Conference Committees .............................................................................. v  
Keynote Speech ............................................................................................ vi  

## Technical Session 1: Application

Hardware-assisted virtualization targeting MIPS-based SoCs ......................... 2
  Alexandra Aguiar, Carlos Moratelli, Marcos Sartori and Fabiano Hessel  
Buffer Length and Traffic Influence on Three-Dimensional NoCs Performance ................................................. 9
  Yan Ghidini, Thais Webber, Edson Moreno, Fernando Grando, Rubem Fagundes and César Marcon  
A Model-Based I/O Interface Synthesis Framework for the Cross-Platform Software-Model ............................. 16
  Baekgyu Kim, Linh T.X. Phan, Insup Lee and Oleg Sokolsky  
Case study: deployment of the 2D NoC on 3D for the generation of large emulation platforms .......................... 23
  Virginie Fresse, Zhiwei Ge, Junyan Tan and Frédéric Rousseau  
A Spectrum of MPSoC Models for Design and Verification Spaces Exploration ............................................. 30
  Carlos Petry, Eduardo Wächter, Fernando Moreas, Ney L. V. Calazans and Guilherme Castilhos  
  Nico Adler, Martin Hillenbrand and Klaus D. Müller-Glaser

## Session 2: Performance evaluation

Parity-Based Mono-Copy Cache for Low Power Consumption and High Reliability ................................................. 44
  Ihsen Alouani, Smail Niar, Fadi Kurdahi and Mohamed Abid  
A Cycle-level Parallel Simulation Technique Exploiting both Space and Time Parallelism .................................. 50
  Dukyoung Yun, Youngmin Yi, Sungchan Kim and Soonhoi Ha  
An ArchC approach for automatic energy consumption characterization of processors ..................................... 57
  Marcelo Guedes, Rafael Auler, Edson Borin and Rodolfo Azevedo  
Automatic Congestion Detection in MPSoC Programs Using Data Mining on Simulation Traces ........................ 64
  Sofiane Lagrava, Alexandre Termier and Frédéric Pétrot  
Design For Prototyping of a Parameterizable Cluster-Based Multi-Core System-on-Chip on a Multi-FPGA Board ........................................................................................................... 71
  Qingshan Tang, Matthieu Tuna and Habib Mehrez

## Session 3: Model-Based Techniques

HySon: Set-based Simulation of Hybrid Systems ............................................. 79
  Olivier Bouissou, Samuel Mimram and Alexandre Chapoutot  
Automatic Generation of Observers from MARTE/CCSL ................................................................. 86
  Frédéric Mallet  
Integrating semantic properties within a Petri net based scheduling tool ......................................................... 93
  Christian Potsing and Annie Geniet  
Seamless Model-Based Design and Deployment of Wireless Networked Systems ....................................... 100
  Tobias Schwalb, Tobias Gädcke, Johannes Schmid and Klaus D. Müller-Glaser
