Proceedings of the 10th International conference on
Flow-Induced Vibration (& Flow-Induce Noise)

FIV2012, Dublin, Ireland, 3-6 July 2012

FLOW-INDUCED VIBRATION

EDITED BY
C.MESKELL & G. BENNETT
SCHOOL OF ENGINEERING
TRINITY COLLEGE, DUBLIN
# TABLE OF CONTENTS

## 1.1 Axial Flow and Thin Shells

- Dynamics Of Fluid-Conveying Cantilevered Pipes With Additional Adornments  
  M. Haj Ghayesh, M. P. Paidoussis, M. Amabili  
  1

- Low Order Resonance Of An Elastic Fluid-Conveying Tube  
  J. Richard, A. Steindl  
  7

- Flow-Induced Oscillations Of A Cantilevered Pipe Conveying Fluid With Base Excitation  
  G. Chang, Y. Modarres-Sadeghi  
  15

## 1.2 Industrial Aeroacoustics

- Experimental Analysis Of The Aeroacoustics Of Free And Impinging Jet  
  G. Sinibaldi, L. Marino, G. P. Romano  
  21

- Fluid-Resonant Coupling In High-Speed Impinging Planar Jets  
  D. Arthurs, S. Ziada  
  27

- Numerical Simulation And Analysis Of The Noise Generated By The Flow Over Rectangular Cylinders At Incidence  
  F. Margnat, A. Buitrago  
  35
2.1 Industrial Aeroacoustics

Countermeasures of Self-Sustained Tones by Baffle Plates in a Boiler Tube Bank 43
K. Ishihara

On The Effect Of A Swirl On The Self-Sustained Oscillations In Compact Axisymmetric Cavities 49
G. Nakiboglu, O. Rudenko, A. Hirschberg, J. Golliard, S. Belfroid

Experimental Study of Interaction Between Pressure Pulsations and Piping Vibration 55

2.2 Hydro- & Aeroelasticity

Low Speed Flutter And Limit Cycle Oscillations Of A Flat Plate Section In A Wind Tunnel 61
X. Amandolese, S. Michelin, M. Choquel

Numerical And Experimental Study Of Hydroelastic Behaviour Of A Hydrofoil 67
F. Gaugain, F. Deniset, J. Astolfi, J. Sigrist

Analysis of Vortex Shedding from a Wind Turbine Blade at High Angle of Attack 75
A. Pellegrino, C. Meskell
3.1 Tube Arrays

Modeling of the Phase Lag Causing Fluidelastic Instability in Tube Arrays 83
A. Khalifa, D. S. Weaver, S. Ziada

Measurement of surface pressure on neighbouring tubes in a deformed normal triangular tube array. 91
D. Keogh, C. Meskell

Study on In-Flow Fluidelastic Instability of Circular Cylinder Arrays 99
T. Nakamura, Y. Fujita, T. Oyakawa, Y. Ni

Unsteady Fluid Forces and the Time Delay in a Vibrating Tube Subjected to Cross Flow 107
M. Hassan, S. El Bouzidi

3.2 Bluff Bodies & VIV

Numerical Study On The Effects Of Particles On Damping The Vibration Of A Bluff Body Due To The Vortex Shedding 115
S. P. Omrani, S. Belfroid, A. Twerda, B. J. Boersma

Study Of Von Karman Vortex Shedding Robustness In The Wake Of A Fuzzy Coated Cylinder 123
B. Levy, Y. Z. Liu

Hilbert-Huang Transform – A Comparison With Fourier And Wavelet Transform For The Analysis Of The Shedding Process 131
R. S. Silveira, S. V. Möller

Numerical Predictions Of The Natural Frequencies Of Long Flexible Cylinders With A Form Of Damping That Includes The Effect Of The Current 139
F. Huera-Huarte, L. González
4.1 Hydro- & Aeroelasticity

Numerical Simulation Of Influence Of A Gap Between The Main Lifting Surface And The Aileron On Aeroelastic Behavior Of An Airfoil 147
J. Horáček, M. Feistauer, P. Sváček

Excitation Characteristics Of Dry Galloping Vibrations 155
N. Nikitas, J. H. G. MacDonald

Large Galloping Oscillations Of A Square Section Cylinder In Wind Tunnel 165
P. Hémon

4.2 Industrial Aeroacoustics

Experimental And Numerical Study Of The Fluid-Acoustic Interaction In A T-Junction At Low Mach Number Flows 171
A. Holmberg, M. Berton, A. Kierkegaard, M. Karlsson

Flow-Induced Pulsations At T-Joints With Inserts: Experimental And Numerical Study 179
J. Golliard, N. González Diez, G. Joost

Acoustic Properties Of An In-Duct Orifice Subjected To Bias Flow And High Level Acoustic Excitation 187
H. Bodén, L. Zhou
### 5.1 Axial Flow and Thin Shells

**Flow-Induced Vibration Tests of a Nuclear Reactor De Mountable Fuel Bundle**  
V. Janzen, B. A. W. Smith, Y. Han, T. Whan, D. F. Sears, M. R. Floyd  

**Stability Of A Structurally Inhomogeneous Flexible Plate In Uniform Axial Flow**  
B. H. Tan, A. D. Lucey, M. W. Pitman  

**Flow Energy Harvesting From Piezoelectric Flags**  
S. Michelin, O. Doaré  

**The Fluid-Structure Interaction Of A Spring-Mounted Cantilevered-Free Flexible Plate In A Uniform Flow**  
R. M. Howell, A. D. Lucey

### 5.2 Industrial Aeroacoustics

**Does Reynolds Number Affect Lock-In of Aeroacoustic Resonance of Tandem Cylinders?**  
C. Paduano, C. Meskell  

**Direct Aeroacoustic Simulation of Merging Flow in T-duct**  
G. C. Y. Lam, R. C. K. Leung, S. Tang  

**Simulations Of Acoustic Scattering In Flow Ducts With The Frequency-Domain Linearized Navier-Stokes Equations**  
A. Kierkegaard, S. Boij, M. Åbom, G. Efraimsson  

The spatial distribution of the acoustic sources in an inline tube array experiencing cross flow induced acoustic resonance.  
S. Finnegan, C. Meskell
6.1 Industrial Aeroacoustics

Audio Simulation And Analysis Of Noise Generated By Aircraft Engines Bearing Contra-Rotating Open Rotor Fans
L. Siozos-Rousoulis, A. I. Kalfas, K. Kritikos, E. Giordano, N. Tantot

Partially Covered Cylindrical Cavity Flow: Resonance Identification
F. Rodriguez Verdugo, D. B. Stephens, G. Bennett

Partially Covered Cylindrical Cavity Flow: Application Of An Acoustic Analogy
F. Rodriguez Verdugo, G. Bennett

6.2 Bluff Bodies & VIV

On the Control of Flow past a Circular Cylinder via a Single Spanwise Protrusion
A. Ekmekci, B. T. Aydin, A. Joshi

Optimal Energy Harvesting By Vortex-Induced Vibrations In Cables
C. Grouthier, S. Michelin, E. de Langre

Optimal Control Cylinder Design For Vortex Suppression Behind A Circular Cylinder
M. Subhash Reddy, B. S. V. Patnaik

Drag Measurements Of A Circular Cylinder With Moving Surface Boundary-Layer Control
I. Korkischko, J. R. Meneghini, R. Konrath
7.1 Tube Arrays

Simple Shock Oscillator For Modelling A Loosely Supported Tube Subjected To Turbulence And Fluid-Elastic Forces
L. Borsoi, P. Piteau, X. Delaune, J. Antunes

Vibration Behavior of a Steam Generator Tube in Interaction with an Anti-Vibration Bar: Experimental Study
V. Lalonde, A. Ross, M. J. Pettigrew

Experimental Study of Fluidelastic Instability in a Rotated Triangular Tube Array Subjected to Two-Phase Cross-Flow
T. Sawadogo, N. Mureithi

Modelling of Fluidelastic Instability Inside an Inline Square Array
J. B. Anderson, M. Hassan, A. Mohany

7.2 Bluff Bodies & VIV

Active Control Of Flow Induced Vibrations Of A Bluff Body
M. Sridhar, B. S. V. Patnaik

A Numerical Investigation Of The Flow Around An Oscillating Circular Cylinder At Low Stokes Number
J. Berland, L. Divaret, P. Moussou, O. Cadot

Computation Of Flow Around A Circular Cylinder Undergoing Two-Degree-Of-Freedom Forced Motion At Low Reynolds Number
L. Baranyi

Two-Dimensional Simulation Of The Flow Around A Cylinder With Strakes
B. Carmo
8.1 Axial Flow and Thin Shells

A Consideration on Nonconservative Elastic Stability of a Beam Subjected to Axial Force Considered to be Fluid Force 375
K. Fujita, A. Gotou

On the Nonlinear Dynamics of Cantilevered Circular Cylindrical Shells Conveying Fluid 383
M. Paak, M. P. Paidoussis, A. K. Misra

Stiffening Of A Fuel Assembly Under Axial Flow 391
G. Ricciardi, E. Boccaccio

8.2 Valves

Study On Pressure Pulsations In Pump-Piping System: Acoustic Interaction Between Pump And Piping 399
A. Maekawa, T. Tsuji, T. Takahashi, M. Kato

Fluid-Structure Interaction At Water Hammer Events In Piping Systems 407
S. Riedelmeier, S. Becker, E. Schlücker

Experimental Investigation Of Flow-Acoustic Coupling In Gate Valves 415
O. Barannyk, P. Oshkai
9.1 Tube Arrays

Numerical Study Of Cross-Flow Past Two Staggered Rows Of Cylinders
P. Anagnostopoulos, S. Seitanis 423

Numerical Study Of Tube-Bundle Flow-Induced Vibration With Multiphase-Pod Approach
M. Pomarède, E. Liberge, A. Hamdouni, E. Longatte, J. Sigrist 431

Homogenization Method For The Vibration Of Tube Bundle In A Fluid
Q. Desbonnets, D. Broc 439

9.2 Bluff Bodies & VIV

Flow Around Circular Cylinder Submitted To Rotational Oscillation And Periodical Cross Section Variation
H. Oualli, M. Daou, M. L. Aouag, S. Hanchi, A. Bouabdallah 453

Limiting Amplitude In Vortex-Induced Vibration Of Elastically Mounted Circular Cylinders
E. Konstantinidis 457

Fluid Forces in Streamwise Vortex-Induced Vibrations
N. Cagney, S. Balabani 465

Drag And Inertia Coefficients Of A Circular Cylinder In A Steady Plus Low-Amplitude Oscillatory Flow
E. Konstantinidis, A. Dedes, D. Bouris 473
### 10.1 Tube Arrays

11.1 Bluff Bodies & VIV

Experimental Investigation Of The Flow-Induced Vibration Of A Curved Circular Cylinder  
G. R. S. Assi, C. M. Freire, I. Korkischko, N. Srinil  

Vortex-Induced Vibrations of an Inclined Cylinder in Flow  
A. Jain, Y. Modarres-Sadeghi  

Comparison Between Force Measurements Of One And Two Degrees-Of-Freedom  
Viv On Cylinder With Small And Large Mass Ratio  
G. R. Franzini, J. R. Meneghini, R. T. Gonçalves, A. L. C. Fujarra  

Modelling of Vortex-Induced Vibrations of Slender Marine Structures  
A. Postnikov, E. Pavlovskai a, M. Wiercigroch

11.2 Industrial Aeroacoustics

Experimental Evaluation of Acoustic Resonance at Single Stub Pipe in each Dry and Wet Steam Flow  
Y. Uchiyama, R. Morita  

Key Parameters for Noise Generation within Corrugated Pipes  
H. Goyder  

On Whistling Of Pipes With A Corrugated Pipe Segment  
O. Rudenko, G. Nakiboglu, A. Hirschberg  

Modeling for Combustion Oscillation Experienced in Micro Gas Turbine Combustor  
Fueled by Biomass Gas  
S. Kaneko, H. Hwang, D. Yamasaki, T. Watanabe, Y. Yamasaki
12.1 Valves

Steel Rod Breaking Excitation to Identify Full-Scale Tainter Gate Dynamics 607
K. Anami, N. Ishii, C. W. Knisely, T. Tsuji, T. Oku, T. Makihata

Mechanisms Of Instability Of Safety Relief Valves In Water Systems 615
H. Berro, P. Moussou

A Theoretical and Experimental Study of a Duckbill Valve 623
J. Wang, S. Tullis, D. S. Weaver

12.2 Axial Flow and Thin Shells

Output-Only Identification Of An Elastic Panel Coupled To A Fluid: Model-Scale And Full-Scale Investigations For Ships 631
D. Dessi, D. D’Orazio

The Influence Of Channel Walls On Flag Flutter 639
O. Doaré, C. Eloy

Flow-Induced Vibrations Of A Flexible Panel In Boundary-Layer Flow 647
J. S. Kapor, A. D. Lucey
13.1 Bluff Bodies & VIV

Experimental Investigation On Vortex-Induced Vibrations Of Yawed Cylinders With One And Two Degrees-Of-Freedom

G. R. Franzini, R. T. Gonçalves, A. L. C. Fujarra, J. R. Meneghini 655

Karman vortex effect on cross flow response on non-yawed and yawed circular cylinder in smooth flow

M. Matsumoto, H. Ishizaki, M. Hashimoto 663

Vortex-Induced Vibrations Of A Flexible Cylinder In Inclined Flow

R. Bourguet, G. E. Karniadakis, M. S. Triantafyllou 671

13.2 High Speed Flow

Experimental Results Of A Fluttering Profile In The Wind Tunnel

I. Zolotarev, V. Vclek, J. Kozanek 677

Numerical Investigation Of Self-Sustained Shock Oscillation Acoustics

C. J. O’Reilly, G. Efraimsson, J. Hammar, U. Emborg 681

Acoustic Resonances And Aerodynamic Interactions In An Axial Compressor Stator Stage Test Rig

B. Pardowitz, U. Tapken, L. Enghardt 689
14.1 Valves

Experimental Analysis Of Aerodynamic Noise Generation In A Rotary Control Valve
S. Malavasi, F. C. Bossi

697

Experimental and Numerical Investigations of Self-Excited Vibration
of Steam Control Valves
K. Yonezawa, Y. Tsujimoto, T. Endo, K. Tezuka

705

Effects Of Internal Pipe Geometry On Acoustic Diametral Modes In
A Steam Control Valve
O. Barannyk, P. Oshkai

713

14.2 Axial Flow and Thin Shells

Three-Dimensional Dynamics Of Long Pipes Towed Underwater
M. Kheiri, M. P. Paidoussis, M. Amabili, B. I. Epureanu

719

Normal Forces Exerted Upon A Long Cylinder Oscillating In An Axial Flow
L. Divaret, P. Moussou, O. Cadot, O. Doaré, J. Berland

727

Energy Harvesting From Axial Flow-Induced Instabilities In Slender Structures
K. Singh, S. Michelin, E. de Langre

735
