Proceedings of the Tenth International Aluminum Extrusion Technology Seminar

Success X Design
VOLUME II

Billet Process and Equipment Management Issues Value-Added Processes

May 15 – 18, 2012
Miami Beach, Florida
Billet Process & Equipment

Management Issues

Value-Added Processes

BILLET PROCESS & EQUIPMENT

The Influence of Iron Content on the Tensile Properties and Anodizing Response of AA6060 Extrusions
Lisa Sweet, Xinquan Zhang, Nick Birbilis Birbilis, Mark A Easton

1

Alloys

Influence of Varying the Chemical Composition on the Extrusion Performance of AA6060 and AA6063 Alloys
Leonel Batalla, Fernando L. Daroqui, Eduardo Siri, Maria V. Canullo

13

High Speed Alloys: On the Optimization of 6xxx Alloys for Medium Strength Requirements
Ulf H. Tundal, Oddvin Reiso, Eskild Hoff, Richard Dickson, Chris Devadas

21

Influence of Fe and Mn Content on 6xxx Extrusion Alloys
Malcolm J Couper, Elizabeth D Sweet, Xinquan Zhang

35

Composition Analysis Uncertainty: Impact, Common Causes and Use of Production Limit Offsets to Ensure On-Composition Product
Keith K. Trischan, Michael L. Ruschak, Jay H. Goodman, Rebecca K. Wyss, Michael K. Brandt

43

Effect of a New Solution and Aging Treatment on the Microstructure and Tensile Properties of the H755 Aluminum Alloy
Jianxiang Li, Zhibing Yang, Zhimin Yin

51

High Performance AA6063 Designed to Meet 6xxx Medium Strength Alloy Properties
Jerome Fourmann, Ram Ramanan, Nick Parson

61

Casting, Casthouse, Environmental Health & Safety

Large Diameter Billet Casting Technology
Tim Scott

83

Effects of Different Lubricating Oils and Ceramic Ring Overhang (CRO) on the Surface Appearance of 6xxx series Alloy Billets
Ricardo Sammy, Kedar Tilak

91
Transient Molten Metal Quality at the Start and End of DC Casting and the Impact on Extrusion
Phil Enright ................................................................. 97

Molten Metal Safety in Aluminum DC Billet Casting
James A. Brock, Jake J. Niedling, C. Wayne Shanko ........................................ 119

Reducing Environmental Impacts in the Casthouse
Corleen Chesonis, Gregg E. Kruzynski, David H. DeYoung .................................. 127

Minimizing Production Shutdowns through Effective Application and Maintenance of Safety Pit Coatings
Alex Lowery, George Stavnes ................................................................. 137

Homogenization

Homogenization Aspects, Continuous versus Batch in an Integrated Modern Casthouse
Franz Niedermair ............................................................................. 149

A New Method to Control Load Temperature in Batch Homogenization Process
André Larouche, Matthew Gavin, Claude Carrier ....................................... 163

Homogenization of Al-Mg-Si Alloy Billets – Myths and Facts
Jostein Røyset, Øystein Bauger, Jan Anders Sæter, Ulf Tundal, Oddvin Reiso .............. 171
MANAGEMENT ISSUES

Is Operational Modeling Worth the Effort? Using Simple Spreadsheet Models of Extrusion Operations to Ask "What if" Questions Regarding Equipment and Profiles
Craig R. Werner .............................................................. 187

Operations

Six Sigma Methodology Analysis Applied to Extrusion Plant
Rodrigo C. Campana .......................................................... 207

The Practical Application of Advanced Linear Programming Modeling Techniques to Optimize Extrusion Operations
Craig R. Werner .............................................................. 223

Flow Stress and Knowledge-Based Superextruders
Paul Robbins ........................................................................ 245

Down Time Monitoring & Extrusion Process Monitoring
Markus Dobler .................................................................... 253

Extrusion Process Equipment Upkeep for Better Plant Performance -- "Mission 95"
Rajat Agarwal, Prasanna B. Venkatesha .................................. 263

How Data Integrity can be Used as a Simple, Effective Means to Continuously Improve Extrusion Results
Craig R. Werner .............................................................. 281

Using Data to Calculate Optimized Log Lengths and Mill Lengths in an Aluminum Extrusion Operation -- A Case Study
Craig R. Werner .............................................................. 295

Search For Similar Profiles through Pattern Matching Algorithms: Effectiveness and Advantages for Extrusion Companies
Alain Michalak, Marco Azzalin, Stefano Bellotti, Vincenzo Giacomelli .................................................. 305

Employee Motivation in an Aluminum Extrusion Operation
Craig R. Werner, James H. Scheuing .................................... 311

Markets and Applications

Aluminum Consumption and Aluminum Extrusion Industry in China
Zitao Wang, Jingru Liu .......................................................... 323

Leveraging the Design Advantages of Aluminum Extrusions vs. Competitive Materials - How the Aluminum Extrusion Industry can Expand its Markets
Craig R. Werner, Nicholas Palladino, John Funai, Randy Kissell, Rob Nelson .................................................. 337

Global Aluminium Applications in Electric Vehicles and Charging Infrastructure
Roberto Boeker .................................................................. 353

Economics of Aluminum Extrusion for Aerospace Applications
Pradip K. Saha ................................................................. 357
Die-Related

Optimization of Die Wear and Tear for 6063 Alloy
Modar Al Mekdad, Sutanay Parida, Suresh Annadurai ........................................... 367

Improvements in Aluminum Extrusion Profitability through Competence
Mike S. Warkins, Jon E. Veenstra ................................................................. 377

Sustainability and Recycling

Constructing the Sustainable Path Forward
Patrick M. Muessig.................................................................................. 383

The Effect of Die Design on the Mechanical Properties of Profiles Recycled From AA6060 Chips by Hot Extrusion
Volkan Güley, Andreas Jäger, A. Erman Tekkaya .............................................. 391

Trivalent Chromium: A "Green" Solution to Hexavalent Chromium
Harry F. Adams......................................................................................... 399

Green and Smart Anodizing: The Anodizing of the Future Available Today
Walter Dalla Barba, Fabio Vincenzi, Federico Vincenzi, Marcello Rossi............... 403

Aspects of Preferential Grain Etching During Alkaline Pre-Etching Step Before Anodizing of Aluminium Profiles.
Øystein Bauger, Hans Bjerkkaas............................................................... 421
VALUE-ADDED PROCESSES

Trace Elements and their Impact on the Surface Finishing Characteristics of Aluminum Extrusions
Jude Mary Runge ................................................................. 431

Metallurgical Factors

Factors Affecting the Machinability of Al-Mg-Si Extrusions
Imed Zaghbani, Victor Songmene, Jules Kouam, Nick Parson, Alexandre Maltais .... 443

Metallurgical Analysis of Surface Streaking Defect in AA6060 Extrudate
Andrew J. Thome, Joshua E. Walker, Timotius Pasang, Wojciech Z. Misiolek .......... 463

Solar

Aluminum in Solar: Manufacturing Cost Analysis of CSP Structures
Anthony E. Mascarin, Ted A. Hannibal ........................................... 477

Issues on the Design and Fabrication of Extruded Aluminum Framing for the Solar Industry
Giovanni Barbareschi ................................................................ 485

Process Improvements

Stretch Wrapping of Master Bundles and Wooden Battens
Raffaele D'Andrea, Carsten Dede .................................................... 497

New Developments in Extrusion of Profiles with Variable Curvatures and Cross-Sections
Alessandro Selvaggio, Sami Chatti, Nooman Ben Khalifa, A. Erman Tekkaya ....... 505

A New Liberalization Trend in the Aluminum Fenestration Industry
Giovanni Barbareschi ................................................................ 513

Finishing

The XS Plant: The Vertical Line for Window Makers
Carlo Zucchetti ........................................................................ 521

Advanced Decoration Technology for Aluminum
Enrico Piva ............................................................................. 525

The World Highest Vertical Powder Coating Line for Aluminium Profiles
Carlo Zucchetti ........................................................................ 533

Acid Etching for Extruded Aluminium: Technical, Economical and Environmental Aspects
Alberto Fuentes .................................................................... 537

Design Developments

Innovative Extrusions for Value-Added Applications
Mario Conserva, Alberto Pomari .................................................. 547

Developments in the Design of Aluminum Extrusions for Structural Applications
J. Randolph Kissell, Michael H. Skillingberg .................................... 555
