Table of Contents

Preface: Quantum Theory: Reconsideration of Foundations 6
Andrei Khrennikov, Harald Atmanspacher, Alan Migdall, and Sergey Polyakov 1

SPECIAL SESSION: WOLFGANG PAULI'S NOTION OF QUANTUM MECHANICAL INCOMPLETENESS
H. Atmanspacher and C. Fuchs, Organizers

Dual-aspect monism à la Pauli and Jung perforates the completeness of physics
Harald Atmanspacher 5

"It's best not to think about it at all—Like the new taxes": Reality, observer, and complementarity in Bohr and Pauli
Arkady Plotnitsky 22

Markus Fierz: His character and his worldview
Hans Christian von Baeyer 49

SPECIAL SESSION: QUANTUM FOUNDATIONS AND EXPERIMENT
A. Migdall And S. Polyakov, Organizers

Trapped ions for testing foundations of quantum theory
Susan M. Clark, David Hayes, David Hucul, Kenny Lee, Volkan Inlek, and Christopher Monroe 56

Adaptive measurements in nonorthogonal state discrimination
F. E. Becerra and A. Migdall 61

Dynamics of a pulsed single photon source
Sergey V. Polyakov, Edward B. Flagg, Tim Thomay, and Glenn S. Solomon 67
TOWARDS MODELING OF EPIGENETIC EVOLUTION WITH THE AID OF THEORY OF OPEN QUANTUM SYSTEMS
Masanari Asano, Irina Basieva, Andrei Khrennikov, Masanori Ohya, Yoshiharu Tanaka, and Ichiro Yamato

TEMPORAL NONLOCALITY IN BISTABLE PERCEPTION
Harald Atmanspacher and Thomas Filk

OBSERVABLES GENERALIZING POSITIVE OPERATOR VALUED MEASURES
Irina Basieva and Andrei Khrennikov

JOINT PROBABILITIES AND QUANTUM COGNITION
J. Acacio de Barros

EVOLUTION OF QUANTUM-LIKE MODELING IN DECISION MAKING PROCESSES
Polina Khrennikova

INVITED PAPERS

CHARACTERIZATION OF OUR SOURCE OF POLARIZATION-ENTANGLED PHOTONS
Guillaume Adenier

GLEASON, KOCHEM-SPECKER, AND A COMPETITION THAT NEVER WAS
Ingemar Bengtsson

A GLIMPSE INTO THE PANDORA BOX OF THE QUANTUM MECHANICS: THE PAULI EXCLUSION PRINCIPLE VIOLATION AND SPONTANEOUS COLLAPSE MODELS PUT TO TEST

THE DIRAC QUANTUM AUTOMATON: A PREVIEW
Giacomo Mauro D'Ariano

WEAK VALUES AND BORN-JORDAN QUANTIZATION
Maurice A. de Gosson and Luis D. Abreu
Unveiling the “mystery” of quantum nonlocality by conformal geometrodynamics
Francesco De Martini and Enrico Santamato 162

Discrete-event simulation of neutron interferometry experiments
H. De Raedt, F. Jin, and K. Michielsen 172

A classical framework for nonlocality and entanglement
G. Grössing, S. Fussy, J. Mesa Pascasio, and H. Schwabl 187

Recent studies of fundamental phenomena in quantum mechanics with single-neutrons
Yuji Hasegawa 197

About tests of collapse models and Bell inequalities at accelerator facilities
Beatrix Hiesmayr and Tomas Tyc 207

Quantum mechanics: A new chapter?
Werner A. Hofer 216

Weak value as a fundamental concept and uncertainty relation
Akio Hosoya 230

Identity, wholes, and parts in quantum mechanics
Gregg Jaeger 237

Växjö interpretation of wave function: 2012
Andrei Khrennikov 244

Entanglement and quantum nonlocality demystified
Marian Kupczynski 253

Maximal violation of state-independent contextuality inequalities
Jan-Åke Larsson, Matthias Kleinmann, Constantino Budroni, Otfried Gühne, and Adán Cabello 265

Photon-number tomography and fidelity
O. V. Man’ko 275

On the quantization of the electromagnetic field of a layered dielectric waveguide
Andrei Khrennikov, Börje Nilsson, Sven Nordebo, and Igor Volovich 285
“Perhaps the biggest of all the big changes”: Measurement and multiplicity in quantum field theory
Arkady Plotnitsky 300

Simulation of quantum dynamics with integrated photonics
Linda Sansoni, Fabio Sciarrino, Paolo Mataloni, Andrea Crespi, Roberta Ramponi, and Roberto Osellame 317

There may be more to entangled photon experiments than we have appreciated so far
Arnt Inge Vistnes and Guillaume Adenier 326

On complexity of quantum communication processes
Noboru Watanabe 334

CONTRIBUTED PAPERS

Limit theorem for the parametrized Grover walk on the line
Clement Ampadu 343

Motion in bundles of purifications over spaces of isospectral density matrices
Ole Andersson and Hoshang Heydari 350

Anti-Bell - Refutation of Bell's theorem
Ilija Barukčić 354

Mutually unbiased bases, Heisenberg-Weyl orbits and the distance between them
Kate Blanchfield 359

A note on Bell's expression for the QM correlation
J. F. Geurdes 365

A new causal interpretation of EPR-B experiment
Michel Gondran and Alexandre Gondran 370

Collisions, indiscernability and the spin-statistics theorem
Michel Gondran and Alexandre Gondran 376

viii
Polaractivation of private capacity-domain of non-private quantum channels
Laszlo Gyongyosi and Sandor Imre 381

Observables and entanglement in the two-body system
N. L. Harshman 386

Entanglement dynamics of double Jaynes-Cummings interaction model based on geometric invariants
Hoshang Heydari 391

Quantum derivatives and second differential quantum operators
Samah Horrigue and Habib Ouerdiane 397

The foundations of quantum mechanics in Observer's Mathematics
Boris Khots and Dmitriy Khots 407

A significant question in quantum foundations
Juliana H. J. Mortenson 412

Universal critical behaviour in finite atom-field systems
E. Nahmad-Achar, O. Castaños, R. López-Peña, and J. G. Hirsch 417

A novel approach to 'making sense' out of the Copenhagen interpretation
Armin Nikkhah Shirazi 422

Reverse engineering quantum field theory
Robert Oeckl 428

From Born rule to large deviations
Kazuya Okamura 433

Towards graphical causal structures
K. Johan Paulsson 438

Reflections on the nature of the concepts of field in physics
C. Pombo 443

A reflection on theories of light
R. C. Z. Quehenberger 459

The existence of the spin as an evidence for the non-Euclidean space
Savely Rabinovich 464
Quantum-like behavior of nonlinear classical oscillator
S. A. Rashkovskiy 467

Correspondence between classical and quantum theory by f-deformed coherent state
R. Roknizadeh, S. A. Ghorashi, and H. Heydari 474

Heisenberg uncertainty in reduced power algebras
Elemér E. Rosinger 478

Can wave-particle duality be a source of quantum nonlocality?
R. N. Sen 482

Locality and simultaneous elements of reality
G. Nisticò and A. Sestito 487

Strategies in a symmetric quantum Kolkata restaurant problem
Puya Sharif and Hoshang Heydari 492

Quantization of Reissner-Nordström black holes and their non-singular quantum behavior
Mojtaba Taslimi Tehrani and Hoshang Heydari 497

Some mutant forms of quantum mechanics
Tatsu Takeuchi, Lay Nam Chang, Zachary Lewis, and Djordje Minic 502

Supercorrelation, an interpretation of quantum non-locality
Louis Vervoort 507

Emerged quantum field of a deterministic system with vibrations in space and time
Hou-Ying Yau 514

Author Index 519
