HIGH STRENGTH STEELS
FOR HYDROPOWER PLANTS
Design Concepts – Pressure Conduits
18th – 20th September 2013, Graz, Austria

Proceedings of the 3rd International Conference

Edited by

Horst Cerjak
Institute for Materials Science and Welding
Graz University of Technology

Norbert Enzinger
Institute for Materials Science and Welding
Graz University of Technology

Richard Greiner
Institute of Steel Structures
Graz University of Technology

Gerald Zenz
Institute of Hydraulic Engineering and Water Resources Management
Graz University of Technology

## Plenary Lecture

P-1 Development, Experiences and Qualification of Steel Grades for Hydro Power Conduits  
Horst Cerjak, Norbert Enzinger, Milan Pudar  

## Session 1: Planning, potential, requirements, energy development, storage concepts: Review, current situation, future prospects

S1-1 Hydraulic Aspects on the Design of Water Conduits  
Gerald Zenz, Josef Schneider, Wolfgang Richter, Helmut Knoblauch  

S1-2 Steel Lining Design in Various Project Phases  
Paul Oberleitner, Peter Steyrer  

S1-3 Conventional Design of HPP Pressure Shafts according to G. Seeber, considering the surrounding Rock Mass  
Alois Vigl  

S1-4 Considerations on Concepts for the Design of Pressure Shafts  
Guntram Innerhofer sen., Guntram Innerhofer jun.  

## Session 2: Construction concepts for pressure tunnels (armored or unarmored)

S2-1 Pressure Shaft Steel Linings for HPP  
Josef Mayrhuber, Paul Stering, Horst Cerjak  

S2-2 Obervermuntwerk II Penstock Design  
Peter Lorenz Meusburger, Wolfgang Glas  

S2-3 The Renewal of the Pressure Shaft for the High Head Hydropower Plant Kaunertal in Austria - Part 1  
Paul Bonapace, Andreas Hammer, Rainer Maldet, Oswin Schüller  

S2-4 Reduction in Stresses in Penstock Bifurcations  
Masato Takeyama, Hiroshi Murayama

<tr>
<th>Session 3: Safety and life cycle evaluation of existing plants</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>S3-1</strong> In-situ Deformation Measurement of the Hongrin-Léman Shaft</td>
</tr>
<tr>
<td>Olivier Chène</td>
</tr>
<tr>
<td><strong>S3-2</strong> Fatigue Cracks Propagation in Steel-lined Pressure Shaft of Pumped-storage Power Plants under normal Operation Conditions</td>
</tr>
<tr>
<td>Fadi Hachem, Francois Giovanola</td>
</tr>
<tr>
<td><strong>S3-3</strong> Fatigue Assessment of Hydropower Plants - Penstocks using IIW-Notch Stress Concept</td>
</tr>
<tr>
<td>Robert Demal, Christian Moser</td>
</tr>
<tr>
<td><strong>S3-4</strong> Impact of Pressure Fluctuation on the Fatigue Life of High Pressure Penstocks</td>
</tr>
<tr>
<td>Florian Duparchy, Pierre-Antoine Chambas, Hélène Marin, Francisco Pereira, Thierry Combaz</td>
</tr>
</tbody>
</table>

<thead>
<tr>
<th>Session 4: Steel construction, design, safety concepts, structural calculation</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>S4-1</strong> Design of Branch Pipes with High Strength Steel</td>
</tr>
<tr>
<td>Yoshiki Hayashi, Nozomu Watanabe</td>
</tr>
<tr>
<td><strong>S4-2</strong> Design and Execution of Two Penstocks in Switzerland</td>
</tr>
<tr>
<td>Dietrich Heinz, Michael Herb</td>
</tr>
<tr>
<td><strong>S4-3</strong> New Design Aspects for Steel Linings of Pressure Shafts made of High Strength Steel</td>
</tr>
<tr>
<td>Richard Greiner, Guntram Innerhofer sen., Wilfried Stering</td>
</tr>
<tr>
<td><strong>S4-4</strong> Load Carrying Behaviour of Thrust Rings in Pressure Conduits</td>
</tr>
<tr>
<td>Harald Unterweger, Alexander Ecker, Wilfried Stering</td>
</tr>
</tbody>

Session 5: Steel construction, design, safety concepts, structural calculation - Contd.

S5-1 Nant de Drance Transition Lining and Gate Housing 207
Claudia Pollak-Reibenwein, Romeo Ralón-Rosales, Peter Zsak

S5-2 Numerical Modeling of Full-Scale Penstock Model Testing 219
Uros Tatic, Simon Sedmak, Andrijana Djurdjevic, Aleksandar Sedmak, Ramo Bakic

S5-3 Stress Analysis in Rock-embedded Miter Bends - New Derivation and Extension of existing Formulae for the Use in Penstocks 227
Andreas Lechner, Richard Greiner, Klaus Krueger

S5-4 Fatigue Strength of High Strength Steel-Linings with different Types of Grouting Openings 241
Richard Greiner, Andreas Lechner

Session 6: Materials joining and quality assurance

S6-1 Qualification Procedure of Thermomechanical Steel ALFORM 700 for Pressure Shaft Lining of Reisseck II Pumped Storage HPP 251
Josef Mayrhuber, Christian Kirilowitsch, Horst Cerjak, Norbert Enzinger

S6-2 The Renewal of the Pressure Shaft for the High Head Hydropower Plant Kaunertal in Austria - Part 2 263
Andreas Hammer, Oswin Schüller, Rainer Maldet, Paul Bonapace

S6-3 Effect of Weld Imperfections on Fracture Assessment of Undermatched Joint of High Strength Steel for Penstocks 273
Masahito Mochizuki, Shigetaka Okano

S6-4 Determination of Limit Loads for New Pipe - Ring Specimens 283
Nenad Gubeljak, Andrej Likeb, Yury G. Matvienko
Session 7: Materials joining and quality assurance - Contd.

S7-1 Application of TMCP to High Tensile Strength Steel Plates for Penstock
Kazushi Onishi, Motohiro Okushima, Katsumi Kurebayashi, Hayashi Katsumoto, Takahiro Kamo, Tomoya Kawabata, Kazuki Fujiwara

S7-2 High Strength Heavy Plates for Penstocks
Rupert Egger, Stefan Kapl, Franz Mayrhofer

S7-3 Current State of the Welding Consumables for High Strength Steels
Hiroyuki Kawasaki, Noriyuki Hara

S7-4 Comprehensive Investigations of new Filler Materials for Welding of High Strength Steels
Ronald Schnitzer, Rudolf Rauch, Wolfgang Ernst, Jürgen Wagner, Susanne Baumgartner, Martin Leitner, Michael Stoschka, Thomas Schlagradl, Reinhold Schneider, Christian Bernhard
