Contents

Keynotes

Water in mining challenges for the Australian and international mining industry
David Jones

Maximising use of waters produced by mining
Martin Schultze

Protecting Water Values

Coal mines – managing groundwater and impacts for open pit underground mines

Inrush and mine inundation - A real threat to Australian coal mines?
Detlef Bringemeier

Overview of managing groundwater and impacts at Loy Yang open cut.
Genevieve Foley, Chris Nicol, Jon Missen

Simulation of Water Balance in Dump Slopes of Open-Cast Mining Pits for Geotechnical Stability Prognosis
Peter-Wolfgang Graeber, Martin Meyer, Issa Hasan, Jana Sallwey, René Blankenburg

Predicting the acid production potential of Mpumalanga coal mines
Gideon Steyl, Danie Vermeulen, Lore-Mari Cruywagen

Experience-based approaches to coal mine groundwater evaluation in Kalimantan, Indonesia
John Waterhouse and Craig Wicenciak

Uranium mining and water

Dewatering of an underground uranium mine in Saskatchewan, Canada
Rashid Bashir, James Hatley

Conclusions from using an active production well for mine drawdown compliance
Gabor Bekesi, Murray Tyler, John Waterhouse

Improved calculation of groundwater heads for environmental management in the Great Artesian Basin, Australia
Gabor Bekesi, Murray Tyler, John Waterhouse

Remediation strategy for a waste rock dump at a former uranium leach operation
Marcus Frenzel, Andrea Schramm, Carsten Wedekind, Michael Paul, Ulf Jenk

Review of solute selection for water quality and bioaccumulation monitoring at a northern Australian uranium mine
Alison Frostick, David Jones, Kate Turner
Characterisation of hydrogeological conditions and solute transport pathways in the region of the Ranger uranium mine tailings storage facility, Northern Territory, Australia

Alan Puhalovich, Andrew Thomas, Nathaniel Toll, Philippe Puig, Alana O’Neill

One- and three-dimensional modelling of sub-surface solute transport processes in the region of Ranger uranium mine's tailings storage facility, Northern Territory, Australia

Alan Puhalovich, Keely Mundle, Russell Pol, Nathaniel Toll

Groundwater and coal seam gas developments

Development of a management tool to support optimization of the beneficial reuse of associated or produced water in eastern Australia

Ryan T. Jakubowski, Nathan W. Haws, David A. Ellerbroek, John Murtagh, and David Macfarlane

Hydrochemical compatibility assessments of aquifer injection of treated coal seam gas water into Surat Basin aquifers.

Matt Landers, David Harris, Brent Usher, Ryan Morris and Andrew Moser

Leading practices for assessing the integrity of confining strata: application to mining and coal-seam gas extraction

Wendy Timms, Ian Acworth, Adam Hartland, David Laurence

A South African perspective on shale gas hydraulic fracturing

P.D. Vermeulen

Mine Water and Mine Closure

Deriving surface water quality closure criteria for natural waterbodies adjacent to an Australian uranium mine

Chris Humphrey, David Jones, Alison Frostick, Lisa Chandler

Pit lakes as evaporative ‘terminal’ sinks: an approach to best available practice mine closure

Clint D. McCullough, Geneviève Marchant, Jörg Unseld, Michael Robinson, Ben O’Grady

The importance of having an agreed plan

Jamie Robertson

Acid Mine Drainage – processes and treatment

Application of a jet loop reactor to enhance removal of sulphates from mine water using coal fly ash, lime and aluminium hydroxide

Research on the applicability of anaerobic passive bioreactor for mine water treatment in Japan

Hisatoshi Furuya, Takuya Kodera, Kousuke Takamoto, Nobuyuki Masuda, Mikio Kobayashi, Atsushi Osame, Hideo Asano, Hajime Ikeda, Takeshi Sakata, Hidekatsu Nakamura, Masao Okumura, Tatsuru Takahashi, Kazuya Sunada and Manami Ikeda

Treatment plant to allow mine water release from Morro Da Mina, Brazil

Sam Hawker, Jamie Robertson
Combined numerical and analytical modelling as a means to assess closure options for open-pit mines, Pilbara region

Niall Inverarity, Shawan Dogramaci, Iain Rea

Ettringite Precipitation vs. Nano-Filtration for Efficient Sulphate Removal from Mine Water

Eberhard Janneck, Mitch Cook, Christian Kunze, Klaus Sommer, Laurentiu Dinu

Review of sulfate reduction based bioprocesses for acid mine drainage treatment and metals recovery

Anna H Kaksonen, Erkan Sahinkaya

Acid metalliferous leaching of a mineral sands deposit: From field to laboratory.

Matt Landers, Brent Usher

Mineralogical and geochemical studies on pyrite and chalcopyrite oxidations in the Sarcheshmeh copper mine tailings

Sajjad Jannesar Malakooti, Mohammad Noaparast, Saied Ziaeddin Shafaei Tonkaboni, Faramarz Doulati Ardejani, Esmaeil Soleimani, Esmat Esmaeilzadeh

A novel approach to exploit indigenous mining algal-microbes in a photo-rotating biological contactor for heavy metal removal from acid mine drainage

Sanaz Orandi, David M. Lewis, Afsar Eslami, Ali Mohebbi

Biological sulphate reduction of acid mine drainage using primary sewage sludge

Johann Poinapen

Oxidation process and hydrology of tailings dams: Implication for acid mine drainage from TSFs management - The Witwatersrand experience, South Africa

Bisrat Yibas, WPulles, S Lorentz, B Maiyana, C Nengovhela

Stream sediment geochemistry of the Olifants catchment, South Africa: Implication for acid mine drainage

Robert Netshitungulwana, B. Yibas

Approaches to predetermine the variables affecting the efficiency for the design of mining effluents and acidic drainage treatment systems

Nora Paños, Luis Gutierrez, Ana Senese

Liming of acid surface waters: Effect of water constituents and material impurities on calcite dissolution kinetics

Mandy Schipek and Broder J. Merkel

Abandoned Mine Issues

The Collie Pit Lake District, Western Australia: An Overview

Mark A. Lund, Clint D. McCullough, & R. Naresh Kumar

Role of private sector and national policy for rehabilitation of abandoned mines in Portugal

Hossain M. Anawar

Is Water Conservation and Water Demand Management a real option?

Fanie Botha, Karen Chetty

Antimony contamination of surface water at abandoned Sardinian mine sites

Rosa Cidu, Riccardo Biddau, Elisabetta Dore
Numerical groundwater flow modelling at the historic Rum Jungle mine site, northern Australia

Christoph Wels, Paul R. Ferguson, and Mike Fawcett

Revegetation of historic acidic mine waste with Agrostis capillaris – Remediation strategy

Stefan Karlsson, Viktor Sjöberg, Anna Grandin and Bert Allard

The status and implications of the AMD legacy facing South Africa

Mosidi Makgæ

Dispersion of Metals at Louis Moore Gold Tailings Dam, Limpopo Province, South Africa 334 A

Khodani Matshusa, Jason S. Ogola, Klaus Maas

Keeping the lid on it

Jamie Robertson, Samuel Hawker

Best left to leach? Geochemical understanding of waste tips at abandoned metal mines

Alison J. M. Turner Charlotte Braungardt

Conserving Mine Water Resources

Site-wide mine water management

Exemplar mine-site water management - A necessity in an era of climatic variability

Geoff Pettifer, David Brett, Sjors Hein, Stuart Gray, Andre Kemp, Wayne Schafer, Rob Virtue, and Brett Goebel

Advances in hydrogeologic testing of mineral exploration boreholes

Joel Adams, Randall Roberts

Reducing capital expenditure using probabilistic simulation for water management

Ari Craven

Hydraulic performance of liners in tailings management and heap leach facilities

Gareth Digges La Touche, Hollie Garrick

Forensic analysis of mine water impacts – a mass balance approach

Chris Gimber

Mt Leyshon Gold Mine Automated Monitoring Network: Meeting Environmental and Social Commitments

R. Haymont, A.M. Vitale

What is a representative pan factor value for the eastern Pilbara?

Aditya Jha

Management of mine and tailings seepage water discharge in an intensively used watershed

Thomas Metschies and Michael Paul

Evaluation of the applicability of the passive treatment for the management of polluted mine water in the Witwatersrand Goldfields, South Africa.

Ntshengedzeni Obed Novhe

The future of water in the mining industry

Jerry Rowe
Water security and engineering innovation for the Southdown Project

Daniel Visser, Ross Carpenter

Mine water and climate change

Climate science in mine water system design

Jennifer Ahern, Mark Gibbs

The Impact of Climate Change on a Mine Water Source

Conor O'Hara, Jaco Grobler, Greg Hookey, Jan Vermaak

Modeling the impact of a possible climate change on the water balance in post-mining areas

Rene Blankenburg, Dietrich Sames, Holger Mansel, Bernd Pfützner

Heat storage potential of a flooded mine in the Siegerland-Wied district, Germany

Georg H. E. Wieber, Hagen Deckert, Frieder Enzmann, Michael Kersten

Geochemistry of mine waters

Geochemical Assessment of Mineral Waste through the Mine Life Cycle

Rosalind Green

Groundwater modelling meets geochemistry: Building the bridge between FEFLOW and PHREEQC with IFMPhreeqc

Eduardo Reckziegel de Sousa

Zn-Al sulphate layered double hydroxide for Mo uptake

Franco Frau, Carla Ardaou, Elisabetta Dore, Pierfranco Lattanzi

Revegetation of historic acidic mine waste with Agrostis capillaris – Impact on leachate composition in pot experiments

Stefan Karlsson, Viktor Sjöberg, Anna Grandin and Bert Allard

A critical review of static geochemical test methods applied to mining wastes, including their applicability to field conditions

Pierre D S Rousseau

Getting rid of chemical analysis – Mine water management with indicator parameters

Christian Wolkersdorfer

Maximising use of waters produced by mining

Pit Lakes

Post-closure mining pit lake water quality modelling

David Dettrick, Brian Barnett, Damon Grace, Hiro Toki

Upper and lower concentration thresholds for bioremediation of acid mine drainage using bulk organic substrates

R. Naresh Kumar, Clint D. McCullough, Mark A. Lund

Riverine breach and subsequent decant of an acidic pit lake: evaluating the effects of riverine flow-through on lake stratification and chemistry

Clint D. McCullough, R. Naresh Kumar, Mark A. Lund, Michelle Newport, Elmien Ballot, Digby Short
Pit lake modelling – The total system approach
Dave Richers, C. (Doc) Richardson, Dwaine Edington, Guy Roemer, and Brad Bijold

The implications of redox conditions for the perpetual management of mine pit lakes
Phillip Whittle, Amie Leggett

Mine dewatering – maximising value and minimising costs
An alternative approach to managing dewatering in an open pit mine
Keith Brown, Shane Trott and Aadil Nabi

Shallow anthropogenic aquifers may provide a solution to reduce nitrate in dirty mine water?
Fanie Botha and Lebogang Maleka

Mine of the Future™: The automated mine dewatering design module of PBMO™
Eddy Lim, Larry M. Deschaine, and Peter S. Huyakorn

Dewatering of Opencast Mines using Horizontal Wells
Holger Mansel, Carsten Drebenedst, Peter Jolas, Rene Blankenburg

Treatment and Disposal of mine waters
Zero Discharge Desalination Technology – Achieving Maximum Water Recovery
Brad Biagini, Bernie Mack, Phil Pascal, Thomas A. Davis, Malynnda Cappelle

Removal of zinc and lead from a neutral mine water using iron tailings and iron oxyhydroxide coated iron tailings
Linnea Fahlqvist, Lotta Sartz, Mattias Bäckström

Effective desorption of metals from loaded biomass using response surface methodology based on Box-Behnken design
E Fosso-Kankeu, AF Mulaba-Bafuibiandi, TG Barnard

The next step in the bioremediation of heavy metal polluted water: development of suitable microbial-sorbent
E Fosso-Kankeu, AF Mulaba-Bafuibiandi, G Tlou and L Piater

Concomitant removal of iron and NAPLs within a mine water treatment system
Jennifer N. Geroni, Devin J. Sapsford

A case study of underground brine disposal
Terry Harck, Jennifer Pretorius, and Peter Gunther

Ecotoxicology of actively treated mine waters
Andrew J Harford, David R Jones, Rick A van Dam

Novel application of membrane distillation for acid and water recovery from mining waste waters
Uchenna K. Kesiemea, Nicholas Milne, Hal Aral, Chu Yong Cheng, Mikel Duke

Membrane based water and wastewatertreatment solutions
Tim Lilley

Study on the mining influenced water and a possibility to extract copper metal from tailings deposition in Bor, Serbia
Nobuyuki Masuda, Daizo Ishiyama, Atsusi Shibayama, Yasushi Takasaki, Hiroshi Kawaraya, Hinako Sato, Zoran O. Stevanovic, Ljubisa Obradovic
## Treatment of acidic and neutral metal-laden mine waters with bone meal filters
Lotta Sartz, Mattias Bäckström

Page 643

## Novel salt extractor system for salt removal from mine water and calcium sulfate removal on the International Space Station
Benjamin Sparrow, Malcolm Man, and Joshua Zoshi

Page 651

## The impact of co-disposal of sulphate brines on a fly-ash dam, a study of the physical-chemical influence on drainage patterns
Gideon Steyl, Francois Fourie, and Lukas Marais

Page 661

## Strategies to reduce AMD liability treatment costs at Stockton Coal Mine, New Zealand.
Dave Thomas, Joe Wildy, Paul Weber, Phil Rossiter, Phil Lindsay, Mark Pizey

Page 678 A

## Posters

### Former Pit Mine Dive Parks
Peter Buzzacott, David Paine

Page 679

### Influence of acid mine drainage on river water quality in the vicinity of the Osamu Utsumi uranium mine, Caldas-Minas Gerais, Brazil
Carlos Alberto de Carvalho Filho, Cristina Fonseca da Silva, Rubens Martins Moreira, Pedro Henrique Dutra, Vinícius Verna Magalhães Ferreira, Peter Marshall Fleming, Otávio Eurico de Aquino Branco

Page 685

### A vertical flow reactor for removal of iron from zinc-rich AMD
K. Florence

Page 687

### Manganese and vanadium uptake by Cynodon Dactylon grass species: A case study in New Union gold mine tailings, Limpopo, South Africa
N. Makuya, J.R. Gumbo, C. Muzerengi, F.A. Dacosta

Page 689

### Seawater desalination of the Chilean coast for water supply to the mining industry
Frans Knops, Manuel Garcia de la Mata, Cristian Mendoza Fajardo, Estanislao Kahne

Page 697

### The influence of mine water on surface water in the Miłek catchment (Intrasudetic Basin, SW Poland).
Chudy Krzysztof, Worsa-Kozak Magdalena

Page 704 A

### Investigation of the quality of water samples in the entrance and effluents from the Sarcheshmeh copper mine tailings dam
Sajjad Jannesar Malakooti, Seyed Ziaedin Shafaei, Mohammad Noaparast, Faramarz Doulati Ardejani, Reza Naseh, Hosein Saadloo

Page 705

### Investigation of phosphatic-vermiculite-heavy metal interaction and the implication to pollution of Solati River in Limpopo Province, South Africa
Haile Mengistu, Bisrat Yibas, Souleymane Diop, Tamiru Alemayehu and Molla Demile

Page 713

### Optimisation of a floating sulphur biofilm reactor in a passive acid mine drainage treatment system
N. Mooruth and R.P. Van Hille

Page 723

### Treatment of acid mine drainage (AMD) using iron oxides
James D. Navratil, Andrew C. Akin and Justin Feis

Page 725
Removal of vanadium from neutralized acid mine drainage (AMD) by adsorption to saw dust

Viktor Sjöberg, Stefan Karlsson and Bert Allard

An evaluation on coal mining safety above high pressure confined aquifers in a deep coalmine

Sui Wanghua, Gao Yue, Feng Fuyuan

Tailing dam management practices - A review of 3 case studies

Gary Thorne, and Vanessa Personnaz

Evaluating the environmental impacts after the closure of mining activities, using Remote Sensing methods-The case study of Aliveri mine area.

Vasileiou E., Stathopoulos N. , Stefouli M. , Charou E., Perrakis A.
