Contents

1 Evolving SQL Queries from Examples with Developmental Genetic Programming ........................................... 1
   Thomas Helmuth and Lee Spector

2 A Practical Platform for On-Line Genetic Programming for Robotics .................................................. 15
   Terence Soule and Robert B. Heckendorn

3 Cartesian Genetic Programming for Image Processing .............. 31
   Simon Harding, Jürgen Leitner, and Jürgen Schmidhuber

4 A New Mutation Paradigm for Genetic Programming .................. 45
   Christian Darabos, Mario Giacobini, Ting Hu, and Jason H. Moore

5 Introducing an Age-Varying Fitness Estimation Function ........ 59
   Babak Hodjat and Hormoz Shahrzad

6 EC-Star: A Massive-Scale, Hub and Spoke, Distributed Genetic Programming System ......................... 73
   Una-May O’Reilly, Mark Wagy, and Babak Hodjat

7 Genetic Analysis of Prostate Cancer Using Computational Evolution, Pareto-Optimization and Post-processing ........... 87
   Jason H. Moore, Douglas P. Hill, Arvis Sulovari, and La Creis Kidd

8 Meta-Dimensional Analysis of Phenotypes Using the Analysis Tool for Heritable and Environmental Network Associations (ATHENA): Challenges with Building Large Networks ...... 103
   Marylyn D. Ritchie, Emily R. Holzinger, Scott M. Dudek, Alex T. Frase, Prabhakar Chalise, and Brooke Fridley

9 A Baseline Symbolic Regression Algorithm ......................... 117
   Michael F. Korns
10 Symbolic Regression Model Comparison Approach Using Transmitted Variation ........................................... 139
Flor A. Castillo, Carlos M. Villa, and Arthur K. Kordon

11 A Framework for the Empirical Analysis of Genetic Programming System Performance .......................................................... 155
Oliver Flasch and Thomas Bartz-Beielstein

12 More or Less? Two Approaches to Evolving Game-Playing Strategies ................................................................. 171
Amit Benbassat, Achiya Elyasaf, and Moshe Sipper

13 Symbolic Regression Is Not Enough: It Takes a Village to Raise a Model .............................................................. 187
Mark E. Kotanchek, Ekaterina Vladislavleva, and Guido Smits

14 FlexGP.py: Prototyping Flexibly-Scaled, Flexibly-Factored Genetic Programming for the Cloud ........................ 205
James McDermott, Kalyan Veeramachaneni, and Una-May O’Reilly

15 Representing Communication and Learning in Femtocell Pilot Power Control Algorithms ............................................ 223
Erik Hemberg, Lester Ho, Michael O’Neill, and Holger Claussen

Index ......................................................................................................................... 239
