

## Table of Contents

**Preface** xx

### Chapter 1  Microcontrollers for Embedded Systems  

1.1 Embedded Systems 1

1.2 Microchip PIC  
  1.2.1 PIC Architecture 2  
  1.2.2 Programming the PIC  
    PIC Programmers 3  
    Development Boards 4

1.3 PIC Architecture  
  1.3.1 Baseline PIC Family  
    PIC10 devices 5  
    PIC12 Devices 6

  1.3.2 Mid-Range Family  
    PIC14 Devices 7  
    PIC16 Devices 8

  1.3.3 High-Performance PICs and DSPs  
    Digital Signal Processor 10  
    Analog-to-Digital 11

### Chapter 2  PIC18 Architecture  

2.1 PIC18 Family Overview  
  2.1.1 PIC18FXX2 Group 13  
  2.1.2 PIC18FXX2 Device Group Overview 14

  2.1.3 PIC18F4X2 Block Diagram 15

  2.1.4 Central Processing Unit  
    Status Register 17  
    Program Counter Register 17  
    Hardware Multiplier 18  
    Interrupts 18

  2.1.5 Special CPU Features  
    Watchdog Timer 19  
    Wake-Up by Interrupt 20

  2.2 Memory Organization  
  2.2.1 Program Memory 21

v
# Table of Contents

2.2.2 18FXX2 Stack  
   Stack Operations  
   Fast Register Stack  
   Instructions in Memory  
2.2.3 Data Memory  
2.2.4 Data EEPROM Memory  
2.2.5 Indirect Addressing  
2.3 PIC18FXX2 Oscillator  
   2.3.1 Oscillator Options  
      Crystal Oscillator and Ceramic Resonator  
      RC Oscillator  
      External Clock Input  
      Phase Locked Loop Oscillator Mode  
2.4 System Reset  
   2.4.1 Reset Action  
      Power-On Reset (POR)  
      Power-Up Timer (PWRT)  
      Oscillator Start-Up Timer (OST)  
      PLL Lock Time-Out  
      Brown-Out Reset (BOR)  
      Time-Out Sequence  
2.5 I/O Ports  
   2.5.1 Port Registers  
   2.5.2 Parallel Slave Port  
2.6 Internal Modules  
   2.6.1 PIC18FXX2 Modules  

## Chapter 3 Programming Tools and Software 37

3.1 Environment  
   3.1.1 Embedded Systems  
   3.1.2 High- and Low-Level Languages  
   3.1.3 Language-Specific Software  
3.2 Microchip's MPLAB  
   3.2.1 MPLAB X  
   3.2.2 Development Cycle  
3.3 An Integrated Development Environment  
   3.3.1 Installing MPLAB  
   3.3.2 Creating the Project  
   3.3.3 Setting the Project Build Options  
   3.3.4 Adding a Source File  
   3.3.5 Building the Project  
   3.3.6 .hex File  
   3.3.7 Quickbuild Option  
3.4 MPLAB Simulators and Debuggers  
   3.4.1 MPLAB SIM  
      Using Breakpoints  
      Watch Window  
      Simulator Trace  
   3.4.2 MPLAB Stimulus  
      Stimulus Dialog  
   3.4.3 MPLAB Hardware Debuggers
# Table of Contents

3.4.4 An Improvised Debugger 56

3.5 Development Programmers 56
  3.5.1 Microchip PICkit 2 and PICkit 3 58
  3.5.2 Micropro USB PIC Programmer 60
  3.5.3 MPLAB ICD 2 and ICD 3 In-Circuit Debuggers/Programmers 60

3.6 Test Circuits and Development Boards 61
  3.6.1 Commercial Development Boards 61
  3.6.2 Circuit Prototype 63
  3.6.3 Breadboard 64
    Limitations of Breadboards 65
    Breadboarding Tools and Techniques 66
  3.6.4 Wire Wrapping 67
  3.6.5 Perfboards 67
  3.6.6 Printed Circuit Boards 68

## Chapter 4 Assembly Language Program 71

4.1 Assembly Language Code 71
  4.1.1 A Coding Template 71
    Program Header 73
    Program Environment Directives 73
    Configuration Bits 73
    Error Message Level Control 74
    Variables and Constants 74
    Code Area and Interrupts 74
  4.1.2 Programming Style 74
    Source File Comments 75

4.2 Defining Data Elements 75
  4.2.1 equ Directive 76
  4.2.2 cblock Directive 76
  4.2.3 Access to Banked Memory 77

4.3 Naming Conventions 77
  4.3.1 Register and Bit Names 77

4.4 PIC 18Fxx2 Instruction Set 79
  4.4.1 Byte-Oriented Instructions 80
  4.4.2 Bit-Oriented Instructions 80
  4.4.3 Literal Instructions 80
  4.4.4 Control Instructions 80

## Chapter 5 PIC18 Programming in C Language 85

5.1 C Compilers 85
  5.1.1 C versus Assembly Language 85
  5.1.2 MPLAB C18 86

5.2 MPLAB C18 Installation 86
  5.2.1 MPLAB Software Components 87
  5.2.2 Configuration Options 88
  5.2.3 System Requirements 89
  5.2.4 Execution Flow 90

5.3 C Compiler Project 91
  5.3.1 Creating the Project 91
Select Hardware Device 92
Select the Language Toolsuite 92
Create a New Project 93
Add Files to the Project 95
5.3.2 Selecting the Build Directory 96
5.4 A First Program in C 98
5.4.1 Source Code Analysis 99
main() Function 100
Local Functions 101

Chapter 6 C Language in an Embedded Environment 103
6.1 MPLAB C18 System 103
6.1.1 PIC18 Extended Mode 104
6.2 MPLAB C18 Libraries 104
6.2.1 Start-Up Routines 104
6.2.2 Online Help for C18 and Libraries 105
6.3 Processor-Independent Libraries 106
6.3.1 General Software Library 106
Character Classification Functions 107
Data Conversion Functions 107
Memory and String Manipulation Functions 108
Delay Functions 110
Reset Functions 111
Character Output Functions 112
6.4 Processor-Specific Libraries 115
6.4.1 Hardware Peripheral Library Functions 115
6.4.2 Software Peripherals Library Functions 116
6.4.3 Macros for Inline Assembly 116
6.4.4 Processor-Specific Header Files 117
6.5 Math Libraries 118
6.5.1 ANSI-IEEE 754 Binary Floating-Point Standard 118
Encodings 119
Rounding 119
6.5.2 Standard Math Library Functions 120
6.5.3 Floating-Point Math Sample Program 120
6.6 C18 Language Specifics 122
6.6.1 C18 Integer Data Types 122
6.6.2 C18 Floating-Point Data Types 122
6.6.3 Endianness 123
6.6.4 Storage Classes 123
6.6.5 Static Function Argument 123
6.6.6 Storage Qualifiers 123
far and near Qualifiers 123
rom and ram Qualifiers 124

Chapter 7 Programming Simple Input and Output 125
7.1 Port-Connected I/O 125
7.1.1 A Simple Circuit and Code 125
7.1.2 Circuit Schematics 125
7.1.3 Assembler Simple I/O Program 126
# Table of Contents

7.1.4 Assembler Source Code Analysis 129  
Command Monitoring Loop 129  
Action on the LEDs 130  
A Delay Routine 130

7.2 C Language Simple I/O Program 131  
7.2.1 C Source Code Analysis 132  
main() Function 133

7.3 Seven-Segment LED Programming 134  
7.3.1 Computed Goto 135  
7.3.2 Assembler Seven-Segment LED Program 136  
Access Bank Operation 136  
Port A for Digital Operation 137  
DIP Switch Processing 138  
Seven-Segment Code with Computed Goto 139  
7.3.3 Assembler Table Lookup Sample Program 140

7.4 C Language Seven-Segment LED Programs 141  
7.4.1 Code Selection by Switch Construct 142  
7.4.2 Code Selection by Table Lookup 142

7.5 A Demonstration Board 143  
7.6.1 Power Supply 145  
Voltage Regulator 145

## Chapter 8 Interrupts 147

8.1 Interrupt Mechanism 147

8.2 PIC18 Interrupt System 147  
8.2.1 Hardware Sources 148  
8.2.2 Interrupt Control and Status Registers 148  
INTCON Registers 149  
PIE Registers 151  
PIR Registers 152  
IPR Registers 152  
8.2.3 Interrupt Priorities 154  
High-Priority Interrupts 154  
Low-Priority Interrupts 155  
An Interrupt Interrupting Another One 155  
8.2.4 Context Saving Operations 155  
Context Saving during Low-Priority Interrupts 156

8.3 Port B Interrupts 157  
8.3.1 Port B External Interrupt 158  
8.3.2 INTO Interrupt Demo Program 158  
cblock Directive 158  
Vectoring the Interrupt 159  
Initialization 160  
Setup INTO 160  
Program Foreground 161  
Interrupt Service Routine 161  
Switch Debouncing 162  
Interrupt Action 162  
8.3.3 Port B Line Change Interrupt 163  
Reentrant Interrupts 164  
Multiple External Interrupts 165
Chapter 9  Delays, Counters, and Timers 179

9.1 PIC18 Family Timers 179

9.2 Delay Timers 179
  9.2.1 Power-Up Timer (PWRT) 179
  9.2.2 Oscillator Start-Up Timer (OST) 180
  9.2.3 Phase Locked Loop (PLL) 180
  Power-Up Delay Summary 181
  9.2.4 Watchdog Timer 181
  Watchdog Timer Uses 181

9.3 Hardware Timer-Counters 182

9.4 Timer0 Module 182
  9.4.1 Timer0 Architecture 184
    16-bit Mode Operation 184
    Timer and Counter Modes 185
    Timer0 Interrupt 185
    External Clock Source 185
    Timer0 Prescaler 186
  9.4.2 Timer0 as a Delay Timer 186
    Long Delay Loops 187
    Delay Accuracy Issues 188
    Black-Ammerman Method 188
    Delays with 16-Bit Timer0 189
  9.4.3 Counter and Timer Programming 189
    Programming a Counter 190
    Timer0_as_Counter.asm Program 190
    A Timer/Counter Test Circuit 191
    Timer0_Delay.asm Program 191
    A Variable Time-Lapse Routine 193
    Timer0_VarDelay.asm Program 193
    Interrupt-Driven Timer 196

9.5 Other Timer Modules 199
  9.5.1 Timer1 Module 199
    Timer1 in Timer Mode 200
    Timer1 in Synchronized Counter Mode 201
    External Clock Input Timing in Synchronized Mode 201
    Timer1 Read and Write Operations 201
    16-bit Mode Timer1 Write 201
Chapter 10  Data EEPROM

10.1  EEPROM on the PIC18 Microcontrollers
  10.1.2  On-Board Data EEPROM

10.2  EEPROM Programming
  10.2.1  Reading EEPROM Data
  10.2.2  Writing EEPROM Data

10.3  Data EEPROM Programming in C Language
  10.3.1  EEPROM Library Functions
  10.3.2  Sample Code

10.4  EEPROM Demonstration Programs
  10.4.1  EEPROM_to_7Seg Program
  10.4.2  C_EEPROM_Demo Program

Chapter 11  Liquid Crystal Displays

11.1  LCD
  11.1.1  LCD Features and Architecture
  11.1.2  LCD Functions and Components
    Internal Registers
    Busy Flag
    Address Counter
11.3 The HD44780 Instruction Set 247
   11.3.1 Instruction Set Overview 247
      Clearing the Display 248
      Return Home 248
      Entry Mode Set 248
      Display and Cursor ON/OFF 248
      Cursor/Display Shift 248
      Function Set 248
      Set CGRAM Address 249
      Set DDRAM Address 249
      Read Busy Flag and Address Register 249
      Write data 249
      Read data 250
   11.3.2 18F452 8-Bit Data Mode Circuit 250
11.4 LCD Programming 251
   11.4.1 Defining Constants and Variables 252
      Constants 252
   11.4.2 Using MPLAB Data Directives 253
      Data Definition in Absolute Mode 253
      Relocatable Code 254
      Issues with Initialized Data 254
   11.4.3 LCD Initialization 255
      Reset Function 255
      Initialization Commands 256
      Function Preset Command 256
      Function Set Command 256
      Display Off 257
      Display and Cursor On 257
      Set Entry Mode 258
      Cursor and Display Shift 258
      Clear Display 258
   11.4.4 Auxiliary Operations 259
      Time Delay Routine 259
      Pulsing the E Line 260
      Reading the Busy Flag 261
      Bit Merging Operations 262
   11.4.5 Text Data Storage and Display 264
      Generating and Storing a Text String 265
      Data in Program Memory 265
      Displaying the Text String 266
      Sample Program LCD_18F_MsgFlag 268
## Table of Contents

11.5 Data Compression Techniques 278
   11.5.1 4-Bit Data Transfer Mode 279
   11.5.2 Preserving Port Data 279
   11.5.3 Master/Slave Systems 280
   11.5.4 4-Bit LCD Interface Sample Programs 281

11.6 LCD Programming in C18 291
   11.6.1 Editing xlcd.h 292
      Defining the Interface 292
      Defining the Data Port and Tris Register 293
   11.6.2 Timing Routines 294
   11.6.3 XLCD Library Functions 295
      BusyXLCD 295
      OpenXLCD 296
      putrXLCD 296
      putsXLCD 296
      ReadAddr 296
      ReadDataXLCD 297
      SetDDRamAddr 297
      SetCGRamAddr 297
      WriteCmdXLCD 298
      WriteDataXLCD 298

11.7 LCD Application Development in C18 299
   11.7.1 Using the Project Wizard 299
   Main Program File 300

Chapter 12 Real-Time Clocks 303

12.1 Measuring Time 303
   12.1.1 Clock Signal Source 303
      32 kHz Crystal Circuit 304
   12.1.2 Programming the Timer1 Clock 305
      Setting Up Timer1 Hardware 305
      Coding the Interrupt Handler 306
      Sample Program RTC_18F_Timer1.asm 306

12.2 Real-Time Clock ICs 309
   12.2.1 NJU6355 310
   12.2.2 6355 Data Formatting 310
   12.2.3 Initialization and Clock Primitives 311
      Reading and Writing Clock Data 311
      Initialize RTC 314
   12.2.4 BCD Conversions 316

12.3 RTC Demonstration Circuit and Program 318
   12.3.1 RTC_F18_6355.asm Program 318
      Code Details 319
      Code Listing 319

12.4 Real-Time Clocks in C18 336
   12.4.1 Timer1-Based RTC in C18 336
### Chapter 13  Analog Data and Devices

13.1 Operations on Computer Data 343
13.2 18F452 A/D Hardware 343
   13.2.1 A/D Module on the 18F452 344
      ADCON0 Register 345
      ADCON1 Register 347
      SLEEP Mode Operation 348
   13.2.2 A/D Module Sample Circuit and Program 349
      Initialize A/D Module 350
      A/D Conversion 351
   13.2.3 A2D_Pot2LCD Program 352
13.3 A/D Conversion in C18 365
   13.3.1 Conversion Primitives 365
      Busy ADC 365
      CloseADC 365
      ConvertADC 366
      OpenADC 366
      ReadADC 367
      SetChan ADC 367
   13.3.2 C_ADCConvert.c Program 368
      C_ADCConvert.c Code Listing 368
13.4 Interfacing with Analog Devices 371
   13.4.1 LM 34 Temperature Sensor 371
   13.4.2 LM135 Circuits 372
      Calibrating the Sensor 372
   13.4.3 C_ADC_LM35.c Program 373

### Chapter 14  Operating Systems

14.1 Time-Critical Systems 377
   14.1.2 Multitasking in Real-Time 378
14.2 RTOS Scope 378
   14.2.1 Tasks, Priorities, and Deadlines 379
   14.2.2 Executing in Real-Time 381
14.3 RTOS Programming 381
   14.3.1 Foreground and Background Tasks 382
      Interrupts in Tasking 382
   14.3.2 Task Loops 383
   14.3.3 Clock-Tick Interrupt 383
   14.3.4 Interrupts in Preemptive Multitasking 383
14.4 Constructing the Scheduler 384
   14.4.1 Cyclic Scheduling 384
   14.4.2 Round-Robin Scheduling 385
   14.4.3 Task States and Prioritized Scheduling 385
14.5 A Small System Example 386
   14.5.1 Task Structure 386
   14.5.2 Semaphore 387
14.6 Sample OS Application 388
Appendix A  MPLAB C18 Language Tutorial  

A.1 In This Appendix  
A.1.1 About Programming  
A.1.2 Communicating with an Alien Intelligence  
A.1.3 Flowcharting  
A.1.4 C Language Rules  
  Comments  
  Program Header  
  Programming Templates 
A.2 Structure of a C Program  
A.2.1 Sample Program C_LEDs_ON  
  Identifiers  
  Reserved Words  
  main() Function  
A.2.2 Sample Program C_LEDs_Flash  
  Expressions and Statements  
  Variables  
  Scope and Lifetime of a Variable  
  Constants  
  Local Functions  
A.2.3 Coding Style 
A.3 C Language Data  
A.3.1 Numeric Data  
A.3.2 Alphanumeric Data  
A.3.3 Arrays of Alphanumeric Data  
A.3.4 Arrays of Numeric Data  
A.4 Indirection  
A.4.1 Storage of C Language Variables  
A.4.2 Address of Operator  
A.4.3 Indirection Operator  
A.4.4 Pointers to Array Variables  
A.4.5 Pointer Arithmetic  
A.5 C Language Operators  
A.5.1 Operator Action  
A.5.2 Assignment Operator  
A.5.3 Arithmetic Operators  
  Remainder Operator  
A.5.4 Concatenation  
A.5.5 Increment and Decrement  
A.5.6 Relational Operators  
A.5.7 Logical Operators  
A.5.8 Bitwise Operators  
  AND Operator  
  OR Operator  
  XOR Operator  
  NOT Operator  
  Shift-Left and Shift-Right Operators 
A.5.9 Compound Assignment Operators 
A.5.10 Operator Hierarchy  
  Associativity Rules 
A.6 Directing Program Flow
A.6.1 Decisions Constructs
  if Construct
  Statement Blocks
  Nested if Construct
  else Construct
  Dangling else Case
  else-if Clause
  switch Construct
  Conditional Expressions

A.7 Loops and Program Flow Control
  A.7.1 Loops and Iterations
  A.7.2 Elements of a Program Loop
  A.7.3 for Loop
    Compound Statement in Loops
    while Loop
    do-while Loop

A.8 Breaking the Flow
  A.8.1 goto Statement
  A.8.2 break Statement
  A.8.3 continue Statement

A.9 Functions and Structured Programming
  A.9.1 Modular Construction
  A.9.2 Structure of a Function
    Function Prototype
    Function Definition
    Function Call
    Return Keyword
    Matching Arguments and Parameters

A.10 Visibility of Function Arguments
  A.10.1 Using External Variables
  A.10.2 Passing Data by Reference
    Pointers and Functions
    Passing Array Variables
  A.10.3 Function-Like Macros
    Macro Argument

A.11 Structures, Bit Fields, and Unions
  A.11.1 Structure Declaration
    Structure Type Declaration
    Structure Variable Declaration
  A.11.2 Accessing Structure Elements
    Initializing Structure Variables
    Manipulating a Bit Field
    Type Casting
  A.11.3 Unions
  A.11.4 Structures and Functions
    Pointers to Structures
    Pointer Member Operator
    Passing Structures to Functions
  A.11.5 Structures and Unions in MPLAB C18
Appendix B  Debugging 18F Devices

B.1  Art of Debugging
    B.1.1  Preliminary Debugging
    B.1.2  Debugging the Logic

B.2  Software Debugging
    B.2.1  Debugger-Less Debugging
    B.2.2  Code Image Debugging
    B.2.3  MPLAB SIM Features
        Run Mode
        Step Mode
        Animate
        Mode Differences
        Build Configurations
        Setting Breakpoints
    B.2.4  PIC 18 Special Simulations
        Reset Conditions
        Sleep
        Watchdog Timer
        Special Registers
    B.2.5  PIC 18 Peripherals
    B.2.6  MPLAB SIM Controls
    B.2.7  Viewing Commands
        Dissassembly Listing
        File Registers
        Hardware Stack
        Locals
        Program Memory
        Special Function Registers
        Watch
        Watch Window in C Language
    B.2.8  Simulator and Tracing
        Setting Up a Trace
        Trace Menu
    B.2.9  Stimulus
        Stimulus Basics
        Using Stimulus
        Asynch Tab
        Message-Based Stimulus
        Pin/Register Actions Tab
        Advanced Pin/Register Tab
        Clock Stimulus Tab
        Register Injection Tab
        Register Trace Tab

B.3  Hardware Debugging
    B.3.1  Microchip Hardware Programmers/Debuggers
        MPLAB ICD2
        MPLAB ICD3
        MPLAB ICE 2000
        MPLAB ICE 4000
        MPLAB REAL ICE
        MPLAB PICkit 2 and PICkit 3
    B.3.2  Using Hardware Debuggers

# Table of Contents

---

### E.5.3 Standardized Floating-Point
- Page 649

### E.5.4 Binary-Coded Decimals (BCD)
- Page 650

### E.5.5 Floating-Point BCD
- Page 650

---

## Appendix F Basic Electronics

### F.1 Atom
- Page 654

### F.2 Isotopes and Ions
- Page 654

### F.3 Static Electricity
- Page 655

### F.4 Electrical Charge
- Page 656
  - F.4.1 Voltage
  - Page 656
  - F.4.2 Current
  - Page 656
  - F.4.3 Power
  - Page 657
  - F.4.4 Ohm's Law
  - Page 657

### F.5 Electrical Circuits
- Page 658
  - F.5.1 Types of Circuits
  - Page 658

### F.6 Circuit Elements
- Page 660
  - F.6.1 Resistors
  - Page 661
  - F.6.2 Revisiting Ohm's Law
  - Page 661
  - F.6.3 Resistors in Series and Parallel
  - Page 662
  - F.6.4 Capacitors
  - Page 664
  - F.6.5 Capacitors in Series and in Parallel
  - Page 665
  - F.6.6 Inductors
  - Page 666
  - F.6.7 Transformers
  - Page 667

### F.7 Semiconductors
- Page 667
  - F.7.1 Integrated Circuits
  - Page 668
  - F.7.2 Semiconductor Electronics
  - Page 668
  - F.7.3 P-Type and N-Type Silicon
  - Page 669
  - F.7.4 Diode
  - Page 669
