ASME 6TH INTERNATIONAL CONFERENCE ON ENERGY SUSTAINABILITY

PART A

ADVANCES IN SOLAR BUILDINGS AND CONSERVATION;
CLIMATE CONTROL AND THE ENVIRONMENT;
SOLAR HEATING AND COOLING

COMBINED ENERGY CYCLES, CHP AND CCHP

CONCENTRATING SOLAR POWER

ECONOMIC, ENVIRONMENTAL POLICY, EDUCATION,
MARKETS AND LEGAL ASPECTS OF ALTERNATIVE ENERGY

ENERGY SYSTEMS DESIGN AND THERMOECONOMIC ANALYSIS

presented at
ASME 2012 6TH INTERNATIONAL CONFERENCE ON ENERGY SUSTAINABILITY
JULY 23–26, 2012
SAN DIEGO, CALIFORNIA, USA

sponsored by
ADVANCED ENERGY SYSTEMS DIVISION, ASME
SOLAR ENERGY DIVISION, ASME

ASME
Three Park Avenue * New York, N.Y. 10016
CONTENTS

PART A

6TH INTERNATIONAL CONFERENCE ON ENERGY SUSTAINABILITY

ADVANCES IN SOLAR BUILDINGS AND CONSERVATION;
CLIMATE CONTROL AND THE ENVIRONMENT;
SOLAR HEATING AND COOLING

ES2012-91007 ...................................................................................................................... 1
Development of Controllers for Temperature Control of a Room Deploying the
Displacement Ventilation HVAC System
Zhicheng Li, Ramesh Agarwal, and Huijun Gao

ES2012-91010 ...................................................................................................................... 11
Simulation Study for the Performance of a Large Solar Hot Water System Constructed by
Natural Circulation Solar DHW System Modules
Ru Yang and Kuan-Hsiang Yu

ES2012-91032 ...................................................................................................................... 17
A Screening Methodology for Climatic Evaluation of the Cooling Potential of Night
Ventilation in Buildings
Akhilesh Reddy Endurthy and T. Agami Reddy

ES2012-91192 ...................................................................................................................... 27
Experimental Validation of Solar Chimney Performance Models and Operational
Characteristics for Small Scale Remote Applications
Stephen M. Raney, Jeremy R. Brooks, Jared P. Schaffer, and Jesse J. French

ES2012-91194 ...................................................................................................................... 33
Design, Construction, and Testing of a Small Scale Solar Chimney for Nomadic Herdsmen
Ryan D. Chappell, Michael J. Congdon, and Jesse J. French

ES2012-91200 ...................................................................................................................... 39
3D Experimental and Numerical Analysis of Natural Ventilation of Domed-Roof Buildings
During Economizer Mode
A. Rahmatmand, M. Yaghoubi, and E. Goshtasbi Rad

ES2012-91246 ...................................................................................................................... 49
Heat and Mass Transfer Characteristics of a Zeolite 13X/CaCl₂ Composite Adsorbent in
Adsorption Cooling Systems
K. C. Chan, Christopher Y. H. Chao, and M. Bahrami

ES2012-91289 ...................................................................................................................... 59
Reducing Unwanted Gains During the Cooling Season From a Heat Pipe Augmented
Passive Solar Heating System
Brian S. Robinson and M. Keith Sharp

</table>
ES2012-91050 ................................................................. 247
Performance and Operation of the Southern Nevada Water Authority High Concentration
Photovoltaic Plant for the Last 800 Days
    Omer Ayubi, Aaron Sahm, and Robert Boehm

ES2012-91053 ................................................................. 255
Solar STIG Cycle Annual Analysis
    Maya Livshits and Abraham Kribus

ES2012-91055 ................................................................. 263
Considering Uncertainties in Research by Probabilistic Modeling
    Markus Eck, David Kretschmann, Jan Fabian Feldhoff, and Michael Wittmann

ES2012-91056 ................................................................. 273
Analysis of Operation Test Results of a High Temperature Phase Change Storage for
Parabolic Trough Power Plants With Direct Steam Generation
    Doerte Laing, Markus Eck, Matthias Hempel, Wolf-Dieter Steinmann,
    Mirko Meyer-Grunefeldt, and Martin Eickhoff

ES2012-91064 ................................................................. 281
Numerical Simulation of Natural Convection in Solar Cavity Receivers
    James K. Yuan, Clifford K. Ho, and Joshua M. Christian

ES2012-91067 ................................................................. 291
The Impact of Receiver Position Error on Parabolic Trough Collector Optical Performance
    Guangdong Zhu

ES2012-91069 ................................................................. 299
Computational Analysis of a Pipe Flow Distributor for a Thermocline Based Thermal Energy
Storage System
    Samia Afrin, Eduardo Cordero, Sebastian De La Rosa, Vinod Kumar, Desikan Bharathan,
    Greg C. Glatzmaier, and Zhiwen Ma

ES2012-91077 ................................................................. 307
Optical Analysis of a Novel Linked Heliostat Tracking System for Distributed-Scale
Concentrated Solar Power
    Marc Dunham, Rajan Kasetty, Anoop Mathur, and Wojciech Lipinski

ES2012-91095 ................................................................. 317
Economic Chances and Technical Risks of the Internal Direct Absorption Receiver (IDAR)
    Cs. Singer, R. Buck, R. Pitz-Paal, and H. Müller-Steinhagen

ES2012-91097 ................................................................. 327
The Effect of Solar Tracking Resolution to the Defocus of a Giant Fresnel Lens
for a Solar Stove
    Peter Kane, Matthew Mokler, Peiwen Li, and Ricardo G. Sanfelice

ES2012-91109 ................................................................. 333
Energetic Comparison of Linear Fresnel and Parabolic Trough Collector Systems
    Heiko Schenk, Tobias Hirsch, Jan Fabian Feldhoff, and Michael Wittmann
ES2012-91131 ................................................................. 345
General Performance Metrics and Applications to Evaluate Various Thermal Energy
Storage Technologies
   Zhiwen Ma, Greg C. Glatzmaier, Michael Wagner, and Ty Neises

ES2012-91143 ................................................................. 353
Heliostat Characterization by Optical Techniques and Image Processing
   Manuel I. Peña-Cruz, Camilo A. Arancibia-Bulnes, Cuitlahuac Iriarte-Cornejo,
      Rafael E. Cabanillas, and Claudio A. Estrada

ES2012-91154 ................................................................. 363
Three-Dimensional Optical and Thermal Numerical Model of Solar Tubular Receivers in
Parabolic Trough Concentrators
   Men Wirz, Matthew Roesle, and Aldo Steinfeld

ES2012-91179 ................................................................. 375
Thermodynamic Study of Advanced Supercritical Carbon Dioxide Power Cycles for
High Performance Concentrating Solar Power Systems
   Craig S. Tuchi, Zhiwen Ma, Ty Neises, and Michael Wagner

ES2012-91187 ................................................................. 385
Analysis of Drift Phenomena in Heliostat Images
   Martha Escobar-Toledo, Camilo A. Arancibia-Bulnes, Manuel I. Peña-Cruz,
      David Riveros-Rosas, Rodolfo Peón-Anaya, Cuitlahuac Iriarte-Cornejo,
      Rafael E. Cabanillas, and Claudio A. Estrada

ES2012-91204 ................................................................. 393
Initial Testing of the HiTek Solar Tracking Monitor
   Stephen Kusek, Michael Caraway, Timothy McFarland, Matthew Lynn, Aaron Sahm,
      Robert Boehm, and Omer Ayubi

ES2012-91229 ................................................................. 399
Estimating Atmospheric Attenuation in Central Receiver Systems
   Manajit Sengupta and Michael Wagner

ES2012-91235 ................................................................. 405
Coupled Fluid Flow and Radiation Modeling of a Cylindrical Small Particle Solar Receiver
   Adam Crocker and Fletcher Miller

ES2012-91237 ................................................................. 413
Modeling of a High-Temperature Latent Heat Thermal Storage Module for Brayton
Cycle Applications
   Brian Gehring and Fletcher Miller

ES2012-91256 ................................................................. 423
High-Temperature Solar Selective Absorbers Based on Interface Effects in Refractory
Metals Coated With Transparent Conductive Oxides
   Makoto Shimizu, Fumitada Iguchi, and Hiroo Yugami
