INVITED SPEAKERS

KEYNOTE SPEAKERS

The Complexity Crisis
François E. Cellier IS-5

Context-Aware Decision Support in Dynamic Environments - Theoretical & Technological Foundations
Alexander Smirnov IS-7

The DAO of Parallel Software Construction
Armin Größlinger IS-9

Software Engineering Research under the Lamppost
Claes Wohlin IS-11

INTERNATIONAL CONFERENCE ON SOFTWARE ENGINEERING AND APPLICATIONS

ENTERPRISE SOFTWARE TECHNOLOGIES

SHORT PAPERS

SESGAL Software for Managing Earthquake Risk in Galicia
Carla Iglesias, Eduardo Giráldez, Javier Taboada, Roberto Martinez-Alegria and Isabel Margarida Antunes 7

A Business Goals Centric Method for Automatic DW Design from UML Models
Mounira Ben Abdallah, Nahla Z. Haddar and Hanene Ben-Abdallah 15

Using Intentional and System Dynamics Modeling to Address WHYs in Enterprise Architecture
Sagar Sunkle, Suman Roychoudhury and Vinay Kulkarni 24

Implementing Intelligent Tutoring System using Jade Agents Intermediation System (JAIS) in an Collaborative Environment (CE) like Community of Practices - For Collaborative Learning, Knowledge Sharing Emergence
Claudice Kenfack 32

Process Lines for Automatic Workflow Development
Mario L. Bernardi, Marta Cimitile and Fabrizio M. Maggi 41

Spatial Connector - Loosely Binding Contextual Changes and Non-Context-Aware Services
Ichiro Satoh 50

An Industrial Standard to Assure Dependability in Software Reuse
Fevzi Belli 58

New Concepts for Knowledge based Cataract Surgery Assistance - A First Clinical Approach
K. P. Scherer, C. Rieder, C. Henninger, J. Baumeister and J. Reutelshöfer 64

The Application of VLE with 3D Google Earth and Interactive Technology
Wei-Kai Liou and Chun-Yen Chung 69
A Metamodel-driven Architecture for Generating, Populating and Manipulating “Possible Worlds” to Answer Questions

Imre Kilián and Gábor Alberti

SOFTWARE ENGINEERING METHODS AND TECHNIQUES

FULL PAPERS

MuLSA: Multi-Layered Scenario Analysis for an Advanced Driver Assistance System

Takako Nakatani and Keita Sato

An Intermediate Language for Compilation to Scripting Languages

Paola Giannini and Albert Shaqiri

SHORT PAPERS

Real-Time and Embedded Systems Challenges - Key Requirements and Issues

Nadia Menad and Philippe Dhaussy

MDA Approach for Distributed and Real-Time embedded Systems Analysis and Verification - Overview and First Proposal

Nadia Menad, Philippe Dhaussy and Messabih Belhadri

Cloud Testing for Mobile Software Systems - Concept and Prototyping

Oleksii Starov, Sergiy Vilkimir and Vyacheslav Kharchenko

A Systematic Literature Review on CMS-based Web Applications

Feliu Trias, Valeria De Castro, Marcos López-Sanz and Esperanza Marcos

From Viewpoints and Abstraction Levels in Software Engineering Towards Multi-Viewpoints/Multi-Hierarchy in Software Architecture

Ahmad Kheir, Hala Naja, Mourad Oussalah and Kifah Tout

Software Requirements Parts for Construction of Software Requirements Specifications

Yoshitaka Iyoda and Atsushi Ohnishi

Feature Model Extraction from Product Source Codes based on the Semantic Aspect

Jihen Maazoun, Nadia Bouassida, Hanène Ben-Abdallah and Abdelhak-Djamel Seriai

An Architectural Model for Customizing the Business Logic of SaaS Applications

André Correia, Jorge Renato Penha and António Miguel Rosado da Cruz

Towards a Standard Approach for Optimization in Science and Engineering

Carlo Comin, Luca Onesti and Carlos Kavka

Towards a Formal Semantic for UML 2.0 - Activity Diagram based on Institution Theory

Amine Aouchiri and Leila Jemni Ben Ayed

A Software Quality Predictive Model

Elisabetta Ronchieri and Marco Canaparo

CQE - An Approach to Automatically Estimate the Code Quality using an Objective Metric From an Empirical Study

Saima Arif, Miao Wang, Philip Perry and John Murphy

ATMOS - A Data Collection and Presentation Toolkit for the Nevada Climate Change Portal

Andrew Dittrich, Sergiu Dascalu and Mehmet Gunes
Web Service to JSON-RPC Transformation
Christian Samsel, Sevket Gökay, Paul Heiniz and Karl-Heinz Krempels

Dynamic Software Updating with Gosh! - Current Status and the Road Ahead
Allan Raundahl Gregersen, Michael Rasmussen and Bo Norregaard Jørgensen

Slope based Grid Creation using Interpolation of LIDAR Data Sets
Jan Hovad, Jitka Komarkova and Pavel Sedlak

Partial Order Interpretation of a Mu-Calculus-Like Temporal Logic
Antonella Santone and Gigliola Vaglini

An Approach to the Metadata Driven Programming in .Net Framework
Pavel Abduramanov, Sergey Kalistratov and Yuri Okulovsky

Embedding and Parsing Combined for Efficient Language Design
Gergely Dévai, Dániel Leskó and Máté Tejfel

Increasing Efficiency of ISO 26262 Verification and Validation by Combining Fault Injection and Mutation Testing with Model based Development
Rakesh Rana, Miroslaw Staron, Christian Berger, Jörgen Hansson, Martin Nilsson and Fredrik Törner

Managing Risk in Open Source Software Adoption
Xavier Franch, Angelo Susi, Maria C. Ammosi, Claudia Ayala, Ruediger Glott, Daniel Gross, Ron Kenett, Fabio Mancinelli, Pop Ramsamy, Cedric Thomas, David Ameller, Stijn Bannier, Nili Bergida, Yehuda Blumenfeld, Olivier Bouzereau, Dolors Costal, Manuel Dominguez, Kirsten Haaland, Lidia Lopez, Mirko Morandini and Alberto Siena

Platform-independence in Model-based Multi-device UI Development
David Raneburger, Gerrit Meixner and Marco Brambilla

Extracting Characteristics of Speaker’s Voice Harmonic Spectrum - Design of Human Voice Feature Extraction Technique
Oldrich Horák and Jan Capek

From Concrete to Abstract - About Teaching UML Class Diagrams to Novice Programmers
João Paulo Barros

Model-based Analysis of Embedded Systems: Placing It upon Its Feet Instead of on Its Head - An Outsider’s View
Peter Struss

A Comparison of Maintainability Metrics of Two A+ Interpreters
Péter Gál and Ákos Kiss

DISTRIBUTED AND MOBILE SOFTWARE SYSTEMS

SHORT PAPERS

Desired Quality Characteristics in Cloud Application Development
Leah Riungu-Kalliosaari, Ossi Taipale and Kari Smolander

Supporting Decision Making in Mobile Software Development - A Fuzzy Cognitive Maps Approach
Pantelis-Stylianos Yiasemis and Andreas S. Andreou

SmartRestaurant - A Report on the Development of a NFC-Based Mobile Application
Vanda Rosa, Isabel Brito and João Paulo Barros
IDE-JASMIN - An Interactive Graphical Approach for Parallel Programming in Scientific Computing  
*Liao Li, Zhang Aiqing, Yang Zhang, Wang Wei and Jing Cuiping*  

Component-based Parallel Programming for Peta-scale Particle Simulations  
*CAO Xiaolin, Mo Zeyao and Zhang Aiqing*  

Distributed Processing of Elevation Data by Means of Apache Hadoop in a Small Cluster  
*Jitka Komarkova, Jakub Spidlen, Devanjan Bhattacharya and Oldrich Horak*  

Mobile Technologies to Enable Users' Informed Decisions  
*Xavier Franch, Anna Perini, Hugo H. Pibernat and Norbert Seyff*  

A Layered Architecture based on Previsional Mechanisms  
*Francesco Fiamberti, Daniela Micucci, Marco Mobilio and Francesco Tisato*  

**SOFTWARE PROJECT MANAGEMENT**  

**FULL PAPERS**  
Scheduling Strategies for Risk Mitigation  
*Peng Zhou and Hareton K. N. Leung*  

An EDF-based Scheduling Algorithm for Real-time Reconfigurable Sporadic Tasks  
*Hamza Gharsallaoui, Mohamed Khalgui and Samir Ben Ahmed*  

Using Expert-based Bayesian Networks as Decision Support Systems to Improve Project Management of Healthcare Software Projects  
*Emilia Mendes*  

**SHORT PAPERS**  
Multi-method Software Estimation Utilizing Judgment and Model based Methods  
*Aldo Dagnino*  

Improving Quality in Agile Development Processes  
*Priscilla Marcilli Dóra, Ana Cristina Oliveira and J. Antão B. Moura*  

Software Ecosystems Risks  
*Ekananta Manalif, Luiz Fernando Capretz and Danny Ho*  

**INTERNATIONAL CONFERENCE ON SOFTWARE PARADIGM TRENDS**  

**MODELS**  

**FULL PAPERS**  
ACME+ for Software Architecture Analysis  
*Imen Derbel, Lamia Labed Jilani and Ali Mili*  

Controllability for Nondeterministic Finite Automata with Variables  
*Jasen Markovski*  

From Problems to Laws in Requirements Engineering - Using Model-Transformation  
*Stephan Faßbender and Maritta Heisel*  

XVIII
An Ambient ASM Model for Client-to-Client Interaction via Cloud Computing
Karoly Bosa

SHORT PAPERS

Creating Domain-Specific Modeling Languages with OPM/D - A Meta-modeling Approach
Arieh Bibliowicz and Dov Dori

Graph Partitioning Algorithm for Social Network Model Transformation Frameworks
Gergely Mezei, László Deák, Krisztián Fekete and Tamás Vajk

Design and Operationalization of Patterns - Case of a Training Situation of Personal Assistance for Public in Professional Integration
Lahcen Oubahssi, Claudine Piau-Toffolon, Jean-Pierre Clayer and Fatma Kammoun

Model-driven Transformation for Optimizing PSMs - A Case Study of Rule Design for Multi-device GUI Generation
David Ranburger, Roman Popp and Hermann Kaindl

Specification of Learning Management System-centered Graphical Instructional Design Languages - A DSM Experimentation about the Moodle Platform
Esteban Loiseau and Pierre Lafourcade

Model Checking of Distributed Component-based Control Systems
Atef Gharbi, Hamza Gharssellaoui, Mohamed Khalgui and Samir Ben Ahmed

Linear Software Models - Vector Spaces for Design Pattern Modules
Iaakov Exman

An Aspect Oriented Framework for Flexible Design Pattern-based Development
Mario L. Bernardi, Marta Cimitile and Giuseppe A. Di Lucca

Using Meta-code Generation to Realize Higher-order Model Transformations
Thomas Buchmann and Felix Schwägerl

Uncertainty Measure of Process Models using Entropy and Petri Nets
Martin Ibl

Towards Easy Robot Programming - Using DSLs, Code Generators and Software Product Lines
Johannes Baumgartl, Thomas Buchmann, Dominik Henrich and Bernhard Westfechtel

Towards a Design-by-contract based Approach for Realizable Connector-centric Software Architectures
Mert Ozkaya and Christos Kloukinas

Quality Improvement in Data Models with SLFE-based OCL Constraints
Rosario Baena, Roberto Aragón, Manuel Enciso, Carlos Rossi, Pablo Cordero and Ángel Mora

Context Based Content Aggregation for Social Life Networks
Maneesh Mathai and Athula Ginige

Towards Devising an Architectural Framework for Enterprise Operating Systems
Sérgio Guerreiro, Steven van Kervel and Eduard Babkin
SERVICES

SHORT PAPERS

Smart Space-based Ridesharing Service in e-Tourism Application for Karelia Region Accessibility - Ontology-based Approach and Implementation
Alexander Smirnov, Nikolay Shilov, Alexey Kashevnik, Nikolay Teslya and Santa Laizane

An Adaptive and Flexible Replication Mechanism for Space-based Computing
Stefan Craß, Jürgen Hirsch, eva Kühn and Vesna Sesum-Cavic

CONTEXT

SHORT PAPERS

Semantic Indexing of Twitter Resources
Cristian Lai, Claude Moulin and Marie-Hélène Abel

Context-aware Recommendation using Fuzzy Formal Concept Analysis
Jose Luis Leiva, Manuel Enciso, Carlos Rossi, Pablo Cordero, Ángel Mora and Antonio Guevara

AUTHOR INDEX
