2012 Proceedings of the Tenth Workshop on Intelligent Solutions in Embedded Systems

(WISES 2012)

Klagenfurt, Carinthia, Austria
5 – 6 July 2012
Contents

Welcome from the Chairman ii
Organization iii

Keynote

In-network Adaptation of Scalable Video (H.264/SVC) Content 2
Hermann Hellwagner

Oral Session 1

A New Driving System towards Energy Efficient and Safe Driving Behaviour 3
Emre Yay and Natividad Martínez Madrid

Computational Cost Estimation of a RTL JPEG Architecture with Powersim 9
Cristiano Scavongelli, Marco Giammarini, Massimo Conti and Simone Orcioni

Rapid Prototyping of Image Processing Workflows on Massively Parallel Architectures 15
Bo Li, János Sullai, Péter Völgyesi and Akos Ledeczi

Toward the design of a low cost reconfigurable real time Augmented reality system 21
Fatma Abbes, Sonda Chtourou and Emna Bakhroui

Oral Session 2

Fail-Safe Over-The-Air Programming and Error Recovery in Wireless Networks 27
Stefan Unterschiitz and Volker Turu

Android Based Body Area Network for the Evaluation of Medical Parameters 33
Matthias Wagner, Benjamin Kuch, Carlos Cabrera, Peter Enoksson and Arne Sieber

Using Ethernet over Powerline Communication in Automotive Networks 39
Marius Strobl, Thomas Waas, Stefan Moehne, Markus Kucera, Andreas Rath, Norbert Balbierer and Angelika Schingale

Oral Session 3

A Wireless Sensor Network Protocol for the OMG Data Distribution Service 45
Kai Beckmann and Marcus Thoss

Using a Leaky Bucket Counter as an Advanced Threshold Mechanism for Event Detection in Wireless Sensor Networks 51
Karima Hein, Leander Hörmann and Reinhold Weiß
Oral Session 4

EqMutDetect - A Tool for Equivalent Mutant Detection in Embedded Systems .......................... 57
Simona Nica and Franz Wotawa

Optimizing Software Integration by Considering Integration Test Complexity and Test Effort .... 63
Michael Steindl and Juergen Mottok

Efficient test methods for the system test of highly networked safety systems ....................... 69
Kathrin Sattler, Andreas Raith and Thomas Brandmeier

Design Guidelines for Smart Appliances ...................................................................................... 76
Wilfried Elmenreich and Dominik Egarter

PhD Forum .................................................................................................................................. 83

Towards the Light - Comparing Evolved Neural Network Controllers and Finite State Machine
Controllers ......................................................................................................................................... 83
Ágnes Pintér-Bartha, Anita Sobe and Wilfried Elmenreich

Evaluation of MANET Routing Protocols in a Realistic Emergency Response Scenario ........ 88
Christian Raffelsberger and Hermann Hellwagner

Imprint ........................................................................................................................................... 93
