2012 Fourth International Conference on Multimedia Information Networking and Security

(MINES 2012)

Nanjing, China
2 – 4 November 2012

Pages 500-998
FDS Simulation of the Pool Fire in the Dichloropropane Tank .............................500
   Fei Xie, Wenhua Song, Lingyue Lv, and Zhen Chen

Analysis for Combustion Characteristics of Large-Scale Pool Fire with Wind .......................505
   Zhen Chen, Wen-hua Song, and Ling-yue Lv

Study of Prognostic Method for Distributive Patterns of Summer Rainfall Based on Fuzzy Support Vector Machine .................................................................509
   Desheng Fu and Liangliang Xu

Research on a New Kind of Speech Parameter Based on MFCC ..................................................513
   Xiaoyan Wang

Observability Role in Acceptance of Message Application with LBS ........................................517
   Hui Cai and Xi Chen

Scheduling Optimization of Multi to Multi Emergency Supplies Model ...................................521
   Ming Zhao and Xiao-Yu Song

Research on the Construction of the Marine Railway for Transportation of Bulk Commodities ..........................................................525
   Sun Jian Hong and Lan Geng Ze

Evolution and Tendency to "Double-Qualified" Teacher Competency: A Literature Review on Chinese Higher Vocational Education .......................................................529
   Zhang Nan and Zhang Yuan
The Research and Implementation of Technology of Generating Test Paper
Based on Genetic Algorithm ..........................................................533
    Shao Ming-Zhu, Li Wei-Feng, and Du Jing-Yi
The Design and Implement of High Efficient Incremental Microblogging
Crawler .........................................................................................537
    Dayong Shen, Hui Wang, Jianping Cao, Pei Li, and Zhihong Jiang

**Multimedia Information Security**
A Low Complexity while Robust Watermarking Scheme Using Balanced
Multiwavelet ..................................................................................541
    Xiaonian Tang, Dan Wang, Xiaoyan Tang, Huiming Zhu, Jianchun Wang,
    and Yingbiao Gao
Real-Time Identification Research of Unstructured P2P Multicast Video
Streaming ......................................................................................545
    Chaobin Liu, Jie He, and Qiang Guo
A 3D Model Watermarking Algorithm Resistant to Affine Transformation .........................................................549
    Hua Deng, Lei Chen, Jifu Zhang, and Rui Wang
Analysis on Effect Range of Context in Chinese Word Segmentation Based
Word-Position Tagging ......................................................................552
    Xijie Wang and An Guo
The Research of Android Broadcast Intercept Technology Based on Priority ...........................................................556
    Quan Gan and Hao Wu
ZRTP-based Trusted Transmission of VoIP Traffic and Formal Verification ..............................................................560
    Xiaolin Chang, Ying Qin, Zhi Chen, and Bin Xing
Super Resolution Based on Inter-frame Translation Model .................................................564
    Suqin Xu, Yubing Han, and Kelan Wang
An Improved Dynamic Graph Watermark Algorithm ...........................................................................................568
    Haichao Zhang and Dan Chen
A Multi-granularity Reputation Management Model Suitable for P2P MMOG .................................................................572
    Liu Fang, Shi Xiang-Bin, Dai Qin, and Yang Hong-Ping
An ID-based Designated-Verifier Proxy Multi-signature Scheme ................................................................................576
    Weiping Zuo, Yunfang Liu, and Sanfu Wang
Construction of Urban Ecological Water Systems under Perspective
of Information Security .....................................................................580
    Huang Hehong
TransSec: Security Image Transportation in Visual Sensor Networks ..............................................................584
    Songtao Ye, Junfei Liu, and Jin Zhang
Features Optimization Techniques for Traffic Classifiers ..................................................................................588
    Jie He, Yuexiang Yang, Yong Qiao, Kun Jiang, and Chaobin Liu
The Design Problems of One Kind of Chaotic One-Way Hash Function .............................................. 592
   Peiyue Li, Mingchao Zhang, and Junxia Shi

Image Recognition Based on Nonlinear Dimensionality Reduction .................................................... 595
   Sun Zhanwen

Research and Optimization of UMHexagons Algorithm Based on H.264 ............................................... 600
   Wenqi Zhao and Su Xu

**Network Technologies**

Research of Buddle Protocol of Deep Space Sensor Network Based on DTN ........................................ 604
   Feixiang He, Lin Yao, and Qian Liu

An Energy-Saving Routing Protocol Based on LEACH ............................................................... 608
   Chen Yueyun, Zhu Yue-Long, An Jianwei, and Liu Qian

A Multi-path Routing Algorithm Based on Maximum Transmission Reliability in Wisdom Network .......................................................... 612
   Yueyun Chen, Xiaoqun Wang, Qian Liu, and Fuhong Lin

Research on Unicast Routing for Deep Space Sensor Networks Based on DTN .................................. 616
   Wenjie Li, Lin Yao, and Lifang Feng

A Mixed Message Distribution Inter-domain Signaling Protocol .................................................... 620
   Jianping Wang, Zhen He, Liangjie Tang, and Xianyu Du

Research on Billing Strategy of Cloud Storage .............................................................................. 624
   Haitao Li, Yuliang Yang, and Bin Zheng

An Evaluation Method for Network Reliability in Ad-Hoc Networks ............................................. 628
   Fuhong Lin, Yueyun Chen, Jianwei An, and Xianwei Zhou

A Hierarchical Name System Based on Hybrid P2P for Data-Centric Networks .................................. 632
   Fuhong Lin, Yueyun Chen, Jianwei An, and Xianwei Zhou

A Shannon's Theory of Wisdom Internet ......................................................................................... 636
   Fuhong Lin, Yueyun Chen, Jianwei An, and Xianwei Zhou

New Trend of Network: Wisdom ................................................................................................. 640
   Xianwei Zhou, Zhimi Cheng, Fuhong Lin, Yan Ding, and Yueyun Chen

Time-Angle Spectrum Sensing Based on Sliding Window MUSIC Algorithm .................................. 644
   Du Liping, Liu Feifei, and Chen Yueyun

Research on Multicast Routing in Deep Space Sensor Network ..................................................... 648
   Xiaoyan Li, Fuhong Lin, and Yujie Meng

Research on the Application of Feature Model of Online Shopping System ................................... 652
   Xiaoqiang Tang, Hongxu Wang, and Jingfa Yao

Multi-agent Semantic Mining System Based on Ontology ............................................................. 655
   Hongxu Wang, Xiaoqiang Tang, and Liguo Wang
Secure Multimedia Communication and Services

Adaptive Video Error Concealment Using Reversible Data Hiding .......................................................... 658
Yuanzhi Yao, Weiming Zhang, and Nenghai Yu

Towards a Novel Approach for Hidden Process Detection Based on Physical
Memory Scanning ........................................................................................................................................... 662
Junhu Zhu, Tianyang Zhou, and Qingxian Wang

Hybrid Additive Multi-watermarking Decoder .......................................................................................... 666
Jinwei Wang, Xingming Sun, Yuhui Zheng, Jin Han, and Zhihua Xia

Text Encryption Algorithm Based on Natural Language Processing ..................................................... 670
Xianghe Jing, Yu Hao, Huaping Fei, and Zhijun Li

A Method of Part of Speech Based on the Algorithm of C4.5 for Polyphone ........................................... 673
Peng Fuming, He Xin, and Shi Yingchun

An Improved fastICA Based on the Negative Entropy for Voiceprint
Identification .................................................................................................................................................. 677
He Xin and Shi Yingchun

A Motif-Based Framework for Characterizing the Evolution of Social Networks ..................................... 681
Leiming Yan and Jinwei Wang

Symposium on Intelligence Service, Management and Engineering

Technological Progress, Technical Efficiency & Productivity Growth of Modern
Service Industry: An Comparative Study on Yangtze River Delta and Pearl
River Delta ..................................................................................................................................................... 685
Jianyun Cao

The Study on Constructing Institutional Repository of University ........................................................... 689
Li Naiwen and Zhao Xin

Study On Manufacturing Process Innovation Diffusion Game .................................................................. 693
Yao Qian

The Influence of Tech SMEs Policy on Enterprise Growth ......................................................................... 697
Wang Yue

Research on the Modern Transportation System Development Based
on Fuzzy Comprehensive Evaluation ....................................................................................................... 701
Zhan Yue and Zhang Peilin

Morphological Study of the Water Source Area Ecological and Economic
Sustainable Perspective ................................................................................................................................. 705
Huang Hehong
Research on Correlation between Audit Quality and Efficiency of Anti-poverty Fund: Evidence from the National Poverty Counties ................................................................. 709
   Wang Shanping and Xie Miao

A Survey on Video Caption Extraction Technology .......................................................... 713
   Zhujun Wang, Lei Yang, Xiaoyu Wu, and Ying Zhang

Enterprise Marketing Strategies Transformation Enabled by Information Technology ................................................................. 717
   Sifan Huang, Jiawei Li, and Li Li

Research of School-Enterprise Research Evaluation Information Mining Technology Based on Analytical Hierarchy Process (AHP) and Genetic Algorithm (GA) ......................................................... 721
   Ben Song and Junle Yu

Forecast Model of V-SVR Based on an Improved GA-PSO Hybrid Algorithm ................................................................. 725
   Li-Chun Tang, Xiu-juan Xu, and Liang Lu

An Empirical Study on Electronic Business of Farmer Professional Cooperatives in Anhui ................................................................. 729
   Cheng Guanghua and Wang Yongjing

Emergency Dynamic Alliance Sub-tasks Evaluation Based on UEOWA ................................................................. 732
   Min Hu and Ge Zhu

   Ying Guo

Analysis of Matrix Embedding with Error Correction Capabilities ................................................................. 740
   Zhenxing Qian and Xinpeng Zhang

The Design of MultiParty Call Software in Rescue Communication ................................................................. 744
   Minli He, Yu Jiang, and Wenfeng Li

Security for Networks Virtual Access of Cloud Computing ................................................................. 749
   Qunying Sun and Zhiyuan Hu

A Research for Scheduling Model of Vehicles in Warehouses Based on Genetic Algorithm ................................................................. 753
   Wang You-Zhao, Peng Yu-Xiang, and Guo Xiao-Xi

Alternative Priority Ranking of Automobile Business Integrated Management Based on Group Relative Position Estimation ................................................................. 757
   Lu Guangyan, Li Peishun, Zhao Wengi, and Liu Xiaofeng

Analysis on the Way of Scale Economy of Halal Food and Moslem Supplies Industry of Ningxia ................................................................. 761
   Zhao Yi

CO2 Emissions Inventory from Major Industrial Sectors In China ................................................................. 765
   Liu Li
Demand Analysis of Beijing-Hong Kong-Macao Expressway Service Zone Extension in Guangdong Section  ................................................................. 769
  Gongliang Zhang and Chengke Zhang

Empirical Analysis of Industrial Gradient Transfer ............................................. 773
  Meng Yang, Lu Xu, and Hao Jin

Use Habit, Continue Use and WOM for SST: Based on E-banking .......................... 778
  Wang Xinhao and Dong Dahai

HSE Management Illocutionary Force and Linguistic Context ............................. 782
  Bao-jun Lu, Dejun Liu, Yong-chun Miao, and Ze-hong Yin

Research on the Evaluation Method of Operational Performance
of Emergency Response Plan .............................................................................. 786
  Qinglan Han, Zaishang Huang, and Xiangwu Fan

The Internet of Things Promoting Higher Education Revolution ......................... 790
  Zhang Tianbo

Study on Countermeasures to Dairy Supply Chain Quality Security Control ........... 794
  Congna Quan and Huifeng Zhao

Study on Personnel Restructuring of Government Stock Bidding Agency
Based on the Integer Linear Programming ......................................................... 798
  Hu Ping and Gu Dongxiao

The Evaluation of Bilingual Education in Colleges and Universities from a New
Perspective .......................................................................................................... 802
  Chen Lv, Hong-yu Liu, Yi-yan Li, Nan Li, and Ya-su Lv

Analysis of Ecological Tourism Resources Digitization Mode of Gansu Province .......... 806
  Chun-Li Wang

The Impact of Users' Participation on EWoM on Social Commerce Sites: An
Empirical Analysis Based on Meilishuo.com ...................................................... 810
  Xi Chen and Jingjing Tao

Customer Value Creation Capacity System and Its Enhance Mechanism ................ 816
  Chunhua Xin, Yutong Zhu, and Fangzhe Xin

Effect of Land Use Change to Water Quality of Poyang Lake Region ..................... 820
  Yan Xifeng, Qiu Zumin, Yan Xifeng, Wang Jinglan, Liu Feng, and Liu Daonan

Mapping Intelligence Research Domain in China ............................................... 824
  Wei Li, Zhihong Jiang, Hui Wang, Pei Li, Chengcai Zhao, and Yubao Zhang

New Strategic Management Business Models for New Technology-Based
Firms ..................................................................................................................... 828
  Zheng Peng
The Exploration of Integrated Exquisite Courses' Producing of Higher Education ................................................................. 832

Zhang Yanjun

Research of Avoid the Selfish Behavior in Mobile Ad Hoc Networks Based on Repeated Game ................................................................. 835

Tao Lei and Ming-Sen Xiang

Identifying Important Users in Sina Microblog ................................................................. 839

Jiaqi Liu, Zhidong Cao, Kainan Cui, and Feng Xie

The Analysis on Economic Development and Urban-Rural Income Gap of China ................................................................. 843

Ying Zhang

Wireless Network Services

Simulation-Based Analysis of Worm Propagation in Wireless Sensor Networks ................................................................. 847

Zhuang Kechen, Zhang Hong, and Zhang Kun

A New Intrusion Detection Feature Extraction Method Based on Complex Network Theory ................................................................. 852

Wu Heyi, Hu Aiqun, Song Yubo, Bu Ning, and Jia Xuefei

Malware Detection in Smartphone Using Hidden Markov Model ................................................................. 857

Kejun Xin, Gang Li, Zhongyuan Qin, and Qunfeng Zhang

A Mobile Communication Honeypot Observing System ................................................................. 861

Yubo Song, Xiaoyun Zhu, Yelin Hong, Haoyue Zhang, and Hangbo Tan

Design of Whitening Information Hiding and Protection Equipment ................................................................. 866

Kejun Xin, Gang Li, and Yu Jiang

Forensics of Computer and Networking

Research on Parallel Computing Model for Cubic-R Architecture ................................................................. 870

Nan Yu and Shan Zheng

Forensics Aided Steganalysis of Heterogeneous Bitmap Images with Different Compression History ................................................................. 874

Xiaodan Hou, Tao Zhang, Gang Xiong, and Baoji Wan

Steganalysis on JPEG Decompressed Bitmaps Revisited ................................................................. 878

Weiquan Cao and Jiesi Han

A Framework for Automatic Security Proof of Public-Key Cryptography in Computational Model ................................................................. 882

Yan Guang, Jin-Long Fei, Chun-Xiang Gu, and Yue-Fei Zhu

SEA: Analyzing Memory Access of Executables ................................................................. 887

Wang Guo-Hao, Jiang Lie-Hui, Jing Jing, and Li Dan
CHI Based Instruction-Words Based Software Birthmark Selection ...............................................................892
   Yong Wang, Fenlin Liu, Daofu Gong, Bin Lu, and Shixin Ma

Information Security of EHRs ........................................................................................................896
   Ying Han, Junwei Wang, Yan Li, and Yongxia Chen

Information Hiding Based on CAVLC in H.264/AVC Standard .................................................................900
   Xijie Lin, Qingbao Li, Wei Wang, and Guangyu Zeng

High-Coverage Security Testing for Windows Kernel Drivers ..................................................................905
   Tao Ni, Zhongxu Yin, Qiang Wei, and Qingxian Wang

Instruction-Words Based Software Birthmark ..................................................................................909
   Lianhong Ma, Yong Wang, Fenlin Liu, and Lin Chen

Research on Reconfigurable Intrusion Detection System ......................................................................913
   Zhao Liang and Zhang Xiao-Hui

A Research on Detection Algorithm of Failure-Type Hardware Trojan ......................................................918
   Da Xia and Yue-Fei Zhu

Hotspots Detection on Microblog ........................................................................................................922
   Silong Zhang, Junyong Luo, Yan Liu, Dong Yao, and Yu Tian

Network Anomaly Detection Using Random Forests and Entropy of Traffic Features ............................926
   Dong Yao, Meijuan Yin, Junyong Luo, and Silong Zhang

Hybrid Method to Analyze Cryptography in Software ........................................................................930
   Li Ji-Zhong, Jiang Lie-Hui, Yin Qing, and Xie Yao-Bin

A Trust Evaluation Mechanism Based on Certified Trust and Fuzzy-Derived Reputation ......................934

RankFuzz: Fuzz Testing Based on Comprehensive Evaluation ..................................................................939
   Cheng Li, Qiang Wei, and Qingxian Wang

An Agent Formal Model for Autonomous Decision-Making ..................................................................943
   Linjin Wu, Dongying Wu, Jiayong Chen, and Wenxiong Li

Trojan Detection Based on Network Flow Clustering ........................................................................947
   Xiaochen Zhang, Shengli Liu, Lei Meng, and Yunfang Shi

Rate-Unknown Image Steganalysis Based on Dempster-Shafer Evidence Theory .................................951
   Baoji Wan, Tao Zhang, Zhenhao Zhu, and Xiaodan Hou

Steganalysis of PQ Based on the Histogram Difference between Coefficient Adjacent Positions ............955
   Yi Zhang, Fenlin Liu, Xiangyang Luo, and Jicang Lu

Routing Attack in the ND and SEND Mixed Environment ...................................................................959
   Hou Yi, Wang Zhen-Xing, Wang Yu, and Zhang Lian-Cheng

xx
Improvement of Semantic Similarity Computation in Battlefield Information
Services Matching ................................................................. 963
   Jue Wang, Wendong Zhao, and Chang Tian
Research of HTTP Hyperlinks Reconstruction and Hot Topic Auto-Discovery ...................... 968
   Qing Shan Liu, Dan Wang, Rongjie Qin, and Haijun Wang
Research on the Communication Monitoring Technology for Host Based
on Virtual Machine Monitor ........................................................................... 972
   Weiwu Yang, Junhu Zhu, Tianyang Zhou, and Qingxian Wang
Project Design of Tourism E-commerce System for Sanqing Mountain Based
on Customer Relationship Management ............................................................. 975
   Dapeng Zhang
Image Fragment Carving Algorithms Based on Pixel Similarity ............................................ 979
   Binglong Li, Lu Wang, Yifeng Sun, and Qingxian Wang
The Research on Network Security Visualization Key Technology ....................................... 983
   Xiaoyan Li, Qingxian Wang, Lin Yang, and Xiangyang Luo
A Method Based on Feature Matching to Identify Steganography Software .............................. 989
   Yongzhen Zheng, Fenlin Liu, Xiangyang Luo, and Chunfang Yang
Robust Image Watermarking against Brightness and Contrast Change .................................... 995
   Gong Daofu, Liu Fenlin, Luo Xiangyang, and Wang Ping

Author Index
