2011 18th IEEE International Conference and Workshops on Engineering of Computer-Based Systems

ECBS 2011

Table of Contents

Foreword ix
Program Committee x

Keynotes

Consensus in Networks: Coordination and Control of CyberPhysical Systems, from Unmanned Vehicles to Energy-Efficient Buildings ......................................................... 1

Kevin L. Moore

Medical Cyber-Physical Systems ......................................................... 2

Oleg Sokolsky

Supporting Community-Driven Evolution of Model-Driven Development Knowledge Using ReMoDD ......................................................... 3

Robert France

Software I

Finding Interaction Faults Adaptively Using Distance-Based Strategies ......................................................... 4

Renée C. Bryce, Charles J. Colbourn, and D. Richard Kuhn

A Structured Framework for Assessing the "Goodness" of Agile Methods ......................................................... 14

Shvetha Soundararajan and James D. Arthur

Analysis of Applicability for Synchronization Complexity Metric ......................................................... 24

Peter Yastrebenetsky and Mark Trakhtenbrot
Embedded Systems

Hardware/Software Communication Middleware for Data Adaptable Embedded Systems

Sachidanand Mahadevan, Vijay Shankar Gopinath, Roman Lysecky, Jonathan Sprinkle, Jerzy Rozenblit, and Michael W. Marcellin

MoPED: A Model-Based Provisioning Engine for Dependability in Component-Based Distributed Real-Time Embedded Systems

Sumant Tambe, Akshay Dabholkar, and Aniruddha Gokhale

Hardware Observability Framework for Minimally Intrusive Online Monitoring of Embedded Systems

Jong Chul Lee, Andrew S. Gardner, and Roman Lysecky

GeTeX: A Tool for Testing Real-Time Embedded Systems Using CAN Applications

M. Saeed AbouTrab, Steve Counsell, and Robert M. Hierons

Doctoral Symposium

A Meta-Framework for Design Space Exploration

Tripti Saxena and Gabor Karsai

Queral Networks: Toward an Approach for Engineering Large Artificial Neural Networks

Travis A. Hoffman, Jerzy W. Rozenblit, Ali Akoglu, and Liana Suantak

Towards Change Propagating Test Models in Autonomic and Adaptive Systems

Mohammed Akour, Akanksha Jaidev, and Tariq M. King

Towards an Operational Safety Standard for Software: Modelling IEC 61508 Part 3

Alois Mayr, Reinhold Plösch, and Matthias Saft

Computer-Based Systems: Scale, Transition, and Legacy

Fostering the Universal Virtual Computer as Long-Term Preservation Platform

Nico Krebs, Sebastian Rönnau, and Uwe M. Borghoff

Understanding IT Organizations Using Viewpoints

Karin Breitman, Simone Diniz Junqueira Barbosa, Percy Salas, Rita Berardi, José Viterbo, Tâssia Freitas, and Thais Batista

Model-Based Design

Measuring and Reducing Modeling Effort in Domain-Specific Modeling Languages with Examples

James H. Hill

Automated Adaptor Generation for Services Based on Pushdown Model Checking

Hsin-Hung Lin, Toshiaki Aoki, and Takuya Katayama
Model Composition in Rosetta .................................................................140
   N. Frisby, M. Peck, M. Snyder, and P. Alexander

UML/OCL and Refinement .................................................................149
   Mohamed Tahar Bhiiri, Knimech Mourad, Mohamed Graiet, and Phillipe Aniorté

Component-Based Systems

On the Mitigation of MultiCore-Induced Behavioral Deviations of an Autonomous
Ground Vehicle .................................................................159
   Jonathan Sprinkle and Brandon Eames

A Computer-Aided Approach to Preliminary Hazard Analysis for Automotive
Embedded Systems .................................................................169
   Roland Mader, Gerhard Grießnig, Andrea Leitner, Christian Kreiner,
   Quentin Bourrouilh, Eric Armengaud, Christian Steger, and Reinhold Weiß

Identifying Potential Core Assets in Service-Based Systems to Support the Transition
to Service-Oriented Product Lines .............................................179
   Matthias Galster and Armin Eberlein

Pattern-Driven Support for Designing Component-Based Architectural Models ........................................187
   Jogadish Suryadevara, Cristina Seceleanu, and Paul Pettersson

Distributed and Networked Systems

Reachability Analysis in Dynamically Routed Networks ........................................197
   Miroslav Sveda, Ondrej Rysavy, Gayan de Silva, Petr Matousek, and Jaroslav Rab

Formal Verification of Distributed Transaction Management in a SOA Based Control
System .................................................................206
   Ivana Popovic, Vladislav Vrtunski, and Miroslav Popovic

Software II

Scenario-Based Architectural Design Decisions Documentation and Evolution ........................................216
   Meiru Che and Dewayne E. Perry

A Comparative Case Study of Architecting Practices in the Embedded Software
Industry .................................................................226
   Håkan Gustavsson and Jakob Axelsson

Facilitating Software Architecting by Ranking Requirements Based on their Impact
on the Architecture Process .............................................232
   Matthias Galster and Armin Eberlein
Eighth IEEE Workshop on Model-Based Development for Computer-Based Systems

An Open-Source Pivot Language for Proprietary Tool-Chaining .......................................................... 241
Stefano Cucchiella, Antonio Cicchetti, and Federico Ciccozzi

Message Modeling for the Joint Architecture for Unmanned Systems (JAUS) ........................................... 251
Sean Whitsitt and Jonathan Sprinkle

Simplification of Semantically-Rich Model Transformations through Generated Transformation Blocks .......................................................... 260
Maribel Hudson and Jonathan Sprinkle

Model-Driven In-the-Loop Validation: Simulation-Based Testing of UAV Software Using Virtual Environments .......................................................... 269
Florian Mutter, Stefanie Gareis, Bernhard Schätz, Andreas Bayha, Franziska Grünéis, Michael Kanis, and Dagmar Koss

Modeling of Data Adaptable Reconfigurable Embedded Systems .......................................................... 276
Vijay Shankar Gopinath, Jonathan Sprinkle, and Roman Lysecky

Towards Comprehensive Modelling by Inter-model Links Using an Integrating Repository .......................... 284
Matthias Riebisch, Stephan Bode, Qurat-Ul-Ann Farooq, and Steffen Lehnert

Author Index ............................................................................................................................................. 292
