Design of clothing manufacturing processes
A systematic approach to planning, scheduling and control

Jelka Geršak

The Textile Institute

# Contents

*Woodhead Publishing Series in Textiles*  
*Preface*  

## 1 Clothing classification systems  
1.1 Introduction  
1.2 General clothing classification  
1.3 Harmonised clothing classification systems  
1.4 Classification of functional clothing  
1.5 Conclusions  
1.6 References  

## 2 Clothing sizing systems  
2.1 Introduction  
2.2 Clothing size and designation systems: a chronological review  
2.3 European and international sizing systems  
2.4 ISO clothing sizing systems  
2.5 European designation of clothing sizes  
2.6 The JUS clothing sizing system  
2.7 Conclusions  
2.8 References  

## 3 Key issues in developing a garment collection  
3.1 Introduction  
3.2 New product development  
3.3 Garment collection development  
3.4 Developing the concept for a new collection  
3.5 Collection development management and control  
3.6 Design and manufacturing requirements for a collection  
3.7 Design aspects of functional protective clothing: a case study  
3.8 Fashion trade fairs and garment collections

3.9 Conclusions 83
3.10 References 83

4 Planning and organisation of clothing production 87
4.1 Introduction 87
4.2 Production planning and organisation within a company 88
4.3 Clothing-design analysis and activity planning 91
4.4 Key documentation 93
4.5 Conclusions 102
4.6 References 103

5 Planning of clothing design, pattern making and cutting 105
5.1 Introduction 105
5.2 Constructing garment patterns 105
5.3 Pattern-pieces and their preparation 107
5.4 Pattern cutting-markers 114
5.5 Designating cutting-markers 118
5.6 Defining fabric and other parameters 118
5.7 Technological requirements when arranging pattern-pieces within a cutting-marker 130
5.8 Cutting-marker efficiency 133
5.9 Fabric losses outside the cutting-marker 138
5.10 Determining fabric consumption 141
5.11 Conclusions 143
5.12 References 143

6 Planning clothing manufacturing 145
6.1 Introduction 145
6.2 Analysis of clothing manufacture requirements and selection of appropriate equipment 148
6.3 Joining technologies 148
6.4 Work analysis 157
6.5 Identifying work methods 160
6.6 Selecting processing equipment 168
6.7 Types of sewing machine 169
6.8 Determining standard time 182
6.9 Planning manufacturing operations 186
6.10 Planning clothing assembly 190
