Preface
Introduction

Part I Hip resurfacing designs

1 The advanced ceramic coated implant systems (ACCIS) hip resurfacing prosthesis
   K. J. Hamelink and R. G. Wöringer
   1.1 Introduction
   1.2 Information about the advanced ceramic coated implant systems (ACCIS) prostheses
   1.3 Recommended advanced ceramic coated implant systems (ACCIS) surgical technique
   1.4 Metal ion measurements in patients after advanced ceramic coated implant systems (ACCIS) hip arthroplasty
   1.5 Conclusion
   1.6 Sources of further information and advice
   1.7 References

2 The ADEPT® hip resurfacing prosthesis
   M. Tuke
   2.1 Introduction
   2.2 Design rationale
   2.3 Surgical technique
   2.4 Clinical results
   2.5 References

3 The DePuy Articular Surface Replacement (ASR™) hip resurfacing prosthesis
   K. De Smet
   3.1 Introduction
   3.2 Design rationale
   3.3 Instrumentation
   3.4 Clinical results
   3.5 Summary
   3.6 References

4 The Birmingham Hip Resurfacing (BHR) prosthesis
   P. Campbell and K. De Smet
   4.1 Introduction
   4.2 Design rationale
   4.3 Surgical technique
   4.4 Clinical results
   4.5 References

11.3 Surgical technique 60
11.4 Clinical results 63
11.5 References 64

12 The MITCH hip resurfacing prosthesis 65
D. Young and J. Burke

12.1 Introduction 65
12.2 Design rationale 65
12.3 Clinical results 67
12.4 Acknowledgements 68

13 The BIOMET ReCap hip resurfacing prosthesis 69
H. P. Delpoort

13.1 Introduction 69
13.2 Design rationale 70
13.3 Surgical technique 73
13.4 Clinical results 76
13.5 References 76

14 The ROMAX® hip resurfacing prosthesis 78
S. Giannini, F. Laude, M. Menge, H. Sadri and F. Scardari

14.1 Introduction 78
14.2 Design rationale 79
14.3 Surgical technique 82
14.4 Clinical results 83
14.5 References 83

15 The Tornier DynaMoM hip resurfacing prosthesis 85
J. Girard

15.1 Introduction 85
15.2 Design rationale 85
15.3 Surgical technique 87

16 Design issues and comparison of hip resurfacing prostheses 88
K. De Smet and C. Van Der Straeten

16.1 Introduction 88
16.2 General issues: component identification and metallurgy 88
16.3 Component sizes 90
16.4 The acetabular cup design 91
16.5 The femoral head design 99
16.6 Comparing hip resurfacing designs 103
16.7 References 108

Part II Clinical follow-up 111

17 Clinical follow-up of the hip resurfacing patient 113
K. De Smet

17.1 Introduction 113
17.2 Pre-operative examination 113
17.3 Post-operative examination 116
17.4 Treatment options for symptomatic hip resurfacing patients 126
17.5 References 127

Contents

18 Acoustic phenomena in hip resurfacing
W. L. Walter, C. Esposito, K. De Smet and C. Van der Straeten

18.1 Introduction: the incidence of noise in hip resurfacing 128
18.2 Acoustic phenomena in resurfacings at the Specialist Orthopaedics Group, Sydney, Australia 129
18.3 Acoustic phenomena in resurfacings at the ANCA Clinic, Ghent, Belgium 131
18.4 References 135

19 Rehabilitation of patients after hip resurfacing
E. Van Haekle and K. De Smet

19.1 Introduction 136
19.2 Post-operative physical therapy whilst in hospital 136
19.3 Physical therapy after discharge from the hospital 138
19.4 Milestones in rehabilitation 139
19.5 Patient activities after hip resurfacing 139

20 The use of radiography to evaluate hip resurfacing
K. De Smet, G. Grammatopoulos and A. Calisti

20.1 Introduction: indications for resurfacing 140
20.2 Indications/contra-indications for resurfacing: osteopenia, osteoporosis, osteoarthritis and osteophytes 141
20.3 Assessing femoral abnormalities 143
20.4 Assessing acetabular abnormalities 146
20.5 Assessing other abnormalities 151
20.6 Using radiographs in pre-operative templating 153
20.7 Using radiographs to analyse hip implants 163
20.8 Evaluation of the acetabular cup 166
20.9 Evaluation of the femoral component 169
20.10 Assessing hip resurfacing pathology from X-ray analysis 176
20.11 Conclusions 188
20.12 References 208

21 The use of bone scintigraphy to evaluate hip resurfacing
K. De Smet and A. Calisti (with the help of D. Wulfrank and A. Blaibon)

21.1 Introduction 209
21.2 Bone scans in the normal hip joint 210
21.3 Bone scans in hip disease 211
21.4 Bone scans in total hip arthroplasty (THA) 213
21.5 Bone scans in resurfacing hip arthroplasty (RHA) 216
21.6 Bone scans in adverse tissue reactions 218
21.7 Conclusion 219
21.8 References 221

22 The use of ultrasound (US) to evaluate hip resurfacing (HR)
S. Ostilere and J. Hauptfleisch

22.1 Introduction 222
22.2 Advantages and disadvantages of ultrasound (US) 222
22.3 The role of ultrasound (US) in assessing painful hip resurfacing (HR) 223
22.4 Ultrasound (US) techniques 223
22.5 Detection of reactive mass ('pseudotumour') 224
22.6 Detection of other pathologies 224
22.7 Case study 226
22.8 References 232
23 The use of computerized tomography (CT) to evaluate hip resurfacing
M. F. Hoomsma, H. B. Ettema and C. Van Der Straeten
23.1 Introduction: the science of computerized tomography (CT) 233
23.2 The use of computerized tomography (CT) scans for pre-operative evaluation and planning of hip resurfacing 233
23.3 The use of computerized tomography (CT) scans to evaluate hip resurfacing 234
23.4 Case studies from the Isala Clinic, Zwolle, The Netherlands 240
23.5 Conclusions 240
23.6 References 241

24 The use of magnetic resonance imaging (MRI) to evaluate hip resurfacing
C. Van Der Straeten
24.1 Introduction: the science of magnetic resonance imaging (MRI) 242
24.2 Distinguishing normal and pathological structures 243
24.3 Magnetic resonance imaging (MRI) evaluation of bone 244
24.4 Magnetic resonance imaging (MRI) evaluation of soft tissues 246
24.5 Case studies 248
24.6 Conclusions 251
24.7 Acknowledgement 251
24.8 References 251

25 The use of positron emission tomography (PET) to evaluate hip resurfacing
C. Van Der Straeten and J. Girard
25.1 Introduction: the basic science of positron emission tomography (PET) 253
25.2 The use of positron emission tomography (PET) scans to evaluate hip resurfacing 253
25.3 Case studies 255
25.4 Conclusion 260
25.5 References 260

26 The use of dual energy X-ray absorptiometry (DEXA) to evaluate hip resurfacing
P. Campbell and C. Van Der Straeten
26.1 Introduction 261
26.2 Analyzing bone using dual energy X-ray absorptiometry (DEXA) 262
26.3 The clinical application of dual energy X-ray absorptiometry (DEXA) in hip resurfacing 263
26.4 Using dual energy X-ray absorptiometry (DEXA) to monitor post-operative changes in bone density 264
26.5 Bone mineral density (BMD) in osteonecrosis of the femoral head 265
26.6 References 266

27 The use of metal ion level measurements to evaluate hip resurfacing
R. Gill, P. Campbell and K. De Smet
27.1 Introduction 267
27.2 Wear particles from the use of cobalt-chrome alloys in hip resurfacing 267
27.3 Methodological issues in measuring metal ion concentration 268
27.4 Metal ion levels after metal-on-metal (MoM) hip replacement 268
27.5 Factors affecting metal ion levels 270
27.6 Conclusion: the diagnostic use of metal ion measurement 277
27.7 References 277

28 The practical application of metal ion level measurement in evaluating hip resurfacing
K. De Smet and C. Van Der Straeten
28.1 Introduction 279
28.2 Protocol for metal ion measurement 279
28.3 Metal ion concentration units, sample sources and conversion factors 281

© Woodhead Publishing Limited, 2013
28.4 Interpretation of metal ion levels: normal cobalt and chromium levels and safe upper limits for unilateral and bilateral metal-on-metal (MoM) hip resurfacing arthroplasties 282
28.5 The evolution of metal ion levels during run-in and steady-state wear in hip resurfacing 289
28.6 Metal ion levels with different hip resurfacing designs 292
28.7 The influence of patient activity on metal ion levels 296
28.8 Toxicity of metal ions 297
28.9 Case studies 306
28.10 Conclusion 315
28.11 References 316

Part III Operating techniques 319

29 Comparing surgical techniques in hip resurfacing
K. De Smet and C. Van Der Straeten

29.1 Introduction 321
29.2 Comparing posterior, modified lateral, trochanteric and anterior approaches 321
29.3 References 322

30 Surgical technique in hip resurfacing: the modified posterior approach
K. De Smet

30.1 Introduction 323
30.2 Patient positioning 323
30.3 Surgical exposure 323
30.4 Femoral sizing 325
30.5 Acetabular procedure 325
30.6 Femoral preparation 327
30.7 Implantation and closure 331

31 Surgical technique in hip resurfacing: the anterior approach
P. E. Beaule

31.1 Introduction: rationale for the anterior approach 334
31.2 Patient positioning and surgical exposure 334
31.3 Femoral head preparation 335
31.4 Acetabular component preparation 336
31.5 Post-operative recovery 336
31.6 Clinical experience with the anterior approach 337
31.7 References 337

32 Tips and tricks for successful hip resurfacing
K. De Smet

32.1 Introduction: general issues 339
32.2 Bilateral surgery 340
32.3 Patient positioning 341
32.4 Exposure 341
32.5 Preserving soft tissue 343
32.6 Acetabular procedure 344
32.7 Femoral procedure 345
32.8 Resurfacing in hip dysplasia 351
32.9 References 353

33 Surgical instruments in hip resurfacing
K. De Smet

33.1 Introduction 355

© Woodhead Publishing Limited, 2013
38 Case studies of femoral loosening and femoral head collapse in hip resurfacing 444
P. Campbell and K. De Smet

38.1 Introduction 444
38.2 Femoral loosening/head collapse: Case 1 444
38.3 Femoral loosening/head collapse: Case 2 446
38.4 Femoral loosening/head collapse: Case 3 446
38.5 Femoral loosening/head collapse: Case 4 449
38.6 Femoral loosening/head collapse: Case 5 451
38.7 References 453

39 Case studies of acetabular loosening in hip resurfacing 454
P. Campbell and K. De Smet

39.1 Introduction 454
39.2 Surface coatings for acetabular fixation 454
39.3 Acetabular loosening: Case 1 460
39.4 Acetabular loosening: Case 2 461
39.5 Acetabular loosening: Case 3 461
39.6 Acetabular loosening: Case 4 463
39.7 References 465

40 Case studies of acetabular malposition and high wear in hip resurfacing 466
P. Campbell and K. De Smet

40.1 Introduction 466
40.2 Acetabular malposition/high wear: Case 1 466
40.3 Acetabular malposition/high wear: Case 2 469
40.4 Acetabular malposition/high wear: Case 3 470
40.5 Acetabular malposition/high wear: Case 4 472
40.6 Acetabular malposition/high wear: Case 5 475
40.7 References 477

41 Case studies of suspected metal allergy in hip resurfacing 479
P. Campbell and K. De Smet

41.1 Introduction 479
41.2 Aseptic lymphocyte-dominated vasculitis-associated lesion (ALVAL) 480
41.3 Suspected metal allergy: Case 1 480
41.4 Suspected metal allergy: Case 2 482
41.5 Suspected metal allergy: Case 3 484
41.6 References 487

Part V General hip resurfacing issues 489

42 The patient experience of hip resurfacing 491
K. De Smet, P. Bolaffio, J. Buch, Patient X, P. Gabriel and D. Dixon

42.1 Introduction 491
42.2 Patient testimonial: combined revision of a malpositioned hip resurfacing and a primary hip resurfacing (Paolo Bolaffio) 491
42.3 Patient testimonial: hip resurfacing and the experience of infection (John Buch) 494
42.4 Patient testimonial: the experience of metal allergy (Patient X) 498
42.5 Patient testimonial: bilateral hip resurfacing (Peggy Gabriel) 499
42.6 Patient testimonial: bilateral hip resurfacing (Dru Dixon) 503
