ENERGY AUDIT
THERMAL POWER, COMBINED CYCLE,
AND COGENERATION PLANTS

Y P Abbi

The Energy and Resources Institute
Contents

Foreword v
Preface vii
Acknowledgements ix

1. Energy Conservation in the Operation of Thermal Power Plants 1
   Abbreviations 5
   Bibliography 6

Section A – Design Concepts

2. Design Concepts of Steam Cycle Power Plants 9
   2.1 Introduction 9
   2.2 Thermodynamics of Steam Cycle 10
   2.3 Feedwater Heating 15
   2.4 Reheating of Steam 15
   2.5 Heat Rate of Steam Cycle and Gross Plant Heat Rate 17
   2.6 Sub-critical and Super-critical Systems 19
   2.7 Technical Description of Major Equipment/sub-systems 22
      Abbreviations 35
      Bibliography 36

3. Design Concepts of Cogeneration Plants 39
   3.1 Introduction 39
   3.2 Cogeneration Systems 39
      Abbreviations 51
      Bibliography 53

4. Design Concepts of Combined Cycle Power Plants 55
   4.1 Thermodynamics of Combined Cycle 55
## Contents

4.2 Technical Description of Major Sub-systems 60
4.3 Integrated Gasification Combined Cycle 67

*Abbreviations*

*Reference*

*Bibliography*

### Section B – Energy Audit of Steam Cycle Power Plants

5. **Perspectives of Energy Audits** 75
   5.1 Introduction 75
   5.2 Benefits: fuel savings and emission reduction 75
   5.3 Terms of Reference 86

*Abbreviations*

*Annexure*

*Bibliography*

*Website*

6. **Energy Audit of Boilers and their Auxiliaries** 97
   6.1 Introduction 97
   6.2 Evaluation of Efficiency of Boilers 98
   6.3 Air Heaters 120
   6.4 Coal/lignite Milling System 132
   6.5 Auxiliary Fuel Firing Audit 145
   6.6 Water Chemistry 147

*Abbreviations*

*References*

*Bibliography*

7. **Energy Audit of Steam Turbine Generators and their Auxiliaries** 153
   7.1 Steam Turbine Generator 153
   7.2 Condensers and Vacuum Pump 165
   7.3 Feedwater Heaters and Deaerators 172

*Abbreviations*

*References*

*Bibliography*
## Contents

8. Techno-economic Analysis of Energy Audit Results 189
   8.1 Introduction 189
   8.2 Plant Heat Rate and Specific Fuel Consumption 189
   8.3 Cost of Electricity Generation 190
   8.4 Techno-economic Analysis of Energy Conservation Measures 191
   8.5 Techno-economic Analysis for Blending of Coals 193
     *Abbreviations* 201
     *Bibliography* 202

9. Energy Audit of Plant Auxiliaries 203
   9.1 Introduction 203
   9.2 Pumps 203
   9.3 Fans 212
   9.4 Coal-handling Plant 218
   9.5 Ash-handling Plant 224
     *Abbreviations* 228
     *References* 228
     *Bibliography* 229

Section C – Energy Audit of Cogeneration and Combined Cycle Plants

10. Energy Audit of Steam Turbine-based Cogeneration Plants 233
    10.1 Methodology 233
    10.2 Case Study of a Cogeneration System with a Back-pressure Turbine 234
    10.3 Case Study of a Cogeneration System with a Double-extraction and Condensing Turbine 237
     *Abbreviations* 240
     *Bibliography* 242

11. Gas Turbine-based Cogeneration and Combined Cycle Plants 243
    11.1 Gas Turbine 243
    11.2 Heat Recovery Steam Generator 247
    11.3 Cogeneration Plant 250
xiv  Contents

11.4 Combined Cycle Power Plant  257
11.5 Integrated Gasification Combined Cycle Power Plant  260
   Abbreviations  262
   Bibliography  262

Index  265
