CONTENTS

INVITED SPEAKERS

KEYNOTE SPEAKERS
Human-Robot Intelligent Cooperation - Methodologies for Creating Human-Robot Heterogeneous Teams
Luis Paulo Reis

Toward Design of a Robotic Companion
Krzysztof Tchon

Control of Networked Distributed Pico-Satellite Systems - Small Satellites for Challenging Tasks
Klaus Schilling

EU-funded Activities in Robotics Research and Innovation - From FP7 towards Horizon 2020
Libor Kral

INTELLIGENT CONTROL SYSTEMS AND OPTIMIZATION

FULL PAPERS
Computational Experience in Solving Continuous-time Algebraic Riccati Equations using Standard and Modified Newton’s Method
Vasile Sima

Intelligent Control of a Prosthetic Ankle Joint
Anh Mai and Sesh Commuri

Explicit Homogeneous Time-varying Stabilizing Control of a Submarine Vehicle (ROV)
Adel Khadhraoui, Lotfi Beji, Samir Otmame and Azgal Abichou

A Layered Multi-Agent Model for Multi-Configuration Platoon Control
Baudouin Dafflon, Franck Gechter, Pablo Gruer and Abderraafaa Koukam

SHORT PAPERS
Pitch Control for Variable Speed Wind Turbines
A. I. Roussos, V. E. Ntampasi and O. I. Kosmidou

A Hybrid Control System for a Tentacle Arm
Nirvana Popescu, Decebal Popescu and Mircea Ivanescu

Enhanced Iterated Local Search Algorithms for the Permutation Flow Shop Problem Minimizing Total Flow Time
Xingye Dong, Maciek Nowak, Ping Chen and Houkuan Huang

H.264 Video Encoder Simulator applied in the Brazilian TV Digital Platform
Arthur Torgo Gómez and Iris Corrêa das Chagas Linck

Semi-centralized Reconstruction of Robot Swarm Topologies - The Largest Laplacian Eigenvalue and High Frequency Noise are used to Calculate the Adjacency Matrix of an Underwater Swarm from Time-series
Vincenzo Fioriti, Stefano Chiesa and Fabio Fratichini

Parametric Fault Detection in Nonlinear Systems - A Recursive Subspace-based Approach
Paulo Gil, Fábio Santos, Alberto Cardoso and Luis Palma
Application of Metaheuristics in Developing an Optimization Model for Audio Coding Process
MPEG-4 AAC
Mauricio Harff and Arthur Torgo Gómez

Introducing the Web-of-Things in Building Automation - A Gateway for KNX Installations
Gérôme Bovet and Jean Hennebert

Remarks on an Adaptive-type Self-tuning Controller using Quantum Neural Network with Qubit Neurons
Kazuhiro Takahashi, Yuka Shiotani and Masafumi Hashimoto

Multistep Fuzzy Classifier Design with Self-tuning Coevolutionary Algorithm
Roman Sergienko and Eugene Semenkin

A Generic Control Architecture for Material Handling Systems Applied to a Baggage Handling System
S. W. A. Haneyah, J. M. J. Schutten, P. C. Schuur and W. H. M. Zijm

Cognitive Parameter Adaption in Regular Control Structures - Using Process Knowledge for Parameter Adaption
Martin Schmid, Simon Berger and Gunther Reinhart

A Robust Design for Image-based Visual Servoing
Hajer Abidi, Khaled Kaaniche, Hassen Mekki and Mohamed Chtourou

High-order Least Squares Identification - A New Approach
Rajamani Doraiswami and Lahouari Cheded

Static Output-feedback Control with Selective Pole Constraints - Application to Control of Flexible Aircrafts
Isaac Yaesh and Uri Shaked

Control of Mobile Manipulator with Skid-steering Platform Moving in Unknown Terrain in Presence of Disturbance
Alicja Mazur, Jurek Sasiadek and Mateusz Cholewiński

Kalman Filter-based Estimators for Dual Adaptive Neural Control - A Comparative Analysis of Execution Time and Performance Issues
Simon G. Fabri and Marvin K. Bugeja

Cooperative Area Extension of PSO - Transfer Learning vs. Uncertainty in a Simulated Swarm Robotics
Adham Atyabi and David M. W. Powers

Sven Tomforde, Jörg Hähner and Christian Müller-Schloer

Set-membership Method for Discrete Optimal Control
Rém Ygayonneau, Sébastien Lagrange, Laurent Hardouin and Mehdi Lhommeau

Image based 3D Reconstruction in Cultural Heritage Preservation
Alessandro Cefalu, Mohammed Abdel-Wahab, Michael Peter, Konrad Wenzel and Dieter Fritsch

Stator Winding Short Circuit Fault Detection based on Uncertainty Ellipsoid Intersection for Three Phase Induction Motors
Mohammed Obaid Mustafa and George Nikolakopoulos
A Computational Cognition and Visual Servoing based Methodology to Design Automatic Manipulative Tasks

Hendry Ferreira Chame and Philippe Martinet

Uncertainty Analysis of the LOCA Break Size Prediction Model using GMDH

Soon Ho Park, Jae Hwan Kim, Dae Seop Kim and Man Gyun Na

Detection of Hot Pipe Defects using IR Thermography

Kwae Hwan Yoo, Ju Hyun Kim, Man Gyun Na, Jin Weon Kim, Kyeong Suk Kim and Chang-Doo Kee

Derivation of Control Input using Optimization with CFD Simulator and its Application to a Molten-metal Pouring Process

Yoshifumi Kuriyama, Hisashi Yamada, Ken’ichi Yano, Yuya Michioka, Yasunori Nemoto and Panya Minyong

Self-organizing Agents for an Adaptive Control of Heat Engines

Jérémy Boes, Frédéric Migeon and François Gatto

Static Balance based Rescue Robot Navigation Algorithm in Random Step Environment

Evgeni Magid and Takashi Tsubouchi

Control System with State Feedback and NN based Load Torque Feedforward for PMSM with LC Filter Fed by 3-Level NPC Inverter

L. M. Grzesiak and T. Tarczewski

About Optimization Techniques in Application to Symbolic-Numeric Optimal Control Seeking Aproach

Ivan Ryzhikov, Eugene Semenkin and Vladimir Okhorzin

A Methodology for the Design of Fuzzy Fractional PID Controllers

Ramiro S. Barbosa and Isabel S. Jesus

Tuning of Fuzzy Fractional PD^θ + I Controllers by Genetic Algorithm

Isabel S. Jesus and Ramiro S. Barbosa

SmaCCS: Smart Camera Cloud Services - Towards an Intelligent Cloud-based Surveillance System

Sven Tomforde, Uwe Jänen, Jörg Hähner and Martin Hoffmann

In Need of Methods to Solve Imprecisely Posed Problems

Andreas Geiger, Andreas Kroll and Hanns J. Sommer

An Architecture of a Multi-Agent System for SCADA - Dealing With Uncertainty, Plans and Actions

Sarah Calderwood, Weiru Liu, Jun Hong and Michael Loughlin

Optimized Eigenstructure Assignment

Ngoc Minh Dao, Dominikus Nolland Pierre Apkarian

SIGNAL PROCESSING, SENSORS, SYSTEMS MODELLING AND CONTROL

Full Papers

Parametric Macromodeling using Interpolation of Sylvester based State-space Realizations

Elizabeth Rita Samuel, Luc Knockaert and Tom Dhaene

Adaptive Filtering for Stochastic Volatility by using Exact Sampling

Shinichi Aihara, Arunabha Bagchi and Saikat Saha

Modeling the Behavior of Hair Follicle Receptors as Technical Sensors using Adaptive Control

Carsten Behn

XVII
SHORT PAPERS

Adabook and Multibook - Adaptive Boosting with Chance Correction
David M. W. Powers

A Concept of the Real-time Diagnostic System for Prototype Engines - Architecture and Algorithm
Vitaly Promyslov and Stanislav Masolkin

Optimal Errors-in-variables Interpolation of Noise-corrupted Algebraic Observations
Roberto Guidorzi

Enhancing the Life Time of a Wireless Sensor Network in Target Tracking Applications
Phuong Pham and Sesh Commuri

Overview of Bounded Support Distributions and Methods for Bayesian Treatment of Industrial Data
Kamil Dedecius and Pavel Ettler

A Kalman Filter for Odometry using a Wheel Mounted Inertial Sensor
Bernd Gersdorf and Udo Freese

Component Oriented Modeling of Biomass Incineration Plants
Fethi Belkhir, Christian Gierend and Georg Frey

Robust Sliding Mode Control for a Roll-to-Roll Machine
Kuo-Ming Chang and Yen-Yeu Lin

Stabilization of a Trajectory for Nonlinear Systems using the Time-varying Pole Placement Technique
Yasuhiko Mutoh and Shuhei Naitoh

Robotic Pre-manipulation - Real-Time Polynomial Trajectory Control for Dynamic Object Interception with Minimum Jerk
Arjun Nagendran, Remo Pillat and Robert Richardson

Phase-frequency Domain Model of Costas Loop with Mixer Discriminator
N. V. Kuznetsov, G. A. Leonov, P. Neittaanmaki, S. M. Seledzhi, M. V. Yuldashev and R. V. Yuldashev

Developing Embedded Control Systems with XtratuM - Application to Control the Attitude of a Mini-helicopter
P. Garcia, P. Albertos, A. Crespo and F. González

Comparison of Active Sensors for 3D Modeling of Indoor Environments
Abdennour Aouina, Michel Devy and Antonio Marin-Hernandez

LUC - Land Uptake Control - A GIS-based Approach
Elena De Santis and Bernardino Romano

Light Scattering Device for Measuring Finest Particles in the Exhaust of Diesel Engines
Harald Axmann and Bernd Eichberger

Redundant Inertial Navigator for Robotic Applications
Teodor Lucian Grigorie and Ruxandra Mihaela Botez

Easily Reprogrammable embedded Logic Control
Vaclav Dvorák and Petr Mikušek

Reduction of Reactive Power for Power Saving Utilization at Home Power Lines
Ondrej Krejcar and Robert Frischer

XVIII
The Research on the Balancing Capacitor Parameter Identification Method for Electric Double-Layer Capacitor Modules
Gang Yao, Younian Qiu, Tianhao Tang and Yu Lu

Multi-source Energy Harvesting Powered Acoustic Emission Sensing System for Rotating Machinery Condition Monitoring Applications
Wensi Wang, Anderson Machado Ortiz, Ningning Wang, Michael Hayes, Brendan O’Flynn and Cian O’Mathuna

BITalino - A Multimodal Platform for Physiological Computing
José Guerreiro, Raúl Martins, Hugo Silva, André Lourenço and Ana Fred

Comfort in Cars - Estimating Equivalent Temperature for Comfort Driven Heating, Ventilation and Air Conditioning (HVAC) Control
Diana Hintea, James Brusey, Elena Gaura, John Kemp and Neil Beloe

Exploratory Modeling of Complex Information Processing Systems
Jochen Kerdels and Gabriele Peters

SPECIAL SESSION ON INTELLIGENT VEHICLE CONTROLS & INTELLIGENT TRANSPORTATION SYSTEMS

FULL PAPERS

Tyre Footprint Reconstruction in the Vehicle Axle Weight-in-Motion Measurement by Fibre-optic Sensors
Alexander Grakovski, Alexey Pilipovecs, Igor Kabashkin and Elmars Petriëns

A New Vehicle Detection Method for Intelligent Transport Systems based on Scene-Specific Sliding Windows
Seung Jong Noh, Moongu Jeon and Daeyoung Shim

SHORT PAPERS

Sampling-based Multi-robot Motion Planning
Zhi Yan, Nicolas Jouandeau and Arab Ali Cherif

Heterogeneous Multiprotocol Vehicle Controls Systems in Cloud Computing Environment
Vladimir S. Zaborovski, Mikhail Chuwatov, Oleg Gusikhin, Abdulaziz Makkiya and David Hatton

ASTER - Acute Stroke Care - Telematics for Ambulance Vehicles
Franziska Wolf, Carsten Edelberger and Thomas Wolf

Instrumental Environment of Multi-protocol Cloud-oriented Vehicular Mesh Network
Glazunov Vadim, Kurochkin Leonid, Kurochkin Mikhail and Popov Sergey

Novel Techniques to Handle Rectangular Areas in Car-to-X Communication Applications
Attila Jaeger and Sorin A. Huss

Towards a “Holistic” Safety Monitoring in Intelligent Vehicle Control
Tim Köhler and Martin Schröer
