Research in Mechanical Engineering and Material Science

Selected, peer reviewed papers from the 2013 International Conference on Mechanical, Material Engineering (MME 2013), November 23-24, 2013, Shiyan, Hubei, China

Edited by
Zhongjun Hu
# Table of Contents

Preface \hspace{1cm} v  
Committees and Sponsors \hspace{1cm} vi  

## Chapter 1: Mechanical Engineering and Manufacturing Technology

Research of Line Contact Rotate-Milling about Space Ruled Surface  
D.X. Zheng and B. Wang \hspace{1cm} 3

A Decoupling Algorithm for Full Vehicle Active Suspension Rolling Control  
J.G. Chen \hspace{1cm} 10

A Vibration Attenuation Control Algorithm of Half Vehicle Using Active Suspension  
J.G. Chen, X. Feng and X.L. Zhang \hspace{1cm} 14

The Design of Electric Car Battery Box Test Equipment  
Q.D. Cui, L. Yao and Y.X. Zhu \hspace{1cm} 18

An Optimizing Process Design for Sinking with the Thin-Wall Cylindrical Cup  
H.C. Teng and B.Y. Teng \hspace{1cm} 22

Simulation Research of Five-Bar Pneumatic Clamping Mechanism  
Y. Wu and X. Zhou \hspace{1cm} 28

Design and Experimental Investigation on High Efficient Horizontal Micro Electrical Discharge Machine  
X.Y. Shu and H.H. Zhang \hspace{1cm} 32

The Analysis and Improvement for Side Impact of Car Body Structure  
A.H. Gong and M.M. Hu \hspace{1cm} 38

Path Planning of the Intersecting Line of Cylindrical Pipes Welded by the Welding Robot  
Y.Q. Wang \hspace{1cm} 43

Study on Leaky Fault Mechanism and Influential Factors of Hydraulic System of Artillery  
R.B. Zhou, X.B. Liao, A.Q. Ming and Z. Zhang \hspace{1cm} 50

Simulation Study on Armor-Piercing Effect of Armor-Piercing Bomb  
R.B. Zhou, X.B. Liao, A.Q. Ming and Y.F. Zhang \hspace{1cm} 55

The Effects of the Wear Elongation on the Load of a Long-Distance Transmission Chain  
J.T. Zhao, S.Z. Wang and Z.X. Wang \hspace{1cm} 60

Research on Influencing Factors of Magnesium Alloy Wheels Forging Forming Force  
J. Li, H.X. Sun, S.M. Sun and X.X. Liu \hspace{1cm} 65

A Simplified Representation of the Intersecting Lines of the Common Rotary Bodies Intersected in Symmetric Vertical Intersection Position in Mechanical Drawings  
Y.Q. Wang and Y.M. Cheng \hspace{1cm} 69

Dynamics Analysis and Optimization of Gear Transmission System  
H.D. Zhang and T. Sun \hspace{1cm} 76

Design of the Fault Diagnosis and Maintenance Support System of New Self-Propelled Artillery Electromechanical Equipment  
X.B. Liao, R.B. Zhou, L.H. Huang and L.J. Huang \hspace{1cm} 80

Numerical Simulation and Experiment of Hot Roll Forming Large Module Gear  
X.X. Zhu, B.Y. Wang and Z.H. Hu \hspace{1cm} 86
Research on Quality Information Management Based on Quality BOM in Multi-Specification & Small-Batch Production
D. Zhou, M. He and Z.B. Yang

Introduction of Modular Design in the Conceptual Design of Refrigerators
J.M. Zhang, J. Xu and B. Tang

Numerical Simulation and Orthogonal Design Method Research Effect of Splitter Blade's Main Geometry Factors on the Performance of Pump as Turbine
J.H. Yang and S.C. Miao

Analysis of Die Lock for Stamping Parts
L. Jing, M. Liao and M.J. Yin

Experimental Investigation on Damping Characteristic of Metal Rubber Material at Simulated Marine Environment
Z. Lin, G.Z. Li, H.B. Bai and C.H. Lu

Angle Measurement Based on Computer Vision
J. Wang and X.H. Ni

Design of a Novel Down-Hole Pump with Hydro-Automatic Reversing Valve
W. Zhao and C.W. Guo

Laser Shock Processing of Titanium Alloy Blade and FEM Simulation
B. Yan and R. Wang

Study on Profile Design and Analysis of Screw Expander
G.B. Liu, Q.C. Yang and L. Wang

Research on Dynamic Characteristics of Globoidal Cam Employed in Automatic Tool Changer (ATC) of Machine Center
Q.S. Gong, M. Luo, A.H. Ren and Z.B. Chang

The Analysis of Motion Characteristics of Variable Forward-Swept Wing Mechanism with a Double Slideways
X.B. Su, Z. Zhou, X. Wang, J.C. Shi and P. Chen

Theory Design Research and the Application Prospect of the Future for the Ever Moving Car
G.Q. Cao, Y.J. Li and J.N. Liu

Kinematics and Workspace Analysis of 3-RPP Parallel Mechanism
Z.J. Xie, J. Zhang and X.B. Liu

Design and Simulation Analysis of Compost Pallet Transfer Device of Agaricus bisporus Factory Cultivation
W.Y. Zhao, J. Yang, X.P. Tang and F. Dai

Dynamics Simulation and Fatigue Life Study of the Drive System of Rack and Pinion Climbing Vertical Shiplift
X.Q. Sun, Y. Zhang and D.W. Shi

The Design of the Self-Propelled All-Filming Double-Furrow Vertical Dropping Accurate Hill-Drop Planter for Corn
W.Y. Zhao, X.P. Tang, Q. Fei and F. Dai

Finite Element Analysis of Spur Gears on Modal and Stress
J.Y. Wang, Y.Y. Huang and Z.H. Chen

Rotor/Stator Interactions Study under Different Operating Condition in Axial Flow Pump
W.D. Shi, S.Q. Wu and J. Yao

Application of Modified PANS Model for Computation of Cloud Cavitation around a Clark-Y Hydrofoil
W.D. Shi and G.J. Zhang

Cloud Service Platform for Big Data of Manufacturing
H.P. Zhu, Y. Xu, Q. Liu and Y.Q. Rao

Large-Size Wheel Rotary Forging Process Research  
J. Li, H.X. Sun, L.M. Wang and M.H. Tao .......................................................... 282

Spindle System Dynamic Characteristics Analysis of Vertical Gantry Machining Center  
H.B. Huang, Y.M. Wang and S. Xia ................................................................. 286

Application Research on High-Tech Tax Preference Policy of Manufacturing  
S.F. Cui, M. Du and Z.X. Li ................................................................. 291

The Study on Linear Guide Precision Straightening Stroke Prediction Quick Algorithm  
L. He and L. Hong ................................................................................. 294

Multi-Function Fusion Measurement Method for Surface Texture  
S.H. Wang, F.H. Xu, Y.R. Chen and T.B. Xie ............................................. 299

Research on Modeling and Simulation of the Trafficability of Vertical Screw Conveyors: Intermediate Support Based on EDEM  
L. Mei, J.Q. Hu, Y.Z. Li and T.P. Chen ....................................................... 303

The Design of Torsional Fatigue Life Test of Vehicle Steering Driveshaft  
W. Bao .................................................................................. 310

Numerical Simulation for Solid-Liquid Two-Phase Flow in Stirred Vanadium Leaching Tank  
J.Y. Kong, Z.W. Wu, Y. Hou and X.D. Wang ............................................. 314

A Novel Friction Model Basing on Journal Bearing Theory for Reciprocating Compressor  
L. Wang, B. Tang and Y.Y. Zhao ............................................................. 320

Safety Assessment and Remaining Service Life Prediction of Sandwich Marine Air Bottles  
G.J. He and A.M. Diao ........................................................................ 324

Dynamics of Flexible Slider-Crank Mechanism Based on the Floating Frame Reference Formulation  
W.F. Sun, X.Z. Zheng and J.R. Liang ......................................................... 330

Optimal Design of Pendulum in High Impact Shock Testing Machine for Middleweight  

Effect of Nitrogen on Crystal Grain Forming of Metastable Austenitic Manganese Steel  

Impact Test Method for Automobile Plastic Tank Research and Equipment Development  
L.L. Wang, T.Q. Du and W. Liu ................................................................. 345

Comparative Study on the Wear Behavior of FPM and NBR in the Natural Crude Oil Medium  
Z. Wang and S.J. Wang ........................................................................ 349

Casting Process Design and Simulation for Shaft Locking Pin  
G.H. Zhang, R.D. Li, C. Tian and K.Q. Qiu ............................................ 354

A Study on the Method for Punching Small Holes with Cold Stamping Dies  
J.H. Ning and Z.P. Hai ........................................................................... 358

Current Control Type Power Distribution Algorithm of Indirect Fuel Cell Hybrid Vehicle  
P. Xiao and S.H. Quan ................................................................. 363

Chapter 2: Materials Science and Chemical Engineering

Study on the Test of Pulse Laser Processing of Brittle Materials  
P.P. Liu and L. Wei ........................................................................ 369

Characterization of Microstructure, Texture and Properties of a Continuously-Annealed Cold-Rolled High Strength Structural Steel  
Assessment of Aging Properties of Anti-Scratch Coatings by Nanoindentation

Numerical Simulation of Temperature Field and Stress Field to Multiple Laser Cladding
Coatings
L. Ding, M.X. Li, D.Y. Huang and H.Y. Jang .......................................................... 382

Influence of Pearlite Interlamellar Spacing on the Deformation Behavior and Fracture
Characteristics in Spring Steel 60Si2MnA
C.L. Zhang, Y.Z. Liu and L.Y. Zhou ................................................................. 388

Influence of MoSi2 Addition in Co Based Alloy Cladding Coating on Microstructure
Evolution and Pitting Corrosion Behaviour
Z.F. Liang and M. Zheng .......................................................... 392

Electrochemical Analysis of the Phase Structures in Galvannealed Coatings
X.H. Yuan, D.W. Guo, S.M. Jiang and Q.F. Zhang ............................................. 399

Research Progress of Surface Nanocrystallization on Metallic Materials by Surface
Mechanical Attrition Treatment
H. Wang, Y.X. Wu, C.S. Ma and Z.L. Zhan ..................................................... 406

Photoluminescence Properties of ZnO Thin Film Prepared by Sol-Gel Route
Y.J. Hu, W.Y. Pei, L.G. Ying and L.S. Jun .......................................................... 411

Research on the Performance and Process of Fe/Cr-V – WC Surfacing Welding Layer on
Weapons Parts Department
X.B. Liao, R.B. Zhou, A.Q. Ming and Z.Z. Quan ................................................. 416

Study on the Method of Typical Defects in Butt Welding of 20 Steel
P.L. Zhang, Z.Q. Zhao, Y. Sang and Y.X. Xu ............................................. 421

Forming Load Calculation of Hot Precision Forging of Cylindrical Gears
B. Zuo, B.Y. Wang and L.Y. Yang .......................................................... 425

Recent Development of Vacancy Formation Energy
X.H. Yu, Z.L. Zhan, J. Rong and Y. Wang .................................................... 429

Study on the Erosion and Abrasion Mechanism of the Modern Artillery Barrel
X.B. Liao, R.B. Zhou, Y.F. Yang and C.H. Gong ............................................. 433

Fabrication and Corrosion Properties of Electroplated Ni-Co-Cr Alloy Coatings
T. Yang, C.Z. Peng, L. Xiang and H. Cao .......................................................... 438

Thermodynamic Properties of Nb4AlC3
A.L. Ding, W.B. Yu, C.M. Li and Z.Q. Chen ................................................... 442

The Reach on the Salt Spray Corrosion of 6000 Series Aluminum Alloys for the
High-Speed Trains
B. Li, J. Yang, X.M. Wang, P.X. Qiu, S.F. Zhang and Q. Jia ................................ 447

Influence of Stress Concentration on Fatigue Property of Welded Joints of 5083
Aluminum Alloy
J. Yang, B. Li, Q. Jia, Y.X. Li, M.Y. Zhang and H. Chen .................................... 451

Research Progress of Phase Change Materials on Heat Transfer
F. Ma and Y. Qin ............................................................. 456

The Advances in Research of Complexes of Chitosan and its Derivatives
F. Ma and F.Y. Lu ................................................................. 461

The Study on the Basic Theory of Gold Seamless Pipe Welding Numerical Simulation
W.C. Qin, J.R. Qi, L.X. Wang and W.H. Ye ............................................ 467

Synthesis, Morphology and Hydrophobicity of Core-Shell Fluorinated Copolymer Latexes
P. Guo, X. Zhao and Z.G. Xiao ............................................................. 471
Surface Hardening of a Vermicular Cast Iron Used for Integral Molding Valve Seat by High Power Laser
M. Pang, W. He, C.Z. Liu, X.L. Wang and X.B. Kang .......................................................... 474

Numerical Simulation of Aluminum Alloy Welding for Butt-Joint of AA2024 Considering Surface Effect Element
W.F. Zhu, J. Wang, P.J. Lin and B.Y. Zhang ........................................................................ 478

Microstructural Characteristics of Mg-Zn-Y Alloy Containing Quasicrystal Phase under Pulsed Magnetic Field
L. Zhang, Q. Zhou, K. Luo and L. Yang ................................................................................ 482

Research Progress of Plasma Nitriding in Low-Temperature for Austenitic Stainless Steel
Y.X. Wu, H. Wang, X.H. Yu and Z.L. Zhan ......................................................................... 486

Thermoelectric Properties of n-Type AgPbSbTe Composites Containing Nanoscaled Phases
J. Liu and L.M. Peng ............................................................................................................. 490

Microstructure and Tensile Properties of Al0.5CoCrCuFeNi High-Entropy Alloy
H.F. Sheng and L.M. Peng ..................................................................................................... 494

Recognition and Control of the Influence Factors on the Surface Defects of Cold Rolled Strip with Emulsion Lubrication
Y. Li and J.L. Sun ................................................................................................................... 498

Theoretical and Experimental Research on Preparing Silicon Microspheres by Pulsed Electrical Discharge Method
J. Hong and W. Zhang ........................................................................................................... 503

Effect of Grain Refinement and Composition on the Wear of Cemented Carbide Cutting Tools

Effect of Activating Hot Dipping Aluminum Process on High Strength Steel and Aluminum Alloy Welding Properties
Y. Xu, Y.H. Zhang and C.B. Yu .............................................................................................. 512

Microstructure Changes of Beta Alumina Sintering at Lower Temperature
H. Li, J.C. Lu, G.Y. Cheng, Y.N. Zhu and X.B. Jiang ............................................................. 517

The Effect of RE on the Microstructure and Properties of Weld of 7075 Aluminum Alloy
L.J. Li, X.R. Huang and H.K. Wei .......................................................................................... 521

Effect Dehydrants to Increasing Molecular Weight of Condensed Polylactic Acid
M.Y. Yin, R.J. Yang and D.H. Li ........................................................................................... 525

Numerical Study on Compressive Properties of Mineral Composite Material
P. Li, Z. Ji and R. Liu ............................................................................................................. 529

Orientation Relationship between Fe2M and Martensite in M50NiL Steel
Y.Z. Lou .................................................................................................................................. 533

Experimental Study of Solid Dispersion in a Seeded Precipitation Tank with Slight Agitation for Gibbsite Crystallization
Y.F. Ding, X.D. Su, D.Q. Hu, J.K. Liu, L. He and D.N. Li ......................................................... 537

HREM Study on Heterogeneous Formation of Titanium Carbonitride in Ti Microalloyed Steel
Y.Z. Lou .................................................................................................................................. 541

Investigation of the Mechanical Properties of Nanocrystalline Cemented Carbides by Nano-Indentation Technique
X.M. Liu, X.Y. Song, H.B. Wang, Y. Wang, Y. Gao and X.L. Wang ........................................ 545

A Novel Method to Determine EHL Film Thickness with Optical Interference
Q.Q. Yang, Y.J. Chen and P. Huang ......................................................................................... 549

Design and Realization of Automatic Control System in Process of Plasma Extraction
W. Ren and Y. Wang ............................................................................................................... 555
Experimental Research on Mercury-Containing Wastewater by Fly Ash  
Y. Li and P. Sun .................................................. 559
