

Introduction to  
Computation and  
Programming Using Python

Revised and Expanded Edition

John V. Guttag

The MIT Press  
Cambridge, Massachusetts  
London, England

# CONTENTS

PREFACE .....	xiii
ACKNOWLEDGMENTS.....	xv
1 GETTING STARTED .....	1
2 INTRODUCTION TO PYTHON .....	7
2.1 The Basic Elements of Python .....	8
2.1.1 Objects, Expressions, and Numerical Types.....	9
2.1.2 Variables and Assignment .....	11
2.1.3 IDLE .....	13
2.2 Branching Programs .....	14
2.3 Strings and Input .....	16
2.3.1 Input.....	18
2.4 Iteration.....	18
3 SOME SIMPLE NUMERICAL PROGRAMS .....	21
3.1 Exhaustive Enumeration .....	21
3.2 For Loops.....	23
3.3 Approximate Solutions and Bisection Search .....	25
3.4 A Few Words About Using Floats .....	29
3.5 Newton-Raphson .....	32
4 FUNCTIONS, SCOPING, and ABSTRACTION .....	34
4.1 Functions and Scoping .....	35
4.1.1 Function Definitions.....	35
4.1.2 Keyword Arguments and Default Values .....	36
4.1.3 Scoping.....	37
4.2 Specifications .....	41
4.3 Recursion .....	44
4.3.1 Fibonacci Numbers .....	45
4.3.2 Palindromes .....	48
4.4 Global Variables .....	50
4.5 Modules.....	51
4.6 Files .....	53

5	STRUCTURED TYPES, MUTABILITY, AND HIGHER-ORDER FUNCTIONS..	56
5.1	Tuples .....	56
5.1.1	Sequences and Multiple Assignment.....	57
5.2	Lists and Mutability .....	58
5.2.1	Cloning .....	63
5.2.2	List Comprehension .....	63
5.3	Functions as Objects .....	64
5.4	Strings, Tuples, and Lists .....	66
5.5	Dictionaries .....	67
6	TESTING AND DEBUGGING.....	70
6.1	Testing.....	70
6.1.1	Black-Box Testing .....	71
6.1.2	Glass-Box Testing .....	73
6.1.3	Conducting Tests .....	74
6.2	Debugging .....	76
6.2.1	Learning to Debug.....	78
6.2.2	Designing the Experiment .....	79
6.2.3	When the Going Gets Tough.....	81
6.2.4	And When You Have Found “The” Bug.....	82
7	EXCEPTIONS AND ASSERTIONS .....	84
7.1	Handling Exceptions.....	84
7.2	Exceptions as a Control Flow Mechanism .....	87
7.3	Assertions.....	90
8	CLASSES AND OBJECT-ORIENTED PROGRAMMING .....	91
8.1	Abstract Data Types and Classes .....	91
8.1.1	Designing Programs Using Abstract Data Types.....	96
8.1.2	Using Classes to Keep Track of Students and Faculty.....	96
8.2	Inheritance .....	99
8.2.1	Multiple Levels of Inheritance.....	101
8.2.2	The Substitution Principle .....	102
8.3	Encapsulation and Information Hiding.....	103
8.3.1	Generators .....	106
8.4	Mortgages, an Extended Example .....	108

9	A SIMPLISTIC INTRODUCTION TO ALGORITHMIC COMPLEXITY .....	113
9.1	Thinking About Computational Complexity .....	113
9.2	Asymptotic Notation.....	116
9.3	Some Important Complexity Classes .....	118
9.3.1	Constant Complexity .....	118
9.3.2	Logarithmic Complexity.....	118
9.3.3	Linear Complexity .....	119
9.3.4	Log-Linear Complexity.....	120
9.3.5	Polynomial Complexity .....	120
9.3.6	Exponential Complexity.....	121
9.3.7	Comparisons of Complexity Classes.....	123
10	SOME SIMPLE ALGORITHMS AND DATA STRUCTURES .....	125
10.1	Search Algorithms .....	126
10.1.1	Linear Search and Using Indirection to Access Elements .....	126
10.1.2	Binary Search and Exploiting Assumptions .....	128
10.2	Sorting Algorithms .....	131
10.2.1	Merge Sort.....	132
10.2.2	Exploiting Functions as Parameters.....	135
10.2.3	Sorting in Python .....	136
10.3	Hash Tables.....	137
11	PLOTTING AND MORE ABOUT CLASSES .....	141
11.1	Plotting Using PyLab .....	141
11.2	Plotting Mortgages, an Extended Example .....	146
12	STOCHASTIC PROGRAMS, PROBABILITY, AND STATISTICS.....	152
12.1	Stochastic Programs .....	153
12.2	Inferential Statistics and Simulation .....	155
12.3	Distributions .....	166
12.3.1	Normal Distributions and Confidence Levels.....	168
12.3.2	Uniform Distributions .....	170
12.3.3	Exponential and Geometric Distributions .....	171
12.3.4	Benford's Distribution .....	173
12.4	How Often Does the Better Team Win?.....	174
12.5	Hashing and Collisions .....	177

13	RANDOM WALKS AND MORE ABOUT DATA VISUALIZATION .....	179
13.1	The Drunkard's Walk.....	179
13.2	Biased Random Walks .....	186
13.3	Treacherous Fields.....	191
14	MONTE CARLO SIMULATION.....	193
14.1	Pascal's Problem .....	194
14.2	Pass or Don't Pass?.....	195
14.3	Using Table Lookup to Improve Performance.....	199
14.4	Finding $\pi$ .....	200
14.5	Some Closing Remarks About Simulation Models.....	204
15	UNDERSTANDING EXPERIMENTAL DATA .....	207
15.1	The Behavior of Springs .....	207
15.1.1	Using Linear Regression to Find a Fit .....	210
15.2	The Behavior of Projectiles .....	214
15.2.1	Coefficient of Determination .....	216
15.2.2	Using a Computational Model.....	217
15.3	Fitting Exponentially Distributed Data.....	218
15.4	When Theory Is Missing.....	221
16	LIES, DAMNED LIES, AND STATISTICS .....	222
16.1	Garbage In Garbage Out (GIGO).....	222
16.2	Pictures Can Be Deceiving .....	223
16.3	<i>Cum Hoc Ergo Propter Hoc</i> .....	225
16.4	Statistical Measures Don't Tell the Whole Story.....	226
16.5	Sampling Bias.....	228
16.6	Context Matters .....	229
16.7	Beware of Extrapolation .....	229
16.8	The Texas Sharpshooter Fallacy.....	230
16.9	Percentages Can Confuse.....	232
16.10	Just Beware.....	233
17	KNAPSACK AND GRAPH OPTIMIZATION PROBLEMS.....	234
17.1	Knapsack Problems .....	234
17.1.1	Greedy Algorithms.....	235
17.1.2	An Optimal Solution to the 0/1 Knapsack Problem.....	238

17.2	Graph Optimization Problems .....	240
17.2.1	Some Classic Graph-Theoretic Problems.....	244
17.2.2	The Spread of Disease and Min Cut.....	245
17.2.3	Shortest Path: Depth-First Search and Breadth-First Search....	246
18	DYNAMIC PROGRAMMING .....	252
18.1	Fibonacci Sequences, Revisited .....	252
18.2	Dynamic Programming and the 0/1 Knapsack Problem.....	254
18.3	Dynamic Programming and Divide-and-Conquer.....	261
19	A QUICK LOOK AT MACHINE LEARNING.....	262
19.1	Feature Vectors .....	264
19.2	Distance Metrics .....	266
19.3	Clustering.....	270
19.4	Types Example and Cluster.....	272
19.5	K-means Clustering .....	274
19.6	A Contrived Example .....	276
19.7	A Less Contrived Example.....	280
19.8	Wrapping Up.....	286
	PYTHON 2.7 QUICK REFERENCE.....	287
	INDEX .....	289
