2012 International Conference on Indoor Positioning and Indoor Navigation

(IPIN 2012)

Sydney, Australia
13 – 15 November 2012
Table of Contents

Investigation of location capabilities of four different smartphones for LBS navigation applications 1
Guenther Retscher and Tobias Hecht

Ultrasound positioning based on time-of-flight and signal strength 7
Sverre Holm

Platform for Hybrid Positioning based on a Sensor Description Language 13
Moritz Kessel and Sascha Schreier

An Accurate 3D Localization Technique using a Single Camera and Ultrasound 23
Masanori Sugimoto, Noriyoshi Kanie, Shigeki Nakamura and Hiromichi Hashizume

Camera-Assisted Localization of Passive RFID Labels 31
Theresa Nick, Sebastian Cordes, Jürgen Götze and Werner John

A Study on Indoor Pedestrian Localization Algorithms with Foot-Mounted Sensors 39
Michailas Romanovas, Vadim Goridko, Ahmed Al-Jawad, Manuel Schwaab, Martin Traechtler, Lasse Klingbeil and Yiannos Manoli

Complexity-reduced FootSLAM for Indoor Pedestrian Navigation 49
Maria Garcia Puyol, Patrick Robertson and Oliver Heirich

INDOOR LOCALIZATION USING CONTROLLED AMBIENT SOUNDS 59
Ish Rishabh, Don Kimber and John Adcock

Optical and Radio Calibration of the Repealite Based Indoor Positioning System 69
Ikhlas SELMI, Alexandre VERVISCH-PICOIS, Yaneck GOTTESMAN and Nel SAMAMA

Automated WLAN Calibration with a Backtracking Particle Filter 77
Moritz Kessel and Martin Werner

INS and GNSS Fusion Enhancement based on a Weighted Reliabilities Approach 87
Alexandre PATAROT, Mehdi BOUKALLEL, Sylvie LAMY-PERBAL, Alexandre VERVISCH-PICOIS and Nel SAMAMA
Indoor Pedestrian Localisation Solution based on Anemometry Sensor Integration with a Smartphone 97
Guillaume TREHARD, Mehdi BOUKALLEL and Sylvie LAMY-PERBAL

Uncertainty Estimation for Kinematic Laser Tracker Measurements 106
Thomas Ulrich

Utilizing pulsed pseudolites and high-sensitivity GNSS for ubiquitous outdoor/indoor satellite navigation 116
Heidi Kuusniemi, Mohammad Zahidul H. Bhuiyan, Mårten Ström, Stefan Söderholm, Timo Jokitalo, Liang Chen and Ruizhi Chen

CUPID algorithm for indoor multipath-aided cooperative localization using a single anchor 123
Samuel Van de Velde and Heidi Steendam

Deeply Coupled GPS/INS Integration in Pedestrian Navigation Systems in Weak Signal Conditions 129
Markus Langer, Stefan Kiesel, Christian Ascher and Gert F. Trommer

Indoor Positioning of Vehicles using an Active Optical Infrastructure 136
Sven Heißmeyer, Andreas Müller and Ludger Overmeyer

Mitigation of Attitude and Gyro Errors through Vision Aiding 144
Laura Ruotsalainen, Jared Bancroft and Gérard Lachapelle

A Particle Filter Approach to Indoor Navigation Using a Foot Mounted Inertial Navigation System and Heuristic Heading Information 153
James Pinchin, Chris Hide and Terry Moore

Feasibility of ultrasound positioning based on signal strength 163
Carlos Medina, Sverre Holm and José Carlos Segura

A Portable and Low-Cost 3D Tracking System Using Four-Point Planar Square Calibration 172
Pekka Peltola, Miika Valtonen and Jukka Vanhala

Robust Tracking of a Mobile Beacon using Time Differences of Arrival with Simultaneous Calibration of Receiver Positions 181
Johannes Wendeberg, Jörg Müller, Christian Schindelhauer and Wolfram Burgard

Evaluating MisMatch Probability of Activity-based Map Matching in Indoor Positioning 191
Sara Khalifa and Mahbub Hassan
Optimization of Rank Based Fingerprinting Localization Algorithm 200
Juraj Machaj and Peter Brida

RSS-based Indoor Positioning Accuracy Improvement using Antenna Array in WLAN Environments 207
Gayan Attanayake and Yue Rong

DactyLoc: A minimally geo-referenced WiFi+GSM-fingerprint-based localization method for positioning in urban spaces 213
Kristian Cujia, Martin Wirz, Mikkel Baun Kjærgaard, Daniel Roggen and Gerhard Tröster

Ambiguity Resolution and Validation in Precise Pseudolite Positioning 222
Tao Li, Jinling Wang and Jingsong Huang

An Information Addition Technique for Indoor Self-localization System Using SS Ultrasonic Waves 229
Hiromichi Yoshiga, Akimasa Suzuki and Taketoshi Iyota

Hybrid indoor/outdoor localisation system to support aeronautical maintenance activities 235
Nelly de BONNEFOY, Yohann DUGUA, Samir TORKI, Jean-Pierre JESSEL and Bernard ORDY

A Mobile Security Robot equipped with UWB-Radar for Super-Resolution Indoor Positioning and Localisation Applications 247
Rahmi Salman and Ingolf Willms

Multi-Floor Map Matching in Indoor Environments for Mobile Platforms 255
Christian Ascher, Christoph Kessler, Ruediger Weis and Gert F. Trommer

A Constraint Approach for UWB and PDR Fusion 263
Francisco J Zampella, Alessio De Angelis, Isaac Skog, Dave Zachariah and Antonio Ramón Jiménez

Device Signal Strength Self-Calibration using Histograms 272
Christos Laoudias, Robert Piche and Christos Panayiotou

Indoor Navigation on Wheels (and on Foot) using Smartphones 280
Jó Ágila Bitsch Link, Felix Gerdsmeier, Paul Smith and Klaus Wehrle

ActionSLAM: Using location-related actions as landmarks in pedestrian SLAM 290
Michael Hardegger, Daniel Roggen, Sinziana Mazilu and Gerhard Tröster
Indoor Localisation with UMTS compared to WLAN  300
Ulrich Birkel and Mark Weber

Scale-Preserving Long-Term Visual Odometry for Indoor Navigation  306
Sebastian Hilsenbeck, Andreas Möller, Robert Huitl, Georg Schroth, Matthias Kranz and Eckehard Steinbach

Requirements and Metrics for Location and Tracking for Ambient Assisted Living  316
Samih Elsa and Adriano Moreira

Performance Evaluation of an Indoor Localization Protocol in a 802.15.4 Sensor Network  323
Jorge Juan Robles, Enrique Gago Muñoz, Laura de la Cuesta and Ralf Lehnert

Combining similarity functions and majority rules for multi-building, multi-floor, WiFi Positioning  333
Nelson Marques, Adriano Moreira and Filipe Meneses

Time-of-flight positioning using the existing wireless local area network infrastructure  342
Ivan Casacuberta and Alejandro Ramirez

System Simulation for M-Sequence Radar Sensors  350
Markus Robens, Ralf Wunderlich, Jürgen Sachs and Stefan Heinen

Fingerprinting Based Localisation Revisited: a rigorous approach for comparing RSSI measurements coping with missed access points and differing antenna attenuations  359
Christian Beder and Martin Klepal

A novel indoor localization scheme based on fingerprinting technique and CDMA signals  366
Nadia ALOUI, Kosai RAOOF, Ammar BOUALLEGUE, Stephane LETOURNEUR and Sonia ZAIBI

Calibration of Smartphones for the use in indoor navigation  371
Friedrich Keller, Thomas Willemsen and Harald Sternberg

Design and Implementation of WiFi Indoor Localization based on Gaussian Mixture Model and Particle Filter  379
Katsuhiko Kaji and Nobuo Kawaguchi

A Robust Room-level Localization Method Based on Transition Probability for Indoor Environments  388
Shinji Hotta, Yoshiro Hada and Yoshinori Yaginuma
Indoor Localization System based on Galvanometer-Laser-Scanning for numerous Mobile Tags (GaLocate) 396
Jan Kokert, Fabian Höflinger and Leonhard Reindl

Image Matching Techniques for Vision-based Indoor Navigation Systems: Performance Analysis for 3D Map Based Approach 403
Xun Li and Jinling Wang

Indoor Positioning System Using Geomagnetic Anomalies for Smartphones 411
Seong-Eun Kim, Yong Kim, Jihyun Yoon and Eung Sun Kim

Indoor Positioning for Moving Objects Using A Hardware Device with Spread Spectrum Ultrasonic Waves 416
Yuya Itagaki, Akimasa Suzuki and Taketosi Iyota

Virtual Reconstruction Using an Autonomous Robot 422
Matthew McGill, Adam Milstein, Rudino Salleh, Timothy Wiley, Adrian Ratter, Reza Farid and Claude Sammut

WiFi Fingerprinting Signal Strength Error Modeling for Short Distances 430
Vahideh Moghtadaiee and Andrew G. Dempster

RoughMaps: A Generic Platform to support Symbolic Map Use in Indoor Environments 436
Rainer Wasinger, Kurt Gubi, Judy Kay, Bob Kummerfeld, Michael Fry and Tsvi Kuflik

Benchmark Measurements for Wi-Fi Signal Strength based Positioning System 446
François Spies, Philippe Canalda, Matteo Cypriani and Ancuta Dobircau

Harmonization of Position Providers 454
Anja Bekkelien and Michel Deriaz

Statistical Path Loss Parameter Estimation and Positioning Using RSS Measurements in Indoor Wireless Networks 461
Henri Nurminen, Jukka Talvitie, Simo Ali-Löytty, Philipp Müller, Elena-Simona Lohan, Robert Piché and Markku Renfors

Doppler Positioning with Orientation Estimation by Using Multiple Transmitters for High-accuracy IMES Localization 470
Yoshihiro Sakamoto, Takuji Ebinuma, Kenjiro Fujii and Shigeki Sugano
A New Indoor Position Estimation Method of RFID Tags for Continuous Moving Navigation
Systems 479
Emi Nakamori, Daiki Tsukuda, Manato Fujimoto, Yuki Oda, Tomotaka Wada, Kouichi Mutsuura and
Hiromi Okada

Adding Link Quantity Information to Redundant RF Signal Strength Estimates for Improved Indoor
Positioning 487
Andreas Fink and Helmut Beikirch

Separation of Control Quality and Measurement Accuracy for Guiding Control Tasks of an Indoor
Construction Machine Simulator 493
Alexander Beetz

A robust pedestrian navigation algorithm with low cost IMU 504
Yan Li and Jianguo Jack Wang

Fusing Information from Multiple Navigation Systems Using Upper Bounds on their Spatial
Separations 511
Isaac Skog, John-Olof Nilsson, Dave Zachariah and Peter Händel

A robust and precise 3D indoor positioning system for harsh environments 516
Joerg Blankenbach, Abdelmoumen Norrdine and Hellmers Hendrik

Indoor Magnetic Field Characterization for Applications in Localization and Simultaneous
Localization and Mapping 524
Michael Angermann, Marek W. Doniec, Martin Frassl, Brian J. Julian and Patrick Robertson

A Reference System for Indoor Localization Testbeds 533
Simon Schmitt, Heiko Will, Benjamin Aschenbrenner, Thomas Hillebrandt and Marcel Kyas

Using Natural Footstep-Accurate Traces for Indoor Positioning Evaluation 541
Tim Schwartz, Christoph Stahl, Angela Mahr, Christian Müller and Bahjat Saliba

The Geo-n Localization Algorithm 549
Heiko Will, Thomas Hillebrandt and Marcel Kyas

Smoothing for ZUPT-aided INs 559
David Simón Colomar, John-Olof Nilsson and Peter Händel
Automatic 3D Calibration for a Multi-Sensor System 564
Enrico Köppe and Daniel Augustin

Multi-technology RF fingerprinting with leaky-feeder in underground tunnels 570
Fernando Pereira, Christian Theis, Adriano Moreira and Manuel Ricardo

Constraints for different locomotion types and their role in subspacing of indoor environments for indoor navigation 579
Aftab Ahmed Khan and Thomas H. Kolbe

Hidden Markov Model-based 3D Path-matching using Raytracing-generated Wi-Fi Models 591
Nicolai Viol, Jó Ágila Bitsch Link, Hanno Wirtz, Dirk Rothe and Klaus Wehrle

Radio-Asissted Inertial Navigation System by Tightly Coupled Sensor Data Fusion: Experimental Results 601
Christian Ascher, Lukasz Zwirello, Carina Hansmann, Sebastian Werling, Thomas Zwick and Gert F. Trommer

The Research on Cartographical Indoor Presentation and Indoor Route Modeling for Navigation Applications 608
Dariusz Gotlib, Jacek Marciniak and Miłosz Gnat

Acoustic Self-calibrating System for Indoor Smartphone Tracking (ASSIST) 615
Fabian Hoflinger, Johannes Wendeberg, Rui Zhang, Manuel Bührer, Joachim Hoppe, Amir Bannoura, Leonhard Reindl and Christian Schindelhauer

Scalable Indoor Pedestrian Localisation using Inertial Sensing and Parallel Particle Filters 624
Agata Brajdic and Robert Harle

How feasible is the use of magnetic field alone for indoor positioning? 634
Binghao Li, Thomas Gallagher, Andrew Dempster and Chris Rizos

A new method to generate and maintain a WiFi fingerprinting database automatically by using RFID 643
Michael Gunawan, Binghao Li, Thomas Gallagher, Andrew Dempster and Günther Retscher

Indoor Positioning System based on Sensor Fusion for the Blind and Visually Impaired 649
Thomas Gallagher, Elyse Wise, Binghao Li, Andrew G. Dempster, Chris Rizos, Daniel Woo and Euan Ramsey-Stewart
A Dynamic Channel Assignment Method Based on Location Information of Mobile Terminals in Indoor WLAN Positioning Systems 658
Ming Li, Long Han, WeiQiang Kong, Shigeaki Tagashira, Yutaka Arakawa and Akira Fukuda

Time-Reversal UWB positioning beacon for railway application 667
Bouna Fall, Fouzia Elbahhar, Marc Heddebaut and Atika Rivenq

Large scale movement analysis from WiFi based location data 675
Filipe Meneses and Adriano Moreira

An Indoor Localization Algorithm in a Small-Cell LED-based Lighting System 684
Anna Maria Vegni and Mauro Biagi

A Device-Clustering Algorithm for Device Heterogeneity in Crowdsourcing-based Localization 691
Huang Cheng, Haiyong Luo, Fang Zhao, Feng Wang and Rui Tao

Mobile 3D Indoor Mapping Using the Continuous Normal Distributions Transform 698
Dylan Campbell, Mark Whitty and Samsung Lim

Wireless LAN based Indoor Positioning using Radio-Signal Strength Distribution Modeling 707
Yaemi Teramoto and Akinori Asahara

Hybrid CFO-RSS Cooperative Positioning for Environments with Limited GNSS Visibility 714
Nima Alam, Allison Kealy, Andrew Dempster, Azmir Hasnur Rabiain and Chris Hill

Collaborative Navigation with Ground Vehicles and Personal Navigators 720
Allison Kealy, Guenther Retscher, Nima Alam, Azmir Hasnur Rabiai, Charles Toth, Dorota A. Grejnner-Brzezinska, Terry Moore, Chris Hill, Vassilis Gikas, Chris Hide, Chris Danezis, Lukasz Bonenberg and Gethin Wyn Roberts

Indoor navigation for the visually impaired: Where are we today? 728
Elyse Wise, Binghao Li, Thomas Gallagher, Andrew G. Dempster, Chris Rizos, Euan Ramsey-Stewart and Daniel Woo

Entropy-based Location Fingerprinting for WLAN Systems 735
Nayef Alsindi, Zdenek Chaloupka and James Aweya

Classifying and Using Motion in Organic Indoor Positioning 742
Álvaro Fialho, André Cavalcante, Afonso Costa and Jonathan Ledlie
Audio Beacon Providing Location-Aware Content for Low-End Mobile Devices 752
Andre Cavalcante, Rafael Paiva, Renato Iida, Alvaro Fialho, Afonso Costa and Robson Vieira

On Sensor Pose Parameterization for Inertial Aided Visual SLAM 761
Markus Kleinert and Uwe Stilla

Distributed Multi Sensor Data Fusion for Autonomous 3D Mapping 770
Jose Guivant, Samuel Marden and Karime Pereida

A multisensor LBS using SIFT-based 3D models 781
Antonio Ruiz-Ruiz, Pedro E. Lopez-de-Teruel and Oscar Canovas

Activity and Environment Classification using Foot Mounted Navigation Sensors 791
Jared B. Bancroft, David Garrett and Gérard Lachapelle

Hybrid RSS-SOM Localization Scheme for Wireless Ad Hoc and Sensor Networks 801
Nyein Aye Maung Maung and Makoto Kawai

Landmark-based Navigation in Complex Buildings 808
Paul Heiniz, Karl-Heinz Krempels, Christoph Terwelp and Stefan Wüller
