A General Discussion on Tropospheric Aerosol – Formation, Transformation, Fate and Impacts was held in Leeds, UK on 22nd, 23rd and 24th July 2013.

RSC Publishing is a not-for-profit publisher and a division of the Royal Society of Chemistry. Any surplus made is used to support charitable activities aimed at advancing the chemical sciences. Full details are available from www.rsc.org

CONTENTS

INTRODUCTORY LECTURE

9 Introductory lecture: Atmospheric organic aerosols: insights from the combination of measurements and chemical transport models
Spyros N. Pandis, Neil M. Donahue, Benjamin N. Murphy, Ilona Riipinen, Christos Fountoukis, Eleni Karnezi, David Patoulias and Ksakousti Skyllakou

PAPERS AND DISCUSSIONS

25 Quantitative and time-resolved nanoparticle composition measurements during new particle formation
Bryan R. Bzdek, Andrew J. Horan, M. Ross Pennington, Joseph W. DePalma, Jun Zhao, Coty N. Jen, David R. Hanson, James N. Smith, Peter H. McMurry and Murray V. Johnston

45 Regional and global impacts of Criegee intermediates on atmospheric sulphuric acid concentrations and first steps of aerosol formation
Carl J. Percival, Oliver Welz, Arkke J. Eskola, John D. Savee, David L. Osborn, David O. Topping, Douglas Lowe, Steven R. Utembe, Asan Bacak, Gordon McFiggans,
Comparing simulated and experimental molecular cluster distributions

How do organic vapors contribute to new-particle formation?

Modeling the influence of alkane molecular structure on secondary organic aerosol formation
Bernard Aumont, Marie Camredon, Camille Mouchel-Vallon, Stéphanie La, Farida Ouzebidour, Richard Valorso, Julia Lee-Taylor and Sasha Madronich

Organic aerosol formation photo-enhanced by the formation of secondary photosensitizers in aerosols
Kifle Z. Aregahegn, Barbara Nozière and Christian George

Halogen-induced organic aerosol (XOA): a study on ultra-fine particle formation and time-resolved chemical characterization
Johannes Ofner, Katharina A. Kamilli, Andreas Held, Bernhard Lendl and Cornelius Zetzsch

General discussion

Average chemical properties and potential formation pathways of highly oxidized organic aerosol
Kelly E. Daumit, Sean H. Kessler and Jesse H. Kroll

Atmospheric aerosols in Amazonia and land use change: from natural biogenic to biomass burning conditions

Sulfate radical-initiated formation of isoprene-derived organosulfates in atmospheric aerosols
J. Schindelka, Y. Iinuma, D. Hoffmann and H. Herrmann

Formation of secondary organic aerosol marker compounds from the photooxidation of isoprene and isoprene-derived alkene diols under low-NOX conditions
Wu Wang, Yoshiteru Iinuma, Ariane Kahnt, Oxana Ryabtsova, Anke Mutzel, Reinhilde Vermeylen, Pieter Van der Veken, Willy Maenhaut, Hartmut Herrmann and Magda Claey

Including phase separation in a unified model to calculate partitioning of vapours to mixed inorganic-organic aerosol particles
David Topping, Mark Barley and Gordon McFiggans

Morphologies of mixed organic/inorganic/aqueous aerosol droplets
Mijung Song, Claudia Marcolli, Ulrich K. Krieger, Daniel M. Lienhard and Thomas Peter

General discussion
Fluorescent lifetime imaging of atmospheric aerosols: a direct probe of aerosol viscosity
Neveen A. Hosny, Clare Fitzgerald, Changlun Tong, Markus Kalberer, Marina K. Kuimova and Francis D. Pope

Aqueous aerosol SOA formation: impact on aerosol physical properties
Joseph L. Woo, Derek D. Kim, Allison N. Schwier, Ruizhi Li and V. Faye McNeill

The effects of aircraft on climate and pollution. Part II: 20-year impacts of exhaust from all commercial aircraft worldwide treated individually at the subgrid scale

Contact freezing efficiency of mineral dust aerosols studied in an electrodynamic balance: quantitative size and temperature dependence for illite particles
Nadine Hoffmann, Denis Duft, Alexei Kiselev and Thomas Leisner

Kinetic limitations in gas-particle reactions arising from slow diffusion in secondary organic aerosol
Shouming Zhou, Manabu Shiraiwa, Robert D. McWhinney, Ulrich Pöschl and Jonathan P. D. Abbatt

Tropospheric aerosol as a reactive intermediate
Agustín J. Colussi, Shinichi Enami, Akihiro Yabushita, Michael R. Hoffmann, Wei-Guang Liu, Himanshu Mishra and William A. Goddard, III

Online and offline mass spectrometric study of the impact of oxidation and ageing on glyoxal chemistry and uptake onto ammonium sulfate aerosols

Brown carbon formation from ketoaldehydes of biogenic monoterpenes
Tran B. Nguyen, Alexander Laskin, Julia Laskin and Sergey A. Nizkorodov

The magnitude and sources of uncertainty in global aerosol
Kenneth S. Carslaw, Lindsay A. Lee, Carly L. Reddington, Graham W. Mann and Kirsty J. Pringle

A water activity based model of heterogeneous ice nucleation kinetics for freezing of water and aqueous solution droplets
Daniel A. Knopf and Peter A. Alpert

Concluding remarks: challenges for aerosols and climate
D. M. Murphy
