## CONTENTS

**Foreword**  
*Lisa Jackson, John Andrews.*

**Programme**

**Keynote Presentations Abstracts**

THE PAPERS

**Predictive and Past Performance Assessment of Power System Reliability**  
*Roy Billinton, University of Saskatchewan, Canada.*

**A System-wide Modelling Approach to Railway Infrastructure Asset Management**  
*Dovile Rama, and John Andrews, University of Nottingham.*

**Analysis of the Contributions to the Performance of a Functional Product Design using Simulation**  
*Sean Reed, Magnus Lofstrand, Lennart Karlsson, and John Andrews, University of Nottingham, and Luleå University of Technology, Sweden.*

**Modelling the Deferred Impact of Failures when Considering the Availability of Production Systems**  
*Jelena Borisevic and Mark Rogers.*

**A Markov Modelling Approach to Railway Bridge Asset Management**  
*Bryant Le, and John Andrews, University of Nottingham.*

**Fault Tree Analysis of Polymer Electrolyte Fuel Cells to Predict Degradation Phenomenon**  
*Michael Whiteley, Lisa Bartlett-Jackson, and Sarah Dunnett, Loughborough University.*

**Maintenance and Planning in a Saudi Arabian Hospital**  
*Hesham Alzaben, Chris McCollin, and Lai Eugene, Nottingham Trent University, and Riyadh Military Hospital.*

**Fault Diagnostics for Railway Point Machines**  
*Marius Vileiniskis, Rasa Remenyte-Prescott, Dovile Rama, and John Andrews, University of Nottingham.*

**Probabilistic Analysis of Renewable Heat Technologies**  
*Adam Thirkill and Paul Rowley, Loughborough University.*

**Quantifying Technical Risks: Insights into Theory-Practice Tensions in the Elicitation Process and Method**  
*Gillian Anderson, Matthew Revie, and Lesley Walls, University of Strathclyde, Glasgow.*

**On Combined Data under Competing Risks**  
*Tahani Coolen-Maturi, and Frank P. A. Coolen, Durham University, UK.*

**Towards a Failsafe Flight Envelope Protection: The Recovery Shield**  
*J. A. Stoop, Lund University, Sweden.*

**The Art and Science of Whole Life Costing**  
*Andy Kirwan and Julian Williams, Network Rail.*
Localising Risk Estimates from the RSSB SRM
Chris Harrison, RSSB.

Use of a Generic Hazard List to Support the Development of Re-usable Safety Arguments in the Rail Industry
George Bearfield and Reuben McDonald, RSSB.

Automatic Construction of a Reliability Model for a Phased Mission System
K.S. Stockwell and S. J. Dunnett, Loughborough University.

Recent Advances in System Reliability using the Survival Signature
Frank P. A. Coolen, Tahani Coolen-Maturi, Abdullah H. Al-nefaiee, Ahmad M. Aboalkhair, Durham University, UK, and Mansoura University, Egypt.

Degradation Test Analysis: A Case Study
Filippo De Carlo, Orlando Borgia, Mario Tucci, University of Florence, Italy.

A Petri-Net Modelling Approach to Rail Track Geometry Maintenance and Inspection
Matthew Audley, John Andrews, University of Nottingham.

Asset Management of a Railway Signalling System
Raphaëlle Barbier Saint Hilaire, Darren Prescott, John Andrews, University of Nottingham.

Modelling Railway Service Reliability
Claudia Fecarotti, John Andrews, Rasa Remenyte-Prescott, University of Nottingham.

Using Deep Belief Networks for Predicting Railway Operations Failures
Olga Fink, Ulrich Weidmann, Institute for Transport Planning and Systems, ETH Zurich, Switzerland.

Bayesian Analysis of Electric Transmission Network Outages
Tomas lešmanius, Robertas Alzbutas, Lithuanian Energy Institute, Kaunas.

Predictive and Diagnostic Analysis of a Holdup Tank by means of Dynamic Bayesian Networks
Daniele Codetta-Raiteri, Luigi Portinale, University of Piemonte Orientale, Alessandria, Italy.

Condition Monitoring Data in the Study of Offshore Wind Turbines’ Risk of Failure
Maria C. Segovia, Matthew Revie, Francis Quail, University of Strathclyde, Glasgow.

Risk and Reliability: An Evolutionary Biologist’s Perspective
Sara L. Goodacre, University of Nottingham.

Long-term Asset Maintenance Optimization at Scottish Water
Travis Poole, Tom Archibald, Jake Ansell, Robert Murray, Scottish Water Plc, Edinburgh.

Road Network Flow Modelling for Maintenance
Chao Yang, Rasa Remenyte-Prescott, John Andrews, University of Nottingham.

Probabilistic Reliability and Risk Analysis for Systems of Fusion Device
Roman Voronov, Robertas Alzbutas, Lithuanian Energy Institute, Kaunas, Lithuania.

Aleatory Uncertainty in Power System Reliability Index Assessment
R. Billinton, W. Wangdee, University of Saskatchewan, Canada, BC Hydro, British Columbia, Canada.
Choosing the Reliability Approach – A Guideline for Selecting the Appropriate Reliability Method in the Design Process

Cristina Johansson, Per Persson, Michael Derelöv, Johan Ölvander, Linköping University, Sweden, SAAB Aeronautics, Linköping, Sweden.

Investigating Electronics Reliability in Business Jet Applications

Ian James, Aero Engine Controls, Birmingham, UK.

The Dependability Case Is it Achievable

Onboard, Real-Time Detection of Adhesion Levels in the Rail/Wheel Contact

Peter Hubbard, Chris Ward, Roger Dixon, Roger Goodall, Loughborough University.

Use of Bayesian Updating to Combine Experts’ Opinion and Results of Inspection in Bridge Management

Luis A. C. Neves, Dan M. Frangopol, University of Nottingham, Lehigh University, Bethlehem, Pennsylvania, U.S.

Stochastic State Space Methods for Railway Network Asset Management Modelling

Darren Prescott, John Andrews, University of Nottingham.

A Simple Model of the Software Failure Rate

Hendrik Schäbe
