# Contents

Chapter 1  **Elemental Sustainability and the Importance of Scarce Element Recovery**  
*Andrew J. Hunt, Thomas J. Farmer and James H. Clark*

1.1 The Issue of Elemental Sustainability  
1.2 What are Critical Elements?  
1.3 Why is there a Growing Security of Supply Issue?  
1.3.1 Trends in Elements  
1.4 Current Uses of Critical Elements  
1.4.1 Critical Elements in Catalysis  
1.4.2 Growing Need for Greener Elemental Recovery  
1.5 New Sources of Critical Elements  
1.6 Could a Circular Economy Hold the Answer?  
References

Chapter 2  **Integration of Traditional Methods for Elemental Recovery in a Zero-waste Recycling Flow Sheet**  
*Xuan Wang, Tom Van Gerven and Bart Blanpain*

2.1 Introduction  
2.2 Metal Production Processes  
2.2.1 Basic Stages in Metal Production  
2.2.2 Extractive Metallurgy  
2.2.3 Important Flow Sheets  
2.3 Metal Recovery From Metallurgical Waste  
2.3.1 Introduction  
2.3.2 Case Study: Metal Recovery from Copper Slag  
2.4 Conclusions  
References
Chapter 3  Ionometallurgy: Processing of Metals using Ionic Liquids  59
Andrew P. Abbott and Gero Frisch

3.1 Metal Extraction and Recovery  59
3.2 Speciation and Phase Control  61
3.3 Current Issues  62
3.4 Ionometallurgy: A Potential Solution  64
3.5 What is an Ionic Liquid?  65
  3.5.1 Properties of Ionic Liquids  65
3.6 Previous Studies in Ionometallurgy  67
  3.6.1 General Observations  67
  3.6.2 Systems Studied  67
3.7 Current Research and Future Direction  69
  3.7.1 Oxidising Metals Electrolytically  69
  3.7.2 Oxidising Metals Chemically  69
  3.7.3 Solubility  71
  3.7.4 Precipitating Agents  72
  3.7.5 Redox Potentials  73
3.8 Issues to be Addressed  74
  3.8.1 Material handling  74
  3.8.2 Material Recycling  75
  3.8.3 Fundamental Data  75
  3.8.4 Environmental Impact  75
3.9 Conclusions  76
References  76

Chapter 4  Biosorption of Elements  80
Pei Pei Gan and Sam Fong Yau Li

4.1 Science of Biosorption  80
  4.1.1 Mechanisms of Biosorption  80
  4.1.2 Modelling Biosorption for Evaluation of Sorption Performance  83
4.2 Biosorbent Materials  85
  4.2.1 Potential Candidates  85
  4.2.2 Living versus Dead Biomass  99
4.3 Metal Recovery and Post-treatment of Spent Biosorbent  101
4.4 Further Consideration of Practical Applications  102
  4.4.1 Availability of Reactors for Biosorption  102
  4.4.2 Immobilisation of Biomass  104
4.5 Current Challenges and Future Direction  105
4.6 Conclusions  107
Acknowledgement  107

## Chapter 5 Hyperaccumulation by Plants

*Christopher W. N. Anderson*

### 5.1 Introduction 114

### 5.2 Hyperaccumulation of Metals 115

### 5.3 Reason for Hyperaccumulation 116

### 5.4 Natural vs. Induced Hyperaccumulation 117

### 5.5 Technological Application of Hyperaccumulation to Metal-rich Soil 119

#### 5.5.1 Phytoremediation and Phytomining. What is the Difference? 119

#### 5.5.2 Timeframe 119

### 5.6 Phytomining of Nickel and Gold 120

#### 5.6.1 Phytomining of Nickel 121

#### 5.6.2 Phytomining of Gold 122

### 5.7 Biomass Processing: Recovery of Metal from Harvested Plants – the Big Unknown 128

#### 5.7.1 Green Technology Idea for the Future: Supercritical Fluid Extraction 129

### 5.8 Economic Case for Using Nickel and Gold Hyperaccumulator Plants 130

#### 5.8.1 Sustainability of Hyperaccumulation with Time 132

### 5.9 Where Might Phytoextraction be Most Usefully Employed? 133

#### 5.9.1 Phytoextraction as a Community Mining Initiative 133

### 5.10 Conclusion 136

**References** 136

## Chapter 6 F-block Elements Recovery

*Louise S. Natrajan and Madeleine H. Langford Paden*

### 6.1 Introduction 140

### 6.2 The Lanthanide Series 140

#### 6.2.1 Discovery and Mining 142

#### 6.2.2 Rare Earth End Uses 146

#### 6.2.3 Rare Earth Separation, Recovery and Recycling 151

### 6.3 The Actinide Series 160

#### 6.3.1 End Uses and Applications 162

#### 6.3.2 Spent Nuclear Fuel and Reprocessing 164

### 6.4 Summary and Future Outlook 176

Chapter 7 Anthropospheric Losses of Platinum Group Elements 185
N. T. Nassar

7.1 Overview 185
7.2 Methodology 186
7.3 Loss and Recovery Rates 188
  7.3.1 Mining, Comminution and Concentration, Smelting and Refining 188
  7.3.2 Autocatalysts 192
  7.3.3 Jewellery and Investment 195
  7.3.4 Industrial Applications 196
  7.3.5 Electrical and Electronics 197
  7.3.6 Other Uses 198
7.4 Results and Discussion 198
7.5 Conclusions 202
Acknowledgement 202

Chapter 8 WEEE Waste Recovery 207
Avtar S. Matharu

8.1 Introduction: EEE and WEEE 207
8.2 WEEE Urban Mine 208
8.3 Case Study: Liquid Crystal Displays 209
  8.3.1 Success of LCDs 209
  8.3.2 Demanufacturing and Resource Recovery 211
  8.3.3 Distribution and Quantification of Critical Metals in LCDs 213
8.4 Environmental Legislation: WEEE, RoHS, REACH, EuP, ERP 215
8.5 Summary and Future Outlook 216
References 217

Chapter 9 Mining Municipal Waste: Prospective for Elemental Recovery 220
J. Dodson and H. L. Parker

9.1 Introduction 220
  9.1.1 The Material Cycle and Material Flows 220
  9.1.2 End-of-life Waste 223
9.2 Elemental Stocks in Society 225
  9.2.1 Metal Stocks 225
  9.2.2 Landfill Stockpiles 228
