CHAPTER 1  INTRODUCTION TO MANUFACTURING FACILITIES DESIGN AND MATERIAL HANDLING  1

Objectives  1
The Importance of Manufacturing Facilities Design and Material Handling  1
Lean Thinking and Lean Manufacturing  4
The Goals of Manufacturing Facilities Design and Material Handling  6
The Manufacturing Facilities Design Procedure  12
Types and Sources of Manufacturing Facilities Design Projects  14
Computers and Simulation in Manufacturing Facilities Design  15
ISO 9000 and Facilities Planning  16
Glossary of Some Major Terms and Concepts in Facilities Planning  18
Questions  21

CHAPTER 2  SOURCES OF INFORMATION FOR MANUFACTURING FACILITIES DESIGN  22

Objectives  22
The Marketing Department  23
  Determining Takt Time or Plant Rate  24
  Calculating Scrap and Rework Rates  25
The Product Design Department  27
  The Indented Bill of Material  32
Management Policy Information  36
  Inventory Policy  36
  Lean Thinking and Muda as Part of Management Policy  36
  Investment Policy  37
  Startup Schedule  37
  Make or Buy Decisions  38
  Organizational Relationships  39
  Feasibility Studies  39
Conclusion  40
Questions  41
CHAPTER 3  TIME STUDY  42

Objectives  42

What is a Time Standard?  43

The Importance and Uses of Time Study  44

1. How Many Machines Do We Need?  46
2. How Many People Should We Hire?  47
3. How Much Will Our Product Cost?  50
4. When Should We Start a Job, and How Much Can We Handle with the Equipment and People We Have? Or, How Do We Schedule and Load Machines, Work Centers, Departments, and Plants?  51
5. How Do We Determine the Assembly Line Balance and the Conveyor Belt Speed, Load the Work Cells with the Correct Amount of Work, and Balance the Work Cells?  52
6. How Do We Measure Productivity?  53
7. How Can We Pay Our People for Outstanding Performance?  54
8. How Can We Select the Best Method or Evaluate Cost Reduction Ideas?  55
9. How Do We Evaluate New Equipment Purchases to Justify Their Expense?  57
10. How Do We Develop a Personnel Budget?  57

Techniques of Time Study  57

Predetermined Time Standards Systems  58
Stopwatch Time Study  58

Time Study Procedure and the Step-by-Step Form  62

Rating, Leveling, and Normalizing  71

Allowances  73

Types of Allowances  73
Methods of Applying Allowances  77
Work Sampling  80
Standard Data  81

Expert Opinion Time Standards and Historical Data  82

Time Standards for Manufacturing Facilities Design  83

Questions  84

CHAPTER 4  PROCESS DESIGN  86

Objectives  86

Fabrication: Making the Individual Parts  87

Route Sheets  87

The Number of Machines Needed  91

Work Cell Load Chart  92

Step-by-Step Procedure for Preparing a Work Cell Load Chart  94
Assembly and Packout Process Analysis 97
   The Assembly Chart 97
   Time Standards for Every Task 97
   Plant Rate and Conveyor Speed 97
   Paint Conveyor Speed 99
   Assembly Line Balancing 101

Step-by-Step Procedure for Completing the Assembly Line Balancing Form 105

Calculating the Efficiency of the Assembly Line 108
   Use of Computer Simulation 109

Layout Orientation 112

Questions 113

CHAPTER 5 FLOW ANALYSIS TECHNIQUES 115

Objectives 115

Fabrication of Individual Parts 119
   String Diagram 119
   Multicolumn Process Chart 121
   From-To Chart 123
   Process Chart 125
   Step-by-Step Description for the Process Chart 127

Total Plant Flow 131
   Flow Diagrams 131
   Step-by-Step Procedure for Developing a Flow Diagram 134
   The Operations Chart 135
   Step-by-Step Procedure for Preparing an Operations Chart 135
   Flow Process Chart 137
   Step-by-Step Procedure for Preparing a Flow Process Chart 139

Computer-Aided Flow Design and Analysis 139

Conclusion 144

Questions 144

CHAPTER 6 ACTIVITY RELATIONSHIP ANALYSIS 145

Objectives 145

Activity Relationship Diagram 146
   Determining the Relationship Code 148

Worksheet 150

Dimensionless Block Diagram 150
CHAPTER 7 ERGONOMICS AND WORKSTATION DESIGN SPACE REQUIREMENTS 158

Objectives 158

Workstation Design 158

Ergonomics and the Principles of Motion Economy 160

Principle 1: Hand Motions 161
Principle 2: Basic Motion Types 165
Principle 3: Location of Parts and Tools 166
Principle 4: Freeing the Hands from as Much Work as Possible 168
Principle 5: Gravity 169
Principle 6: Operator Safety and Health Considerations 169

Space Determination 170

Questions 173

CHAPTER 8 AUXILIARY SERVICES REQUIREMENT SPACE 174

Objectives 174

Receiving and Shipping 174

Advantages and Disadvantages of Centralized Receiving and Shipping 175
The Trucking Industry's Effect on Receiving and Shipping 175
Functions of a Receiving Department 176
Facilities Required for a Receiving Department 178
Space Requirements for a Receiving Department 180
Functions of a Shipping Department 180

Storage 186

Just-in-Time Inventories 188
Maximizing the Use of the Cubic Space 188
Providing Immediate Access to Everything (Selectivity) 190
Providing Safekeeping 199

Warehousing 199

Warehouse Design Criteria 200

Functions of a Warehouse 202

Procedure for Sales Analysis of ABC Inventory 203
ABC Inventory Layout of a Hand Tool Manufacturing Company's Warehouse 204
Warehouse Space Determination 207
Warehouse Equipment 209
Conclusion 209
CHAPTER 9 EMPLOYEE SERVICES—SPACE REQUIREMENTS 214

Objectives 214
Parking Lots 215
Employee Entrance 217
Locker Rooms 219
Restrooms and Toilets 220
Cafeterias or Lunchrooms 220
Recreational Facilities 225
Drinking Fountains 225
Aisles 225
Medical Facilities 226
Break Areas and Lounges 228
Miscellaneous Employee Services 228
Questions 230

CHAPTER 10 MATERIAL HANDLING 231

Objectives 231
Cost Justification 232
   Sample Material Handling Cost Problem 233
Goals of Material Handling 234
Ten Principles of Material Handling 234
   Planning Principle 239
   Systems Principle 241
   Work Principle 242
   Space Utilization Principle 242
   Unit Load Principle 243
   Automation Principle 244
   Standardization Principle 244
The Material Handling Problem-Solving Procedure 245
Questions 250
CHAPTER 11  MATERIAL HANDLING EQUIPMENT  251

Objectives  251

Receiving and Shipping  252
  Receiving and Shipping Docks  252
  Dock Equipment  256
  Moving Equipment  256
  Telescopic Conveyor  261
  Weight Scale  263
  Systems Required on Receiving and Shipping Docks  263

Stores  264
  Storage Units  264
  Stores Mobile Equipment  267
  Systems Required for the Stores Department  269

Fabrication  273
  Shop Containers  273
  Tubs and Baskets  274
  Workstation Material Handling Devices  278
  Manipulators and Lifting Devices  278
  Mobile Fabrication Equipment  285

Assembly and Paint  292
  Belt Conveyors  293
  Powered Roller Conveyors  293
  Car-Type Conveyors  294
  Slat Conveyors  294
  Tow Conveyors  295
  Overhead Trolley Conveyors  296
  Power and Free Conveyors  298

Packout  298
  Box Formers  299
  Automatic Taping, Gluing, and Stapling  299
  Palletizers  301
  Pick and Place Robots  301
  Banding  301
  Stretch Wrap  306

Warehousing  306
  Picking Carts  306
  Gravity Flow Bins  306
  Tractor-Trailer Picking Carts  306
  Clamp Trucks  306
  Rotary Conveyor Bins  310
  Vertical Warehouse and Picking Cars  310
  Packing Station  312
  Shipping Containers  312
CHAPTER 12 OFFICE LAYOUT TECHNIQUES AND SPACE REQUIREMENTS 325

Objectives 325

Goals of Office Layout Design 326

Types of Office Space 327
  Supervisors' Offices 327
  Open Office Space 327
  Conventional Offices 330
  The Modern Office 330

Special Requirements and Considerations 333

Techniques of Office Layout 337
  Organizational Chart 338
  Flowchart 339
  Communications Force Diagram 339
  Activity Relationship Diagram 342
  Activity Worksheet 343
  Dimensionless Block Diagram 344
  Office Space Determination 347
  Detailed Master Layout 347

Questions 349

CHAPTER 13 AREA ALLOCATION 350

Objectives 350

Space Requirements Planning 350
  Under the Floor 352
  Overhead or Clear Space Areas 352
  Truss Level 353
  Roof 353

Building Size Determination 353

Dimensionless Block Diagram 354

Area Allocation Procedure 355

Office Area Allocation 356

Questions 360
The Presentation 406
Adjustments 407
Approval 407
The Rest of the Project 408
  Sourcing 408
  Installation 408
  Engineering Plot 409
  Production Start 409
  Debugging and Follow-Up 409
Conclusion 410

ANSWERS 411

APPENDIX 423

INDEX 496
