

**Qualification of the airborne FTIR spectrometer  
MIPAS-STR and study on denitrification and  
chlorine deactivation in Arctic winter 2009/10**

Zur Erlangung des akademischen Grades eines  
DOKTORS DER NATURWISSENSCHAFTEN  
Fakultät für Chemie und Biowissenschaften

Universitätsbereich

genehmigte

DISSERTATION

von

Helmut Walter Wolfgang Woiwode

aus Köln

Dekan:	Prof. Dr. M. Bastmeyer
Referent:	Prof. Dr. M. Olzmann
Korreferent:	Prof. Dr. J. Orphal
Tag der mündlichen Prüfung:	19.4.2013

# Contents

<b>Contents</b> . . . . .	<b>ix</b>
<b>1 Introduction</b> . . . . .	<b>1</b>
1.1 Motivation . . . . .	1
1.2 The ozone layer and chemistry of the Arctic winter stratosphere . . . . .	5
1.3 Atmospheric limb-emission spectroscopy . . . . .	10
<b>2 Overview MIPAS-STR</b> . . . . .	<b>23</b>
2.1 Instrument overview . . . . .	25
2.2 Atmospheric sampling . . . . .	29
<b>3 Data processing, characterisation and validation</b> . . . . .	<b>33</b>
3.1 Transformation of raw interferograms into calibrated spectra with known geolocation (level-1 processing) . . . . .	33
3.1.1 Correction of detector nonlinearity . . . . .	35
3.1.2 Fourier Transformation of interferograms and phase correction . . . . .	40
3.1.3 Determination of instrumental offset and radiometric calibration . . . . .	43
3.1.4 Characterisation of the vertical field-of-view weighting function . . . . .	50
3.1.5 Post-processing and characterisation of pointing information . . . . .	53

3.1.6	Summary: Optimisation and characterisation of level-1 product . . . . .	58
3.2	Retrieval (level-2 processing) and validation . . . . .	61
3.2.1	Cloud detection . . . . .	61
3.2.2	Retrieval method . . . . .	63
3.2.3	Retrieval strategy . . . . .	66
3.2.4	Retrieval result characterisation . . . . .	72
3.2.5	Geophysical validation of the retrieval results .	79
3.2.6	Summary: Retrieval strategy and characterisation of level-2 product . . . . .	95
<b>4</b>	<b>Scientific results . . . . .</b>	<b>97</b>
4.1	The Arctic winter 2009/10 and the RECONCILE field campaign . . . . .	98
4.2	MIPAS-STR measurements in Arctic winter 2009/10: Denitrification and chlorine deactivation . . . . .	100
4.2.1	Flight on January 25 <sup>th</sup> 2010: Cold vortex under synoptic scale PSC conditions . . . . .	102
4.2.2	Flight on January 30 <sup>th</sup> 2010: Developed denitrification in cold vortex after PSC phase .	109
4.2.3	Flight 11 on March 2 <sup>nd</sup> 2010: Aged vortex and filaments . . . . .	113
4.2.4	Discussion: Denitrification and chlorine deactivation in the Arctic winter 2009/10 . . . .	119
4.3	Combined study on the denitrification by potential large- dimension NAT particles based on CLaMS simulations and MIPAS-STR measurements . . . . .	130
4.3.1	The process of denitrification, open issues and approach for the study . . . . .	130
4.3.2	Introduction of the CLaMS model . . . . .	133

---

4.3.3	In-situ measurements of large-dimension potentially HNO <sub>3</sub> -containing particles on January 25 <sup>th</sup> 2010 and comparison with CLaMS particle backward trajectories . . . . .	134
4.3.4	MIPAS-STR measurements and CLaMS simulations of HNO <sub>3</sub> redistribution for the flights on January 25 <sup>th</sup> and January 30 <sup>th</sup> 2010 . . . . .	138
4.3.5	Comparison of modelled and measured HNO <sub>3</sub> redistribution: The impact of reduced particle settling velocities . . . . .	142
4.3.6	Discussion: Indications for shape and morphology of large-dimension HNO <sub>3</sub> -containing particles . . . . .	148
<b>5</b>	<b>Summary and outlook . . . . .</b>	<b>151</b>
	<b>Bibliography . . . . .</b>	<b>155</b>
	<b>Nomenclature . . . . .</b>	<b>171</b>
	<b>Acknowledgments . . . . .</b>	<b>177</b>
