11th International Conference on Fast Sea Transportation

(FAST 2011)

Honolulu, Hawaii, USA
26-29 September 2011

Editors:
Todd J. Peltzer

CONTENTS

T-Craft, Surface Effect Ships (SES), and Air Cushion Vehicles (ACV)

A1-1 T-Craft—What, Why & How? ................................................................. 1
Dr. Alfred Skolnick and Robert A. Wilson

A1-2 The T-Craft Program – Merging Technology Development and Ship Design ................................................. 9
Mark Redmond, J. Christopher Ryan, Brent Tompkins, and Chris B. McKesson

A2-1 Surface Effect Ship Sizing and Synthesis: A Nonlinear Programming Approach ........................................... 18
Stefanos Koullias, Santiago Balestrini Robinson, and Dimitri N. Mavris

A2-2 Comparison of Model Scale and Full Scale Deceleration of a Fully Skirted Air Cushion Vehicle in Sideslip ................................................................. 26
Robert E. Cole and Joseph J. Boza

A2-3 MVDC and HFAC Electric Power System Architectures for the Transformable Sea Base Connector (T-Craft) ........................................................................ 34
John D. Herbst and Angelo L. Gattozzi

A3-1 The Application of T-Craft Technology to Future Sea Base Connectors ............................................................. 42
Robert G. Moore

A3-2 Development of a Large Scale Surface Effect Ship Bow Seal Testing Platform ................................................. 49
Andrew D. Wiggins, Steven F. Zalek, Marc Perlin, Steven L. Ceccio, Lawrence J. Doctors and Robert J. Etter

A3-3 Numerical Simulation of Flow about a Surface-Effect Ship .................................................................................. 57
David J. Donnelly and Wayne L. Neu

A4-1 Scaling of Resistance from Surface-Effect Ship Model Tests .............................................................................. 65
Chris B. McKesson and Lawrence J. Doctors

A4-2 T-Craft Calm Water Resistance and Motions, and Seakeeping in Regular Waves .............................................. 74
Shanti Bhushan, Frederick Stern, and Lawrence J. Doctors

A4-3 T-Craft – A Transformable Sea Base Connector .................................................................................................. 82
J. Christopher Ryan, Mark Redmond, Weimin Hu, Michael Badal, and William Latham

A5-1 Hinged Ship to Ship Connection for At Sea Cargo Transfer ............................................................................... 91
Trygve Espeland Halvorsen, Nere G Skomedal, Jan Gunnar Reyland, Arve Pedersen, and Egil Jullumströ

A5-2 A Numerical Investigation into the Linear Seakeeping Ability of the T-Craft .......................................................... 99
John C. Bandas and Jeffrey M. Falzarano

A6-1 Using Soft Computing Technologies for the Simulation of LCAC Dynamics ......................................................... 106
Thomas K. Fu, William E. Faller, and David E. Hess

A6-2 Air Cushion Adaptive Disturbance Cancellation for the Reduction of Wave Induced Motion of Ramp-Connected Ships ................................................................................................. 114
Halil I. Basturk, Joseph Doblack, and Miroslav Krstic

A7-1 Large Surface Effect Ship Size Limits .................................................................................................................... 122
Stefanos Koullias, Santiago Balestrini Robinson, and Dimitri N. Mavris

A11-2 Single and Multi-Body Surface Effect Ship Simulation for T-Craft Design Evaluation ...................................... 130
Benjamin S.H. Connell, William M. Milewski, Benjamin Goldman, and David C. Kring

© 2011 American Society of Naval Engineers
Computational Methods, Modeling, and Simulation

A9-1 Study on Linear 3D Rankine Panel Method for Prediction of Semi-Displacement Vessels’ Hydrodynamic Characteristics at High Speed

Babak Ommani and Odd M. Faltinsen

A9-2 URANS Simulation of Catamaran Interference

Wei He, Teresa Castiglione, Mani Kandasamy, and Frederick Stern

A9-3 Solving Nonlinear Wave-Body Interaction Problems with the Pre-corrected Fast Fourier Transform (pFFT) Method

Sheguang Zhang, Kenneth Weems, and Woei-Min Lin

A10-1 Investigation of Skirt Dynamics of Air Cushion Vehicles under Non-linear Wave Impact Using a SPH-FEM Model

Qing Yang, Van Jones, and Leigh McCue

A10-2 Anisotropic Grid Adaptation for RANS Simulation of Ship Flow

Michel Visonneau, Ganbo Deng, Patrick Queutey, and Jeroen Wackers

A13-1 Simulation of Maneuvering in Waves for a High-Speed Surface Effect Ship

David C. Kring, Mealani K. Parish, William M. Milewski, and Benjamin S.H. Connell

B2-3 Comparison of Turbulence Models for Simulating Flow in Waterjets

Xian Luo, Brenden Epps, Chryssostomos Chryssostomidis, and George Em Karniadakis

B9-1 Hydroelasticity of Marine Vessels Advancing in a Seaway

Suvabrata Das and Kwok Fai Cheung

B9-2 Application of SPH in Fluid-Structure Interaction Problems Involving Free-Surface Hydrodynamics

Ruben Paredes and Len Imas

B9-3 Validation of a Time Domain Panel Code for High Speed Craft Operating in Stern Quartering Seas

Frans van Walree and Pepijn de Jong

B11-3 Numerical and Experimental Evaluation of Waterjet Propelled Delft Catamarans

Manivannan Kandasamy, Svetlozar Georgiev, Evgeni Milanov, and Frederick Stern

B13-1 Hydrodynamic Forces on High-Speed Ships in Forced Vertical Motions

Hui Sun and Odd M. Faltinsen

Optimization

A6-3 Applying Soft Constraints to Multi-Disciplinary Design Optimization using Fuzzy Logic

Brian J. Cuneo, Kevin J. Maki, and David J. Singer

B5-3 Optimization of Hull Structures for a 60 Meters MegaYacht

Dario Motta, Jean-David Caprace, Philippe Rigo, and Dario Boote

B8-1 Optimization of Waterjet Propelled High Speed Ships-JHSS and Delft Catamaran

Manivannan Kandasamy, Wei He, Tomaohiro Takai, Yusuke Tahara, Daniele Peri, Emilio Campana, Wesley Wilson, and Frederick Stern

B8-3 Hydrodynamic Optimization of Multihull Ships

Hyunyul Kim and Chi Yang

C4-2 CFD-Based Multiobjective Optimization of Waterjet Propelled High Speed Ships

Yusuke Tahara, Takanori Hino, Manivannan Kandasamy, Wei He, and Frederick Stern

© 2011 American Society of Naval Engineers
Hydrodynamics

A10-3 Nonlinear Nearshore Wave Environment for Ship Motion
Wenting Xiao, Yuming Liu, and Dick K.P. Yue

A11-1 Re-evaluation of Resistance Prediction for High-Speed Round Bilge Monohull Forms
Prasanta K Sahoo, Heather Peng, Jae Won, and Dileepan Sangarasingamany

B6-2 Experimental Investigation of the Lift and Interference of Asymmetric Planing Catamaran Demi-Hulls
Michael G. Morabito

B8-2 The Influence of Catamaran Hull Form on Added Resistance in Head Seas
Gregor J. Macfarlane and Nikki Daire

B10-1 Calm water and Seakeeping Investigation for a Fast Catamaran
R. Broglio, B. Bouscasse, B. Jacob, A. Olivieri, S. Zaghi and F. Stern

B10-3 Stern End Bulb for Energy Enhancement and Speed Improvement
Gabor Karafiath

B11-2 An Investigation into the Effect of Section Shape on the Interference Resistance of Catamarans
Cullen Sarles, Bradley Gelles, and Amanda Malarkey

B12-1 Pressure Sensor Arrays to Optimize the High Speed Performance of Ocean Vehicles
Vicente I. Fernandez, Jeff Dusek, James Schmellester, Audrey Maertens, Stephen Hou, Karthik S. Sekar, Jason Dahl, Jeffrey H. Lang, and Michael S. Triantafyllou

B13-2 Effects of Shallow Water on Catamaran Interference
Teresa Castiglione, Wei He, Frederick Stern, and Sergio Bova

B13-3 Twin-Hull Formation Cruising for Efficiency
Livia Cohen

C1-2 Hydrodynamic Trends in Ferry Design
John S. Richards, Oliver Reinholz

C3-3 A Hybrid Method for Predicting Lift and Drag on Semi-planing/Semi-displacement Hull Forms
Brandon M. Taravella, William S. Vorus, and Lothar Birk

C10-1 Investigation of Cylinder Planing on a Flat Free Surface
Timothy Yen, Michael Morabito, Len Imas, John Dzielski and Raju Datla

C10-3 Measurements and Computational Predictions of A Deep-V Monohull Planing Hull
T. C. Fu, R. Akers, T. O'Shea, K. Brucker, D.G. Dommermuth, and E. Lee

C11-2 A Method for Resistance Prediction in the Design Environment
William J. Rosemurgy, Deborah O. Edmund, Kevin J. Maki, and Robert F. Beck
C11-3 Hydrodynamic and Supportive Structure for Gated Ship Sterns - Amphibious Ship Stern Flap

Dominic S. Cusanelli

**Propulsion, Maneuvering, and Control**

A11-3 Numerical Investigation of the Impact of SES-Waterjet Interactions and Flow Non-uniformity on Pump Performance

Yin Lu Young, Brant R. Savander, and Matthew R. Kramer

A12-2 Experimental and Simulation Studies on Fast Delft372 Catamaran Maneuvering and Course Stability in Deep and Shallow Water

Evgeni Milanov, Valya Chotukova, and Frederick Stern

B6-3 Nonlinear Adaptive Model Predictive Control for Ship Path-Following Using Parametric Neighbouring Extremal Approach

Lingfeng Gao, Reza Ghaemi, and Jing Sun

B7-3 Development of an Emergency Trip System in Response to a Ride Control System FMEA

Robert Ranzenbach and Jeff Bowles

C5-1 Study of a Novel Air Augmented Waterjet Boost Concept

Alon Gany and Aviad Gofer

C5-3 Hydrodynamics of Surface-Piercing Outboard and Sterndrive Propulsion Systems

John O. Scherer and S.K.R. Patil

C7-1 An Improved Z-Drive with Contra-Rotating Propellers for High-Speed Applications

R. Schulze and A. Weber

C7-2 Application of the new FORTJES® Z-drive from REINTJES on planing vessels

A. Weber and R. Schulze

**Structures and Materials**

A5-3 Structural Evaluation of Metallic and Composite Material Systems Used for T-Craft Hull Structure

Himat J. Garala

B1-1 Modeling the Constitutive Behavior of Polymer Foams

Victor L. Berdichevsky and John N. Herman

B1-2 Numerical Simulation of a Composite Ship under Hydrodynamic and Blast Loads using Fluid Structure Interactions

Siyuan Ma and Hassan Mahfuz

B2-1 Structural Health Monitoring of Composite T-Joints Based on Distributed Effects of Localized Damages

Valery Piliuchuk, Ihab Grace, Raouf Ibrahim and Emmanuel Ayorinde

B2-2 An Holistic Approach to Design and Construction of Composite Ships

Nere G Skomedal and Arve Pedersen

B3-1 Modes of Vibration of High Speed Ship Hull Sections

Michael R. Davis, Gary Davidson, Timothy Roberts, and Christopher Cato

B3-2 Lifecycle Fatigue Management for High-Speed Vessels Using Local Approaches

Jiandao Zhu and Matthew Collette

B3-3 Computational Assessment of Build Strategies for a Titanium Mid-Ship Section

Pingsha Dong and Larry DeCan
B4-1 Comparison of Long-term Fatigue Damage in Bulk Carrier, VLCC and Container Carrier Subjected to Wave-induced Vibrations .......................................................... 547
Kazuhiro Iijima, Naoki Itamura, and Masahiko Fujikubo

B4-2 Life-Cycle Ship Reliability Assessment, Damage Detection, and Optimization .......................................................... 555
Dan M. Frangopol, Paolo Bocchini, Alberto Decò, Sunyong Kim, Kihyon Kwon, Nader M. Okasha, Duygu Saydam, and Liming W. Salvino

B4-3 Global load estimations for a 75 Meter FRP Composite SES vessel using a scaled model instrumented with a network of fiber optic sensors .......................................................... 561
Alf E. Jensen, Jon Taby, Karianne Pran, Arve Pedersen, and Egil Jullumstrø

B5-1 Investigation of Wave Impact and Whipping Response on the Fatigue Life and Ultimate Strength of a Semi-Displacement Patrol Boat .......................................................... 569
Rubin Sheinberg, Christopher Cleary, Karl Stambaugh, and Gaute Storhaug

B5-2 A Comparison of Numerical Methods to Predict the Progressive Collapse of Lightweight Aluminium Vessels .......................................................... 577
Simon Benson, Jonathan Downes, and Robert S. Dow

B12-3 Structural Responses of High Performance Sailing Yachts to Slamming Loads .......................................................... 585
Tom Allen, Mark Battley, Pascal Casari, Benoit Kerling, Ivan Stenius, and Joacim Westlund

C12-1 Bending Tests of Inflatable Dropstitch Panels .......................................................... 593
Jaye Falls and Jennifer K. Waters

Seakeeping, Seaworthiness, and Slamming

A7-2 SES Seakeeping Motion in Transforming Near-Shore Head Seas .......................................................... 601
Manhar Dhanak

A7-3 Non-linear roll motions of a frigate-type trimaran .......................................................... 607
Adrian S. Onas and Raju Datla

A8-1 Seakeeping Analysis of a Medium Speed Twin-Hull Containership .......................................................... 615
George Zaraphonitis, Gregory J. Grigoropoulos, Dimitra P. Damala, and Dimitris Mourkoyannis

A12-1 Dynamic Performance of the NTUA Double-Chine Series Hullforms in Random Waves .......................................................... 623
Gregory J. Grigoropoulos and Dimitra P. Damala

A12-3 On the Lateral Accelerations of Multihulls compared against the Cruise Performance requirements of the HSC Code Annex 9 – a Safety Issue .......................................................... 630
Tony Armstrong

B7-1 Seakeeping Evaluation and Loads Determination of a High-Speed Hull Form with and without a Bow Lifting Body .......................................................... 638
Allen Engle, Van Lien and Christopher Hart

B7-2 Hydroelastic Effects in Slamming Loaded Panels .......................................................... 644
I. Stenius, A. Rosén, M. Battley, T. Allen, and P. Pehrson

B10-2 Hydroelastic Wedge Entry and Exit .......................................................... 653
Dominic J. Piro and Kevin J. Maki

B11-1 Influence of Centrebow on Motions and Loads of High-Speed Catamarans .......................................................... 661
Shinsuke Matsubara, Giles Thomas, Michael R. Davis, Damien S. Holloway, and Tim Roberts

B13-4 Simulation of Free Fall Lifeboats – Impact Forces, Slamming and Accelerations .......................................................... 669
Vidar Tregde, Trygve Espeland Halvorsen, and Kjell Ove Underhaug

© 2011 American Society of Naval Engineers
C6-1  Shock Mitigation Of Planing Craft Using The ARES® Aft Lifting Body System
Gary Shimozono and Brian Kays ................................................................. 675

C6-2  Planing Craft Acceleration Prediction Using Vibro-Impact Methodology
Christopher J. Rose, Charles R. Well, and Armin W. Troesch
...................................................................................................................... 679

C6-3  Testing and Modeling of Shock Mitigating Seats for High Speed Craft
Christopher Liam and Mehdi Ahmadian ......................................................... 687

C7-3  Ride Severity Index — A New Approach to Quantifying the Comparison of Acceleration
Responses of High-Speed Craft....................................................................... 693
Michael R. Riley, Dr. Tim Coats, Kelly Haupt, and Donald Jacobson

C8-2  Seaworthiness of Resonance-Free SWATH with Movable Fins as an Oceangoing Fast Ship
Motoki Yoshida, Hajime Kihara, Hidetsugu Iwashita, and Takeshi Kinoshita
.......................................................................................................................... 700

C8-3  Time-Domain Seakeeping Simulations for a High Speed Catamaran with an Active Ride
Control System.............................................................................................. 708
Michael J. Hughes and Kenneth M. Weems

Ship Design Methods and Tools

A8-3  Trimaran Resistance Artificial Neural Network
Richard A. Royce, Andrei Mouravieff, and Aurore Zuzick
....................................................................................................................... 717

B6-1  Maximising Efficiency and Minimising Cost in High Speed Craft
Gary Davidson, Tim Roberts, Stuart Friezer, Michael Davis, Neil Bose, Giles Thomas, Jonathan Binns,
and Rob Verbeek .......................................................................................... 727

C1-1  The Use of Transport Factor as a Very Simple Model for Ship Design Exploration
Chris B. McKesson ...................................................................................... 735

C12-3  Impacts of the Energy Efficiency Design Index on Future Designs of Fast RoRo and
RoPax Vessels .............................................................................................. 742
Lennart Pundt and Stefan Krüger

C13-1  Tools for Analysing and Comparing Tri-SWACH, Monohull and Trimaran Hullforms
Tim P. McDonald, Richard W.G. Bucknall, and Alistair R. Greig
....................................................................................................................... 747

Innovative Vehicle Concepts

A8-2  Trimaran Hull Form Development for America’s Marine Highways
EXPRESS SERVICE Trailership........................................................................ 755
Igor Mizine, Mattia Brenner, Murthy Chitrapu, William Danilczyk, Gerco Hagesteijn, and Stefan Harries

B12-2  Theoretical Considerations and Experimental Investigation of Seakeeping of Transonic Hulls
A. Calderon and L. Hedl ................................................................................ 763

C2-1  Second Generation Design of Wave Adaptive Modular Vessels (WAM-V®): A Technical
Discussion of Design Improvements............................................................ 772
Ugo Conti and Mark Gundersen

C2-2  Multi-body Dynamic Simulation and Analysis of Wave-adaptive Modular Vessels
John Fratello and Mehdi Ahmadian .............................................................. 777

C2-3  Simulation and Testing of Wave-adaptive Modular Vessels
Andrew Peterson and Mehdi Ahmadian ...................................................... 784

C5-2  Support Logistics Landing Craft Concept Design
David Widhalm, LCDR Robert D’Eon, and Andrei Mouravieff
........................................................................................................................ 790
