## Reduction and Separation of CO₂

- Enhancement of reducing agent reactivity for mitigating CO₂ emissions from ironmaking process ........................................ | 9 |
  S Ueda, T Kon, S Natsui, R Inoue, T Ariyama

- Production of papermaking grade calcium carbonate from steelmaking slag — product quality and development of a larger scale process ........................................ | 19 |
  H-P Mattila, I Grigaliunaite, R Zevenhoven, A Said, C-J Fogelholm

- Effective sequestration of carbon dioxide by chemical sorption of Li₂O-compounds ........................................ | 29 |
  R Inoue, S Ueda, N Tokuda, K Sasaki, Y Kawazoe, T Ariyama

## Blast Furnace Ironmaking III

- Modeling of liquid flow in the lower part of blast furnace by particle method ........................................ | 41 |
  T Kon, S Natsui, R Soda, S Ueda, R Inoue, T Ariyama

- Numerical analysis of the flow in the blast furnace with population balance model (PBM) ........................................ | 51 |
  D Hwang, J Baek, E Choi, S Lee

- Advanced gas-solid flow simulation in blast furnace by Eulerian-Lagrangian approach ........................................ | 59 |
  S Natsui, T Kon, S Ueda, J Kano, R Inoue, T Ariyama, H Nogami

- Simulation of burden and gas flow characteristics using a mathematical model of the upper shaft of the blast furnace ........................................ | 69 |
  T Mitra, L Shao, H Saxén

## Secondary Metallurgy II

- A novel approach for numerical modeling of the CAS-OB process ........................................ | 79 |
  M Jarvinen, S Olilia, A Kärä, T Fabritius

- Reoxidation of molten steel by arc in ladle furnace ........................................ | 89 |
  H-G Kim, J-J Lee, K-Y Lee

- Secondary metallurgy research at Uddeholms AB ........................................ | 95 |
  M Nzotta

- Control on production process and cleanliness of bearing steel GCr15 ........................................ | 97 |
  Y Guo-An, X Jun-Liang

## Oxygen Steelmaking II

- Modeling of BOF converter — CONSIM simulator and its further development ........................................ | 107 |
  A Kruskopf, P Väyrynen, A Vittaler, H Jalkanen, S Louhenkilpi

- A Numerical Investigation on VOD nozzle jets ........................................ | 117 |
  Z Song, M Ersson, P G Jönsson

- Investigation of bath oscillation in Q-BOP with water model experiment ........................................ | 119 |
  F Ogasawara, K Nakalani, G Okuyama, Y Uchida, T Yamauchi, Y Miki

- Droplet generation in steelmaking ........................................ | 125 |
  S Sabah, M Alem, G Brooks, J Nazer

## Carbon Capture and Storage

- Carbon capture and storage (CCS) — status in Norway ........................................ | 135 |
  K Schöffel

- Handling of CO₂ in the Skagerrak/Kattegat region ........................................ | 141 |
  A Mathisen, D Bjerrisøn, N Eidrup, R Skageset, H A Haugen, P Aagaard, J Kjåstad

- Feasibility of CCS at an integrated steel mill — a case study ........................................ | 151 |
  A Arasto, E Tsupari, J Kårk, E Pissl, J Lilja

---

Scanmet IV — 4th International Conference on Process Development in Iron and Steelmaking, 10-13 June 2012, Luleå, Sweden
BLAST FURNACE IRONMAKING IV

High temperature coke characteristics in the blast furnace - evaluation of coke properties in the raceway area ................................................................. 157
M Lundgren, L Sundqvist Ökvist, G Hyllander, B Jansson, B Björkman

Evaluation of softening, shrinking and melting reduction behavior of raw materials for blast furnace ................................................................. 169
T Nishimura, K Higuchi, M Naito, K Kunitomo

Injection of DR/LRI into the blast furnace ................................................................. 179
S Born, A Babich, D Senk, H W Gudena, A Spatzker, T Stefan

HOT METAL PRETREATMENT

Improved slag skimming performance at hot metal desulphurisation station by using recycled materials as slag modifying agent ................................................................. 189
J van Boggelen, Z Li, H Thomson, G Parker, A Ferguson

Iron losses during desulphurisation in transfer ladle and torpedo car – an industrial investigation ................................................................. 197
M Magnelöv, J Björkval, J Eriksson, J Drugge, M Thorén, B Björkman

Process simulation of hot metal desulphurization by magnesium injection ................................................................. 207
M-J Lu, H Sun, Y-C Liu

AGGLOMERATION

X-ray microtomography for sequential imaging and analysis of iron ore pellets under reduction ................................................................. 217
F Forsberg, E Hjortsberg

Effect of coal ash characteristics on ash deposition in rotary kilns ................................................................. 227
R Bandyopadhyay, S Gupta, B Lindblom, S Jonsson

Influence of iron ore green ball temperature on the straight grate induration process ................................................................. 239
U Sjöström, J Riesbeck, D Marjavaara, B Lindblom

PROCESS INTEGRATION I

Improving energy efficiency in steel industry by process integration ................................................................. 249
P Ahtila, M Tuomaala, L Holappa

A system analysis of alternative energy carriers and its potential for greenhouse gas emission mitigation ................................................................. 259
J Riesbeck, M Larsson

A model for simulation of an integrated steelmaking plant focused on energy consumptions and CO₂ emissions ................................................................. 269
G F Porzio, V Colla, B Fornai, A Amato, S Cateni, M Vannucci

Optimum process conditions for the production of pig iron by COREX process ................................................................. 279
A Wafiq, A Studmen, T M Moustafa, A F Nassar

NEW OR ALTERNATIVE IRONMAKING

Comparison of commercially available direct reduction processes ................................................................. 289
K Huitu, M Kekkonen

CO₂ abatement, energy savings and use of alternative reducing gases with energiron DR technology ................................................................. 299
P Duarte, J Martinez, T Scarnati

ITmk3 process development ................................................................. 311
O Tsuge

Clustering mechanism and influencing factors in reduction shaft for COREX process ................................................................. 321
X Hafsa, Z Jinming, M Luowen

ELECTRIC ARC FURNACE II

The influence of iron oxide on the chromium leachability of EAF slag – a full-scale study at Ovako Hofors AB ................................................................. 329
I Strandkvisti, F Engström, B Björkman, K Påhlson
Research and commercial development of liquid-fuel based CoJet® Coherent Jet Technology for EAF ................................................................. 339
W Mahoney, L Cates, S Warty, J Cates, S Manley

Improvement of Cr yield in the EAF by use of briquetted Al containing filings ........................................... 349
G Stubbe, G Harp, K Vannvakas

Process condition monitoring of EAFs by MVDA-Batch modeling ............................................................... 357
E Sandberg

CASTING AND SOLIDIFICATION III

Mold thermo-mechanical rigidity "MTMR" new technique for zero defects strategy of continuous casting of steel ................................................................. 359
M O El-Bealy

Mechanism of central black points in bearing steel and the countermeasures ........................................... 369
X Liu, L Guo, H Zhang

Improvement of surface quality of hypo-peritectic carbon steel slab in continuous casting process ....... 377
H-Y Seo, J-T Choi, K-Y Lee, S-G Kim

Trial application of pulse current for improvement of quality of high carbon chromium bearing steel ................................................................. 385
Z Li, Y Jiang, R Li, Z Yin, Q Zhao

PROCESS INTEGRATION II

Application of integrated models to predict and optimise CO₂ emissions and energy consumption following major reconfiguration ........................................... 393
H Zughbi, P Zulli

Evaluation of oxyfuel application for the integrated steel plant – for the case of Ruukki Metals, Raade Steelworks ........................................................................ 395
K Kinnunen, C Wang, J Ore, R Echtler, T Niemi

Selection and optimization of GHG reduction strategies based on a material flow network model of an integrated steel mill ........................................... 405
H Kim, S Kwon, J-B Lee, K Han

Analysis of metallurgical processes and slag utilisation in an integrated steel plant producing advanced high strength steels ........................................................................ 415
M Brämming, K Lundkvist, M Larsson, C Samuelsson

BLAST FURNACE IRONMAKING V

The role of particle shape on coke size segregation in charging and discharging of a Paul Wurth hopper ................................................................. 425
Y Yu, H Saxén

DEM simulation of particle size segregation behaviors during filling and emptying parallel hoppers at bell-less top blast furnace ........................................... 441
M Kou, S Wu, J Xu, X Guo, C Fu, K Du

Development of FCG dynamic control technique for high ratio coke mixed charging into ore layer ........................................... 451
A Murao, Y Kashihara, S Watakabe, M Sato

Development and application of blast furnace burden profile measurement system at CSC ........................................... 461
S-W Du, C-Y Lu, C-S Chou

STAINLESS STEELMAKING

Study on Al-Ti complex deoxidation and Ca treatment of ultra clean ferritic stainless steel ................................................................. 471
Z Chen, Y Xu, L Gu

Studies of AOD production decarburisation slags ........................................................................ 481
G Lindstrand, A Tilliander, P Jönsson

Dust pollution prevention of AOD slag with szalibelyite stabilizer ................................................................. 491
C Zhen, Y Qi, X Na, Y Lu, S Wang

Study on the corrosion mechanism between MgO-CaO refractories and refining slag ................................................................. 499
Y Yu, Y Zheng
