Session 1: Wireless Sensor Networks

Data Transmission Strategies for Event Reporting and Continuous Monitoring
Applications in Wireless Sensor Networks ................................................................. 1
  Israel Leyva Mayorga, Mario E. Rivero-Angeles, Claudia C. Gutierrez-Torres,
  Jose A. Jimenez-Bernal, Ramsés Rodríguez, and Alma Torres-Rivera

  Fayez Gebali, Rami Sulaimani, and Haytham Elmiligi

Simulated Annealing for Maximizing the Lifetime of Sensor Networks
under Opportunistic Routing .............................................................................. 14
  Samia Chelloug and Mohammed Benmohammed

Dynamic Change Method of Cluster Size in WSN ............................................. 20
  Shinnosuke Toyoda and Fumiaki Sato
**Session 2: Wireless Communication Systems I**

Strength Based Receiver Architecture and Communication Range and Rate
Dependent Signal Detection Characteristics of Concentration Encoded Molecular Communication ..................................................28
  Mohammad Upal Mahfuz, Dimitrios Makrakis, and Hussein T. Mouftah

Multi-user Interference Mitigation in TH-PPM UWB Systems ..........................................................36
  Hao Zhang, Hongjiao Zhang, Xuerong Cui, and T. Aaron Gulliver

Performance Analysis of Cognitive Transmission in Dual-Cell Environment and its Application to Smart Meter Communications ..........................................................40
  Hong-Chuan Yang, Dong Zhang, Xiangyu Kong, and Hongjie Jia

Simulation Analysis of IEEE 802.15.4 Non-beacon Mode at Varying Data Rates ..........................................................46

**Session 3: Ad-Hoc Networks**

Setting Up Static Components for Investigating MANET Performance: A Simulation Case ..........................................................53
  Elis Kulla, Masahiro Hiyama, Makoto Ikeda, Leonard Barolli, Kazunori Uchida, and Makoto Takizawa

Performance Evaluation of a MANET Testbed in Heterogeneous Environment: Experimental Results ..........................................................60
  Masahiro Hiyama, Elis Kulla, Makoto Ikeda, and Leonard Barolli

Geographical Multi-Channel Multi-Interface Routing Protocol for Mobile Ad Hoc Network ..........................................................66
  Saman Hameed Amin and H.S. Al-Raweshidy

**Session 4: P2P Networks**

Reputation Aggregation Method Considering Reliability of Newly Joining Peers in Unstructured P2P Networks ..........................................................74
  Takashi Yajima, Hiroki Ushikubo, and Hiroshi Shigeno

Design of GeoConscious P2P Content-based Image Retrieval ..........................................................82
  Junzo Kamahara, Naoki Tanaka, Katsutoshi Hirayama, Takashi Nagamatsu, Yuuichi Teranishi, and Yusuke Ariyoshi

Performance Comparison of Peer-to-Peer Content Distribution Schemes ..........................................................88
  Francisco de Asís López-Fuentes
### Session 5: Vehicular Networks

CoR-VANETs: Game Theoretic Approach for Channel and Rate Selection in Cognitive Radio VANETs .......................................................... 94
  **Danda B. Rawat, Bhed B. Bista, and Gongjun Yan**

Performance Analysis of Random Access Strategies for Short Message Exchange in VANETs: A Social Approach ........................................... 100
  **Néstor E. Hernández-Atonal, Fernando Martínez-Plínón,**
  **and Mario E. Rivero-Angeles**

Performance of OLSR and DSDV Protocols in a VANET Scenario: Evaluation Using CAVENET and NS3 .......................................................... 108
  **Evjola Spaho, Makoto Ikeda, Leonard Barolli, Fatos Xhafa,**
  **Muhammad Younas, and Makoto Takizawa**

Jamming Strategies in DYMO MANETs: Assessing Detectability and Operational Impacts ............................................................... 114
  **Deepali Arora, Eamon Millman, and Stephen W. Neville**

### Session 6: Wireless Communication Systems II

Minimum Cell Size for Information Capacity Increase in a Shadowed Environment of Cellular System Operating at Higher Carrier Frequency .............................................. 122
  **K.A. Anang, P.B. Rapajic, R. Wu, G. Oletu, L. Bello, and T.I. Eneh**

Adaptive Path Ranking Technique for Maximization of Gains of Bandwidth Aggregation over Heterogeneous Wireless Links .................................. 127
  **Syed Zubair Ahmad, Muhammad Abdul Qadir, and Samiullah Khan**

Performance of DPPM 60 GHz Impulse Radio Systems with Multiple Receive Antennas ............................................................... 135
  **Hao Zhang, Lingwei Xu, Tingting Lu, Jingjing Wang, and T. Aaron Gulliver**

### Session 7: Network Protocols

Multimedia Quorum-based Synchronization Protocols .......................................................... 141
  **Tadateru Ohkawara, Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa**

Routing Load of Route Calculation and Route Maintenance in Wireless Proactive Routing Protocols ............................................................... 149
  **D. Mahmood, N. Javaid, U. Qasim, and Z.A. Khan**

Multiple Station Aggregation Procedure for Radio-On-Demand WLANs .......................................................... 156
  **Kazumi Kumazoe, Daiki Nobayashi, Yutaka Fukuda, Takeshi Ikenaga,**
  **and Kenichi Abe**
Session 8: Wireless Sensor Networks and Body Area Networks

On Performance Evaluation of Variants of DEEC in WSNs ................................................................. 162
  T.N. Qureshi, N. Javaid, M. Malik, U. Qasim, and Z.A. Khan

Data Forwarding Method Based on Status of Connection with Multiple Mobile
Sinks in Wireless Sensor Networks .............................................................. 170
  Akimitsu Kanzaki, Ayana Yamamoto, Takahiro Hara, and Shojiro Nishio

QPRD: QoS-aware Peering Routing Protocol for Delay Sensitive Data
in Hospital Body Area Network Communication .............................................. 178
  Zahoor Khan, Shyamala Sivakumar, William Phillips, and Bill Robertson

Modeling Propagation Characteristics for Arm-Motion in Wireless Body Area
Sensor Networks ......................................................................................... 186
  Q. Ain, A. Ikram, N. Javaid, U. Qasim, and Z.A. Khan

Session 9: Energy-Aware Algorithms and Systems

Evaluation of the Algorithms for Selecting an Energy-efficient Storage Server
in Storage and Computation Oriented Applications .......................................... 192
  Takuro Inoue, Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Transmission Power Consumption Laxity-Based (TPCL) Algorithm
for Communication Type Applications ......................................................... 200
  Tomoya Enokido and Makoto Takizawa

Energy-Efficient Multiuser MIMO Downlink Transmissions in Massively
Distributed Antenna Systems with Predefined Capacity Constraints .................. 208
  Saad Mahboob, Chinmaya Mahapatra, and Victor C.M. Leung

Algorithm and Convergence of MST Problem for Energy Efficient Routing
in Wireless Sensor Networks ........................................................................ 212
  Rui Yang, Tiande Guo, and Wenguo Yang

Session 10: Wireless Transmission Systems

Symbol Error Rate Analysis of MIMO Dual-Hop Amplify-and-Forward Relaying
Systems with Transmit and Receive Beamforming .......................................... 220
  Xiao-bo Guo, Min Li, Ying Li, and Li-Feng Wang

Transmit Antenna Selection for Downlink Transmission in a Massively
Distributed Antenna System Using Convex Optimization ............................. 228
  Saad Mahboob, Rukhsana Ruby, and Victor C.M. Leung

Cooperative Spectrum Sensing over κ-μ Fading Channel .............................. 234
  Alireza Bagheri and Ali Shahzadi
Performance of Incremental DF Cooperative Networks with the Nth Best-Relay over Identical Rayleigh Fading Channels ................................................................. 239
  Zhang Hao, Wang Xinjie, Wang Jingjing, and T. Aaron Gulliver

Session 11: Multimedia Processing and Applications
Characterizing Videos and Users in YouTube: A Survey .................................................. 244
  Shaiful Alam Chowdhury and Dwight Makaroff
Implementation of Imaging Compressive Sensing Algorithms on Mobile Handset Devices ................................................................................................................. 252
  Irene L. Manotas Gutiérrez, Henry Arguello Fuentes, and Kristina Winbladh
Analyzing City Blocks’ Properties Based on Mobile Data .................................................. 260
  Weifeng Lv, Kan Liu, and Tongyu Zhu

Session 12: Privacy and Trust Computing
Trust Based Security Mechanisms for Social Networks .................................................... 264
  Ping Zhang, Arjan Durresi, Yefeng Ruan, and Mimoza Durresi
Who Refuses to Wash Hands? Privacy Issues in Modern House Installation Networks ............................................................................................................. 271
  Thomas Mundt, Frank Krüger, and Till Wollenberg
An Integrated Fuzzy-based Trustworthiness System for P2P Communications in JXTA-Overlay ...................................................................................................... 278
  Kouhei Umezaki, Evjola Spaho, Leonard Barolli, Fatos Xhafa, Muhammad Younas, and Jiro Iwashige

Session 13: Optical Systems
Investigation of Polarization Mode Dispersion Influence to Different Optical Signal Modulation Formats ........................................................................................................ 285
  Jurgis Porins, Girts Ivanovs, Andis Supe, and Gunars Cauna
A Routing Algorithm for Rearrangeable Nonblocking Optical Banyan-type Networks ......................................................................................................................... 289
  D.J. Guan, Li-Da Tong, and Irene Ya-Ping Chen
Reach Improvement of Spectrum-Sliced Dense WDM-PON System ............................ 296
  Sandis Spolitis, Vjaceslavs Bobrovs, and Girts Ivanovs
Space to Ground Optical Power Transmission ................................................................ 302
  A. Jooshesh, T.A. Gulliver, and S. Uysal
Session 14: Multimedia Tools and Systems

User Preference Profiling Based on Speech Recognition for Personalized Recommendation .................................................................308

Kosuke Takano, Hiroshi Honda, and Kin Fun Li

A Handy Image Explorer with Tactile Feedback for Diagnostic Imaging ...............................................................316

Jiaqing Lin, Hiroaki Nishino, Tsuneo Kagawa, and Kouichi Utsumiya

Exploitation of Mobile Access to Context-Based Information in Cultural Heritage Fruition ..................................................322

Salvatore Andolina, Dario Pirrone, Giuseppe Russo, Salvatore Sorce, and Antonio Gentile

Performance Evaluation of Multi-pattern Matching Algorithms on Smartphone .................................................329

Abdelfattah Amamra, Chamseddine Talhi, and Jean-Marc Robert

Session 15: Cognitive Radio Networks and Mesh Networks

Prioritized Proactive Scheme for Spectrum Handoff Decision in Cognitive Radio Networks ...................................................335

Salah Zahed, Irfan Awan, and Geyong Min

Proposal of Autonomous Cloud Based Network Control Methods for Disaster Information Network System with Cognitive Wireless Network ..................................................342

Noriki Uchida, Kazuo Takahata, and Yoshitaka Shibata

Comparison of Spectrum Management without Game Theory (SMWG) and with Game Theory (SMG) for Network Performance in Cognitive Radio Network ..........................................348

Saed Alrabae, Anjali Agarwal, Nishith Goel, Marzia Zaman, and Mahmoud Khasawneh

Tetsuya Oda, Admir Barolli, Evjola Spaho, Leonard Barolli, Fatos Xhafa, and Jiro Iwashige

ASTSA 2012

Session 1: Sensors and Applications

Ceramic Humidity Sensors for Environmental Parameters Monitoring .................................................................362

Rodrigo de Matos Oliveira, Maria do Carmo de Andrade Nono, and Celso von Randow

Smart Clustering for Multimodal WSNs .................................................................367

Fady Medhat, Rabie A. Ramadan, and Ihab Talkhan
HSEP: Heterogeneity-aware Hierarchical Stable Election Protocol for WSNs .................................................. 373

Session 2: Protocols and Algorithms
Supporting Communication in Time of Disaster ................................................................. 379
  Takashi Lokawa, Yuhiro Yonamine, Jiahong Wang, Eiichiro Kodama, 
  and Toyoo Takata

An Error Control Scheme for Delay Constrained Data Communication in 
a Chain-Based Wireless Sensor Network .......................................................... 385
  Zahra Taghikhaki, Nirvana Meratnia, and Paul J.M. Havinga

Evaluation of Slotted CSMA/CA of IEEE 802.15.4 .................................................. 391
  A.N. Alvi, S.S. Naqvi, S.H. Bouk, N. Javaid, U. Qasim, and Z.A. Khan

BioSPAN 2012

Session 1: Bio-Sensing, Processing, Application 
and Networking I
GPS Waypoint Application ................................................................. 397
  Kris Koiner, Haytham Elmiligi, and Fayez Gebali

ABLE Transit: A Mobile Application for Visually Impaired Users to Navigate 
Public Transit ................................................................. 402
  Naomi Harrington, Laura Antuña, and Yvonne Coady

Analytical Survey of Wearable Sensors ............................................. 408
  A. Rehman, M. Mustafa, N. Javaid, U. Qasim, and Z.A. Khan

Session 2: Bio-Sensing, Processing, Application 
and Networking II
Introducing GlucoFit: An Assistive Technology for Monitoring and Managing 
Diabetes .................................................................................. 414
  Bryan Gislason, Christopher McKnight, Brianna Potvin, Sean Stuart, 
  Juan Zepeda, Jens Weber, and Haytham Elmiligi

Motion Tracking and Learning in Telerehabilitation Applications ..................... 420
  Ana-Maria Sevcenco and Kin Fun Li

Transmission Delay of Multi-hop Heterogeneous Networks for Medical 
Applications .................................................................. 428
  M.M. Yaqoob, I. Israr, N. Javaid, M.A. Khan, U. Qasim, and Z.A. Khan

A Comprehensive Survey of MAC Protocols for Wireless Body Area Networks .......... 434
  A. Rahim, N. Javaid, M. Aslam, Z. Rahman, U. Qasim, and Z.A. Khan
CWECS 2012

Session 1: Computer Security and Confidentiality
Structuring Reconfigurable Composite Signature Codecs to Enhance OCDMA
Network Confidentiality ...........................................................................................................440
   Jen-Fa Huang, Chung-Yu Li, Kai-Sheng Chen, and Tsing Zhang

New Security Perspectives around BYOD ............................................................................446
   Antonio Scarfo

The IPSec Security Problems and a Cross-layer Security Mechanism
for PMIPv6 Handover when an IPSec Security Association is Established
on an L2 Direct Link ..............................................................................................................452
   Fang-Yie Leu, Yi-Li Huang, and Chien-Nan Chen

A CAPTCHA with Tips Related to Alphabets Upper or Lower Case .................................458
   Wei-Bin Lee, Che-Wei Fan, Kevin Ho, and Chyi-Ren Dow

Session 2: Distributed Systems and Applications
Controlling Traffic Lights for Ambulances ...........................................................................462
   Fang-Yie Leu, Miao-Heng Chen, Yi-Li Huang, and Chung-Chi Lin

Routing Protocols with Power Saving and Data Salvation for Wireless Sensor
Networks ...............................................................................................................................468
   Chu-Hsing Lin, Hung-Yan Lin, and Wei-Bin Lee

A SWE-Based Network Management Framework for Environment Monitoring ..........472
   Chyi-Ren Dow, Ruei-Yu Hu, Yu-Hong Lee, Shiow-Fen Hwang, and Wei-Bin Lee

A Study of Virtual Machine Development .........................................................................478
   Wuu-Yee Chen and Yuan-Kan Lu

MAPWC 2012

Session 1: Wireless Communication
Relation between Discrete Points of DRTM and Diffraction Points ....................................482
   Masafumi Takematsu, Kazunori Uchida, and Junichi Honda

Field Distributions of 1-Ray Model Using Estimated Propagation Parameters
in Comparison with DRTM ....................................................................................................488
   Kazunori Uchida, Masafumi Takematsu, Jun-Hyuck Lee, and Junichi Honda

Numerical and Experimental Study on Y-Shaped Branch by Post Array
Waveguide ...............................................................................................................................494
   Hiroshi Maeda, Kazuya Tomiura, Huili Chen, and Takuya Shinoara
Session 2: Wireless Networks
Performance Evaluation of WMN Considering Number of Connections Using NS-3 Simulator ................................................................. 498
  Makoto Ikeda, Tetsuya Oda, Elis Kulla, Masahiro Hiyama, Leonard Barolli, and Muhammad Younas

Performance Evaluation of WSNs for MAC and Routing Protocols Considering Depletion and Routing Efficiency Metrics ........................................... 503
  Tao Yang, Elis Kulla, Tetsuya Oda, Leonard Barolli, Muhammad Younas, and Makoto Takizawa

Routing Load of Route Discovery and Route Maintenance in Wireless Reactive Routing Protocols ................................................................. 511
  D. Mahmood, N. Javaid, U. Qasim, and Z.A. Khan

MNSA 2012
Session 1: Wireless and Mobile Networks
An Extension of Wireless Internet-Access Mesh Network Simulator for Use of Smart Antenna ................................................................. 517
  Nobuo Funabiki, Shigeto Tajima, Teruo Higashino, Toru Nakanishi, and Kan Watanabe

Impact of Population Size and Number of Generations on the Performance of Dense WMNs ................................................................. 523
  Admir Barolli, Tetsuya Oda, Evjola Spaho, Leonard Barolli, Fatos Xhafa, and Makoto Takizawa

Using Data Replication for Improving QoS in MANETs ................................................................. 529
  Elis Kulla, Evjola Spaho, Fatos Xhafa, Leonard Barolli, and Makoto Takizawa

A Unique Global Mobile Network Service Tracker and User Centric Data Analyser ................................................................. 534
  Muhammad Bilal, Irfan Awan, Steve Mockford, and Asfand e-Yar

Session 2: Distributed Systems and Applications
Design Pattern Usage in Grid Computing ................................................................. 540
  Markus Aleksy, Makoto Takizawa, and Leonard Barolli

Platforms for Human-Human Interaction in Large Social Events ................................................................. 545
  Dario Pirrone, Salvatore Andolina, Antonella Santangelo, Antonio Gentile, and Makoto Takizawa

Concept of the Support System for Operation and Management of DACS System ................................................................. 552
  Kazuya Odagiri, Shogo Shimizu, Makoto Takizawa, and Naohiro Ishii
Session 3: Network Applications

A Redundant Power Consumption Laxity-Based (RPCLB) Algorithm for Computation Type Applications ................................................................. 562
Tomoya Enokido, Allixier Aikebaier, and Makoto Takizawa

Communication Protocols in Layered Groups with Heterogeneous Clocks ................................................................. 568
Dilawaer Duolikun and Makoto Takizawa

Demonstration of a Novel OCDMA Based PON System for Next-Generation Fiber Optic Communication ................................................................. 573
Nadia Nowshin, A.K.M. Arifuzzman, Mohammed Tarique, and A.B.M. Siddique Hossain

A Density Mapping Algorithm for Supporting Cyber Foraging Service Networks ................................................................. 578
Manjinder Nir and Ashraf Matrawy

The Evaluations of 2P-3D Orthogonal RAIDs in Virtual Large-Scale Disks ................................................................. 584
Minoru Uehara

NGWMN 2012

Session 1: Algorithms and Systems

A Grey Prediction Based Hard Handover Hysteresis Algorithm for 3GPP LTE System ................................................................. 590
Hsing-Chung Chen and Yagus Cahyadi

A Secure E-Voting System Based on RSA Time-Lock Puzzle Mechanism ................................................................. 596
Hsing-Chung Chen and Rini Deviani

Simulation Analysis of Medium Access Techniques ................................................................. 602
I. Israr, M.M. Yaqoob, N. Javaid, U. Qasim, and Z.A. Khan

Monitoring and Controlling Power Using Zigbee Communications ................................................................. 608
N. Javaid, A. Sharif, A. Mahmood, S. Ahmed, U. Qasim, and Z.A. Khan

Session 2: Wireless Networks

Routing Management Algorithm Based on Spectrum Trading and Spectrum Competition in Cognitive Radio Networks ................................................................. 614
Saed Alrabee, Anjali Agarwal, Nishith Goel, Marzia Zaman, and Mahmoud Khasawneh

Analyzing Energy-Efficiency and Route-Selection of Multi-level Hierarchal Routing Protocols in WSNs ................................................................. 626
M.S. Fareed, N. Javaid, S. Ahmed, S. Rehman, U. Qasim, and Z.A. Khan

Optimal Number of Cluster Head Selection for Efficient Distribution of Sources in WSNs ................................................................. 632
M.S. Fareed, N. Javaid, M. Akbar, S. Rehman, U. Qasim, and Z.A. Khan

NTCAA 2012

Session 1: Network Application and Security

A Practical Method for Forecasting the Future Calendar Events of Ambiguous Recurrence ................................................................. 638
Hideto Yoshii, Yoshinari Nomura, and Hideo Taniguchi

Computational Complexity of Anomaly Detection Methods ................................................................. 644
Shunsuke Oshima and Takuo Nakashima

Token-based Code Clone Detection Technique in a Student’s Programming Exercise ................................................................. 650
Mai Iwamoto, Shunsuke Oshima, and Takuo Nakashima

Multiple Active Queue Management within Input/Output Buffers ................................................................. 656
Fumihiko Nakamura and Takuo Nakashima

Hierarchical Annotation Management Method for Activity Information Collecting System ................................................................. 662
Yuichi Hattori, Shota Tanaka, and Sozo Inoue

SCMAS 2012

Session 1: Agent Technology and Symbiotic Computing

Circulation Mechanism of Multiagent System Based on Agent Repository ................................................................. 668
Takahiro Uchiya, Ichi Takumi, and Tetsuo Kinoshita

Enhancement of Repository Based Agent Framework for Ubiquitous Environment ................................................................. 673
Naoya Tatematsu, Takahiro Uchiya, Ichi Takumi, and Tetsuo Kinoshita

Design Environment of Reinforcement Learning Agents for Intelligent Multiagent System ................................................................. 679
Sho Itazuuro, Takahiro Uchiya, Ichi Takumi, and Tetsuo Kinoshita

A Structured Overlay Network for Aggregating Sensor Data ................................................................. 684
Atsushi Takeda, Takuma Oide, and Akiko Takahashi
