A Parametric and Physics-Based Approach to Structural Weight Estimation of the Hybrid Wing Body Aircraft
Trevor Laughlin, Jason Corman, Dmitri Mavris
Conceptual Design of a Magnetic-Assisted Take-Off System for Mid-Range Transport Aircraft
Roele Vos, Catherine Eeckels, Rommer-Jan Schoustra, Mark Voskuil
Analysis of the Required Thrust of an Aircraft Aided During Take-Off and Landing by Ground-Based System
Using Magnetic Levitation Technology
Andrzej Majka
Initial Weight Analysis of a Next Generation Light Attack/Armed Reconnaissance Aircraft (LAAR)
Guido Fuentes, Carolina Agudelo, Leonardo Palacio
Application of Climate Impact Metrics to Civil Tiltrotor Design
Carl Russell, Wayne Johnson
