

Methods of Analysis

of Soils, Plants, Waters, Fertilisers & Organic Manures

**Edited by
HLS Tandon**

**Fertiliser Development and Consultation Organisation
204-204A Bhanot Corner, 1-2 Pamposh Enclave
New Delhi - 110048 (India)**

CONTENTS

1 Nutrients in Soils, Plants, Waters, Fertilisers and Organic Manures - <i>HLS Tandon</i>	01-20
Introduction	01
Soils	01
Nitrogen, phosphorus and potassium	02
Sulphur, calcium and magnesium	05
Micronutrients	06
Plants	08
Waters	08
Fertilisers	14
Organic manures	17
References	18
2 Analysis of Soils for pH, EC and Available Major Nutrients - <i>A Subba Rao and K Sammi Reddy</i>	21-59
Introduction	21
Sample collection and preparation	21
Sample collection	21
Sample preparation for analysis	23
Determination of soil reaction (pH)	23
Principle	24
Equipment and reagents	24
Procedure	24
Comments and suggestions	25
Determination of electrical conductivity (EC)	26
Principle	26
Selection of method	27
Equipment and reagents	27
Procedure	27
Comments and suggestions	28
Estimation of available nitrogen	28
Organic carbon by wet digestion	28
Estimation of available (mineralizable) nitrogen	30
Estimation of exchangeable $\text{NH}_4\text{-N}$ and $\text{NO}_3\text{-N}$	32
Estimation of available phosphorus	36
Olsen's method	36
Bray and Kurtz P_1 method	39
Estimation of exchangeable potassium	40
Reagents and standard curve	41

Procedure	41
Calculation	42
Estimation of exchangeable calcium and magnesium	42
EDTA titration method	42
Estimation of exchangeable Ca and Mg by AAS	44
Comments and suggestions on the determination of K, Ca and Mg	45
Estimation of available sulphur	46
Determination of heat-soluble sulphur	46
Determination of CaCl ₂ - extractable sulphur	48
Interpretation of available nutrient status data for practical use	49
Soil fertility categories	50
Approaches for making soil test based fertiliser recommendations	50
References	55

3 Soil Analysis for Available Micronutrients

- VK Gupta

60-75

Introduction	60
Soil sampling and sample processing	61
Sampling	61
Sample processing	62
Weighing sample for analysis	62
Determination of available zinc, copper, manganese and iron	63
Principle	63
Reagents and extracting solution	64
Standards and standard curve	64
Extraction and determination	65
Analysis for available molybdenum	66
Reagents, standards and standard curve	67
Extraction and determination	68
Calculation	68
Precautions	69
Merits and limitations of major alternate methods	69
Analysis for available boron	69
Reagents and standard solutions	69
Extraction and determination	70
Calculation	70
Merits and limitations of alternate methods	70
Analysis for pollutant heavy metals	71
Critical levels of available micronutrients in soils	71
Zinc	71
Iron	71
Copper	74
Manganese	74
Molybdenum	74

Boron	74
References	74

4 Analysis of Plant Materials For Macro & Micro-nutrients - *BS Bhargava and HB Raghupathi* 76-111

Introduction	76
Sampling and sample preparation	77
Sampling	77
Sample preparation	81
Determination of total nitrogen	82
Sample preparation and digestion	82
Distillation (Kjeldahl method)	83
Colorimetric method	84
Determination of water soluble nitrates, phosphates and potassium	85
Determination of phosphorus	86
Digestion and ashing of the sample	86
Phosphorus estimation in acid digest	87
Determination of water-soluble phosphates	89
Determination of potassium and sodium	89
Determination of potassium	89
Determination of sodium	90
Determination of sulphur	90
Principle	90
Reagents	91
Preparation of standard curve	91
Estimation of sulphur	91
Determination of calcium and magnesium	92
Calcium	92
Magnesium	92
Determination of iron, manganese, zinc and copper	92
Principle	92
Instrumentation	93
Total Iron	93
Analysis of ferrous iron (Fe^{2+}) in fresh plant tissues	94
Manganese	95
Zinc	95
Copper	95
Determination of boron	96
Determination by colorimetric method	96
Determination of molybdenum	97
Determination by colorimetric method	97
Determination of B and Mo by the inductively coupled plasma (ICP) spectrometer	98

Diagnosis and interpretation of nutrient status in plants	99
Critical concentration approach	99
Diagnosis and recommendation integrated system (DRIS)	99
Compositional nutrient diagnosis norms	107
References	109

Analysis of Irrigation Waters For Quality Assessment - *BR Yadav and Dhyan Singh* 112-152

Introduction	112
Collection of water samples	112
Sampling tools and accessories	112
Procedure for sample collection	113
Practical suggestions	113
Quality parameters of Irrigation water	114
Determination of total salts (EC)	114
Principle	114
Procedure	115
Interrelationships	115
Determination of pH	115
Principle	116
Procedure	116
Practical suggestions	116
Determination of anions	116
Determination of chlorides	117
Determination of carbonates and bicarbonates	118
Determination of sulphate	120
Determination of boron	122
Determination of fluoride	124
Determination of cations	126
Determinations of Calcium and Magnesium	126
Determination of Sodium	130
Determination of nitrogen, phosphorus and potassium	131
Determination of ammoniacal nitrogen	131
Determination of nitrate nitrogen	133
Determination of phosphorus	134
Determination of potassium	136
Determination of trace elements/heavy metals	137
Water quality indices and suitability for irrigation	137
Quality indices	137
Suitability of water for irrigation	141
Trace element toxicities	141
Determination of organic and microbial constituents	143
Biochemical oxygen demand	143
Interferences and inadequacies	147

Chemical oxygen demand	148
Water microorganisms	150
References	152

6 Analysis of Fertilisers for Major and Micronutrients - N Tripathi **153-182**

Introduction	153
Sample collection and preparation	153
General requirement of fertiliser sampling	154
Sampling equipment, procedure and preparation	154
Methods of moisture determination	155
Oven dry method	156
Vacuum desiccator method	156
Karl Fischer titration method	157
Methods of nitrogen estimation	158
Determination of total nitrogen	158
Determination of ammoniacal N	161
Determination of ammoniacal and nitrate N	162
Methods of phosphate (P_2O_5) estimation	163
Estimation of total phosphates as P_2O_5	164
Estimation of water soluble phosphates	166
Estimation of available P_2O_5 (neutral ammonium citrate-soluble P_2O_5)	167
Estimation of neutral ammonium citrate-insoluble P_2O_5	167
Methods of potassium estimation	168
Principle	169
Reagents	169
Standardisation of solutions	170
Procedure	170
Method of sulphur estimation	171
Principle	171
Reagents	172
Procedure	172
Calculations	172
Procedure for sulphur in SSP	172
Method of calcium and magnesium estimation	173
EDTA titrimetric method	173
Calculation	175
Method of micronutrient estimation	175
Reagents	175
Preparation of standard solutions	175
Preparation of fertiliser sample solution	176
Flaming of solution	176
Calculation	176

Method of zinc estimation	177
Estimation of chelated zinc and chelated iron	178
Sampling and analysis of liquid fertilisers	178
Method of sampling of liquid fertilisers (other than anhydrous ammonia)	179
Analysis	180
Dos and dotts in chemical analysis	180
Dos	180
Dotts	181
Some reference books	181

7 Methods of Analysis of Organic Manures

- A C Gaur

183-201

Introduction	183
Evaluation of maturity of compost/organic manure	184
Physical methods	184
Chemical methods	184
Biological methods	185
Sample collection and preparation	185
Special techniques for sampling of vermicompost	185
Sample preparation for analysis	185
Determination of moisture	186
Procedure	186
Calculation	186
Determination of pH	186
Equipment	186
Method	187
Determination of electrical conductivity (EC)	187
Equipment and standard solution	187
Procedure	187
Determination of organic matter (loss on ignition)	187
Method	187
Calculation	188
Determination of ash or mineral matter	188
Extractions and fractionation of humic substances (humus)	188
Reagents	188
Procedure	189
Determination of organic carbon in humic fractions/compost	189
Reagents	190
Procedure	190
Calculation	190
Determination of total nitrogen in manure	190
Principle	191
Determination of N without nitrite and nitrate	191

Determination of N including nitrite and nitrate	192
Calculation	193
Determination of total phosphorus	193
Digestion	193
Phosphorus estimation	194
Determination of water soluble or citric acid soluble P	194
Determination of potassium	194
Determination of secondary and micronutrients	194
Equipment and reagents for wet oxidation method	195
Procedure	195
Determination of calcium and magnesium	195
Determination of sulphur	196
Determination of micronutrient cations	196
Microbial status (total viable counts) of organic manures	196
Apparatus	196
Media	197
Procedure	199
Taking viable counts	200
Calculation and data reporting	200
References	201
Abbreviations and Acronyms	202-203
Units and conversion factors	204
