</table>
Financial risk identification and tracking in underground projects
A. Bourget & J. Blanchard

Application of a methodology for risk management on tunnel project
C. Gaillard, E. Humbert & A. Robert

Project management: why have computers made things harder? And what to do about it
A. Hodgkinson & J. Kaelin

Decision analysis for underground infrastructure using uncertain data and fuzzy scales
M. Thewes & S. Kamarianakis

A study of tunnelling records applying different excavation methods under similar geological conditions

Necessity of geotechnical data base and of reliable technical committee for subway constructions under severe conditions
T. Adachi & H. Mukai

Medical aspects of tunnelling with compressed air – swiss experience
J. Wendling, W. Ciscato, S. Brunswchiler & A. Strauss

Planning and documenting reinforcement system test programs
A.G. Thompson, E. Villaescusa & C.R. Windsor

Use of dispute review board’s on East Side Access
A. Thompson

Exploring the applicability of the Swiss Tunnel Code Principles in other jurisdictions
A. Marulanda

Evaluation of new trends in contracting and delivering underground infrastructure projects
A.P. Flately, G. Fortuna, G. Stack & I.S. Fogarasi

Presentation of the activity of the AFTES’ Working Group 25, “Cost control and contractual practice”

Comparison SIA – ITA on contractual practices
T. Huber, R. Schuerch, C. Bachofner, F. Henke, J. Leu, A. Zimmermann & M. Neuenschwander

Stockholm’s Cityline Project Odenplan and Vasatunnel – keys for the success of a cooperation contract
A. Groten & P.A. Erixon

CO2 emissions during the construction of a large diameter tunnel with a slurry shield TBM
Q.S. Li, L. Li & Y. Bai

Second phase of the Eastern European High speed railway line: Stretch 47 and the Saverne Tunnel
A. Cuccaroni, P.L. Veyron, A. Lacroix & M. Russo

Geological and geotechnical risk management for the A89 East motorway (France)
H. Tournery, F. Bultel & P. Bienfait

The Koralum tunnel project – 33 km to connect Europe
H. Wagner, K. Keiper, H. Hözl & K. Mussger

Planning and investigating geotechnical challenges for the Toronto Eglinton Scarborough Crosstown Project
J. Habimana, M. Manzari & A. Lionço
Construction of an underground ring in a historical center
P. Torta, M. Tutinelli, F. Forchino, S. Porrello & G. Soddu

Safety and other operational issues

Tunnel safety in new and old railway tunnels of Swiss Federal Railways SBB
J.D.S. Chabot

Scenario-oriented safety design of underground traffic infrastructures
M. Bettelini & S. Rigert

Disaster-prevention measures for Tokyo Metro tunnels
Y. Tashiro & Y. Mutou

Surveillance of road tunnels by means of fused detection systems
C. Thienert, A. Piazzolla, A. Lehan & K. Fehren-Schmitz

Optimum emergency management through physical simulation – findings from the EMILI research project
M. Bettelini, S. Rigert & N. Seifert

A proposed method to enhance safety in complex urban road tunnels, going beyond the mere implementation of the technical instructions dated August 25th, 2000 on the Safety of road tunnels in France
M. Tramblay, N. Melhem, G. Labrit, J. Blanchard & P. Merand

Fire design methodology for the CLEM7 Tunnel, Brisbane
E. Van Der Horst, J. Ashley, R. Wong & G. Charlesworth

Methodological approaches for tunnel classification according to ADR agreement
N. Vagiokas, A. Bletsas & R.M.L. Nelisse

On the use of flexible devices for controlling smoke propagation in road tunnels – perspectives and limitations
M. Bettelini & S. Rigert

Smoke extraction of road tunnels – scope, limits and prospects of fire control engineering
M. Wehner & E. Krokos

Gas analytics for the early detection of fires in road tunnels
M. Wietek, C. Berweger & C. Lämmle

Slag based geopolymer for passive fire protection of tunnels
K. Sakkas, P. Nomikos, A. Sofianos & D. Panias

Fire safety of underground structures using Fire Safety Engineering – the underground network of La Défense
B. Bertrand, M. Oucherti, P. Van Hulle, A. Wyzgolik, É. Cesmat, B. Moreau & J. Dupont

Lyon's Caluire tunnel renovation – structural fire resistance assessment contributing to safety improvement
J. N'Kaoua, J. Dupont & F. Walet

Fire tests for water mist fire suppression systems in road tunnels
R. Leucker & F. Leismann

Development of an optimal temporary ventilation system for a long tunnel
C. Hong, D. Hwang & H. Kang

Challenges and solutions for tunnel ventilation of Doha Metro
P. Reinke, A. Krpo & M. Flueckiger

Design and implementation of an innovative ventilation system using natural flow amplification in Moghanak access tunnel – Qumroud tunnel project
M. Khosrotash & M. Torabi
Enhancement of tunnel safety in the Albula railway tunnel  
S. Wälchli & C. Bernet  

How much flow recirculation is acceptable at tunnel portals?  
S. Gehrig, R. Buchmann & R. Yousaf  

Measuring pressure differences between portals of long road tunnels  
A. Rudolf & T. Kienzler  

Tunnel ventilation in practice – insights from testing  
P. Pospisil & L. Ilg  

Large-scale project to improve Tokyo subway network efficiency – Minami-sunamachi Station improvement plan  
A. Numata & T. Hirano  

Innovative 3D lighting planning for all kind of tunnel geometries  
H. Heis & B. Parth  

The importance of drainage system in railway tunnels and possibilities to reduce the LCC  
J.D.S. Chabot, F. Sandrone & T. Gamisch  

Structural health assessment and tunnel refurbishment  
Methodology of diagnosis of urban tunnels in service  
D. Llanca, P. Breul, Y. Haddani & P. Goirand  

Tunnel conditions assessment based on image analysis: a new inspection procedure for railway tunnels  
F. Sandrone  

New tunnel inspection and maintenance strategy using 3D laser scanning  
T. Yoshida, Y. Adachi & K. Hayashi  

Evaluation method of the falling of concrete piece from tunnel lining  
K. Tsuno, Y. Kojima, T. Nakayama & T. Ushida  

Quantitative health evaluation for existing tunnel against scaling and spalling  
N. Isago & H. Mashimo  

Inspection and repairing examination for the large scale immersed tube tunnel  

The fire in the Simplon Tunnel 2011 – event, effects on the tunnel and reconstruction  
W. Kradolfer  

Innovative method of rail tunnel refurbishment  
V. Wetzig, K. Baumann & A. Riedl  

The enhancement of performance on road tunnel lining by repair and rehabilitation  
J.H. Choo, T.J. Lee, T.G. Yoon & Y.S. Shin  

The refurbishment strategy of the Seelisberg Tunnel  
R. Marty, B. Schädler & D. Frey  

Integration of the existing Beverentunnel in the new Liefkenshoek Railway Link  
B. de Pauw, J. Moyaert, Ph. van Bogaert & K. Berten  

Swiss motorway N06 – repair of the Allmend Tunnel  
F. Gisler, M. Ramoni & P. Kübler  

Tunnel refurbishment and evolving standards – the safety file solution in New Zealand  
J.G. Miezio & J.Q. Cooper  

Methods and basic aspects of design and analysis  
Optimal calculation of reinforcement in tunnel segmental lining  
A.P. Fantilli, B. Chiaia, S. Marello & B. de Rivaz
Practical aspects of segmental tunnel lining design
M. Bakhshi & V. Nasri

Analysis of shield tunnel lining by frame structure analysis using ground reaction curve
M. Sugimoto, L.G. Le, C. Jian & T. Tamai

Some criteria to consider in final lining design and supervision in conventional tunnelling
E. von Munthe af Morgenstierne, H. Vélez Pérez & P. Caro Perdigón

Restrictive specifications for reinforced sprayed concrete for underground support
C. Larive

Design of sprayed concrete lining in soft ground – a UK perspective
J. Su

A rational technique for FEM/FDM simulation of TBM tunnelling
S. Soni, K.G. Sharma & G.V. Ramana

Design aspects for appropriate additional support measures in TBM excavations
G.M. Volkmann & H. Wannenmacher

Influence of annular gap grout on shield tunnel lining bedding behaviour
C. Thienert & M. Pulsfort

Study on the stratum loss and displacement mechanism of mined urban tunnel with cavity behind lining

Tunneling influence zones for adjacent existing pile foundation in soft soil developed by numerical analysis
P. Jongpradist, A. Sawatparnich, S. Youwai, J. Sunitsakul, W. Kongkitkul & S. Suwansawat

Volume loss and settlement trough in Warsaw II line
R. Kuszyk & A. Sieminska-Lewandowska

Guidelines for Gaussian curve-fitting to settlement data
B. Jones & C. Clayton

Pre-support nomenclature and support selection methodology for temporary support systems within weak rock masses
J. Oke, N. Vlachopoulos & M.S. Diederichs

Investigation of the loads on the primary lining for tunnels excavated with face support or improvement
P. Fortsakis, F. Chortis, G. Prountzopoulos & M. Kavvadas

Quantitative two-dimensional numerical analysis for evaluation of effects of steel pipe umbrella arch method
D.Y. Kim, H.S. Lee & J.J. Jung

The effects of long face bolts on face stability in the squeezing ground

The effect of hemi-spherical tunnel face on the stability of mountain tunnels
F. Kusumoto, K. Tanimura & J. Sato

Face stability assessment and ground deformation analysis for soft ground TBM tunnels
S. Konstantis

Face stability improvement by advance drainage via pilot tunnel
S. Zingg, D. Bronzetti & G. Anagnostou

Analysis of the stand-up time of the tunnel face
R. Schuerch & G. Anagnostou
A limit equilibrium method for the assessment of the tunnel face stability taking into account seepage forces

P. Perazzelli, T. Leone & G. Anagnostou

A comparison of viscous models under constant strain and constant stress: implications for tunnel analysis

C. Paraskevopoulou & M. Diederichs

Evaluation of overstressing of deep hard rock tunnels

D. Brox

New development using the “convergence-confinement” method in an anisotropic stress field

C. Jassionnesse, A. Tsirogianni & M. Favre

Large deformation analysis for a planned tunnel crossing heavily squeezing ground

A. Vrakas & G. Anagnostou

The practical modelling of dilation in excavations with a focus on continuum shearing behaviour

G. Walton & M.S. Diederichs

An alternative constitutive model for squeezing rocks in tunneling

W. Dong & G. Anagnostou

Invert heaving in operational tunnels – problems and countermeasures

An analytical study on the hydraulic resistance for the immersed tunnel elements during transportation for the project of Hong Kong-Zhuhai-Macao Bridge

L. Weiqing, Y. Zongquan, W. Ruida & S. Linwang

Instability risk assessment of soil tunnel excavation based on ground properties variability

M.O. Cecilio Jr., P.I.B. Queiroz & A. Negro Jr.

Incorporation of geostructural data into discrete analysis for tunnel design

J.J. Day, M.S. Diederichs & D.J. Hutchinson

Mechanical characteristics of Swiss molassic formations

M. Gencer & J.F. Mathier

In-situ experiment concerning thermally induced spalling of circular shotcreted shafts in deep crystalline rock

L.K.T. Uotinen, T. Siren, D. Martinelli & M. Hakala

Consideration on the influence and stability of middle ground area (center pillar) in binocular tunnels

M. Nakata, M. Kawakita, M. Inagaki & T. Okuno

The adoption of soil coefficients from FEA (Finite Element Analysis) models for use in stiffness matrix models to allow for multiple load cases generating large numbers of load combinations

J. Donohue, R.G. Eberhardt & M. Kuhn

Numerical simulation of mechanism behavior of the horizontal stratum tunnel adopting 3 Dimensional Element Code (3DEC)

G. Huang, W. Qiu & H. Zhang

Behaviour of a tunnel with rapid ring closure and curved face in low-strength ground

J. Sato, K. Kanematsu & F. Kusumoto
Design case studies

Brisbane’s Cross River Rail project – geomechanics supporting city-building 125
G. Charlesworth, R. Gong, J. Ashley & K. Bagget

Excavation analysis using crack tensor theory at the Mizunami Underground Research Laboratory, Japan 126

Urban, geotechnical and construction challenges for the realization of the CEVA Tunnel de Champel in Geneva 127
T. Witschi, W. Steiner & A. Ferrari

Geotechnical challenges for the construction of Tunnel de Court of the A16 Transjurane highway in Switzerland 128
A. Ferrari, S. Wachter & J.M. Jeanneret

Prediction of behavior of structures due to large bore EPBM tunneling at the Port of Miami 129
V. Gall, A. Bauer & P. Bourdon

Segmental lining in squeezing rock – innovative concepts for the Koralm tunnel 130
K. Keiper, S. Frodl, A. Lange, B. Moritz, H. Wagner, D. Handke & J. Matter

Design considerations and construction of the Schuman-Josaphat tunnel in the centre of the European district in Brussels 131
B. de Pauw, P. Vanderhaeghe, N. Hamaide, G. Joris & Ph. van Bogaert

Case study of EPB excavation using three-dimensional analysis 132
N. Allahverdi & V. Nasri

Farringdon Station SCL design – reducing risk at the heart of Crossrail 133
P. Duarte & A. Davis

Complex 3D calculation models for shaft-bored tunnel connection applied to the Liefkenshoek railways tunnels project 134
S. Giuliani-Leonardi & J. Dupeyrat

Three-dimensional elasto-plastic numerical analysis and mechanical evaluation of extremely close twin tunnels excavated with early invert closure 135
M. Inagaki, M. Kawakita, M. Nakata, K. Ushida, D. Awaji & T. Okuno

Cut and cover tunnel adjacent to a slope with a deep-seated slip-surface: assessment of ground and tunnel lining stability for various ultimate limit state cases 136
S. Papakonstantinou

Design of segmental lining using cam-pocket coupling for Waterview Project, Auckland (NZ) 137
R. Mahajan, A. Kuras, K. Allan & T. Kawakami

Important design aspects of the Railway Tunnel T-74R 138
G. Carrieri, A. Poli & L. Repetto

Crossrail sprayed concrete linings design 139
A. Pickett

Chenani-Nashri Tunnel, the longest road tunnel in India: a challenging case for design-optimization during construction 140
M. Palomba, G. Russo, F. Amadini, G. Carrieri & A.R. Jain

Study on rock mass stability of large scale complex underground tunnels in the urban underground 141
K. Chao, Q. Wenge & L. Hao

XI
Geotechnical design of underground infra-structure works for the Mine Chuquicamata in Chile
A.R.A. Gomes, G. Reyes & J.C. Ulloa

Large diameter shafts: a 3D analysis
T.G.S. Dias, M.M. Farias & A.P. Assis

Cooks Lane Tunnels in Baltimore, design and construction challenges
M.G. Kashi & V. Nasri

Lyon-Turin high speed railway link – Italian part base tunnel mixed shield TBM proposal
Y. Boissonnas & A. Mignini

Roveredo bypass tunnel – a pilot project
P. Spinedi, G. Sciuto, D. Fortunato & I. Broglini

The fixed point over the Strait of Messina: final design of the underground works
P. Lunardi, G. Cassani, A. Belloccchio & F. Pennino

Albula tunnel II: concept for tunneling in karst-like cellular dolomite
A. Schneider & N. Lavdas

Effect of tunnel construction on lining of an adjacent tunnel
C. Yoo & H.M. Jeon

Mechanical behaviors of shallow conventional tunnels installed the previous ground improved auxiliary method
Y. Cui, K. Kishida, M. Wako & M. Kimura

Engineering geological characterizing of alluvial sediments along the Line A of Qom metro project, Iran
J. Hassanpour, J. Rostami & S. Tarigh Azali

Tunnel Visp / Valais (CH) – challenges in a twin-tube motorway project incorporating an existing tunnel
A. Waldmeyer, H. Schmaus & J. Hohberg

Tunneling in Israel: challenges for excavation of “Hahamisha” tunnel
M. Concilia, K. Keiper, R. Crapp & D. Fabbri

The Fehmarn tunnel crossing: special elements
O.P. Jensen & S.K. Pedersen

Seismic design and experiences

Studies on seismic damage mechanism of mountain tunnels in poor geological conditions

Failure Characteristics and Influencing factors of highway tunnels damage due to the Chinese Wen-chuan Earthquake
M. Zhirong & J. Zhang

Blind prediction of the seismic response of tunnels observed in centrifuge experiments
G. Elia, M. Rouainia & S. Nadimi Shahraki

Seismic impacts on tunnels in a two-layer rock stratum

Design of running tunnel transversal section under seismic conditions using simplified numerical analysis
M. Pescara, G.M. Gaspari & L. Repetto
Impact of seismic loading on the design of underground projects – example of the Line 3 phase 2 of the Greater Cairo metro  
S. Giuliani-Leonardi & J. Dupeyrat  

Damage pattern analysis of tunnels in highly seismic region based on shaking table test  
T. Chen, B. Gao, Y.S. Shen, Y.M. Wen, X.F. Zhao & S.B. Chen  

**TBM performance and wear**

Down time analysis of hard rock TBM case histories  
E. Farrokh, J. Rostami & O.G. Askilsrud  

Probabilistic estimation of project duration using TBM prediction models: application to the safety gallery of the Fréjus Tunnel  
G. Piaggio, J.P. Novel, G.W. Bianchi & A. Bochon  

Evaluation of EPB TBM performance in mixed ground conditions  
Á. Tóth & J. Zhao  

A methodology of using past experiences in the performance prediction of a TBM in a complex geology  

Performance of penetration models for hard rock TBMs in the case of the Gotthard Base Tunnel  
J. Cheda, R. Schuerch, P. Perazzelli & F. Mezger  

A fuzzy logic model to predict the performance of hard rock tunnel boring machine  
M. Hedayatzadeh & J. Khademi Hamidi  

Review of the TBM performance in blocky rocks with potential face stability issues  
A. Delisio & J. Zhao  

Evaluation of soil abrasivity for soft ground TBM tunnelling applications  
G. Barzegari, A. Uromeihy & J. Zhao  

Abrasivity test results from Lao-PDR: verification of the CAI-LCPC abrasivity classification  
R. Longden & J.F. Mathier  

Introducing the Penn State soil abrasion index (PSAI) for application in soft ground mechanized tunneling  
E. Alavi Gharahbagh, J. Rostami & K. Talebi  

Assessment of TBM cutter wear using Cerchar abrasiveness test  
S. Lee, H.Y. Jeong & S. Jeon  

**Developments in the technology of mechanized tunnelling**

Tunnelling experiences of the largest EPB Shield to date for the Galleria Sparvo highway tunnel  
M. Herrenknecht & K. Bäeppler  

First results of the use of “Martina”, the world’s largest EPB-TBM (15.62 m in diameter), to bore the Sparvo Tunnel (A1 Motorway)  
P. Lunardi, G. Cassani & M. Gatti  

Birth of Earth Pressure Balanced shield method and its applications in Japan  
Y. Kashima & T. Adachi  

XIII
Urban road tunnel in Seattle – a new TBM philosophy
E. Fernández & A. Sanz

Challenges of the largest diameter TBM tunnel in the world – the Alaskan Way Tunnel in Seattle, USA
N. Munfah, M. Preedy & S. Zlatanic

The next generation of large diameter, mixed ground tunnel boring machines
D. Jordan

EPB-specific cutting tools for challenging mixed ground applications
A. Shanahan

The study of pressurized support in a modern rock TBM
G.D. Kang, Y.S. Kwon & I.M. Lee

Tunnel Dismantling Machine – from innovation to completion

Pre-treatment of ground in hard rock TBM tunneling: probe drilling and pre-grouting
S. Log, D. Ofiara, A. Bruland & P. Jakobsen

Strain and infrared thermal camera measurements to evaluate the deformability of a disc cutter during linear cutting tests
G.J. Bae, S.H. Chang, S.W. Choi, Y.T. Park & G.P. Lee

TBM cutter head instrumentation MOBYDIC system–BOUYGUES TP
M.A.N. Sahi, T.N.D.R. Barrett, E. Baranger & P. Moulin

Intensive application of the TBM data management system for the work supervisor of the largest worldwide TBM-EPB project
M. Marchionni, A. Selleri, F. Stahl & L. Messina

Operation monitoring and risk assessment of earth pressure balance tunnel boring machines in urban environment; high speed tunnel Sants-La Sagrera, in the city of Barcelona, right beside Sagrada Familia Basilica (World Heritage)
J.G. Cabrera & E.P. Fernández

Soil conditioning laboratory trials for the Port of Miami Tunnel, Miami, Florida, USA
A. Merritt, S. Jefferis, R. Storry & L. Brais

Foam parameters in saturated sand, theory and model tests
A. Bezuijen

Studies by a mobile laboratory on soil conditioning for EPB tunneling
H. Copur, F. Aksu, K.Y. Levent & M. Cinar

Studies on rock conditioning for hard rock tunnelling by a mobile laboratory

Developments in monitoring technology
Application of satellite radar interferometry for tunnel and underground infrastructures damage assessment and monitoring
C. Giannico, A. Ferretti, S. Alberti & S. Del Conte

Groundwater inflow analysis during tunnel construction using SDA-SWING method
N. Kishinaka, T. Koyama, K. Takahashi, T. Yasuda & Y. Ohnishi

Surface deformation control based on high-speed laser scanning systems
O. Schneider, J. Bertsch & M. Buri

The High Speed Railway Hub of Florence: 4D-monitoring – data integration and real-time post-processing during construction phase
P. Cucino, G. Eccher & C. Meyer
Developments in concrete and shotcrete linings technology

Risk control – online deformation monitoring inside an urban TBM-driven tunnel using the tShape measurement system
Ch. Meyer & S. Schütz

The Florence High-Speed Railway Hub: 4D monitoring – innovations in data acquisition and data management for tunnelling projects in sensitive urban areas
C. Meyer, P. Cucino, G. Eccher & D. Ulrich

Ground condition estimation of collapsed tunnel zones using tunnel electrical resistivity prospecting system (TEPS)
H.H. Ryu, G.W. Joo, K.H. Yun & G.C. Cho

Investigation of geoelectric-while-tunneling methods through numerical modeling
M.A. Mooney, M. Karaoulis & A. Revil

Is geological uncertainty ahead of the face controllable?
T. Dickmann & D. Krueger

Developments in concrete and shotcrete linings technology

Future trends for tunnel lining design for modern rail and road tunnels in hard rock and cold climate
K.G. Hotter, H. Buvik, B. Nermoen & B. Nilsen

Fibre reinforced lining technologies for TBM tunnels in Asia
R. Winterberg & B. Rossi

Results of a tunneling project using the extruded concrete lining system with shield – Tsugaru-Yomogita Tunnel on the Hokkaido Shinkansen Line
M. Noguchi, H. Kanda, A. Tanaka & T. Miyazaki

Preliminary tests on concrete aggregates with high sulphate content for tunnel lining
N. Monin, J. Burdin, L. Brino, J. Colas, L. Divet & T. Chaussadent

Permeability of steel fiber-reinforced concrete measured by surface electrical resistivity
D. Moon, S.W. Choi, S.H. Chang & G.P. Lee

A big full-round tunnel formwork designed for the Ingula Pumped Storage Scheme in South Africa
G. Lanticina

Proven tunnel forms at works in the Acre – Karmiel railway
B. Candeloro & M. Galimberti

Development of flat insulated lining method and its application for Shinkansen tunneling
H. Ishii, K. Akita, T. Iura, T. Komatsu, A. Morita & T. Konda

Polymer rubber gel technology for waterproofing underground structures
H. Russell, S. Schendel & J. Huh

Sprayed on waterproofing in frozen ground conditions: a shaft liner application case
J. Ouellet, J. Hatley, S. Greensted & M. Harper

Sprayed concrete application – high speed camera observations
M. Reinhold & T. Kulbe

Experimental Investigation into the interface properties of composite concrete lined structures
J. Su, A. Bloodworth & B. Haig

A feasibility study on polyamide fiber reinforced shotcrete for rock support in a tunnel

Applications of various shotcrete types in mine tunnels: a case study
E. Guclu, H. Tuncdemir, S. Altinoluk, B. Parali & O. Tas

XV
Other construction technology developments

Innovative use of directionally-drilled borings for underground exploration and construction monitoring
H. Parker, R.A. Robinson, G. Martin, A. Elioff & E. Cording 229

Roof suspended equipment for excavation face and vault support installation on Toulon tunnel project (France)
Y. Chamberlin & B. Combe 230

Applying the lost shield method by freezing to connect bored tunnels to Rokin station on the North/South metro line, Amsterdam

Tunnel excavation using waterjet pre-cutting technology

Development of tremie concrete mix design for underwater mass concrete placement – Lake Mead Intake No. 3 Tunnel Project
J. Grayson & J. Nickerson 233

Case study of pressurizing support trenchless tunneling method

On-site tests of new techniques for blasting noise attenuation and dust reduction
M. Noda, S. Furuki, T. Imamura, S. Yamashita, T. Matsuno, D. Sensui & Y. Honda 235

Quality control of drill and blast excavated tunnels using GPR EDZ method
P. Kantia, E. Heikkinen, S. Mustonen, S. Mellanen, T. Lehtimäki & M. Silvast 236

Pre-grouting and chemical injection for preserving groundwater environment and safe tunnelling
K. Date, N. Narita, Y. Yokota, Y. Takuji, S. Sakamaki, M. Kashiwaya, S. Kobayashi & T. Chiba 237

The chemistry of polyurethane grouts and their uses in tunneling
D.E. Galbreath 238

Elastomeric "eco-friendly" material based on end-of-life tyres blended with organic bind resin for railway applications
E. Sillerico & A. Alvarez 239

Protective layer for tunnels under rock fall impacts
A. Rezagholielou & H. Nikraz 240

Application of expansion joints in diaphragm walls – Vleugel project

Stainless steel in tunnels – a sustainable and safe solution
D.J. Cochrane, B. Heritier & A. Kosmač 242

Alptransit tunnels

Safety and health in long deep tunnelling – lessons learned on Swiss transalpine tunnel projects
M. Vogel & I. Kunz-Vondracek 245

Spoil management: curse or blessing? Looking back on 20 years of experience
C. Thalmann, M. Petitit, M. Kruse, L. Pagani & B. Weber 246

Project-specific logistics for the Gotthard and Ceneri Base Tunnels
A. Belloli & A. Kälin 247
Infrastructure projects – logistical considerations for the planning and realization of deep shafts
*M. Rehbock-Sander & P. Erdmann*

Gotthard base tunnel – simultaneous execution of civil works construction and installation of electromechanical equipment in the Sedrun section – implementation and conclusions
*T. Stamwitz & H. Höflé*

Railways Technology – the key lessons learnt from the Gotthard Base Tunnel project in Switzerland
*R. Sigrist*

The Gotthard Base Tunnel: the challenges of implementing the hoisting machinery in the Sedrun shafts – the owners view
*S. Peggs & H. Höflé*

Gotthard Base Tunnel, sector Sedrun – real scale testing of gliding steel ring beams
*A. Theiler, P. Beeler & B. Baumann-Heidenreich*

Verification of rock temperature prediction along the Gotthard base tunnel – a prospect for coming tunnel projects
*L. Rybach & A. Busslinger*

Ceneri Base Tunnel advancement in difficult rock conditions: tunnel design and construction optimization through back-analysis of the geomechanical parameters
*D. Merlini & M. Falanesca*

Anisotropic geomechanical behaviour of tunnelling Val Colla Line, Ceneri base Tunnel, Switzerland
*A. Malaguti, S. Morandi & D. Stocker*

Underground construction for hydropower

Linth-Limmern – the fascination of construction
*R. Dubach*

The Linth-Limmern hydro-power plant – design and construction of a large pumped storage scheme
*U. Müller, R. Marclay, J. Dunn, J.M. Hohberg & M. Hase*

Design and verification challenges of the Limmern caverns
*T. Marcher, M. John, J.-M. Hohberg, D. Fellner, K. Blank & R. Marclay*

Geomechanical influences on shaft construction for hydropower projects, a case study of the PSW Grimsel 3
*H. Wannenmacher, A. Stucki, M. Bauert, C. Rüegg & B. Schwegler*

Nant de Drance – pumped storage plant in the heart of the Alps
*O. Balmer*

Veytaux 2 Expansion – sensitive excavation to double the old plant capacity
*M. Meury & J. Kukkonen*

Rock mass assessment and corresponding TBM operation optimization for TBM tunneling at depth – a case study of Jinping II hydropower station
*L.J. Yin, Q.M. Gong & J. Zhao*

Improved pressure tunnel lining methods, a case study of the Niagara Tunnel Facility Project
*H. Wannenmacher, M. Bauert, H. Krenn, F. Engel & N. Komma*
Kishanganga hydroelectric project (J&K India) head race tunnel tunneling by TBM under Himalaya mountains dealing with adverse conditions

L. Giacomini, F. Bartimoccia & D. Rodriguez Calderon

Economic and energy loss minimization: design and repair works after failure of the Pucará headrace tunnel in Ecuador

F. Micheli, N. Moncayo, V.H. Jacome & P.F. Bertola

Boring with no. 3 EPB TBM in chaotic Lahar formations under variable cover

R. Grandori, A. Baroiffi & F. Bove

11th Machine PSP Vianden – rock engineering of powerhouse & transformer cavern

B. Stabel

The future of TBM tunnelling in hydroelectric projects

P.A. Scherwey

Hydro tunnel contracting challenges

H. Wagner

Boring of inclined pressure shafts by double shield TBM and problems of casting concrete in the Parbati H E Project Stage-II (Lot PB-3), Kullu, HP, India – a case study

R.K. Khali

Decisive design basis and parameters for power plant caverns

E. Saurer, T. Marcher & M. John
