Paste 2013

Proceedings of the 16th International Seminar on Paste and Thickened Tailings

17–20 June 2013, Belo Horizonte, Brazil

Editors

Richard Jewell
Australian Centre for Geomechanics
The University of Western Australia, Australia

Andy Fourie
The University of Western Australia, Australia

Jack Caldwell
Robertson GeoConsultants, Canada

Joaquim Pimenta
Pimenta De Avila, Brazil

## Keynote

3 Developments in treating and dewatering oil sand tailings  
*J.C. Sobkowicz, Thurber Engineering Ltd., Canada*

## Thickened and Paste Tailings

21 Paste deposition over an existing subaqueous slurry deposit of high sulphide content tailings — the Neves Corvo experience  
*R. Lopes, Golder Associates Brasil Consultoria e Projetos Ltda., Brazil; R. Bahia, Golder Associates Portugal Unipessoal Lda., Portugal; M. Jefferies, Golder Associates Ltd., Canada; M. Oliveira, Somincor, Portugal*

37 Paste and thickened tailings — myth busting and clarification  
*T.G. Fitton and K.D. Seddon, ATC Williams Pty Ltd, Australia*

47 Dry stacking of cyclone tailings  
*W.G. Lugão, M.M. Almeida, A.O. Guimarães and F.S. Magalhães, VOGBR, Brazil; S.D.S. Mohallem, ArcelorMittal, Brazil*

61 The effect of process variations on slurry rheology, washer performance and control strategy  
*F. Sofra and A.P. Knight, Rheological Consulting Services Pty Ltd, Australia*

75 Desiccation in dewatering and strength development of high-density hard rock tailings  
*P. Simms, S. Sivathayalan and F. Daliri, Department of Civil and Environmental Engineering, Carleton University, Canada*

87 Thickening of iron ore tailings slimes using sub-aerial deposition: field experimental observations  
*W.L. Oliveira-Filho, Mining Engineering Department, Federal University of Ouro Preto, Brazil; D.R. Silva and F.E. Almeida, Samarco Mineração S.A., Brazil*

101 An evaluation of cyclone performance to improve the quality of cyclone underflow material for tailings disposal  
*J.A. Wates and M.A. Knight, Fraser Alexander, South Africa*

## Polymer Addition

117 Effects of polymer dosage on dewaterability, rheology, and spreadability of polymer-amended mature fine tailings  
*S. Mitani, S. Soleimani and P. Simms, Department of Civil and Environmental Engineering, Carleton University, Canada*

133 Next generation polymeric flocculants for thickening and dewatering  
*H. Kolla, A. Mahmoudkhani, P. Watson and M. Awad, Kemira, USA; P. O’Neill, Kemira, Canada; L.R. Moore, Kemira, USA*

147 Development of success criteria for high density fluid fine tailings flocculation in the oil sand industry  
*X.S. Yuan, B. Bara and R. Siman, Research and Development Centre, Syncrude Canada Ltd, Canada*

161 BASF novel flocculant technology — benefits for counter current decantation circuits based on pilot-scale trials  
*A. Berger and J. Muhor, Global Development Mining Solutions, BASF SE, Germany; S. Adkins, Global Development Mining Solutions, BASF Performance Products plc., UK*

175 The utilisation of a coiled plug flow reactor for the flocculation of kaolin slurry  
*T. Nugraha and A.B. Fourie, School of Civil and Resource Engineering, The University of Western Australia, Australia; Y.K. Leong and L. Avadjar, School of Mechanical and Chemical Engineering, The University of Western Australia, Australia*
Flocculant evaluations in a counter current decanter thickening process: laboratory and field results
L.R. Moore, Kemira, USA; T. Putra, Kemira, Indonesia; A. Mahmoudkhani, Kemira, USA

Filtered Tailings

Considerations for tailings facility design and operation using filtered tailings
B. Ulrich and J. Coffin, Knight Piésold and Co., USA

Performance analysis for filtered iron ore tailings disposal
A.M.C. Portes, VOGBR Recursos Hídricos e Geotecnia S.A., Brazil; T. Espósito, Universidade Federal Minas Gerais, Brazil

Red mud pressure filtration for the alumina refinery's bauxite residue tailings disposal
Q. Avery and K. Wilson, FLSmidth, USA

Evaluation of field compaction of a filtered residue from alumina production
K.D. Nery and L.F.S. Villar, UFMG, Brazil; R.A. Moreno, CBA – Companhia Brasileira de Aluminio, Brazil; J.P. Freire Neto and M. Scarminio, Pimenta de Ávila Consultoria, Brazil; R.S. Junior, CBA – Companhia Brasileira de Aluminio, Brazil

Geotechnical-geochemical and operational considerations for the application of dry stacking tailings deposits – state-of-the-art
J.L. Lara, E.U. Pornillos and H.E. Muñoz, Golder Associates Peru S.A., Peru

Geotechnical parameters of iron ore tailings from the Quadrilátero Ferrífero after different treatments and ore processing
J.P.S. Silva, University of São Paulo (USP), Brazil; M.B. Mendes, J.G. Milonas, W. Pirete and W.J. Souza, Vale S.A., Brazil

Comparative Studies

Filtered tailings versus thickened slurry: four case studies
T.G. Fitton and A. Roshdieh, ATC Williams Pty Ltd, Australia

Comparative evaluation of surface disposal of thickened versus slurry tailings
D. Johnson, R. Moghaddam and I. Bin Ahmed, Golder Associates Ltd., Canada; C. Laroche, Osisko Mining Corporation, Canada

Surface erosion effect on tailings
M. Mussé, Environment and Infrastructure, AMEC International Ingenieria y Construcción Ltda., Chile; J. Lupo, Newmont Mining Company, USA

The Alberta Oil Sands Tailings Roadmap Project
J.C. Sobkowicz, J.E.S. Boswell, M.D. Kofoed and I.D.C. Gidley, Thurber Engineering Ltd, Canada

New projects – conventional or high density tailings?
D. Rano and R. Martinson, Paterson & Cooke South America Ltda., Chile

Multi-criteria decision-making tool to support the selection of a tailings disposal system
F.F.G. Santos, Capital Projects Management, Brazil; G.E.S. Valadão and P.R.M. Viana, Mining Engineering Department, Universidade Federal de Minas Gerais, Brazil

Study of environmental feasibility of paste and thickened tailings by life-cycle assessment
A. Fernandez-Iglesias, ArcelorMittal, Spain; A. Corrêa de Araújo, ArcelorMittal, France; S. Andrés, ArcelorMittal, Spain; W. Xuan, ArcelorMittal, France; R. Luíña and V. Álvarez, Project Engineering Department, University of Oviedo, Spain

Coarse laden in situ nonwoven geofabrics
D.C. Rennard and J. Medrano, Unconventional Resources, ExxonMobil, USA; A. Ortiz Gomez and T.R. Palmer, Imperial Oil Canada; P.L. Tanaka and S.R. Clingman, Unconventional Resources, ExxonMobil, USA

Mine Backfill

Full scale experiments on the effectiveness of a drainage system for cemented paste backfill
A. Hasan, G. Suazo and A.B. Fourie, School of Civil and Resource Engineering, The University of Western Australia, Australia
Next generation dewatering for tailings and paste backfill: E-Disc filter with eductor feed system
K. Nowicki and A. Hellstrand, FLSmidth, USA

Application of cyclone technology in paste backfill plant design
J. Landriault and P.A. Primeau, Paste Engineering and Design, Golder Associates Ltd., Canada

Dewatering of tailings for mine backfill with the Boozer disc filter
M. Hatzenbühler, BOKELA do Brasil; J. Hahn and R. Bott, BOKELA GmbH, Germany

Cemented paste production provides opportunity for underground ore recovery while solving tailings disposal needs
N.C. Gridley, Anglo American Chile, Chile; L. Salcedo NYRSTAR, Chile

Paste fill – a safety solution for pillar mining
P.R.B. Cavalcante, Mineração Caraiba S.A., Brazil; F. Palkovits, KOVIT Engineering Ltd., Canada

Beach Slopes

Flow through tilt flume testing for beach slope evaluation at Chuquicamata Mine Codelco, Chile
B. Pirouz and K.D. Seddon, ATC Williams Pty Ltd, Australia; C. Pavissich, ATC Williams Pty Ltd, Australia (previously Codelco-VP); P. Williams, Paul Williams Pty Ltd, Australia; J. Echevarria, Codelco-VP, Chile

Analysis and flow behaviour prediction of paste material in sheet flow
P.T. Slatter, ATC Williams Pty Ltd, Australia

Comparison of predictions of beach slopes using alternative models
J. Covacevich, Hatch Associates, Chile; J.A. Wates, Fraser Alexander, South Africa; S. Dal Pozzo, Codelco Andina, Chile

A tailings beach slope model featuring plug flow
T.G. Fitton and P.T. Slatter, ATC Williams Pty Ltd, Australia

Transport

Pipe loop tests at Codelco pilot plant
L. Martinson and R. Martinson, Paterson & Cooke, Chile; R. Cooke, Paterson & Cooke, USA

Pulsation free hydraulically driven piston pump
C. Karambalis, GEHO pumps, Weir Minerals Netherlands, The Netherlands

Pumping a 100–600 Pa yield stress clay slurry with a centrifugal pump
J.M. Furlan and R.J. Visintainer, Department of Engineering and R&D, GIW Industries, USA; A. Sellgren, Luleå University of Technology, Sweden

Poster Papers

A model for technology development in oil sands tailings
I.D.C. Gidley and J.E.S. Boswell, Thurber Engineering Ltd., Canada

Pipeline wear solution at Kidd Mine: energy absorbent ceramic composites
A. White, Xstrata Copper, Canada; M. McGuinness, Paterson & Cooke, Canada; V. Newman, Xstrata Copper, Canada

Dual inorganic–organic flocculating systems for treatment of oil sands tailings
A. Mahmoudkhani, R. Tellakula, K. Stewart, P. Watson and H. Kolla, Kemira, USA

Design of a multi-purpose plant to provide paste fill, hydraulic fill, concrete and shotcrete
M. Wallgren, ISL Machinery Inc., Canada; F. Palkovits, KOVIT Engineering Ltd., Canada

Design of open channels for non-Newtonian fluids
D.A. Rojas, Bechtel, Chile; R.H.A. Janssen, Bechtel, Australia

Trends in mine tailings disposal from a global perspective and in Brazil
M. e Silva Marques and F.A. Pérez, Golder Associates Peru S.A., Peru
Key aspects to consider in the design of facilities that comprise a tailings deposit at high concentrations
M. Barrientos and A. López, AMEC International (Chile) S.A., Chile

Water recovery – a challenge for modern dewatering technology
G. Görres and J. Palmer, Outotec (Filters) Oy, Finland

Studying feasibility of paste and thickened tailings at laboratory scale – pilot thickeners
A. Fernandez-Iglesias, ArcelorMittal, Spain; A. Corrêa de Araújo, ArcelorMittal, France; M. Goosens, Independent Consultant, Brazil

Constitutive relation between void ratio undrained shear strength for iron fine tailings
D.C.R. Penna, Pimento de Avila Consultoria, Brazil; W.L. Oliveira-Filho, Universidade Federal de Ouro Preto, Brazil
