2010 Fifth IEEE International Symposium on Service Oriented System Engineering

(SOSE 2010)

Nanjing, China
4 – 5 June 2010
Message from the General Chair.................................................................................x
Message from the Program Chairs...........................................................................xi
Committee Lists.........................................................................................................xii
Program Committee..................................................................................................xiii
Reviewers....................................................................................................................xv

Keynote Address

Metamorphic Testing: A Simple Approach to Alleviate the Oracle Problem ..............1
Tsong Yueh Chen
Information-Led Transformation of Regional Chinese Enterprises .........................3
Kuo-Wei Hwang
Assured Service-Oriented System Engineering Technologies and Applications ..........4
Kinji Mori
Let’s Walk Out of the Cloud .....................................................................................5
Ming-Chien Shan
A Vision and Information Technologies for Intelligent Society ...............................6
Sanya Uehara

Track 1: Service-Oriented System Engineering

Session 1

GOS: A Global Optimal Selection Approach for QoS-Aware Web Services
Composition ................................................................................................................7
Mu Li, Ting Deng, Hailong Sun, Huipeng Guo, and Xudong Liu
A Survey of Context Aware Web Service Discovery: From User’s Perspective ..........15
Wenge Rong and Kecheng Liu
PASCAL: A Protocol-Based Approach for Service Composition and Dependable Optimization .......................................................... 23
   Huipeng Guo, Xudong Liu, Zongxia Du, Jianxin Li, and Mu Li
MobiCloud: Building Secure Cloud Framework for Mobile Computing and Communication ...................................................... 27,
   Dijiang Huang, Xinwen Zhang, Myong Kang, and Jim Luo
Modeling Service Composition Using Priced Probabilistic Process Algebra .......................................................... 35
   Lizhong Tu, Fangxiong Xiao, and Zhiqiu Huang

Session 2

A Proactive Approach to Load Balancing of Workflow Execution in a SaaS Environment ...................................................... 39
   Liyong Zhang, Yan Wen, and Yanbo Han
   Zheng Li and Jacky Keung
A Pattern-Oriented Impact Analysis Approach for Mashups .................................................................................................................. 55
   Weilong Ding, Guiling Wang, Yanbo Han, and Jing Wang
Automated Semantic Web Service Composition Based on Enhanced HTN .................................................................................... 59
   Yihong Xiao, Xianzhong Zhou, and Xiaopeng Huang

Session 3

WordNet-powered Web Services Discovery Using Kernel-Based Similarity Matching Mechanism ............................................................................... 64
   Lei Chen, Geng Yang, Dongrui Wang, and Yingzhou Zhang
Constructing Service Network via Classification and Annotation .................................................................................................. 69
   Hui Wang, Zhiyong Feng, Shizhan Chen, Jinna Xu, and Yang Sui
A Classification of Enterprise Service-Oriented Architecture .......................................................................................................... 74
   Longji Tang, Jing Dong, Yajing Zhao, and Wei-Tek Tsai
An Approach to Modeling Service-Oriented Solutions Based on CBD1-SAE Metamodel for SOA 2.0 ..................................................................................... 82
   Zhiyi Ma, Lianghuan Kang, and Hongjie Chen
Success Measurement of Web Services with BPEL ......................................................................................................................... 86
   Yixiang Chen and Xinxing Wu
Data Provenance Architecture Based on Semantic Web Services ............................................................................................................ 91
   Guoyan Xu and Zhijian Wang

Track 2: Service-Oriented Software Engineering
Session 4

Flexible-Matching Data-Comparison Tool with the Cloud Applications ..........................................................95
Wei-Tek Tsai, Xin Sun, and Qihong Shao

A Refinement Checking Method of Web Services Composition .................................................................103
Guangquan Zhang, Mei Rong, Yali He, Xueyang Zhu, and Rongjie Yan

An Ontology-Based Resource-Oriented Information Supported Framework towards RESTful Service Generation and Invocation .................................................................107
Wei Zhang, Lihong Jiang, and Hongming Cai

A Formal Modeling for Component Behaviors Based on Event Track .........................................................113
Zhongyu Chen, Jichang Zhang, Huaikou Miao, and Zhenghu Guo

Beam Pattern Optimization Using MVDR and Simulated Annealing .........................................................117
Yu Yanli and Wang Yingmin

Session 5

A Model for Web Service Coordination in Long-Running Transactions .....................................................121
Sun Meng and Farhad Arbab

An Approach to Semantic Web Services Publication and Discovery Based on OWL Ontology Inference .................................................................129
Si Huayou, Ni Yulin, Chen Zhong, Yu Lian, and Zhao Yun

Research on Coupling Risk of System of Systems ......................................................................................137
Peng Di, Fang Li, Zhi-Cheng Chen, and Wei Huang

Enriching Descriptions for Public Web Services Using Information Captured from Related Web Pages on the Internet ..................................................................................141
Lijie Wang, Fei Liu, Liangjie Zhang, Ge Li, and Bing Xie

Robot as a Service in Cloud Computing ..................................................................................................151
Yinong Chen, Zhihui Du, and Marcos Garcia-Acosta

Towards a Graph Grammar Based Verification Approach for Runtime Constrained Evolution of Service-Oriented Architectures ..................................................................................159
Yongwang Zhao, Bingyang Zhao, Min Liu, Chunyang Hu, and Dianfu Ma

Session 6

An Adaptive Service Monitor Providing Runtime Extensibility ..................................................................165
Kaiyuan Qi, Yanbo Han, Zhuofeng Zhao, and Jun Fang

Test Case Prioritization for Web Service Regression Testing ..................................................................173
Lin Chen, Ziyuan Wang, Lei Xu, Hongmin Lu, and Baowen Xu

C4ISR Capability Analysis Based on Service-Oriented Architecture .......................................................179
Ying Zhang, Zhihui Wang, Xiaoming Liu, and Li Chen

Testing as a Service over Cloud .................................................................................................................181
Lian Yu, Wei-Tek Tsai, Xiangji Chen, Linqing Liu, Yan Zhao, Liangjie Tang, and Wei Zhao

Program Slicing Based Web-Service Generation and Composition ........................................................189
Wei Fu, Yingzhou Zhang, Wei Han, Xiaowei Fan, and Geng Yang
Complexity Analysis for Petri Net-Based Business Process in Web Service Composition ................................................................. 193

Chengying Mao

Track 3: Applications and Industry Experiences

Session 7

A Framework for Web Service Discovery Based on Ontology Similarity .................................................................................................................. 197

Lianjie Chen and Lei Xu

An Agent-Based Personalized Active Service Model .............................................................................................................................. 202

Yan Jun, Zhu Liang, Su Zhenglian, and Ling Haifeng

A Methodology to Developing Context-Aware Pervasive Applications ............................................................................................................ 206

Hwai-Jung Hsu, Shang-Yu Wu, and Feng-Jian Wang

On an Automatic Simulation Environment Customizing Services for Cloud Simulation Center .................................................................................... 214

Wenjie Liu, Zhihui Du, Yinong Chen, Xu dong Chai, and Xiaoying Wang

Efficient I/O Intensive Multi Tenant SaaS System Using L4 Level Cache ........................................................................................................ 222

Hironao Takahashi, Kinji Mori, and Hafiz Farooq Ahmad

Session 8

Evaluating a Service-Oriented Travel Portal .................................................................................................................................................. 229

Yinsheng Li, Han Chen, Mu Zhu, and Jen-Yao Chung

A Framework for QoS and Power Management in a Service Cloud Environment with Mobile Devices ........................................................................... 236

Yunqi Ye, Nisha Jain, Longsheng Xia, Suhas Joshi, I-Ling Yen, Farokh B. Bastani, Kenneth L. Cureton, and Mark K. Bowler

Construction of a Trusted SaaS Platform ...................................................................................................................................................... 244

Chaoliang Zhong, Jun Zhang, Yingju Xia, and Hao Yu

A Framework for Integrating Human Processes with Business Artifacts ........................................................................................................ 252

Qiu Zongyan, Peng Liyong, and Yang Hongli

Implementation of CAE Simulation Platform for Lightweight Automobile Body Design ......................................................................................... 260

Jian Li, Liming Fu, Siqun Ma, Xuefei Huang, and Xianjie Li

Session 9

Automated Composition of Middleware Management Services ......................................................................................................................... 264

Zhao Liu, Xuanzhe Liu, Gang Huang, Teng Teng, Yong Zhang, and Honggang Yuan

Service Encapsulation for Middleware Management Interfaces .................................................................................................................... 272

Xing Chen, Xuanzhe Liu, Xiaodong Zhang, Zhao Liu, and Gang Huang

Modeling and Reliability Prediction of WS-CDL Based Service Composition, a Petri-Net-Based Approach ........................................................................ 280

Yi Liu, Xiuwu Wang, Yunni Xia, and Tianhao Sun
