Part I
The Social and Legal Framework of PDO

1. Legal Aspects of Food Protected Designations

Marina Carcea and Francesca Melini

1. Introduction
2. A Brief History of the Adoption of European Legislation on PDOs, PGI and TSGs
3. PDO, PGI and TSG: Legal Definition, Labelling and Establishment of Logos. Other Food Quality-Linked Logos in Europe
   3.1. Legal Definition
   3.2. Labelling of PDOs, PGIs and TSGs
   3.3. Protection of Geographical Indications in the Wine Sector
   3.4. Other Food Quality-Linked Logos in Europe
4. Legal Procedure for Registration of Protected Foods in Europe
5. Legal Establishment of Official Verification of Compliance with Protected Food Specifications
6. Food Authenticity and Legal Establishment of Databases for Protected Agricultural Products and Foods and Drinks
7. Conclusions

2. Consumers’ and Producers’ Expectations and Gains from Geographical Indications: Towards a Conceptual Context

Thanasis Kizos

1. Different Types of Designation of Agri-Food Products in Europe and the World
2. GIS from the Supply Side: Reasons for Adopting GI Schemes
Part II

Analytical and Chemometric Methods for Food Protected Designation Authentication

3. Mineral Profile

Ana Gonzálvez and Miguel de la Guardia

1. The Mineral Elements as a Fingerprint of Foods
   2.1. Sample Pre-treatment
   2.2. Analytical Techniques
3. Applications of Mineral Profile in Food Geographical Origin
   3.1. Wine
   3.2. Vegetables
   3.3. Coffee and Tea
   3.4. Dairy Products
4. Future Perspectives of Mineral Profile in Food Authentication

References

4. Stable Isotope Analysis

Carla Rodrigues, Rodrigo Maia, Marco Lauteri, Enrico Brugnoli, and Cristina Mágwas

1. Isotope Ratio Analysis as a Tool for Geographical Origin Discrimination
2. Recommended Terms for the Expression of Stable Isotope Ratio Measurement Results
3. Isotope Ratio Mass Spectrometry
   3.1. IRMS: Principles and Techniques
   3.2. Sample Preparation
4. Brief Overview of the International Stable Isotope Reference Materials
5. IRMS Techniques: New Developments and Applications in Food Traceability and Adulteration

References

5. Vibrational Spectroscopy

S. Garrigues and Miguel de la Guardia

1. Vibrational Spectroscopy Tools for PDO Authentication
   1.1. NIR Discrimination of Foods
11. Biosensors in Food PDO Authentication

Constantin Apetrei and Mahdi Ghasemi-Varnamkhasti

1. Definition of Biosensors 279
2. Classification of Biosensors 280
   2.1. Classification of Biosensors Based on Biosensing Materials 280
   2.2. Classification Based on Transducing Methods 282
3. Immobilization of the Receptor Component in Biosensors 285
   3.1. Adsorption 285
   3.2. Physical Entrapment 286
   3.3. Covalent Immobilization 288
   3.4. Cross-Linking 288
   3.5. Affinity 288
4. Applications of Biosensors in Food (Food Processing, Food Monitoring, Food Authenticity, Quality and Safety, etc.) 289
5. Future Trends and Perspectives
   Acknowledgements 294
   References 294

12. Basic Chemometric Tools

Ana Gonzálvez and Miguel de la Guardia

1. Statistical Analysis of Protected Designation of Origin Data 299
2. Analysis of Variance 300
3. Hierarchical Cluster Analysis of Food Data 301
4. Principal Component Analysis of Food Data 305
5. Linear Discriminant Analysis as a Food for PDO Authentication 308
6. Classification and Regression Tree Methods 311
7. Limitations and Possibilities of Statistical Analysis in PDO Authentication
   References 313

13. Discriminant and Class-Modelling Chemometric Techniques for Food PDO Verification

Paolo Oliveri and Gerard Downey

1. Introduction 318
2. Classification and Class-Modelling 319
3. Pre-Modelling Considerations
   3.1. Variable Reduction 320
   3.2. Variable Pre-Treatment 321
4. Validation Strategies 323
   4.1. Single Evaluation Set 324
   4.2. Cross-Validation 324
   4.3. Repeated Evaluation Set 324
5. Model Performance Estimation 325
   5.1. Specificity and Sensitivity 325
   5.2. Classification Rate 325
   5.3. Receiver-Operating Characteristic Curves 326
6. Discriminant Methods 328
   6.1. $k$-Nearest Neighbours 328
   6.2. Linear Discriminant Analysis 328
   6.3. Quadratic Discriminant Analysis 331
   6.4. Partial Least Squares Discriminant Analysis 331
7. Class-Modelling Methods 331
   7.1. Unequal Class Models 331
   7.2. Potential Function Methods 333
   7.3. Soft Independent Modelling of Class Analogy 334
8. Conclusions 334
   References 336

14. Classification Methods of Multiway Arrays as a Basic Tool for Food PDO Authentication 339

Elisa Salvatore, Marta Bevilacqua, Rasmus Bro, Federico Marini, and Marina Cocchi

1. Multiway Methods in Food Authentication 339
   1.1. Authenticity Issues 340
   1.2. Multiway Characterization in Food Authenticity Context 341
2. Methods 342
   2.1. Unfolding + Two-Way Classification 342
   2.2. Multiway Compression + Classification on Scores 347
   2.3. Multiway Classification Methods 350
3. Case Studies 354
   3.1. Discrimination of Table Wines 354
   3.2. Discrimination of EVOO 372
4. Conclusions 379
   References 379

Part III
Food Applications

15. Analytical and Chemometric-Based Methods to Monitor and Evaluate Wine Protected Designation 385

Cozzolino Daniel and Heather Smyth

1. Overview and Definitions of Wine Protected Designation 385
2. Traditional Analytical Methods 387
Contents

2.1. Chemical Composition 387
2.2. Elemental and Isotope Analysis 389
2.3. Phenolic, Volatile Compounds and Amino Acids 393
3. Molecular Spectroscopy 395
  3.1. UV, Visible, Near and Mid Infrared Spectroscopy 395
  3.2. NMR Spectroscopy 398
4. Electronic Noses and Tongues 399
5. Sensory Analysis 401
6. Future and Challenges in Wine Authentication 402
   References 404

16. Analytical Strategies Supporting Protected Designations of Origin for Alcoholic Beverages 409

Ross Aylott

1. Issues Associated with PDOS and GIS in the Alcoholic Beverages Sector 410
2. Alcoholic Beverage Manufacturing Processes—An Overview 410
3. Alcoholic Beverage Definition—An Overview 413
4. Alcoholic Beverage Processes and Definitions by Category 420
   4.1. Rum 420
   4.2. Cachaça 420
   4.3. Whisky/Whiskey 421
   4.4. Brandy 422
   4.5. Wine Spirits, Cognac and Armagnac 422
   4.6. Vodka 423
   4.7. Gin 423
   4.8. Tequila 423
   4.9. Liqueurs 424
   4.10. Beer, Lager and Cider 424
5. Counterfeit Issues in the Alcoholic Beverages Sector 424
6. Analytical Techniques Used in the Authentication of Alcoholic Beverages 426
   6.1. Alcoholic Strength 426
   6.2. Chromatography 427
   6.3. Other Analytical Approaches 428
8. Analysis in Practice 431
   8.1. Scotch Whisky 432
   8.2. American and Canadian Whiskies 433
   8.3. Cognac 433
   8.4. Gin 433
   8.5. Vodka 434
   8.6. Tequila 434
   8.7. Beers 434
9. Conclusions 434
