Advanced Materials and Processes III

PART 1

Selected, peer reviewed papers from the 3rd International Conference on Advanced Design and Manufacturing Engineering (ADME2013), July 13-14, 2013, Anshan, China

Edited by
Shengli Li, Weijuan Li and Jiguang Li

## PART 1

### Chapter 1: Composites

Study on Compressive Properties of SiC Particle Reinforced ZAlCu5Mn Composite Foams  
R.Z. Jin, N.S. Xie, J.J. Li and J. Che ................................................................. 3

Research on Nong'an Oil Shale Hydraulic Breaking  
J.S. Mao, Y.H. Sun, J.W. Wen and C. Chen ......................................................... 7

Research on Metallurgical Reactivity Performance of Coke  
X.Y. Wang ............................................................................................................. 11

Fabrication of PLGA/MWNTs/HA Scaffolds for Biomedical Application  
W.H. Li .................................................................................................................. 15

Optical Properties of Fe-Doped TiO₂ Thin Film Prepared by Sol-Gel  
J. Wang and L. Huang ............................................................................................. 20

Numerical Simulation of UHMWPE Laminated Fiber Plate Resisted Projectile  
L.J. Wang, T. Tang and J.B. Ma ............................................................................. 24

Fabrication and Dielectric Characterization of a Novel Polyimide  
J.Q. Lin, P.P. Zhang and W.L. Yang ..................................................................... 29

Raman Spectral of Ce/Mn Co-Doped LiNbO₃ Crystal  
M. Wang, Y.L. Wang and R. Wang ........................................................................ 33

Preparation and Electromagnetic Shielding Effectiveness of a New Kind of Electromagnetic  
Shielding Composite Coatings  
D.G. Guan, Y. Sun, G.L. Xu, C.M. Sun, H.W. Li, W.J. Xu and W.X. Zhou .......... 37

The Influence of Work Parameters on a Hydrogen PEM Fuel Cell Efficiency  
P. Bukowski, S. Honus and D. Juchelková ............................................................ 41

Influences of Environment-Friendly Additives on Electrochemical Properties of Aluminum  
Anode Materials in 4 Mol/L KOH Solution  
Z.X. Yu, S.X. Hao and Q.S. Fu ............................................................................. 47

The Preparation and Electrochromism Property of Vanadium Pentoxide  

Failure Analysis of a Composite Frangible Cover Based on Transient Dynamics  
W. Zeng and Y. Jiang ............................................................................................ 55

Optimization of Bubble Amount in Resin Mineral Composite Based Vacuum Pouring Procedure  
T. Wang, J.H. Zhang, Y. Zhang and X.H. Ren ...................................................... 60

Experimental Research on the Effects of Dimension on the Impact Damage of CFRP Laminates  
A.Y. Zhang, Z.J. Zhang, Z. Jia, Y. Zhang and D.X. Zhang ................................. 64

Threshold of Impact Energy on the Medium Leakage of CFRP Laminates  
A.Y. Zhang, Z.J. Zhang, Z. Jia, Y. Zhang and D.X. Zhang ..................................... 68

Synthesis and Mesomorphism of Novel Star-Shaped Liquid Crystals Containing  
Donor-Acceptor Groups  
D.S. Yao, J. He, G.H. Li, Q. Xu, Y.G. Jia and F.B. Meng ..................................... 72
Buckling Analysis of Carbon Fiber Reinforced Plastics Cylinders under Axial Compression
D. Huang and C.H. Duan ........................................................................................................ 76

Chemical Composition of Cerium and Manganese Co-Doped Lithium Niobate Single Crystal
M. Wang, Y.L. Wang and R. Wang ......................................................................................... 80

Modulations and Core-Shell Effect on Positive Temperature Coefficient of Resistivity of
Na$_{0.5}$Bi$_{3}$Ti$_{3}$O$_{12}$ Ceramics by Electrically Heterogeneous (LiCe) Phases
Z.F. Li, Y.T. Fu, Y.X. Li and Q.X. Zhang .............................................................................. 84

The Electromagnetic Interference Shielding Effectiveness of Carbonized Bacterial Cellulose
Coated with Nickel by Electroless Plating
P. Zhu, B. Dai, Y. Ren and L.Y. Xu ..................................................................................... 88

Stable Electrophosphorescent Emission of Fluorenyltrifluoromethyl-Pyridine Iridium
2-Picolinic Acid at High Concentration
W.G. Zhang, X.L. Shao, X.Z. Xie and S.M. Zhao ................................................................. 96

Study on Dispersion Behavior of Al$_2$O$_3$/ZrO$_2$ Composite Powder
J. Xu and M. Chen .............................................................................................................. 100

Theoretical Studies on Structures and Properties of Pentazine,1,2,4,5-Tetrazine and s-Triazine
Derivatives with Nitrogen - Containing Substituents
X.Q. Liang, Y. Zheng, B.Q. Wang and X.M. Pu .................................................................. 104

Studies on the Aging Resistance of Polypropylene Composites Filled with Mica in High Content
Y.J. Wu, C.P. Yang and C.G. Liu ........................................................................................ 116

Fabrication and Ultraviolet Characterization of Potassium Sodium Niobate/Polyimide
Hybrid Films
J.Q. Lin, P.P. Zhang and W.L. Yang .................................................................................... 121

Study on Microlens Photonic Crystal Fabricated on Organic Light-Emitting Diode Substrate
Y. Li and W. Xu .................................................................................................................. 125

Chapter 2: Micro/Nano Materials and Technology

Effect of Content and Layer Thickness on the Corona-Resistance of PI/TiO$_2$
Nanocomposite Films
X. Zhao, J.H. Yin, R. Jin and J.Y. Dong ............................................................................ 133

Electrospun Ketoprofen Sustained Release Nanofibers Prepared Using Coaxial Electrospinning

The Nanocapsulation Research Progress in Food Industry
Z.B. Xiao, W. Li, G.Y. Zhu, R.J. Zhou and Y.W. Niu .......................................................... 144

The Preparation and Tribological Property Investigation of Chrysotile Nanotubes on the Grease
K.J. He, J. Liu, H. Lv, S.M. Zheng and K.M. Wang ............................................................. 149

Electroless Plating of Cu on Multi-Walled Carbon Nanotubes
R.R. Dai, X.M. Huang and Z.P. Fei ..................................................................................... 154

Synthesis of Silver Nanoparticles through the Soft Template Method and their Applications to
Surface-Enhanced Raman Scattering
Y.D. Lu, X.X. Chen and L.H. Chen .................................................................................... 158

Simulation of the Effect of Nano Phase Size on Microstructure Evolution in Nanocomposite
Ceramic Tool Materials
H.M. Cheng and C.Z. Huang .............................................................................................. 162

Synthesis and Characterization of N-Doped Meso/Macroporous Carbon
C. Liu, A.B. Chen, Y.Q. Hu and Y.F. Yu ............................................................................ 166

Investigation on the Photovoltaic Performance of ZnO Nanoarrays Prepared by Chemical Bath
Deposition and Hydrothermal Method
Preparation of Ni-ZrO$_2$-CeO$_2$ Nanocomposite Coatings by Pulse Electrodeposition

A Straight Nanopore Drilling by Transmission Electron Microscope

Chapter 3: Metal Alloys and Mineral Prospecting and Exploration

The Source of Ore-Forming Material in Barite-Fluorite Deposits, Southeast Sichuan in China: Sr Isotope Evidence
H. Zou, Y. Fang and Z.Z. Xu .................................................. 187

Electrical Erosion Characteristics of Pt-Ir-Zr Alloy Contact under DC Load

Study on the Behavior of Internal Oxidation of Ag-Cu-Zn Alloy

Effect of the Ratio of Zn/Y on Microstructure and Mechanical Properties of As-Cast Mg-4Zn-$x$Y Alloys
F. Wang, J.B. Li, P.L. Mao and Z. Liu ........................................ 201

Effect of the Linear Electromagnetic Stirring on Microstructure and Properties of Cu-10%Nb Alloys
L. Zhang, E.G. Wang, X.W. Zuo, W.B. Wang and J.C. He ................... 205

Study on Molten Zone in Twin-Roll Casting of Magnesium Alloy Strip
Z.P. Pei, H.Y. Zhao, X.D. Hu and D.Y. Ju .................................... 209

The Study about Property of Corrosion Resistance of AlCoCrTiNiCu-$x$ High-Entropy Alloys

Influence of Grain Size on Dynamic Recrystallization of AZ31 Magnesium Alloy Rolling Sheet

Coal Quality Characteristics and Inflaming Retarding Mode of Indonesia Coal in the Large Power Station
G. Chen, J. Lu, W. Su and H.L. Zhang ...................................... 223

Methods for Determining the Physical Property Cutoffs of the Effective Reservoirs of the Yaoyi Formation in Cha 48 Zone
Q.G. Zhang, L.L. Sun and X. Chen .............................................. 230

Cyclic Hardening Behavior of Extruded AZ31B Magnesium Alloy during Low Cycle Fatigue Process
G.S. Duan, B.L. Wu, X. Zhao and G. Zhao .................................. 234

Comparison of Oxidation Behavior of Binary Co-10X (x=Al, Si, Cr) Alloys at 973 and 1073K

Effect of Hydrogen as a Temporary Alloying Element on the Microstructure and Mechanical Properties of Ti-6Al-4V Titanium Alloy
L. Zhou, D. Liu, H.J. Liu and L.Z. Wu ....................................... 243

Boron Influence on Structures and Properties in Nickel-Based Alloys
C.H. Chen, Y. Bai, W. Chen and X.C. Ye ..................................... 251

The Influence of Ti on $d$-Electron Occupancy of Fe in Fe-1.7%Ti Alloy

Simulation of the Effect of Sintering Pressure on Microstructure Evolution in Nanocomposite Ceramic Tool Materials
H.M. Cheng and C.Z. Huang .................................................... 262

The Application of Magnesium Alloy in Automotive Seat Design
S.F. Wang, W.W. Hu, Z.H. Gao and T.P. Zhao ................................. 266
Chapter 4: Steel and Iron

Effect of Cooling Rate on Oxidation Behaviour of Microalloyed Steel

Effect of Intercritical Quenching on Microstructure and Mechanical Properties of Oil Casing
Steel N80
M. Huang, Y. Wang, Y.N. Zhang, Y.W. Xie and S.F. Li ................................................................. 279

Effects of Aging Precipitates on the Mechanical and Corrosion Resistance Properties of
18Cr-18Mn-2Mo-0.96N Super High Nitrogen Austenitic Stainless Steel
Z.R. Zhang, Z.Y. Zhao, C.Z. Li, Z.H. Jiang and H.B. Li ................................................................. 284

Effect of Nano CaO and MgO Addition on the Inclusions Composition in the Cast
Microstructure of X80 Pipeline Steel
Y. Liu, C.L. He, Q.H. Ma and Y. Liu ................................................................. 289

Effect of Magnesium Addition on the Cast Microstructure of a Kind of HSLA Steel
Y. Liu, J.M. Wang, Y. Liu and C.L. He ................................................................. 293

Investigation on Microstructure, Texture and Tensile Properties of Hot Rolled Strip Casting
Grain-Oriented Silicon Steel

Experimental Study on Optimization of Slag Splashing Modifiers with Magnesite Tailings
F.Q. Ma and J. Li ................................................................. 302

Mechanism of 70Mn Steel
P. Deng, R.B. Song, T. Sun and X. Wang ................................................................. 308

Effect of the Continuous Annealing Process on Microstructure and Mechanical Properties of
DP590 Steel
H.B. Wang, R. Xing, Y.Y. Yu, J.G. Li, J.H. Yang and P. Long ................................................................. 313

The Influence of the Electromagnetic Field Power on the Solidification of the Casting

Study of Precipitation in Continuously Casting Slabs of Microalloyed Steels
G. Xu, H.J. Hu, T. Xiong and Z.W. Hu ................................................................. 323

Experimental Study on the Oxide Scale of Steel Slab under Oxygen-Enrichment Combustion
L.Y. Qi, D.Q. Cang and L. Hong ................................................................. 327

Energy Balance Analysis of No.1 Sinter Machine at Baosteel
Z.G. Guan and Z.J. He ................................................................. 331

Electron Microscopic Analysis of 30CrMnSi Steel Surface Layers after Hot Deformation
M. Skakov, G. Uazyrkhanova and N. Popova ................................................................. 336

Microstructure Evolution in Nb-Ti Micro-Alloyed Steel during Hot Compression and Hot
Rolling Simulation
B. Shen, S.H. Zhu and H.H. Zhang ................................................................. 342

Chapter 5: Polymer Materials and Technology

The Study on the Synthesis of Polyfluoroacrylate
Q.H. Yang ................................................................. 351

Detection of Phthalate Esters from Plastic Packaging Materials into Edible Oil by Gas
Chromatography-Mass
L. Li, Q.J. Sun, S.G. Xin, L. Yu and Z.L. Jiang ................................................................. 355
Effects of Emulsifier Concentration on Nucleation Mode of Emulsion Polymerization of Methyl Methacrylate
X.Q. Xiao, H. Wang, L.B. Mei and Y.L. Sun .......................... 359

Preparation and Characterization of Hyperbranched Silicone Oil by Hydrosilylation Reaction
Z. Liu, H.S. Liu, R.F. Guan and C.J. Zhou .......................... 363

Study on Acrylic Emulsion Adhesive Modified by Double Siloxane
C.H. Gao, W.L. Guo and Z.M. Jin .......................... 367

Effect of Barium Stearate on the Thermal Stability of Polyvinyl Chloride
Y.H. Lu, W.L. Liu, F. Wei and S.C. Ma .......................... 371

Effects of the Water Absorbability of Superabsorbent Prepared by Graft Copolymerization of Acrylic Acid onto Milk Proteins
M. Wei, Y.F. Sui, Y.H. Zhao, Q.L. Chen, B. Gao and T.X. Li .......................... 377

Research of Aryl Terminated Hyperbranched Polyester Modified Styrene-Acrylonitrile Emulsion
R. Mu and C. Zhao .......................... 380

Synthesis and Characterization of a Novel Aramid Fiber Liquid Crystalline Polymer
H. Jin, Y.Y. Wang and C.W. Li .......................... 385

Studies on In Vitro Release Performance of Hydrophilic Drugs and Lipophilic Drugs in Amphiphilic SIS-Based Hot-Melt Pressure Sensitive Adhesives

Effects of Emulsifier Concentration on Nucleation Mode of Emulsion Polymerization of Styrene
L.B. Mei, X.Q. Xiao, Y. Li and Y.L. Sun .......................... 399

Effects of Emulsifier Concentration on Polymer Particle Size in Emulsion Polymerization of Styrene
L.B. Mei, X.Q. Xiao, Y. Li and Y.L. Sun .......................... 403

Study on the Curing Reaction and Rheological Behavior of Bismaleimide Resin
Q.J. Sun, K.Y. Wang, S.W. Wu and L. Dai .......................... 407

Synthesis and Polymerization Kinetics of PMMA in [BMIM]BF₄ Imidazolium Ionic Liquids
P. Wang, Y. Liu, W. Su and L. Liu .......................... 411

Preparation and Research of Polymolybdate/Polymer Composite Membrane by Electrospinning and its Photo-Catalytic Property
Z.M. Zhang, T.T. Li and C. Liu .......................... 415

Study on the Poly (ether sulfone) Microfibers
D.H. Wang, T.J. Zhang, D.J. Zhang, J.W. Bao and Z.J. Liu .......................... 419

Study on Synthesis and Properties of Waterborne Polyurethane Modified by Epoxy Resin
Z.M. Jin, W.L. Guo and C.H. Gao .......................... 423

Chapter 6: Building Materials, Civil and Geoengineering, Construction Technology

Study of the Parameters of Lightweight Polymer-Cement Repair Mortars Exposed to High Temperatures
T. Melichar and J. Bydžovský .......................... 429

A Comparative Study on Production of Autoclaved Aerated Concrete by Coal Gangue Fly Ash
Y. Zhang, P.X. Duan, B.S. Jia and L. Li .......................... 433

Physical Properties of Waste Concrete Recycled Aggregates According to Coating Factor
Y.I. Jang, B.J. Lee and J.Y. Bae .......................... 439

Analysis Based on FLAC3D of Surface Subsidence Caused by a Double-Tube Parallel Tunnel Excavation
D.L. Guo and D.S. Zhao .......................... 443
Application Study of FRTP Materials in the Civil Engineering Products
S.M. Wei .................................................................................................................. 447

Progress of Studies on Durability of FRP Rods Used in Civil Engineering
S.M. Wei .................................................................................................................. 451

Diagenesis of Volcanic Rocks and its Effects on Evolution of Reservoir Space of Yingcheng
Formation in 2,3 Wellblock of Yaoshen Area
Y.C. Liu, D.L. Xu, C.Z. Liu, L.Q. Li and J.B. Pei ....................................................... 455

Gulong Oilfield Putaohua Oil Layer in the Gu 83 Block Sequence and Sandstone
Characteristics Research
L.Q. Li, C.Z. Liu and Y.C. Liu .................................................................................. 459

Influence of Ground Phosphorous Slag Powder on Performance of Cement Mortar
Y.J. Wang, F.L. Xu and J. Chen ................................................................................ 463

The Research on Seismic Performance of the Insulation Material on the External Wall of
a Building
Z.X. Zou and S.P. Mao ............................................................................................ 469

Discussions on the Construction Technology of the Vibrating Inserting Rod Long Auger Bored
Pile-CFA
J.J. Wang ................................................................................................................ 473

Analysis of Effects of a Double-Tube Parallel Tunnel Excavation on Underground Pipelines
D.L. Guo and D.S. Zhao ............................................................................................ 477

The Finite Element Analysis of Cross Steel Reinforced Concrete Special-Shaped Columns
R.L. Li, Y.F. Xu and S.Y. Bai .................................................................................... 481

Analysis on Earth Stress and Fracture Distribution Characteristics with Image Logging
Q.G. Zhang, Z.H. Guo and Y.H. Li .......................................................................... 485

Microscopic Mechanism Research on Airport Pavement Ultra-High-early Strength Concrete
Patching Material

Study on the Cementitious Proportion of Cemented Mine Tailings

The Status Analysis of Constitutive Relation and Parameters of Soil Dynamics
C. Cai, Y.D. Tian, L.Z. Cui, J.Q. Zhang and C.C. Ma ............................................. 503

Comparison between SPI and Soil Moisture Retrieved from AMSR-E
J.W. Xu, J.F. Zhao, Y.P. Wang, Q.L. Chen and L.W. Zeng ....................................... 511

Damage Evaluation of Concrete Based on Acoustic Emission b-Value
Z.Z. Xu, Y. Wang, S.X. Wu and Y. Wang ................................................................. 515

Effect of Shape and Size of Concrete Specimens on Test Result of Chloride
Migration Coefficient

A Numerical Method for the Paving Block Evaluation
C.C. Yu, J.W. Chang and S.W. Hao ................................................................. 524

Correct Direct Discrete-Continual Boundary Element Method of Structural Analysis
P.A. Akimov ........................................................................................................... 529

A Brief Analysis of the Floor Crack
J.J. Wang .............................................................................................................. 533

Research on Supporting Theory of Pressure-Bearing Ring and Yield Supporting Technology in
Extremely Soft Rock Roadway
G.L. Qu, J. Wang and G.L. Liu ............................................................................. 536

Application of Reclaimed Ladle Bricks in Magnesium Aluminate Spinel Based Castables
Z.H. Li, D.L. Qu, J. Li and L. Wang ...................................................................... 544
Jacking Force Controlling Technique of PC Beam Flexible Piers Based on Multiple Points Pushing Method
C. Zhu, R. Li and Z.Y. Zhang

Chapter 7: Biomaterials, Biotechnology and Environmental Friendly Materials Engineering

Isolation and Polyphasic Investigation of the Carotenoids-Producing Marine Bacterium from Trachurus murphyi Chile Fishery
X.L. Zhang, Q. Yang, H. Zhang and H.L. Huang

Biodegradation of DCM Vapor in a Biofilter
H.T. Sun, L. Li and X.G. Hao

Kinetics and Thermodynamics Studies of Monascus Red Dyeing on Wool
J.J. Shen and X.M. Chen

Experiment on the Mechanics Properties of Hot-Pepper in the Process of Hot-Air Drying

Characteristics of Hydrated Calcium Silicate and Paper Filler
Q.X. Liu, Y.N. Yin and W.C. Xu

Packaging Mechanical Properties of Composite Paperboard
Q.X. Liu, F. Ma and J. Yang

The Effect and Mechanism of Apoptosis Induced by Desacetylcinobufotalin (DEBF) in Human Hepatocellular Carcinoma HepG2 Cells
X. Chao, L. Dang and M.H. Wei

Adsorption of Cesium from Aqueous Solution by Modified Montmorillonite
S.M. Liu and Y.Z. Quan

Catalytic Destruction and Removal of Dichloromethane in the Microwave/Fe₂O₃ System
C.H. Lin, Y.H. Hsieh and C.Y. Chang

Study of Extraction of Total Alkaloids from Caulophyllum Robustum
J.L. Suo

Surface Modification of Activated Carbon and its Effects on Methane Adsorption
S.X. Hao, Z.X. Yu and X.Y. Liu

Functionalized Mesoporous Silica with Ethylenediamine for Removal of Pb(II)
L.J. Luo, P.B. Ban, X.J. Huang and J.H. Li
