CONTENTS

VIBRATION, ACOUSTICS, AND WAVE PROPAGATION

ACOUSTIC AND ELASTIC WAVE PROPAGATION
IMECE2012-85527 ................................................................. 1
Analysis of Electrohydraulic Shock Wave Generation
Arnold E. Carden

IMECE2012-86539 ................................................................. 7
Determination of the Effects of Air Gap and Hind Support on the Sound Absorption
Coefficient of Biobased and Foam Materials
N. V. David, M. N. Zainal, and M. J. M. Nor

IMECE2012-86823 ................................................................. 13
Testing of Sonic-Absorbent Panels' Behavior in Open-Air Environment
Petru A. Pop, Patricia A. Ungur, Liviu Lazar, Mircea Gordan, and Florin M. Marcu

IMECE2012-87346 ................................................................. 21
Fractional Derivative Viscoelastic Model for the Analysis of Two Colliding Spherical Shells
Yury A. Rossikhin and Marina V. Shitikova

IMECE2012-87792 ................................................................. 33
The Exact Calculation of the Added Resistance in Waves
Razieh Zangeneh, Mahmood Ghiasi, Mahdi Ghareh Baygloo, and Terry Yan

IMECE2012-88658 ................................................................. 41
Dynamic Response of RC Structures Subjected to Blast Wave Shock Loading
Oruba Rabie and Yahia M. Al-Smadi

IMECE2012-88982 ................................................................. 49
Un-Shocked High Amplitude Standing Waves in Wave-Shaped Resonators
Dion Savio Antao and Bakhtier Farouk

IMECE2012-89091 ................................................................. 59
FEA Robustness Verification in the Modeling of 1-D Stress Wave Propagation for a Split
Hopkinson Bar (SHB) Test
Michael L. McCoy, Rasoul Moradi, and Hamid M. Lankarani

AERO-HYDRO-ACOUSTICS AND FLOW-INDUCED VIBRATION
IMECE2012-85700 ................................................................. 67
Numerical Research on Forced Response of a Compressor Rotor Row Under
Inlet Distortion
Zhang Zhang, Hou Anping, Tuo Wei, Xia Aiguo, and Zhou Sheng
Experimental Study on Dynamic Behavior of a Rolling Agricultural Tire
Katsuhide Fujita, Takashi Saito, and Toru Yamazaki

On Free Vibration of Functionally Graded Euler-Bernoulli Beam Models Based on the Non-Local Theory
Reza Moheimani and M. T. Ahmadian

Research on Fluctuating Forces Occurred in Components of Reciprocating Hydrogen Compressors
Yoshifumi Mori, Takashi Saito, Takehisa Aoki, and Katsuhide Fujita

A Novel Impact Damper Consisting of a Linear Chain of Particles
Mohamed Gharib and Saud Ghani

Study on Frequency Variety Stiffness of Metal Springs
L. Liu, W. H. Zhang, Y. Li, and G. H. Huang

The Effect of Multiple Dynamic Absorbers on Regenerative Chatter and Resonance in End Milling Process
Yutaka Nakaho, Hiroki Takahara, Kengo Yasue, and Ryutaro Asaga

Mitigate Friction of Coiled Tubing by Optimization and Axial Vibrations to Facilitate Extended Reach Drilling Operations
M. Danish Haneef and Jamil Abdo

Small Wind Turbine Tower Structural Vibration
Ehsan Mollasalehi, David H. Wood, and Qiao Sun

Input Force Identification in Time Domain Using Optimally Placed Accelerometers
Deepak K. Gupta and Anoop K. Dhingra

Materials and Techniques for Reduction of Vibration Transmission in String Trimmers
Jack Leifer and Stephen J. Weisenburger

Vibration Characteristics of a Human Adult and Infants Travelling in a Bicycle With Two Child Seats
S. Ota, S. Nishiyama, and T. Shinohara
Extending Blind Modal Identification to the Underdetermined Case for Ambient Vibration
Scot McNeill

On the Nonlinear Dynamics of a Vibro-Impacting Cantilever With End Mass
Prasanna Gandhi and Ajinkya Badkas

Yousof Azizi, Patricia Davies, and Anil K. Bajaj

A Review of Damping Matrix Identification Methods in Structural Dynamics
Sharad Pradhan and S. V. Modak

The Effect of Rolling Speed and Friction on Cold Rolling Mill Stability
Y. S. Kim, N. Zhang, J. C. Ji, and W. Y. D. Yuen

Solving Huge Gyroscopic Eigenproblems With AMLS and Subspace Iteration
Heinrich Voss, Jiacong Yin, and Pu Chen

An Iterative Circular Contour Winding Number Integral Method and its Application in Wave Propagation Analysis of Infinite Fluid-Filled Cylinder
Yang Yi, Wang Zhan, Longlei Dong, and Guirong Yan

Numerical Simulations of Soluble Bubble Dynamics in Acoustic Fields
Ekaterina V. Volkova, Elvira S. Nasibullaeva, and Nail A. Gumerov

Trigonometric Collocation for Computation of Steady State Responses of Cracked Structures
Bakeer Bakeer, Oleg Shiryayev, and Ammaar Tahir

A Numerical Study of the Blade Passing Frequency Noise of a Centrifugal Fan
Jian-Cheng Cai, Da-Tong Qi, and Yong-Hai Zhang

*Mourad Dougdag and Mohamed Ouali*

Two-Dimensional Numerical Analyses of Acoustophoresis Phenomena in Microfluidic Channel With Microparticle-Suspended, Viscous, Moving Fluid Medium

*Zhongzheng Liu, Arum Han, and Yong-Joe Kim*

Dynamic Response of a Beam With Absorber Exposed to a Running Force: Fractional Calculus Approach

*Ibrahim Abu-Alshaikh, Anas N. Al-Rabadi, and Hashem S. Alkhaldi*

Comparison of Piezoelectric Structural Damping Based on Velocity Controlled Switching and Pulse Width Modulation Switching Circuits

*Dejan Vasic, Yuan-Ping Liu, and François Costa*

**SYMPOSIUM ON PHONONIC CRYSTALS AND ACOUSTIC METAMATERIALS**

Negative Index Phononic Crystals Made of Metal Based Microstructure

*Anne-Christine Hladky-Hennion, Charles Croënne, Jérôme Vasseur, Bertrand Dubus, and Andrew Norris*

Effective Dynamic Properties of Microstructured Heterogeneous Materials

*Ankit Srivastava and Sia Nemat-Nasser*

Use Multi-Objective Optimization for Designing Cloaks With Acoustic and Elastic Materials

*Chunyan Bao and Liang-Wu Cai*

Focusing Properties of Axisymmetric Acoustic Metamaterials Made of Toroidal Scatterers

**VIBRATION AND ACOUSTIC MEASUREMENT TECHNIQUES AND FACILITIES**

Development of a Numerical Model to Predict Residual Stress Based on Acoustoelastic Effect Using Critically Refracted Ultrasonic Longitudinal (LCR) Waves

*Malur N. Srinivasan, Shrijwal Joshi, and Jiang Zhou*
**VIBROACOUSTIC CHARACTERIZATION, MONITORING, AND DAMAGE DETECTION**

**IMECE2012-85365** ................................................................. 409  
Development of Damage Reconstruction Techniques From Impulsive Events Based on Measurements Made Remotely  
*Oluwafemi A. Olugboji and Jack M. Hale*

**IMECE2012-85485** ................................................................. 417  
An Inverse Algorithm for Resonance Inspection  
*Kevin Lai, Wei Xu, and Xin Sun*

**IMECE2012-86098** ................................................................. 423  
Investigation of Rub-Impact Setup Supported on Flexible Multi-Bearing Rotor  
*Abdulazim H. Falah, Emad A. Khoshid, and Khalid A. Alhazza*

**IMECE2012-86731** ................................................................. 429  
On the In-Pipe Measurements of Acoustic Signature of Leaks in Water Pipelines  
*Y. A. Khulief and A. Khalifa*

**IMECE2012-89340** ................................................................. 437  
Neuron-Fuzzy-Based Acoustic Emission Output Parameters Prediction for Rotary Device Monitoring  
*A. Refahi Oskouei and M. Esmaeili*

**IMECE2012-89376** ................................................................. 443  
Experimental Comparison of GCC-Based Time Delay Estimation Methods for Ultrasonic Leak Detection in Compressed Air System  
*Pingping Liao, Maolin Cai, and Xiangheng Fu*

**VIBROACOUSTICS-BASED ENERGY HARVESTING**

**IMECE2012-85785** ................................................................. 451  
Piezoelectric Vibration Energy Harvester: Design and Prototype  
*Bogdan Cojocariu, Anthony Hill, Alejandra Escudero, Han Xiao, and Xu Wang*

**IMECE2012-85996** ................................................................. 461  
Develop a Nonlinear Oscillating System to Harvest Vibration Energy  
*Longhan Xie, Yupei Yao, and Ruxu Du*

**IMECE2012-86989** ................................................................. 467  
Acoustic Energy Harvesting Using Quarter-Wavelength Straight-Tube Resonator  
*Bin Li, Andrew J. Laviage, Jeong Ho You, and Yong-Joe Kim*

**IMECE2012-89496** ................................................................. 475  
High-Power Operation of Acoustic-Electric Power Feedthroughs Through Thick Metallic Barriers  
*K. R. Wilt, H. A. Scarton, G. J. Saulnier, T. J. Lawry, and J. D. Ashdown*

**Author Index** ........................................................................ 483
