klasky, and B. Richard Bass

R6 V, Vg and RSE-M Estimates of Experimental Failure for Combined Loading
Peter James, Colin Madew, Andrew Goodfellow, and Martin Gallegillo

FATIGUE AND FRACTURE OF WELDS AND HEAT AFFECTED ZONES

Assessment of Fatigue Crack Growth in Imperfect Lap Joint: Part 1 — Analysis of Stress Distribution on Virtual Crack Plane
Masaru Wakasa, Satoshi Igi, Shoichi Yoshida, Kazuyoshi Sekine, Tomohiko Tsuchida, and Katsuki Iwata

Dissimilar Metal Weld Pipe Fracture Testing: Analysis of Results and Their Implications
D. Rudland, R. Lukes, P. Scott, R. Olson, A. Cox, and D.-J. Shim

Dissimilar Metal Weld Pipe Fracture Testing: Experimental Procedures and Results
Andrew J. Cox, Richard J. Olson, Bruce A. Young, Paul M. Scott, and David L. Rudland

Assessment of Fatigue Crack Growth in Imperfect Lap Joint: Part 2 — Crack Propagation Analysis Using "SCANP"
Satoshi Igi, Yasushi Morikage, Masaru Wakasa, Shoichi Yoshida, Kazuyoshi Sekine, Masaki Shiratori, Tomohiko Tsuchida, and Katsuki Iwata

Implant Test Modeling for Risk of Cold Cracking Assessment During Welding Operations
Vincent Robin, Florence Gommez, Christophe Primault, and Josette Devaux

Status of French Road Map to Improve Environmental Fatigue Rules
Claude Faidy

Numerical Analysis of Hydrogen Distribution in Welds of Structural Materials for Pressure Vessels
Hiroaki Mori, Kazuyoshi Saida, Hiroyuki Ogiwara, Rinzo Kayano, and Kazutoshi Nishimoto

Simulation of Triaxial Residual Stress Mapping for a Hollow Cylinder
Mitchell D. Olson, Wilson Wong, and Michael R. Hill
FITNESS FOR SERVICE AND FAILURE ASSESSMENT

Introduction ................................................................. 589

PVP2012-78003 ...................................................................... 591
Estimated SIL Levels and Risk Comparisons for Relief Valves as a Function of
Time-in-Service
Emily M. Mitchell, Robert E. Gross, and Stephen P. Harris

PVP2012-78095 ...................................................................... 601
Bench-KJ: Benchmark on Analytical Calculation of Fracture Mechanics Parameters KI and
J for Cracked Piping Components
S. Marie and C. Faidy

PVP2012-78113 ...................................................................... 609
The Effect of Ovality and Thickness Variations on Stress Analysis of Tube Bends Under
Internal Pressure
Yu Chen and Jonathan Parker

PVP2012-78127 ...................................................................... 617
The Influence of Long-Range Residual Stress on Plastic Collapse and Local Yielding of
Internally Pressurized Pipes
Gui-yi Wu, D. J. Smith, and M. J. Pavier

PVP2012-78408 ...................................................................... 625
Failure Analysis of an In-Service Natural Gas Pipeline
Huai-xiang Cao, Xing-qi Qiu, Xiao-jing Yao, and Ming-da Song

PVP2012-78476 ...................................................................... 633
First Estimate" Plastic Collapse Solutions for Flat and Torispherical Ended Pressure Vessels
Subjected to Extensive Corrosion Wall Thinning
Colin Madew, Mark Wilkes, Richard Charles, and Ian Symington

PVP2012-78537 ...................................................................... 645
Grain Boundary Graphitization in P1 (C-1/2Mo) Alloy Pipe
Clark McDonald, John Arnold, and Jeff Henry

PVP2012-78546 ...................................................................... 657
The Effect of Bi-Axial Stress on Limit Loads of Structures Containing Surface-Breaking
Flaws and its Influence on Structural Integrity Assessments
Liwu Wei and Isabel Hadley

PVP2012-78589 ...................................................................... 669
Fitness for Service of Degraded Grade 91 Pipe
Marvin J. Cohn and Steve R. Paterson

PVP2012-78591 ...................................................................... 677
Comparison of ASME B31.1 Sustained Load Stresses to Corresponding Tresca Stresses
Marvin J. Cohn
