# Contents

*Woodhead Publishing Series in Textiles* | ix  
*Preface* | xv  
*Note for students using this book* | xix  

1. **Introduction: classification and mechanisms of weaving machines** | 1  
1.1 **Introduction** | 1  
1.2 **Classification of weaving machines** | 2  
1.3 **Basic mechanisms of the weaving machine** | 4  
1.4 **Elastic system of fabric formation (ESFF)** | 5  
1.5 **Advantages and disadvantages of different weaving machines** | 15  
1.6 **Questions for self-assessment** | 15  
1.7 **References** | 16  

2. **Mechanisms of the weaving machine for warp release and warp tension control** | 17  
2.1 **Introduction: mechanisms of the weaving machine for warp release and warp tension control** | 17  
2.2 **Warp brakes** | 20  
2.3 **Warp regulators** | 24  
2.4 **Condition of the equilibrium of the mechanism of a moving back-rest** | 34  
2.5 **Stabilization of the mode of release and the tensioning of warp threads** | 35  
2.6 **Comparative analysis of brakes and regulators** | 36  
2.7 **Questions for self-assessment** | 37  
2.8 **References** | 39  

3. **Warp shedding in weaving: parameters and devices** | 40  
3.1 **Introduction: parameters of the shed** | 40  
3.2 **Elongation of warp threads in shedding** | 44  

© Woodhead Publishing Limited, 2013
3.3 The classification of shedding devices  49
3.4 Tappet shedding  49
3.5 Dobbies  54
3.6 The Jacquard machine  58
3.7 Comparative analysis of shedding devices  61
3.8 Questions for self-assessment  62
3.9 References  63

4 The supply of weft on the weaving machine  64
4.1 Introduction: the supply of weft on the weaving machine  64
4.2 Gauges for detecting the presence of weft on shuttle weaving machines  65
4.3 Battery type weft supply  67
4.4 Mechanisms for changing pirns  69
4.5 Safety devices of automatic pirn change  71
4.6 Change of hollow pirns  71
4.7 Change of shuttles  72
4.8 Multishuttle mechanisms  72
4.9 Weft supply on shuttleless weaving machines  76
4.10 Devices for measuring and control of weft tension  78
4.11 Questions for self-assessment  81
4.12 References  82

5 Weft insertion  83
5.1 Introduction: methods of weft insertion  83
5.2 Continuous insertion of weft by shuttle  88
5.3 Weft insertion by microshuttle  89
5.4 Weft insertion by projectile  92
5.5 Weft insertion by rapiers  95
5.6 Weft insertion by air and water jets  100
5.7 Pneumatic-rapier weft insertion  103
5.8 Weft insertion by an electromagnetic drive  106
5.9 Weft insertion by the inertial method  106
5.10 Comparative analysis of different methods of weft insertion  106
5.11 Questions for self-assessment  107
5.12 References  108

6 Woven fabric formation: principles and methods  109
6.1 Introduction: woven fabric formation  109
6.2 Fabric-forming mechanisms  112
6.3 Formation of the woven fabric cell  114
6.4 Parameters of woven fabric formation  116
