New Results in Dependability and Computer Systems

Proceedings of the 8th International Conference on Dependability and Complex Systems DepCoS-RELCOMEX, September 9–13, 2013, Brunów, Poland
Contents

Application Level Execution Model for Transparent Distributed Computing ............................................. 1
Razvan-Mihai Aciu, Horia Ciocarlie

Software Support of the Risk Reduction Assessment in the ValueSec Project Flood Use Case ................... 11
Jacek Baginski

Risk Assessment Aspects in Mastering the Value Function of Security Measures .................................... 25
Andrzej Białas

Reduction of Computational Cost in Mutation Testing by Sampling Mutants ............................................. 41
Ilona Bluemke, Karol Kulesza

Use of Neural Network Algorithms in Prediction of XLPE HV Insulation Properties under Thermal Aging .......... 53
Boukezzi Larbi, Boubakeur Ahmed

Computer Simulation Analysis of Cluster Model of Totally-Connected Flows on the Chain Mail .................. 63
Alexander P. Buslaev, Pavel M. Strusinskiy

Assessment of Network Coding Mechanism for the Network Protocol Stack 802.15.4/6LoWPAN .................. 75
Michał Byłak, Dariusz Laskowski

Reliability Analysis of Discrete Transportation Systems Using Critical States ........................................ 83
Dariusz Caban, Tomasz Walkowiak
A Reference Model for the Selection of Open Source Tools for Requirements Management ................................................. 93
Bartosz Chrabski, Cezary Orłowski

A Probabilistic Approach to the Count-To-Infinity Problem in Distance-Vector Routing Algorithms .................................. 109
Adam Czubak

A Quality Estimation of Mutation Clustering in C# Programs ......................................................................................... 119
Anna Derezińska

Using Virtualization Technology for Fault-Tolerant Replication in LAN ........................................................................... 131
Fernando Dettoni, Lau Cheuk Lung, Aldelir Fernando Luiz

Quantification of Simultaneous-AND Gates in Temporal Fault Trees .................................................................................. 141
Ernest Edifor, Martin Walker, Neil Gordon

Improving of Non-Interactive Zero-Knowledge Arguments Using Oblivious Transfer ......................................................... 153
Alexander Frolov

Virtual Environment for Implementation and Testing Private Wide Area Network Solutions .................................................. 173
Mariusz Gola, Adam Czubak

Optimization of Privacy Preserving Mechanisms in Mining Continuous Patterns ............................................................... 183
Marcin Gorawski, Pawel Jureczek

Technical and Program Aspects on Monitoring of Highway Flows (Case Study of Moscow City) ........................................... 195
M.G. Gorodnichev, A.N. Nigmatulin

Integral Functionals of semi-Markov Processes in Reliability Problems .................................................................................. 205
Franciszek Grabski

Generating Repair Rules for Database Integrity Maintenance ................................................................................................. 215
Feras Hanandeh, Yaser Quasmeh

Optimization Algorithm for the Preservation of Sensor Coverage ....................................................................................... 225
Codruta-Mihaela Istin, Horia Ciocarlie, Razvan Aciu

Reliability Assessment of Supporting Satellite System  
EGNOS  
Miroslaw Siergiejczyk, Adam Rosiński, Karolina Krzykowska  

Vbam – Byzantine Atomic Multicast in LAN Based on Virtualization Technology  
Marcelo Ribeiro Xavier Silva, Lau Cheuk Lung, Leandro Quibem Magnabosco, Luciana de Oliveira Rech  

An Approach to Automated Verification of Multi-Level Security System Models  
Andrzej Stasiak, Zbigniew Zieliński  

A Web Service-Based Platform for Distributed Web Applications Integration  
Pawel Stelmach, Lukasz Falas  

Universal Platform for Composite Data Stream Processing Services Management  
Pawel Stelmach, Patryk Schauer, Adam Kokot, Maciej Demkiewicz  

Proposal of Cost-Effective Tenant-Based Resource Allocation Model for a SaaS System  
Wojciech Stolarz, Marek Woda  

Automatic Load Testing of Web Application in SaaS Model  
Emil Stupiec, Tomasz Walkowiak  

Implementing Salsa20 vs. AES and Serpent Ciphers in Popular-Grade FPGA Devices  
Jaroslaw Sugier  

On Testing Wireless Sensor Networks  
Tomasz Surmacz, Bartosz Wojciechowski, Maciej Nikodem, Mariusz Slabicki  

Towards Precise Architectural Decision Models  
Marcin Szlenk  

Slot Selection Algorithms for Economic Scheduling in Distributed Computing with High QoS Rates  
Victor Toporkov, Anna Toporkova, Alexey Tselishchev, Dmitry Yemelyanov  

K-Induction Based Verification of Real-Time Safety Critical Systems  
Tamás Tóth, András Vörös, István Majzik
Native Support for Modbus RTU Protocol in Snort Intrusion Detection System ........................................ 479 Wojciech Tylman

SCADA Intrusion Detection Based on Modelling of Allowed Communication Patterns .......................... 489 Wojciech Tylman

System for Estimation of Patient’s State – Discussion of the Approach .................................................. 501 Wojciech Tylman, Tomasz Waszyrowski, Andrzej Napieralski, Marek Kamiński, Zbigniew Kulesza, Rafał Kotas, Paweł Marciniak, Radosław Tomala, Maciej Wenerski

Dependability Aspects of Autonomic Cooperative Computing Systems .................................................. 513 Michał Wódczak

Life Cycle Cost through Reliability ........................................... 523 Manac'h Yann-Guïrec, Benfriha Khaled, Aoussat Améziane

Verification of Infocommunication System Components for Modeling and Control of Saturated Traffic in Megalopolis ............................................................... 531 Marina V. Yashina, Andrew V. Provorov

Shuffle–Based Verification of Component Compatibility ...... 543 W.M. Zuberek

Author Index ........................................................................ 553
