Dedication

Preface

Workshop

Acknowledgements

Part 1: Composite Properties in the Fresh and Hardened States

Strength Dependent Tensile Behavior of Strain Hardening Fiber Reinforced Concrete .................................................. 3
D.J. Kim, K. Wille, A.E. Naaman, S. El-Tawil

Tailoring SHCC Made of Steel Cords and Plastic Fibers .............. 11
A.P. Fantilli, H. Mihashi, T. Naganuma, T. Nishiwaki

Model of Hooked Steel Fibers Reinforced Concrete under Tension ................................................................. 19
C. Sujivorakul

Use of Double Punch Test to Evaluate the Mechanical Performance of Fiber Reinforced Concrete ................................. 27

Determining Specimen Size Influences on FRC Response Using the Digital Image Correlation Technique .................... 35
L.N. Talboys, A.S. Lubell, V.S. Bindiganavile

Connecting Non-destructive Fiber Dispersion Measurements with Tensile HPFRCC Behavior .................................... 43
L. Ferrara, M. Faifer, M. Muhaxheri, S. Toscani, R. Ottoboni
Improved Tensile Performance with Fiber Reinforced Self-compacting Concrete ......................................................... 51
S. Grünwald, F. Laranjeira, J. Wairaven, A. Aguado, C. Molins

The Impact of Rheology on the Mechanical Performance of Steel Fiber-Reinforced Concrete ........................................... 59
G.P.A.G. van Zijl, S. Zeranka

Quantification of Fresh and Mechanical Properties of HFRCC by Excess Paste Thickness ........................................... 67
H. Mihashi, N. Ishikawa

An Investigation of Mechanical Properties of Jute Fiber-Reinforced Concrete .......................................................... 75
J. Kim, C. Park, Y. Choi, H. Lee, G. Song

Back-Calculation of Tensile Properties of Strain Softening and Hardening Cement Composites ........................................... 83
M. Bakhshi, C. Barsby, B. Mobasher

Basis of a Finite-Element Simulation Tool to Predict the Flexural Behavior of SFRC Prisms ................................................ 91
T. Soetens, S. Matthys, L. Taerwe, A. Van Gysel

Multifunctional Carbon Black Engineered Cementitious Composites for the Protection of Critical Infrastructure ................. 99
M. Li, V. Lin, J. Lynch, V.C. Li

Effects of Fiber Dispersion and Flaw Size Distribution on the Composite Properties of PVA-ECC ........................................... 107
R. Ranade, M.D. Stults, B. Lee, V.C. Li

Part 2: Bond and Pull-Out Mechanisms

Groups of Physical Parameters Influencing the Three Stages Pull-Out Behavior of Glass Multi-filament Yarns Embedded in Micro-concrete .......................................................... 117
H. Aljewifi, B. Fiorio, J.-L. Gallias

Tailor-Made Steel Fiber Reinforced Ultra High Performance Concrete – Single Fiber Pull-Out, Bending Capacity and Fracture Toughness .......................................................... 127
T. Stengel, X. Lin, P. Schießl, C. Gehlen

Study on Size Effect in Bond Splitting Behavior of ECC .......................................................... 137
K. Asano, T. Kanakubo
Experimental and Nonlinear Finite Element Analysis of Fiber-Cementitious Matrix Bond-Slip Mechanism .................................................. 145
C.S. Chin, R.Y. Xiao

Part 3: Durability

Self-healing of Engineered Cementitious Composites in the Natural Environment ................................................................. 155
E.N. Herbert, V.C. Li

Resistance to Corrosion Induced Cracking in Self Consolidating Hybrid Fiber Reinforced Concrete ........................................... 163
G. Jen, C.P. Ostertag

Basic Creep under Compression and Direct Tension Loads of Self-compacting-steel Fibers Reinforced Concrete ........................ 171
E. Marangon, R.D. Toledo Filho, E.M.R. Fairbairn

Hot and Residual Behavior of Steel Fiber-Reinforced Structural Shotcrete Exposed to High Temperature ............................ 179
P. Bamonte, P.G. Gambarova, A. Nafarieh

Part 4: Structural Elements: Design, Detailing, Shear, Tension Stiffening

Optimization of HPFRCC-Structures with Innovative Computational Methods ............................................................... 189
S. Grünwald, M. Flint, H. Han, J. Coenders, J.C. Walraven

Structural Applications of Hybrid Fiber Engineered Cementitious Composites - A Review .......................................................... 197
M. Maalej

D-Zones in HPFRC .......................................................... 205
M. Colombo, M. di Prisco

Effect of Fiber Reinforced Concrete in Members with Highly Complex Stress Fields .......................................................... 213
S.-H. Chao, T. Pareek, D.R. Sahoo

Towards a Design Model for Steel Fiber Reinforced Concrete in Bending ............................................................. 221
G.P.A.G. van Zijl, P.B.K. Mbewe

Shear Crack Formation and Propagation in Fiber Reinforced Cementitious Composites (FRCC) ........................................... 231
I. Paegle, G. Fischer
Effects of Shear Transfer on the Directions of Principal Strain Field in Cracked Concrete with Hooked Steel Fibers .......................... 239
B. Suryanto, K. Nagai, K. Maekawa

Mechanical Interaction between Concrete and Structural Reinforcement in the Tension Stiffening Process .................................. 247
L. Lárusson, G. Fischer, J. Jönsson

Confinement and Tension Stiffening Effects in High Performance Self-consolidated Hybrid Fiber Reinforced Concrete Composites .................................................. 255
W. Trono, G. Jen, D. Moreno, S. Billington, C.P. Ostertag

Tension-Stiffening in Reinforced High Performance Fiber-Reinforced Cement-Based Composites under Direct Tension ........................................... 263
D.M. Moreno, W. Trono, G. Jen, C. Ostertag, S.L. Billington

Crack Formation in FRC Structural Elements Containing Conventional Reinforcement ................................................................. 271
J. Deluce, S.-C. Lee, F.J. Vecchio

Strength and Behavior of SFRSCC and SFRC Wall Panels under One-Way In-Plane Action .................................................. 279
N. Ganesan, P.V. Indira, S. Rajendra Prasad

Part 5: Impact, Cyclic and Seismic Loading

Drop-Weight Impact Response of Glass-Fiber Reinforced Ceramic Concrete ................................................................. 289
S.T. Tassew, R. Mutsuddy, V.S. Bindiganavile, A.S. Lubell

Mechanical Behavior of SHCC under Impact Loading .................. 297
V. Mechtcherine, O. Millon, M. Butler, K. Thoma

Shock-Absorbing Blocks Made of HPFRCC for Better Girder-End Structures ............................................................. 305

Post-Peak Cyclic Behavior of Steel Fiber Reinforced Concrete under Bending ............................................................. 313
F. Germano, G.A. Plizzari

Seismic Strengthening of Piers by Using High Ductility Cement .......... 321
K. Kosa, H. Shimizu, M. Kusano, H. Goda
Drift Limits of Concrete Frame Members Reinforced with High-performance Steel Bars and Fibers ........................................ 329
H. Tavallali, A. Lepage, J. Rautenberg, S. Pujol

Dynamic Behavior of HPFRC at High Strain Rate: The Fiber Role ... 339
A. Caverzan, E. Cadoni, M. di Prisco

Beam-Column Connections for Precast Concrete Frames Using High Performance Fiber Reinforced Cement Composites .................. 347
L.F. Maya, L. Albajar

A Summary of Ten Years of Research on HPFRC Coupling Beams .......................................................... 355

Part 6: Ultra High Performance Fiber Reinforced Concrete

Size and Shape Effect of UHPFRC Prisms Tested under Axial Tension and Bending .......................................................... 365
B. Frettlohr, K.-H. Reineck, H.-W. Reinhardt

Characterization of Bending and Tensile Behavior of Ultra-high Performance Concrete Containing Glass Fibers ......................... 373
S. Rigaud, G. Chanvillard, J. Chen

Strain Rate Dependent Tensile Behavior of Ultra-High Performance Fiber Reinforced Concrete ............................................... 381
K. Wille, S. El-Tawil, A.E. Naaman

Dynamic Properties and Damage Model of Ultra-High Performance Fiber Reinforced Cement Composites Subjected to Repeated Impacts ............................................................. 389
J. Lai, W. Sun, S. Xu, C. Yang

CARDIFRC – From Concept to Industrial Application .............................................. 397
B.L. Karihaloo

Static and Dynamic Behavior of Hybrid Precast Bridge Parapet Made of Ultra-High Performance Fiber Reinforced Concrete .................. 405
J.-P. Charron, F. Duchesneau, B. Massicotte

Shear Strength of Ultra High Performance Fiber Reinforced Concrete (UHPFRC) Precast Bridge Joint ............................................. 413
C.H. Lee, Y.J. Kim, W.J. Chin, E.S. Choi

UHPFRC Bolted Joints: Failure Modes of a New Simple Connection System .............................................................. 421
E. Camacho, P. Serna, J.A. López
Rapid Jacketing Technique by Using UHP-SHCC for Damaged RC Column under Seismic Loading ........................................ 429
M. Kunieda, Y. Umeda, N. Ueda, H. Nakamura

Structural Design and Previous Tests for a Retaining Wall Made with Precast Elements of UHPFRC ........................................ 437
J.A. López, P. Serna, E. Camacho

Design for Serviceability of Ultra High Performance Concrete Structures ...................................................... 445
T. Leutbecher, E. Fehling

Part 7: Textile Reinforced Concrete (TRC) and Hybrid Composites

Influence of Textile Alignment, Moisture and Shape of Specimens on First Crack Load and Load Bearing Behavior of Textile Reinforced Concrete Containing Short Fibers ........................................ 455
M. Hinzen, A. Hatting, W. Brameshuber

Tensile Behavior of Textile: Influence of Multilayer Reinforcement ................................................................. 463
I. Colombo, M. Colombo, A. Magri, G. Zani, M. di Prisco

Optimization of Quasi-isotropic Formulation of Fiber-Cement Laminates: Polar Method and Experimental Validation ...................................................... 471
P. Hamelin, A. Gabor, T.Q. Bach, A. Si Larbi

Bond Behavior of Textile Reinforcements - Development of a Pull-Out Test and Modeling of the Respective Bond versus Slip Relation ................................. 479
E. Lorenz, R. Ortlepp

Effect of Short Fibers on the Behavior of Textile Reinforced Concrete under Tensile Loading ........................................ 487
R. Barhum, V. Mechtcherine

High Performance Light-Weight Cement Composite Plates Using Wastepaper Fibers and Wire Mesh ...................................................... 495
C. Sujivorakul, T. Muhummud, N. Dokkhan

Textile Reinforced Cementitious Composites for Retrofit and Strengthening of Concrete Structures under Impact Loading ........................................ 503

Industrial Processing Technique for Textile Reinforced Cement Composites with Structural Use ........................................ 511
J. Wastiels, O. Remy
A Mixed Pultrusion and Braiding Process Adapted to the Production of High Performance Cement Composite Beams ......... 519
A. Gabor, P. Hamelin, G. Promis

TRC and Hybrid Solutions for Repairing and/or Strengthening Reinforced Concrete Beams ........................................ 527
A. Si Larbi, R. Contamine, P. Hamelin

Hybrid Fiber Reinforcement and Crack Formation in Cementitious Composite Materials ........................................ 535
E.B. Pereira, G. Fischer, J.A.O. Barros

Impact Behavior of 3D Fabric Reinforced Cementitious Composites ........ 543
A. Peled, D. Zhu, B. Mobasher

Author Index ................................................................. 551

Subject Index ............................................................... 555
