# CONTENTS

## RUDY SCAVUZZO STUDENT PAPER SYMPOSIUM AND COMPETITION

### STUDENT PAPER COMPETITION

**PVP2012-78099**

Prediction of Lower Bound Fracture Toughness in the Transition Temperature Region by T33-Stress

*Kai Lu and Toshiyuki Meshii*

**PVP2012-78169**

Cleavage Dynamic Propagation Analysis in a Nuclear Reactor Pressure Vessel Steel Using a High-Speed Camera

*Amaury Bousquet, Stéphane Marie, and Philippe Bompard*

**PVP2012-78194**

Analytical and Finite Element Multi-Shell Modelling of an Intervertebral Disc

*Sébastien Demers, Abdel-Hakim Bouzid, and Sylvie Nadeau*

**PVP2012-78200**

Fatigue Test for Two-Holes Diagonally-Placed Plate at Elevated Temperature

*Keisuke Kinoshita and Osamu Watanabe*

**PVP2012-78205**

Estimation of Remaining Fatigue Life for Elbow Pipe Subjected to Cyclic Overload

*Hisanori Abe, Kazuya Matsuo, and Koji Takahashi*

**PVP2012-78283**

Small Scale Experiments on Boiling Liquid Expanding Vapor Explosions: Supercritical BLEVE

*Delphine Laboureur, Jean-Marie Buchlin, and Patrick Rambaud*

**PVP2012-78320**

Determination of Shakedown Boundary and Fitness-Assessment-Diagrams of Cracked Pipe Bends

*Mostafa S. ElSaadany, Maher Y. A. Younan, and Hany F. Abdalla*

**PVP2012-78342**

Isothermal Fatigue Responses and Constitutive Modeling of Haynes 230

*Paul Ryan Barrett, Mamballykalathil Menon, and Tasnim Hassan*

**PVP2012-78347**

Thermal Fatigue Evaluation Method of Pipes by Equivalent Stress Amplitude

*Takafumi Suzuki and Naoto Kasahara*
PVP2012-78384 ................................................................. 87
Thermal-Creep Induced Stress Relaxation Near a Notch in Zr-2.5Nb
Shuai Wan, Mark R. Daymond, and Rick A. Holt

PVP2012-78497 ................................................................. 93
Quantification of Creep Cavity Evolution Using a Novel Replica Image Processing Technique
Haoliang Yang, Catrin M. Davies, and John P. Dear

PVP2012-78548 ................................................................. 101
Alternative Selections of Delayed Coke Drum Materials Based on ASME Material Property Data
Milan Nikic and Zihui Xia

PVP2012-78560 ................................................................. 109
A Full-Field Residual Stress Profile Estimation Scheme for Pipe Girth Welds
Shaopin Song, Pingsha Dong, and Jinmiao Zhang

PVP2012-78611 ................................................................. 121
Application of a Remote Health Monitoring System for Pipeline Bolted Joints
Pejman Razi, Ramadan A. Esmaeel, and Farid Taheri

PVP2012-78768 ................................................................. 131
Research and Development of Viscous-Friction Hybrid Damper
Tatsuya Kawamura, Satoshi Fujita, and Keisuke Minagawa

PVP2012-78784 ................................................................. 139
A Study of Formularization of Uplift Behavior at the Bottom Plate of Large LNG Storage Tanks During Earthquake
Shoichiro Hayashi and Tomoyo Taniguchi

STUDENT PAPER SYMPOSIUM
PVP2012-78074 ................................................................. 149
Study on the Effect of Axial Flaw Length on Limit Bending Load of Wall Thinned Straight Pipes by Large Strain Finite Element Analyses
Yoshiaki Ito and Toshiyuki Meshii

PVP2012-78204 ................................................................. 155
Influence of Circumferential Flaw Length on Internal Burst Pressure of a Wall-Thinned Pipe
Masataka Tsuji and Toshiyuki Meshii

PVP2012-78209 ................................................................. 163
Improvement of Fatigue Limit by Shot Peening for High-Strength Steel Containing a Crack-Like Surface Defect: Influence of Stress Ratio
Jun Yasuda and Koji Takahashi

PVP2012-78221 ................................................................. 171
Constitutive Model Development for Thermo-Mechanical Fatigue Response Simulation of Haynes 230
Raasheduddin Ahmed, Mamballykalathil Menon, and Tasnim Hassan
Axi-Symmetrical Stress Analysis and Sealing Performance Evaluation of a Pipe Flange Connection Under Elevated Temperature and Internal Pressure

Yuya Omiya and Toshiyuki Sawa

Study on the Stress-Strain Redistribution Caused by Inelastic Deformation in Perforated Plate

Sho Ikeda, Masakazu Sato, and Naoto Kasahara

Investigation on On-Board High-Pressure Composite Tanks Subjected to Localized and Engulfing Fire

Kesheng Ou, Jinyang Zheng, and Yongzhi Zhao

Development of a Web-based RBI Program for LNG Plant Considering Cryogenic Environment

Joo-Dong Kim, Song-Chun Choi, and Jae-Boong Choi

Dynamic Fracture and Anti-Explosion Capacity Investigation of Composite Explosion Containment Vessel

Yang Hu, Jinyang Zheng, and Li Ma

Effect of Post-Weld Heat Treatment on the Plastic Buckling of Welded Cylindrical Shells

Ji Wang, Zhiping Chen, and Chulin Yu

Safety Investigation of Buried Polyethylene Pipe Subject to Seismic Landslide

Jinjin Ma, Jianfeng Shi, and Jinyang Zheng

A Method to Characterize the Fracture Resistance of Dissimilar Metal Welds

A. Bloudin, S. Chapuliot, and S. Marie

Research and Development of Multiple Tuned Mass Damper for Excavators

Satoshi Roppongi, Satoshi Fujita, and Keisuke Minagawa

Applicability of Semi-Analytical Finite Elements for Analyzing Uplift Displacement of Flat-Bottom Cylindrical Shell Tanks Statically

Teruhiko Nakashima and Tomoyo Taniguchi
