Technical Committee 14
Sustainability and Eco-Efficiency of Steel Construction

CONCEPTS AND METHODS FOR STEEL INTENSIVE BUILDING PROJECTS
N° 130 | 2012

Editors:
Heli Koukkari
Luis Bragança
Samir Boudjabeur
Contents

Foreword iii
   Heli Koukkari, Luís Bragança, Samir Boudjabeur

I | Sustainability Overview

Overview of the SB_Steel project 3
   Heli Koukkari

Interdisciplinary research on sustainability in steel construction –
holistic system thinking in the research and innovation process 9
   Gregor Nuesse, Markus Feldmann

II | Concepts of Sustainable Buildings

Towards a numerical algorithm to evaluate energy performance of
steel buildings at early design stages 37
   Paulo Santos, Rodolfo Martins, Luís Simões da Silva, Helena Gervásio

Eco efficiency of structural frames for low rise office buildings 55
   Raban Siebers, A. Hubauer, J. Lange, B. Hauke

Comparing and Quantifying the Structural Flexibility of three
buildings in the Netherlands 71
   R. Blok, E. Koopman

III | Sustainable renovation

Experiences on steel intensive projects for building renovation: Spanish
case studies on structural rehabilitation and envelope retrofitting. 83
   José Antonio Chica, Sandra Meno, Peru Elguézabal, David López,
   Sergio Baragaño

Steel Regeneration [Urban Acupuncture] 103
   Sergio Baragaño
IV | Sustainable Design

Sustainable Design and Optimization of Office Buildings in Steel and Composite Construction
   Martin Mensinger, Li Huang, Heidrun Hogger

Integrated pre-design for high performance buildings
   Alexandra Dinca, Ionela Marcu, Adrian Ciutina, Viorel Ungureanu

High quality buildings due to smart engineering
   Oliver Hechler, Matthias Braun, Yves Conan

Comprehensive methodological approach for sustainable assessment of buildings in pre-design phases
   Helena Gervásio, Luís Simões da Silva, Paulo Santos, Rodolfo Martins

Selection of key Sustainable Indicators to Steel Buildings in Early Design Phases
   Joana Andrade, Susana Vieira, Luís Bragança

V | Sustainable Steel Buildings

Competitiveness and sustainability of steel-intensive solutions
   Ewelina Grodzicka, Veronique Dehan, Heli Koukkari, Ewa Alicja Zukowska, Alexandra Dinca, Ionela Marcu, Adrian Ciutina & Viorel Ungureanu

Sustainability strategies and research agendas of the steel construction sector
   Iordanis Zygomalas, Heli Koukkari

Sustainable construction – a UK view
   Michael Sansom

Sustainability Assessment and Standardisation – Steel Buildings
   Joana Andrade, Luís Bragança

Sustainable steel-intensive renovation
   Iordanis Zygomalas, Ŭget N Cocen, Charalambos Baniotopoulos

Effect of locality on the environmental impact of buildings – Case study
   Petr Schorsch, Tereza Pavlů, Michal Netušil, František Wald, Petr Hájek
