CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS

Virtual Pets and Avatars - Simulation, Interaction, and Emergent Ecosystems
Jeffrey Ventrella

Interactive Visualization for Cultural Heritage - Current Capabilities and Open Issues
Roberto Scopigno

Re-inventing and Re-implementing the Wheel - Visualization Component Reuse in a Large Enterprise
Frank van Ham

Parallel Coordinates - Breaching 3-D and Onward to BIG DATA
Alfred Inselberg

APPLICATIONS AND SERVICES

FULL PAPERS

Performance Evaluation of BRISK Algorithm on Mobile Devices
Alexander Gularte, Camila Thomasi, Rodrigo de Bem and Diana Adamatti

Non-rigid Surface Tracking for Virtual Fitting System
Naoki Shimizu, Takumi Yoshida, Tomoki Hayashi, Francois de Sorbier and Hideo Saito

iRep3D: Efficient Semantic 3D Scene Retrieval
Xiaoqi Cao and Matthias Klusch

SHORT PAPERS

GAIL: Geometry-aware Automatic Image Localization
Luca Benedetti, Massimiliano Corsini, Matteo Dellepiane, Paolo Cignoni and Roberto Scopigno

Geo-positional Image Forensics through Scene-terrain Registration
P. Chippendale, M. Zanin and M. Dalla Mura

Towards Automatic Direct Observation of Procedure and Skill (DOPS) in Colonoscopy
Mirko Arnold, Anarta Ghosh, Glen Doherty, Hugh Mulcahy, Christopher Steele, Stephen Patchett and Gerard Lacey

Making Digital Signage Adaptive through a Genetic Algorithm - Utilizing Viewers' Involuntary Behaviors
Ken Nagao and Issei Fujishiro

POSTERS

Counterfeit Detection and Value Recognition of Euro Banknotes
Sebastiano Battiato, Giovanni Maria Farinella, Arcangelo Bruna and Giuseppe Claudio Guarnera

Application to Quantify Fetal Lung Branching on Rat Explants
Pedro L. Rodrigues, Sara Granja, António Moreira, Nuno Rodrigues and João L. Vilaça

XIII
Automatic Modeling of an Orthotic Bracing for Nonoperative Correction of Pectus Carinatum  

71

A Tool for Brain Magnetic Resonance Image Segmentation  
Baptiste Magnier, Philippe Montesinos and Daniel Diep  

75

Reconstructing Archeological Vessels from Fragments using Anchor Points Residing on Shard Fragment Borders  
Zexi Liu, Fernand Cohen and Ezgi Taslidere  

80

An Interactive Appearance-based Document Retrieval System for Historical Newspapers  
Hongxing Gao, Marçal Rusiñol, Dimosthenis Karatzas, Apostolos Antonacopoulos and Josep Lladós  

84

Classification of Text and Image Areas in Digitized Documents for Mobile Devices  
Anne-Sophie Ettl, Axel Zeilner, Ralf Köster and Arjan Kuijper  

88

Robust Descriptors Fusion for Pedestrians’ Re-identification and Tracking Across a Camera Network  
Ahmed Derbel, Yousra Ben Jemaa, Sylvie Treuillet, Bruno Emile, Raphael Canals and Abdelmajid Ben Hamadou  

92

A Machine Vision Based Lumber Tracing System  
Riku Hietaniemi, Sami Varjo and Jari Hannikela  

98

Generic 3D Segmentation in Medicine based on a Self-learning Topological Model  
Gerald Zwettler and Werner Backfrieder  

104

Forensic Authentication of Data Bearing Halftones  
Stephen Pollard, Robert Ulichney, Matthew Gaubatz and Steven Simske  

109

Evaluation Methodology for Descriptors in Neuroimaging Studies  
M. Luna, F. Gayá, C. Cáceres, José M. Tormos and E. J. Gómez  

114

Image Processing Supports HCI in Museum Application  
Niki Martinel, Marco Vernier, Gian Luca Foresti and Elisabetta Lamedica  

118

Assessment of 3D Scanners for Modeling Pectus Carinatum Corrective Bar  
António H. J. Moreira, João Gomes Fonseca, Pedro L. Rodrigues, Jaime C. Fonseca, A. C. M. Pinho, Jorge Correia-Pinto, Nuno F. Rodrigues and João L. Vilaça  

122

MOTION, TRACKING AND STEREO VISION

FULL PAPERS

Real-time Video-based View Interpolation of Soccer Events using Depth-selective Plane Sweeping  
Patrik Goorts, Cosmin Ancuti, Maarten Dumont, Sammy Rogmans and Philippe Bekaert  

131

Disjunctive Normal Form of Weak Classifiers for Online Learning based Object Tracking  
Zhu Teng and Dong-Joong Kang  

138

A Robust Least Squares Solution to the Relative Pose Problem on Calibrated Cameras with Two Known Orientation Angles  
Gaku Nakano and Jun Takada  

147

3D Object Reconstruction with a Single RGB-Depth Image  
Silvia Rodriguez-Jiménez, Nicolas Burrus and Mohamed Abderrahim  

155
Planar Motion and Hand-eye Calibration using Inter-image Homographies from a Planar Scene
Mårten Wadenbäck and Anders Heyden

Let it Learn - A Curious Vision System for Autonomous Object Learning
Pramod Chandrashekhariah, Gabrielle Spina and Jochen Triesch

Direct Depth Recovery from Motion Blur Caused by Random Camera Rotations Imitating Fixational Eye Movements
Norio Tagawa, Shoie Koizumi and Kan Okubo

SHORT PAPERS

Anisotropic Median Filtering for Stereo Disparity Map Refinement
Nils Einecke and Julian Eggert

Image Guided Cost Aggregation for Hierarchical Depth Map Fusion
Thilo Borgmann and Thomas Sikora

3D Reconstruction of Interreflection-affected Surface Concavities using Photometric Stereo
Steffen Herbort, Daniel Schugk and Christian Wöhler

Real-Time Estimation of Camera Orientation by Tracking Orthogonal Vanishing Points in Videos
Wael Elloumi, Sylvie Treuillet and Rémy Leconge

3D Face Pose Tracking using Low Quality Depth Cameras
Ahmed Rekik, Achraf Ben-Hamadou and Walid Mahdi

Human Motion Analysis under Actual Sports Game Situations - Sequential Multi-decay Motion History Image Matching
Dan Mikami, Toshitaka Kimura, Koji Kadota, Harumi Kawamura and Akira Kojima

Probabilistic View-based 3D Curve Skeleton Computation on the GPU
Jacek Kustra, Andrei Jalba and Alexandru Telea

RGB-D Tracking and Reconstruction for TV Broadcasts
Tommi Tykköld, Hannu Hartikainen, Andrew I. Comport and Joni-Kristian Kämäräinen

Articulated Object Modeling based on Visual and Haptic Observations
Wei Wang, Vasiliki Koropoulou, Dongheui Lee and Kolja Kühnelz

OpenOF - Framework for Sparse Non-linear Least Squares Optimization on a GPU
Cornelius Wefelscheid and Olaf Hellwich

Direct Estimation of the Backward Flow
Javier Sánchez, Agustin Salgado and Nelson Monzón

3D Representation Models Construction through a Volume Geometric Decomposition Method
Gisele Simas, Rodrigo de Bem and Silvia Botelho

Visual Tracking with Similarity Matching Ratio
Aysegul Dundar, Jonghoon Jin and Eugenio Culurciello

3D Invariants from Coded Projection without Explicit Correspondences
Kenta Suzuki, Fumihiko Sakaue and Jun Sato

Genetic Algorithm for Stereo Correspondence with a Novel Fitness Function and Occlusion Handling
Alvaro Arranz, Manuel Alvar, Jaime Boal, Alvaro Sanchez-Miralles and Arturo de la Escalera
Weighted Joint Bilateral Filter with Slope Depth Compensation Filter for Depth Map Refinement
Takuya Matsuo, Norishige Fukushima and Yutaka Ishibashi

Stable Keypoint Recognition using Viewpoint Generative Learning
Takumi Yoshida, Hideo Saito, Masayoshi Shimizu and Akinori Taguchi

Learning Multi-class Topological Mapping using Visual Information
Anna Romero and Miguel Cazorla

Robust Guided Matching and Multi-layer Feature Detection Applied to High Resolution Spherical Images
Christiano Couto Gava, Alain Pagani, Bernd Krolla and Didier Stricker

3D Face Pose Tracking from Monocular Camera via Sparse Representation of Synthesized Faces
Ngoc-Trung Tran, Jacques Feldmar, Maurice Charbit, Dijana Petrovska-Delacrétaz and Gérard Chollet

Shape from Multi-view Images based on Image Generation Consistency
Kousuke Wakabayashi, Norio Tagawa and Kan Okubo

Consensus-based Inter-camera Re-identification - Across Non-overlapping Views
Fouad bousetouane, Cina Motamed and Lynda Dib

Model-less 3D Head Pose Estimation using Self-optimized Local Discriminant Embedding
F. Dornaika, A. Bosghazadeh and A. Assoum

POSTERS

Multiple Hypotheses Multiple Levels Object Tracking
Ronan Sicre and Henri Nicolas

6D Visual Odometry with Dense Probabilistic Egomotion Estimation
Hugo Silva, Alexandre Bernardino and Eduardo Silva

Optical Flow Estimation with Consistent Spatio-temporal Coherence Models
Javier Sánchez, Agustín Salgado and Nelson Monzón

Human Detection and Tracking under Complex Activities
Brais Cancela, M. Ortega and Manuel G. Penedo

Hybrid Iterated Kalman Particle Filter for Object Tracking Problems
Amr M. Nagy, Ali Ahmed and Hala H. Zayed

Pedestrian Tracking based on 3D Head Point Detection
Zhongchuan Zhang and Fernand Cohen

Continuous Tracking of Structures from an Image Sequence
Yann Lepoittevin, Dominique Béréziat, Isabelle Herlin and Nicolas Mercier

Real-time Multiple Abnormality Detection in Video Data
Simon Hartmann Have, Huamin Ren and Thomas B. Moeslund

Sparse Motion Segmentation using Propagation of Feature Labels
Pekka Sangi, Jari Hannukela, Janne Heikkilä and Olli Silven

Dynamic 3D Mapping - Visual Estimation of Independent Motions for 3D Structures in Dynamic Environments
Juan Carlos Ramirez and Darius Burschka
Real-time Appearance-based Person Re-identification Over Multiple KinectTM Cameras
Riccardo Satta, Federico Pala, Giorgio Fumera and Fabio Roli

External Cameras and a Mobile Robot for Enhanced Multi-person Tracking
A. A. Mekonnen, F. Lerasle and A. Herbulot

Visual-based Natural Landmark Tracking Method to Support UAV Navigation over Rain Forest Areas
Felipe A. Pinage, José Reginaldo H. Cavalho and José P. Queiroz Neto

Automatic Geometric Projector Calibration - Application to a 3D Real-time Visual Feedback
Radhwan Ben Madhkour, Matei Mancas and Bernard Gosselin

Spatial Image Display using Double-sided Lenticular or Fly's Eye Lens Sheets
Naoki Kira and Kazuhsa Yanaka

3D Gesture Recognition by Superquadrics
Ilya Afanasyev and Mariolino De Cecco

AUTHOR INDEX
