# Contents

Preface .................................................................................................................. ix

## Model Courses

1. **The Chemistry of Food: A First-Year Three-Week Seminar Course** .......... 3  
   January D. Haile

2. **Better Eating through Chemistry: Using Chemistry To Explore and Improve Local Cuisine** .......................................................... 11  
   K. A. Daus

3. **Chemistry of Cooking** ............................................................................... 23  
   Jason K. Vohs

4. **The Chemistry of Beer** ............................................................................. 37  
   Roger Barth

5. **Using an Interdisciplinary Course About Food To Inspire Both Our Science and Non-Science Students To Face the Challenges of Their Twenty-First Century World** ......................................................... 49  
   Tom L. Neal

6. **Chemistry of Cuisine: Exploring Food Chemistry by Cooking Meals with Honors Students** ................................................................. 63  
   S. Malapati

7. **The Kitchen Chemistry Sessions: Palatable Chemistry through Molecular Gastronomy and Cuisine** ......................................................... 77  
   Subha R. Das

8. **Putting It All Together: A Capstone Course in Culinary Chemistry** .......... 99  
   Keith Symcox

## Innovative Techniques

9. **Impact of Metal Ions in Nutrition: How a Student Seminar Is Catalyzing Change among Students, Faculty, and Society in a Small Town of Northern India** ................................................................. 117  
   Sangeeta Kumar, Viniti Gupta, and Manisha Nigam
