ICLEM 2012

LOGISTICS FOR SUSTAINED ECONOMIC DEVELOPMENT— TECHNOLOGY AND MANAGEMENT FOR EFFICIENCY

VOLUME 1

PROCEEDINGS OF THE 2012 INTERNATIONAL CONFERENCE OF LOGISTICS ENGINEERING AND MANAGEMENT

October 8–10, 2012
Chengdu, China

SPONSORED BY
Southwest Jiaotong University
American Society of Civil Engineers

EDITED BY
Jin Zhang
Xiaoqiang Zhang
Zhongquan Qiu
Ping Yi

</table>
Research on Attractive Region of the Railway Transport Corridor Based on the Shortest Path
Yuan Tang, Bin Tang, and Yongxia Zhu ................................................................. 86

Study on Stations Distribution Scheme of Inter-City Railway
Zongzhi Huang, Si Ma, and Xuan Liu ................................................................. 92

Analysis on Transfer Organization between Chengdu-Dujiangyan Regional Urban Railway and Chengdu Metro Line 2
Ling Li, Si Ma, and Ling Ma .................................................................................. 98

Analysis of Advantages of Combined Transportation in Transport Corridor
Songjilang Tian, Yaozong Liu, and Kuilin Wang .................................................. 105

Multi-Objective Optimization Model of Hub Location-Allocation in Intermodal Logistics Networks
Rongrong Zhu and Dawei Hu ............................................................................. 110

Based on Multi-Objective Programming Container Multimodal Transportation Research
Zhengbin Wang and Kangli Zheng ....................................................................... 117

Integrated Wagon-Flow Allocation and Shunting Locomotive Scheduling Problem at Railyard with Multiple Locomotives
Jun Zhao and Qiyuan Peng .................................................................................. 123

Study on Reducing Assembling Time of Container Flow from Terminal Area
Wei Li, Haifeng Yan, Qidong Shao, and Shoushuai Zhang ........................................ 129

Study on the Operation Management Mode of Newly-Built Railway from China to Burma
Zhenghong Tan, Haifeng Yan, Qianbiao Zuo, Gongjuan Zhai, and Wenhua Fan ........ 134

Optimization of the Path of the Multimodal Transport Operator’s Transportation Decision-Making
Kuilin Wang, Shaoquan Ni, Xin Lu, and Songjiang Tian .......................................... 139

Research on Modes of Railway-Oriented Multimodal Transport Virtual Enterprise
Yi Cui and Lu Shi .................................................................................................... 145

The Collaborative Optimization of Stop Plan with Train Working Diagram of High-Speed Railway Passenger Trains
Zhenping Fan, Shaoquan Ni, and Dingjun Chen .................................................... 152

Research on Joint Optimization Method for Warehousing and Transportation of Iron and Steel Enterprise
Ming Jian and Guangming Tang ............................................................................ 157

Regional and International Logistics
Accessibility Analysis Method for Polymorphic Regional Logistics Network
Xiaofeng Ji, Xuan Ji, and Fang Chen .................................................................... 165
Game Theory Analysis between Urban Logistics Distribution and Traffic Organization Scheme ......................................................... 171
Yating Luo, Xiaofeng Ji, and Feiwen Liang

The Application of Grey GM(1,1) Model in Forecast of Regional Logistics Scale ................................................................. 178
Xue-liang Shi

Application of EDI in International Logistics .................................................. 183
Peilong Zhang and Wen Zhang

Feasibility Study on the Logistics Development of Sichuan Province Expressway Service Zone .................................................. 189
Shu Wei and Yamin Huo

A Multimodal Multi-Product Transportation Network Model for Strategic Planning of Freight Flows ........................................... 197
Xiao-mei Xia and Xiao-dan Ma

Research on the Freight Corridor Planning for Beibu Gulf of China ....................................................................................... 203
Feibiao Bai, Hua Liu, Ronghua Hou, and Jianmei Zhu

Optimization Model for Wagon Flow Organization on Railway Regional Network ................................................................. 211
Feng Xue, Chongshuang Chen, and Qiang Peng

Connotation and Application of Port Flexible Service .................................................. 217
Guiyun Liu and Dan Zhao

Some Key Problems in Regional Logistics Capacity Research .................................................. 224
Yan Zhang, Gang Wu, and Zhengbin Wang

Intelligent Logistics and Transportation

Optimization of Logistics System Based on Triz Theory .................................................. 230
Juntao Li and Chunxia Shangguan

Large Eddy Simulation of Three-Dimensional Wave-Current Interaction with Vertical Square Cylinders in Tandem Arrangement ........................................................................... 235
Bing Zhu and Azhen Kang

Comprehensive Evaluation of Urban Rail Transit Connecting Lines Planning .................................................. 242
Xiaohui Wu, Meiling He, and Nengye Mou

Study on Apparel Supply Chain Information Sharing Based on RFID .................................................. 249
Xueyan Zhang and Ya Zhang

A Knowledge-Based Fast Recognition Method of Urban Traffic Flow States .................................................. 255
Ling Wang

Research on the Integrated Weight Model of a Reverse Logistics Network .................................................. 263
Lu Liu and Min Mao

Evolution Approach Analysis on Innovation Cluster in ShangHai IC Industry .................................................. 269
Xiangyang Li
Research on Logistics Information System Based on Multi-Source Information Fusion ................................................................. 278
Qile Huang

Evaluation of an RITS-Based System for Special Transport Management .......................................................... 284
Jia Gao, Shaoquan Ni, and Yuxiao Li

Optimization Algorithm of Load Matching for Road Freight .......................................................... 290
Yufeng Shi and Yong Zhou

Research on Continuous Equilibrium Network Design Model of Stochastic Demand and Supply Based on Genetic Algorithm .......................................................... 296
Jie Cheng, Pengcheng Du, and Menglong Zhao

Analysis on Throughput Capacity of Coal Terminal by BP Neural Network .......................................................... 302
Bing-li Yan, Qiang Zhou, and Tian-you Gao

Intelligent Logistics Distribution Based on ITS and EC .................................................................................. 308
Hua Zhao, Haifeng Yan, Wei Li, and Qiaolin Yin

The Guiding System of Passing the Non-Passenger-Flow Bus Station .......................................................... 315
Tong Yu, Qu Hu, and Xiao Liu

Design and Implementation of Intelligent Logistics Warehouse Management System Based on Internet of Things .......................................................... 319
Jie Yang

Application and Study of RFID Technology in Logistics .................................................................... 326
Peng Yao, Chuan Li, and Hailiang Jia

Study of Ways in Ambiguous Path Identification Based on RFID in the Highway Toll System .......................................................... 332
Chuan Li, Hailiang Jia, and Peng Yao

Simulation and Optimization of the Port Discharge Service System Based on Flexsim .......................................................... 336
Feiyuan Zeng, Xiaoping Qiu, and Ping Zeng

Traffic Design of Effective Coordination among the “Time, Space, Flow” .......................................................... 342
Xin Chen, Yuanyuan Zhang, and Xuewen Chen

Internet-of-Vehicles Based on Technologies of Internet-of-Things .......................................................... 348
Bo Wu

Study on System Analysis and Synthesis Handling Capacity of Logistics System in Port .......................................................... 357
Jian-qiao Tang, Ci-guang Wang, and Bin Shuai

Application of Wireless Positioning Technology in Logistics Distribution .......................................................... 365
Xudong Bi

Conception of Intelligent Military Logistics Based on Internet of Things Technology .......................................................... 371
Xuejiang Wei, Yi Wan, Hui Ding, and Haitao Xu

Research on the Construction of the IOT System in the Field of Military Logistics .......................................................... 376
Xiao-Hong Zhong, Hui Ding, Xiao-Ming Zhang, and Fei Zhang
Coordinated Control of Urban Expressway Exit and Its Adjacent Intersection Based on Blocking Index .......................................................... 383
Qiu Yan and Jing Yuan

Basic Theories and Enabling Technologies of Intelligent Logistics ...................................................... 390
Mingyao Hu, Hanping Hou, Huiqi Zhu, and Yong Geng

Things Identification Support System Based on IoT ............................................................ 397
Huiqi Zhu, Hanping Hou, Mingyao Hu, and Yong Geng

Vehicle Operating Speed Prediction Model on Freeway Exit Ramp .............................................. 404
Liguo Xia, Jian Lu, and Yongfeng Ma

A Modular Design of Standard Unit for Automated Storage Logistics System for Aging Tobacco Leaves ...................................................... 410
Zhilan Song, Wenxue Ran, and Pei Zhang

The Application of IOT to Military Logistics ........................................................................ 421
Jun Wang, Fan Jiang, and Chao Xie

Study on Key Techniques of Image Processing and Automatic Recognition of Tunnel Cracks ...................................................... 427
Lixiang Zhao and Lifei Niu

Forecasting of National Expressway Network Scale Based on Support Vector Regression with Adaptive Genetic Algorithm .............................................. 434
Xia Luo, Hongfei Ding, and Lingwan Zhang

Modeling Pedestrian Degree of Satisfaction Based on Structure Equation Model ...................................................... 442
Kai-ying Wang and Ming-jun Liao

Optimal Research of Port Business Process Based on Petri Net ...................................................... 449
Ruikai You, Haiyong Liang, Yaqin Lv, Wenxue Cai, and Huiling Zhong

Evaluation of Regional Logistics System Planning Using Group Language Information ...................... 456
Nianhong Yin and Zengqiang Wang

Research on China Railway Freight Econometric Analysis and Modeling ...................................................... 462
Si Ma and Qingfeng Zhou

Comparison of Traffic Information’s Effectiveness Based on Cell Transmission Model ...................................................... 469
Lan Kuang, Zengqiang Wang, and Lingjuan Chen

An Algorithm for SDIRP with Hard Time Windows ........................................................................ 475
Da Zhao, Danxiang Ma, and Yinlian Zeng

Crude Oil Price Forecasting Based on the ARIMA and BP Neural Network Combinatorial Algorithm ...................................................... 482
Guiqing Wang and Jingqiong Wu

An Introduction to the European Rail Traffic Management System ...................................................... 488
Long Li

Railway Container Station Layout on Modern Logistics Conditions ...................................................... 493
Hongxia Zhao and Gang Wu
China Railway Train Working Diagram Compilation System ................................................. 500
Shaoquan Ni, Hongxia Lu, and Changyu Liao

CRH Train Traction Calculation Model and Algorithm Based on Automatic Constant Speed .................................................................................................................. 506
Hongguo Shi and Hanying Guo

Research on the Optimal Dwell Point Location of Single Stacker in Multiple Aisles Automated Storage and Retrieval Systems .......................................................... 513
Ailan Feng, Yao Chen, and Wenying Ding

Optimization of Dynamic Dispatching Decision of Active Wagons-Flow in Railway Hub Based on ITS-R ................................................................. 519
Zuoan Hu, Yusong Yan, and Pan Xie

Logistics Risk Management and Safety Technology

Key Material Mill Supervision Mode of High-Speed Railway Project: A Case Study of Polyurea Spray ........................................................................................................ 527
Yuanning Tang, Xi Zhao, Fangting Zhou, Lixiang Hou, and Youting Yu

Metro Channel Width Design Considering the Level of Service ..................................... 534
Juanxiu Zhu

Risk Analysis of Highway Traffic Forecasts ................................................................. 541
Li Luo

An Improved Particle Swarm Optimization Algorithm for University Classroom Scheduling Problems ................................................................. 546
Cejun Cao, Qin Yang, Zhenghui Chen, Jinqi Li, and Biao Luo

Research on the Genetic Algorithm in Nurse Scheduling Problems .......................... 553
Lingling Yuan, Qin Yang, and Hongyan Liang

Study of an Optimal Algorithm for Unfixed-Tract Double-Shoulder Circuit Locomotive's Working Diagram .......................................................... 561
Chengbing Li, Jun Wu, and Chukai Li

Security Strategies in Supply Chains ........................................................................ 567
Rongrong Zhang

Evaluating Recovery Reliability of a Road Network during an Incident .................. 572
Haixu Liu, Lingjuan Chen, and Xueqing Cheng

Design and Selection of Pharmaceutical Care Contract Based on the Effort Level ........................................................................................................ 579
Qian Xu, Haiyan Wang, and Lei Tang

An Integrated Model of Land Exploitation and Road Expansion ............................ 586
Wenbo Fan, Fanxiao Liu, and Kejin Jiang

Research and Implementation of Training Integrated Simulator for Large Scale Cranes ........................................................................................................ 593
Benkai Xie, Qiang Zhou, Liang Yu, and Xinlin Guo

An Evaluation Method for Rationality of Setting Locations of Guide Signs at Intersections ......................................................................................... 599
Shu Chen, Qiaojun Xiang, and Xiaohang Bai
Study on Sub-Classification of Surrounding Rock during Construction Based on Theory of Qualification ................................................................. 606
   Jianguo Zhang and Mingnian Wang

Research on the Layout of Railway Ticket Agencies .................................................. 612
   Lin Wang, Si Ma, and Juanxiu Zhu

Research on Adaptive Prediction Model of Traffic Safety ....................................... 619
   Gu Wang

Reliable Logistics Network Design Considering Network Damage ............................. 626
   Ling Cheng and Dawei Hu

Risk Analysis and Safety Management Research for ISO-Tank Transportation of Sodium Cyanide .............................................................................. 633
   Huidan Lin and Gengjun Gao

Relationship between Road Lighting and Traffic Accidents ..................................... 640
   Kairan Zhang, Lei Yao, and Guofang Li

Influence of Road Lighting Quality Index on Traffic Safety ................................... 647
   Kairan Zhang, Lei Yao, and Guofang Li

Study on Risk Control of E-Commerce Logistics Based on QFD ............................... 653
   Gejun Shao, Zengqiang Wang, and Wenyu Yue

Sensitivity Analysis on the Risk Model for Hazmat Transportation ........................... 659
   Xialion Guo

The Design of a New Kind of Device for Forbidding Drunk Driving .......................... 664
   Jun Li, Yingxiang Teng, and Zhibin Li

Fault Diagnosis Method for Marine Hydraulic System ............................................. 670
   Changwei He and Dawei Liu

Safety Training System Construction of Multinational Shipping Companies in Chinese Culture ................................................................. 675
   Fanhui Xing, Jinlu Sheng, and Changwei He

Research on the Highway Freight Overload Supervision Based on Game Theory ........ 681
   Dan Wu, Ming Jian, and Fei Wei
