2011 IEEE 6th International Symposium on Service Oriented System Engineering

(SOSE 2011)

Irvine, California, USA
12-14 December 2011

Editors:

J. Gao
X. Lu

M. Younas
H. Zhu
Table of Contents

Message from General Chairs ................................................................. vii
Message from Program Chairs ................................................................. viii
Organizing Committee ............................................................................. ix
Program Committee ................................................................................ x
Additional Reviewers .............................................................................. xi

Session 1: Service Testing

• A Survey of Cloud Testing Tools ......................................................... 1
  Xiaoying Bai, Muyang Li, Bin Chen, Wei Tek Tsai and Jerry Gao
• Automatically Generating Realistic Test Input From Web Services ...... 13
  Mustafa Bozkurt and Mark Harman
• Using structural testing information to support monitoring activities .... 25
  Marcelo Medeiros Eler, Marcio Delamaro and Paulo Masiero

Session 2: Modelling

• Unifying Domain Ontology with Agent-Oriented Modeling of Services ... 31
  Zhi Jin and Hong Zhu
• Event Driven Architecture Modelling and Simulation ......................... 43
  Tony Clark and Balbir Barn
• How Can Service Oriented Systems Make Beneficial Use of Model Driven
  Architecture and Aspect Paradigm? ...................................................... 55
  Hatim Hafidi, Mahmoud Nassar and Abdelaziz Kriouile

Session 3: Cloud Engineering

• SaaS Performance and Scalability Evaluation in Clouds .................... 61
  Jerry Gao, Pushkala Pattabhiraman, Xiaoying Bai and W. T. Tsai
• Building High-speed Roads: Improving Performance of SOAP Processing for Cloud
  Services ................................................................................................. 72
  Huang Liu, Xudong Liu, Jianxin Li, Yongwang Zhao and Zhuqing Li
• Evaluation of Server Virtualization Technologies for Green IT ............ 79
  Lu Liu, Osama Masafery and Jianxin Li
• A Self-management Approach for Service Developers of PaaS .......... 85
  Hao Wei, Jin Shao, Bang Liu, Haiwen Liu, Qianxiang Wang and Hong Mei
Session 4: Service Discovery, Selection and Composition

- Unified Management of Control Flow and Data Mismatches in Web Service Composition ............................................................................................................93
  Syed Adeel Ali, Partha Roop, Ian Warren and Zeeshan Ejaz Bhatti
- A New Approach to QoS Driven Service Selection in Service Oriented Architectures ...............................................................................................................102
  Valeria Cardellini, Valerio Di Valerio, Vincenzo Grassi, Stefano Iannucci and Francesco Lo Presti
- A Ranking Method for Social-Annotation-Based Service Discovery ..............................................................................................................................114
  Duo Qu, Xudong Liu, Hailong Sun and Zicheng Huang

Session 5: Application and Education

- Service-Orientation in Computing Curriculum .................................................................................................................................122
  Yinong Chen and Wei-Tek Tsai
- Scientific Workflows Composition and Deployment on SOA Frameworks ..............................................................................................................134
  Yan Liu, Ian Gorton, Adam Wynne and Anand Kulkarni
- Adapting User Interface of Service-Oriented Rich Client to Mobile Phones ...........................................................................................................140
  Gang Huang and Daimeng Wang
- An Optimization Process for Adaptation Space Exploration of Service-oriented Applications ........................................................................................................146
  Raffaela Mirandola, Pasqualina Potena and Patrizia Scandurra

Session 6: Business Process

  Jorge L. C. Sanz
- Service Identification in Aspect-Oriented Business Process Models ................................................................................................................164
  Alexandre Souza, Claudia Capelli, Flavia Santoro, Leonardo Azevedo, Julio Leite and Thais Batista
- Multi-View Service-Oriented Rule Merged Business Process Modeling Framework ..............................................................................................175
  Sinan Mei, Hongming Cai and Fenglin Bu

Session 7: Service Testing 2

- Model-based Testing of Web Service Compositions ..............................................................................................................................181
  Fevzi Belli, Andre Endo, Michael Linschulte and Adenilso Simao
- An automated approach to robustness testing of BPEL orchestrations .............................................................................................................193
Sylvia Ilieva, Denitsa Manova, Ilina Manova, Cesare Bartolini, Antonia Bertolino and Francesca Lonetti

- More Testable Service Compositions by Test Metadata .................................................. 204
  Marcelo Medeiros Eler, Antonia Bertolino and Paulo Masiero

Session 8: QoS 1: Security, Privacy and Safety

- A survey of personal privacy protection in public service mashups .................................. 214
  Rob Smith and Jie Xu
- Role-Based Integrated Access Control and Data Provenance for SOA Based Net-Centric Systems ................................................................. 225
  Wei She, I-Ling Yen, Farokh Bastani, Bao Tran and Bhavani Thuraisingham
- Autonomous Continuous Target Tracking Technology for Safety in Air Traffic Radar Systems Network ...................................................... 235
  Tadashi Koga, Xiaodong Lu and Kinji Mori

Session 9: Enterprise Transformation and IT Interplay

  Chaitanya Shivade, Farha Mukri, Rajiv Ramnath and Jay Ramanath
  Mingfeng Tan and Xiao Su
- Provenance: Current Directions and Future Challenges for Service Oriented Computing ........ 262
  Colin Venters, Paul Townend, Lydia Lau, Karim Djemame, Vania Dimitrova, Alison Marshall, Jie Xu, Charlie Dibsdale, Nick Taylor, Jim Austin, John Mcavoy, Martyn Fletcher and Stephen Hobson

Session 10: Experiences and Case Studies

- YI Cloud: Improving user privacy with secret key recovery in cloud storage .................. 268
  Zheng Huang, Qiang Li, Dong Zheng, Kefei Chen and Xiangxue Li
- Decoupling variability management in multi-tenant SaaS applications .......................... 273
  Ali Ghaddar, Dalila Tamzalit and Ali Assaf
- Byzantine Fault-Tolerance in Federated Cloud Computing ............................................ 280
  Peter Garraghan, Paul Townend and Jie Xu

Session 11: Service Specification

- A Process Algebra for Environment-based Specification of Web Services ...................... 286
  Lixing Li, Zhi Jin and Ge Li
• A High-Level Model-Checking Tool for Verifying Electronic Contracts
  Abubkr Abdelsadiq, Carlos Molina-jimenez and Santosh Shrivastava
  297

• Transforming dynamic behavior specifications from Activity Diagrams to BPEL
  Nasser Mousa Faleh Mustafa and Gregor V. Bochmann
  305

• Evaluating Services based on Ontology QoS Model
  Guang Chen, Xiaoying Bai, Xiaofei Huang, Muyang Li and Lizhu Zhou
  312

Session 12: QoS 2: Interoperability and Compatibility

• Business Document Interoperability as a Service
  Christian Pichler, Christian Huemer and Manuel Wimmer
  318

• A Quality of Service Framework for Dependability in Large-Scale Distributed Systems
  Peter Bull, Lin Guan, Iain Phillips and Alan Grigg
  327

• Checking Compatibility of Context-aware Service Protocols
  Chushu Gao and Jun Wei
  335
