Geomechanics and Geotechnics: From Micro to Macro

Editors

Mingjing Jiang & Fang Liu
Department of Geotechnical Engineering, Tongji University, Shanghai, China

Malcolm Bolton
Department of Engineering, University of Cambridge, Cambridge, UK

VOLUME 1
# Table of contents

Preface xv  
International advisory committee xvii  
International academic committee xix  
Local organizing committee xxi  
Panel of reviewers xxiii  

## VOLUME 1

### Part I: Micro and Macro characterization

- Experimental investigation on micro-contact laws of granules bonded with cement  
  M. Jiang, Y. Xiao & Y. Sun  
  3
- A stress-strain modeling approach for soils: From micro to macro  
  C.S. Chang  
  9
- Multiscale modeling and characterization of granular matter: From grain kinematics to continuum mechanics  
  C. Avila & J. Andrade  
  15
- Micro-morphological changes in granular soils  
  F.N. Altuhafi & M.R. Coop  
  19
- A microstructure-based constitutive model for the hydro-mechanical coupling in compacted clay/sand mixtures  
  Y.-J. Cui, A.-M. Tang, C. Loiseau & P. Delage  
  23
- Shear failure development in compacted bentonite specimens  
  T. Kodaka, Y. Teramoto, T. Hirate, Y. Motoyoma, Y. Higo & F. Oka  
  29
- Measurements of local distortion in shear deformed granular material  
  H. Yamamoto & H. Kunizawa  
  35
- Modeling of unsaturated soil considering the effect of saturation directly  
  F. Zhang, X. Bao & T. Kariya  
  41
- Micromechanical modeling for cyclic behavior of sand  
  Z.-Y. Yin, C.S. Chang & P.-Y. Hicher  
  47
- Analytical and numerical solutions to bifurcation in three-dimensional stresses  
  D.A. Sun, L. Chen & W. Zhen  
  53
- The structure characteristics of unsaturated expansive soils  
  L. Miao, Y. Cui & F. Wang  
  59

</table>
Stress-strain behavior of remoulded cement-treated Singapore marine clay

H. Xiao & F.H. Lee

Shear properties of waste tire-bottom ash mixture with various particle sizes of waste tire

Y.T. Kim, H.S. Kang & K.Y. Jo

A constitutive model for unsaturated natural soils

X. Jin, C. Zhao, T. Chen & Y. Liu

Failure criterion of cross-anisotropic soils with the method of macro-micro incorporation

X. Li, M. Huang, J. Qian & L. Kong

Relation between suction changes in compacted soils and evolution of micro-structure during compression

K. Cui, P. Défossez, Y.-J. Cui & G. Richard

Experimental study on evolution of meso-structure of intact Q2 loess during wetting

C. Shen, X. Fang, Z. Chen & Z. Zhou

Elastic waves in salt-cemented granular soils

Characteristics of pumice particle using X-ray CT scanning

N. Kikkawa, R.P. Orense & M.J. Pender

Full-grade concrete strength under long-term sustained loading

D. Zheng, C.R. Zhang & W.W. Li

Design and verification of portable direct shear tester for colluvium

K.-J. Shou & Y.W. Lin

Micro and macro approaches for characterization of porosity depending on the weathering degree

A.S.M. Hasan, Z. Mohamed & K.-I. Song

A new insight of 3-D microfabric analysis of unconsolidated marine sediments: Examples from north atlantic 300-meter long cores

K. Kawamura

Probability of damage to archaeological inclusions in a sandy matrix

A.F.L. Hyde, C.M. Jackson, I. Hassan & L.A. Howie

Change of instantaneous strength of rock in uniaxial compressive creep test

C. She, K. Li & X. Cui

Study on model of coupled behavior of consolidation and creep for soil

B. Tang & J. Lei

Support vector machine model for the relationship between physico-mechanical indexes and microstructure parameters of soft soil

Y. Liu & Z. Li

Study on micromechanism, physical and mechanical indexes of swamp soil

Q. Hu, L. Li, B. Xiao & H. Tang

Influence of obstacle angle on granular flow

Y. Fan, S. Wang, E. Wang & X. Liu

Variational inequality formulation of discontinuous deformation analysis

W. Jiang & H. Zheng
Natural shear strength for municipal solid waste
Z. Zhang, D. Wu & Y. Chen

Study on microstructure characteristics and compaction effects of ISS-reinforced red clay
X. Lu, W. Xiang, Y. Wu & Y. Wu

Study on physical and chemical characteristics of mortar specimens subjected to hydrochloric acid attack
R. Huo, C. Ning, J. Li & Y. Yao

Micro-structure analysis of dynamic replacement with riprapping and removing silt
X. Liu, W. Si & C. Zhu

An ellipse failure model for lightweight aggregate concrete
W. Wang

Test and study the microstructure of polluted soil by acid and alkali in laboratory
C. Zhu, D. Li, H. Liu & G. Yang

Analytical solutions for stresses and displacements of cylindrical cavity expansion based on extended SMP criterion
J. Zou, L. Zhao, J. Peng, L. Peng & X. Yang

Rock matrix-fractured media model for heterogeneous and fractured coal bed
C. Zhang, Q. Zhao & C. Zhang

An elasto-plastic model for aggregates considering particle crushing
H. Sun, Y. Pan, H. Zhou & M. Huang

Localization of concrete fatigue defects in concrete CT images based on fractal theory
X. Zhu, J. Li & L. Wen

Experimental study on wave-induced liquefaction in sandy silt seabed
B. Vu, Y. Zheng & J. Zhong

Analyzing the evolution of grains and contacts in sand under load
E. Andò, S.A. Hall, G. Viggiani, J. Desrues & P. Bésuelle

Research on deep clay high pressure triaxial unloading and structural constitutive model
R. Sun, W. Li & W. Wang

Modified Mohr-Coulomb failure criterion: Taking influence of unloading rate into consideration
W. Chai & W. Li

Testing study of relation between temperature and electrical resistivity of sedimentary rock
F. Zhang & C. Zeng

Arch shapes and principal stress trajectories in planar heap of dry sand
T. Pipatpongsa

Numerical simulation on the effect of filled granule shape on fracture seepage
J. Liu, P. Han & A. Nakayama

Micro mechanics study of granular soil based on the confined compression tests
L. Cao, W. Liu, X. Li, X. Zhao & H. Zhang

Quantifying soil micro-structure using fractals under dynamic replacement with rip rapping and removing silt
W. Chen
Experimental research on Poisson's ratio of sandy soil
Y. Sun, L. Shao & Z. Fan

433

Experimental study on evolution of meso-structure of intact Q2 loess during loading
X. Fang, C. Shen, Z. Chen & Z. Zhou

439

Photoelastic study of force chains
J. Liu, Q. Sun, F. Jin & Z. Bi

445

Microscale parameters variation in biaxial tests
Z. Bi, Q. Sun, J. Liu & F. Jin

449

Effect factor of mechanical properties of cement stabilized grain as road base material
Q. Zhao, W. Zhu, M. Wei, Z. Zhang & H. Zhang

453

A micromechanically-based approach to failure strength for anisotropic geomaterials
J. Qian & M. Huang

461

Numerical simulation of end restraint effects on triaxial strength of soil
L. Su, H. Liao, S. Wang & Z. Hang

467

Analysis on capabilities of stress path of HCA to simulate the principal stress rotation
under dynamic confining pressure
H. Pan & G. Chen

473

Study of scale effect on creep deformation of rockfill
W. Zhou, J. Hua, X. Chang & C. Zhou

481

The role of microstructure in the water-induced mechanics behavior
of Guangzhou red soils
T. Li, B. Liu & L. Tao

487

Part II: Discrete element modeling

Evolution of swelling pressure of cohesive-frictional, rough and elasto-plastic granulates
S. Luding & E. Bauer

495

A micromechanical approach to describe internal erosion effects in soils
L. Scholtes, P.-Y. Hicher & L. Sibille

501

Effect of particle size ratio on shear strength of dense binary mixtures
T. Ueda, T. Matsushima & Y. Yamada

507

Bimodal character of induced anisotropy in granular materials under undrained shear
N. Guo & J. Zhao

513

Aging effects on the stiffness anisotropy in sands
Y. Gao, C. Yeung & Y. Wang

519

DEM simulation of two main influence factors on stress release in tunnel excavation
in noncohesive granular material
L. Zhuang, Y. Nakata & S. Zhou

525

Discrete and continuum modeling of sand flow experiment
S. Moriguchi, R.I. Borja, A. Yashima, K. Sawada & K. Oda

531

Steady state strength behavior of a particulate-solid interphase system
J. Wang

537

DEM analysis of an inclining rigid retaining wall subjected to translation movement mode
T. Zhao & M. Jiang

543
A comparison between DDA and DEM in numerical simulations of earthquake induced landslides
G. Chen, L. Zheng & K. Zen

Mapping deformation during CPT in a virtual calibration chamber
J. Butlanska, C. O’Sullivan, M. Arroyo & A. Gens

PFC3D simulation research on vibrating compaction test of soil and rock aggregate mixture
Y. Meng, X. Jia & H. Chai

Micromechanical investigation on the influence of cyclic loading history on small strain shear modulus of granular soils
X. Xu, D. Ling, B. Huang & Y. Chen

Three-dimensional DEM simulations on pile installation
Y. Lau, G. Ooi & Y. Wang

The role of particle breakage on the shear behaviour of coarse granular materials: A micromechanical investigation
P.K. Thakur, J.S. Vinod & B. Indraratna

Sand dilatancy and internal structure
X. Li & X.-S. Li

Micromechanical characterization and prediction of undrained response from drained triaxial shear tests in granular media under monotonic loading: Simulations using PFC3D
A. Kumari & S. Thallak

Sand meso analysis and numerical simulation
J. Zhou & B. Gao

Mesoscopic study on the mechanics of geosynthetic reinforced slope
J. Zhou, F. Li & X. Kong

Numerical simulation of micro-mechanism of saturated sand liquefaction
Y. Yang, J. Zhou & M. Jia

A discrete numerical approach for modelling face stability in slurry shield tunnelling
X. Hu, K.D. Scott & Z. Zhang

Discrete element method for analysis of supporting force for EPB shield in dry sand
R. Chen, L. Tang, D. Ling & Y. Chen

Numerical investigation of the fracture characteristics of rock under normal wedge indentation tests
Y.-H. Lin, L.-H. Chen & Y.-C. Chen

Effects of lateral opening angle on ore-drawing in pillarless sublevel caving based on PFC2D
T. Yang, P. Wang, Q. Yu & X. Liu

Mesoscopic numerical simulation of acoustic emission experiments in rock failure
H. Su & Q. Ma

Macro-response of rock mechanics behavior affected by its micro-parameters
X. Yin, X. Ge, C. Li & S. Wang

Micro-scale mechanism of liquefaction of saturated granular soils
Y. Zhou, J. Zhou & Y. Liu
Meso-mechanical simulation of fracture grouting under fluid-solid coupling environment
D. Zhang, F. Sun, T. Chen, Y. Hou & P. Li

The influence of geogrid aperture size on the behavior of reinforced granular bases
J. Han & A. Bhandari

Application of 3D-DEM with seepage analysis to numerical simulation of rainfall-induced slope failure
A.C. Capriles, T. Ishikawa & S. Miura

Application of DEM in design of big tunnels in rocks at relatively shallow depth
B. Zhu & E. Ghee

A new fracture and abrasion model of unbound granular materials using the discrete element method
M. Ocampo & B. Caicedo

Microstructure changes of granular materials with different overcompression ratios under biaxial compression
T. Li, S. Liu & M. Liu

DEM simulations of push-up load tests of sand plugs in steel pipe pile
S. Thongmunee, T. Matsumoto & S. Kobayashi

One dimensional compression of gap-graded mixtures in DEM
N.H. Minh & Y.P. Cheng

Study on the relationship between stress and fabric for unsaturated granular soils
W. Zhang & C. Zhao

Capillary force and microscale deformation of polydisperse wet granular materials
J. Qin & H. Zhang

Numerical studies on the effect of grain crushing of idealized granular assemblies
T. Chen, D. Zhang & F. Sun

Microstructural analysis of Shanghai remolded clay during one-dimensional consolidation test
L.R. Kong, H.W. Huang, P.-Y. Hicher & D.M. Zhang
