Table of Contents

SIGCSE 2013 Symposium Committee .................................................. xxvii
SIGCSE 2013 Reviewers ...................................................................... xxviii
Recipients of the SIGCSE Award for Outstanding Contributions to
Computer Science Education ................................................................. xxxvii
Recipients of the SIGCSE Lifetime Service Award ............................ xxxviii
Call for Participation (SIGCSE’14) ...................................................... xxxix

Session 1: Keynote Addresses
- Changing the Face of Computing ..................................................... 1
  Tracy Camp (Colorado School of Mines)
- Principles, Priorities, and Pressures: Personal and Organizational ... 3
  Henry Walker (Grinnell College)
- This Much I Know – Thoughts on the Past, Present and Future of Educational Programming Tools ............................................................ 5
  Michael Kölling (University of Kent)
- Online Education ............................................................................ 7
  John Etchemendy (Stanford University)
- Unlocking the Clubhouse: A Decade Later and Now What? ............. 9
  Jane Margolis (University of California, Los Angeles)

Session 2: Panel Session
- Shifting the Paradigm of African-American Students from Consumers of Computer Science to Producers of Computer Science ........................................ 11
  Yolanda Rankin, Jakita O. Thomas (Spelman College), Quincy Brown (Bowie State University), Leshell Hatley (Uplift, Inc.)

Session 3: Panel Session
- ACM/IEEE-CS Computer Science Curriculum 2013: Reviewing the Ironman Report ................................................................. 13
  Mehran Sahami (Stanford University), Steve Roach (University of Texas at El Paso), Ernesto Cuadros-Vargas (San Pablo Catholic University), Richard LeBlanc (Seattle University)

Session 4: Special Session
- Computer Science Education for Social Good ............................... 15
  Michael Goldweber (Xavier University), John Barr (Ithaca College), Elizabeth Patitsas (University of Toronto)

Session 5: Paper - Data Structures
  Session Chair: Jodi Tims (Baldwin-Wallace University)
- Board Game Strategies in Introductory Computer Science ............ 17
  Ivona Bezáková, James E. Heliotis, Sean P. Strout (Rochester Institute of Technology)
- Integrating Theoretical and Empirical Computer Science in a Data Structures Course ................................................................. 23
  John W. Coffey (The University of West Florida)
- Hunting High and Low: Instruments to Detect Misconceptions Related to Algorithms and Data Structures ........................................... 29
  Wolfgang Paul (Technische Universität Dortmund), Jan Vahrenhold (Westfälische Wilhelms-Universität Münster)
Session 6: Paper - Peer Instruction
Session Chair: Adrian German (Indiana University)

• Experience Report: CS1 in MATLAB for Non-Majors, with Media Computation and Peer Instruction
  Cynthia Bailey Lee (University of California, San Diego) ........................................... 35

• How We Teach Impacts Student Learning: Peer Instruction vs. Lecture in CS0
  Jaime Spacco (Knox College), Julian Parris, Beth Simon (University of California at San Diego) ............. 41

• Peer Instruction in Computing: The Role of Reading Quizzes
  Daniel Zingaro (University of Toronto), Cynthia Bailey Lee (University of California, San Diego),
  Leo Porter (Skidmore College) .................................................................................. 47

Session 7: Paper – Student Dynamics
Session Chair: Suzanne Buchele (Southwestern University)

• Incorporating Metacognition into Learning
  Murali Mani, Quamrul Mazumder (University of Michigan, Flint) ........................................ 53

• Teaching Computer Science Soft Skills as Soft Concepts
  Orit Hazzan, Gadi Har-Shai (Technion – Israel Institute of Technology) ......................... 59

• The Relationship Between Belonging and Ability in Computer Science
  Nanette Veilleux (Simmons College), Rebecca Bates (Minnesota State University, Mankato),
  Diane Jones, Joy Crawford, Cheryl Allendoerfer (University of Washington),
  Tamara Floyd Smith (Tuskegee University) ............................................................................. 65

Session 8: Paper - Non-Majors
Session Chair: Debra Goldberg (University of Colorado at Boulder)

• A Data-Centric Introduction to Computer Science for Non-Majors
  David G. Sullivan (Boston University) ................................................................. 71

• Demystifying Networking: Teaching Non-Majors via Analogical Problem-Solving
  Sridhar Iyer, Sahana Murthy (Indian Institute of Technology Bombay) .......................... 77

• Computation, Complexity, and Emergence: An Interdisciplinary Honors Seminar
  Marie desJardins (University of Maryland, Baltimore County) ........................................... 83

Session 9: Paper - Approaches for Outreach
Session Chair: Adam Anthony (Baldwin-Wallace University)

• Application of the Cognitive Apprenticeship Framework to a Middle School Robotics Camp
  D. Brian Larkins, J. Christopher Moore, Laura R. Covington, Louis J. Rubbo (Coastal Carolina University) 89

• Using Scaffolded Examples to Teach Computational Thinking Concepts
  Heidi C. Webb, Mary Beth Rosson (The Pennsylvania State University) ....................... 95

• A Cascading Mentoring Pedagogy in a CS Service Learning Course to Broaden Participation and Perceptions
  Yasmin B. Kafai, Jean Griffin, Quinn Burke (University of Pennsylvania), Michelle Slattery (Peak Research),
  Deborah A. Fields, Rita M. Powell, Michele Grab, Susan B. Davidson, Joseph S. Sun (University of Pennsylvania) 101

Session 10: Panel Session

• Panel: Mobile Application Development in Computing Curricula
  Stoney Jackson (Western New England University), Stan Kurkovsky (Central Connecticut State University),
  Eni Mustafaraj (Wellesley College), Lori Postner (Nassau Community College) ......................... 107

Session 11: Panel Session

• Strategies for Adding the Emerging PDC Curriculum Recommendations into CS Courses
  Richard A. Brown (St. Olaf College), Joel C. Adams (Calvin College), David P. Bunde (Knox College),
  Jens Mache (Lewis & Clark College), Elizabeth Shoop (Macalester College) ...................... 109
Session 12: Panel Session

- Fulbrights Abroad in Computer Science .................................................. 111
  Tom Armstrong (Wheaton College), Matthew Boutell (Rose-Hulman Institute of Technology), Linda Ott (Michigan Technological University)

Session 13: Paper - Alternatives to Lectures
Session Chair: Sherri Goings (Carleton College)

- The Inverted Classroom and the CS Curriculum ........................................ 113
  Kate Lockwood, Rachel Esselstein (California State University, Monterey Bay)

- Integrating Fantasy Role-Play into the Programming Lab:
  Exploring the 'Projective Identity' Hypothesis ....................................... 119
  Michael James Scott, Gheorghita Ghinea (Brunel University)

- Teaching Creativity in Computer Science ............................................. 123
  Andrea Salgian, Teresa M. Nakra, Christopher Ault, Yunfeng Wang (The College of New Jersey)

Session 14: Paper – Instructional Technologies
Session Chair: Ashish Amresh (Arizona State University)

- Seeking Grace: A New Object-Oriented Language for Novices .................... 129
  Andrew P. Black (Portland State University), Kim B. Bruce (Pomona College),
  Michael Homer, James Noble (Victoria University of Wellington),
  Amy Ruskin, Richard Yannow (Pomona College)

- Developing a Highly Interactive eBook for CS Instruction .......................... 135
  James B. Fenwick Jr., Barry L. Kurtz, Philip Meznar, Reed Phillips, Alex Weidner
  (Appalachian State University)

- CS50 Sandbox: Secure Execution of Untrusted Code .................................. 141
  David J. Malan (Harvard University)

Session 15: Paper - Tough Curricular Challenges
Session Chair: Andrea Danyluk (Williams College)

- Cloud Computing in the Curriculum: Fundamental and Enabling Technologies 147
  Charles Border (Rochester Institute of Technology)

- Characterizing the Need for Graduate Ethics Education ............................ 153
  Scott Dexter (Brooklyn College), Elizabeth Buchanan, Kellen Dins (University of Wisconsin-Stout),
  Kenneth R. Fleischmann (University of Texas at Austin), Keith Miller (University of Illinois Springfield)

- Methodology Education in Computing: Towards a Congruent Design Approach 159
  Matti Tedre (Stockholm University)

Session 16: Paper - Retention
Session Chair: Carl Alphonce (University at Buffalo, SUNY)

- Retaining Nearly One-Third More Majors with a Trio of Instructional Best Practices in CS1 ................................................................. 165
  Leo Porter (Skidmore College), Beth Simon (University of California, San Diego)

- Retention of STEM Majors Using Early Undergraduate Research Experiences 171
  Bethany Bowling, Heather Bullen, Maureen Doyle, John Filaseta (Northern Kentucky University)

- Halving Fail Rates Using Peer Instruction: A Study of Four Computer Science Courses ................................................................. 177
  Leo Porter (Skidmore College), Cynthia Bailey Lee, Beth Simon (University of California, San Diego)

Session 17: Paper - CS Education Research
Session Chair: Kristy Boyer (North Carolina State University)

- Becoming Experts: Measuring Attitude Development in Introductory Computer Science ................................................................. 183
  Brian Dorn (University of Hartford), Allison Elliott Tew (University of Washington Tacoma)
• What Is It We Are Asking: Interpreting Problem-Solving Questions in Computer Science and Linguistics ................................................................. 189
  Noa Ragonis (Beit Berl College and Technion - ITT), Gila Shilo (Beit Berl College)

• Investigating Factors of Student Learning in Introductory Courses ................................................................. 195
  Matthew Hertz (Canisius College), Sarah Michele Ford (University of Massachusetts, Amherst)

Session 18: Panel Session

• Computer Science Curriculum 2013: Social and Professional Recommendations from the ACM/IEEE-CS Task Force ................................................................. 201
  Elizabeth K. Hawthorne (Union County College), Florence A. Appel (Saint Xavier University), Carol L. Spradling (Northwest Missouri State University), Lisa C. Kaczmareczyk (Independent Evaluation Consultant)

Session 19: Special Session

• Understanding NSF Funding Opportunities ................................................................. 203
  Jeffrey Forbes, Victor Piotrowski, Jane Prey, D. Suzanne Westbrook (National Science Foundation)

Session 20: Special Session

• An Interactive Exploration of Gender and Computing: Unpacking the Student Experience ................................................................. 205
  Lynn Andrea Stein, Debbie Chachra, Yevgeniya V. Zastavker, Caitrin Lynch, Alisha Sarang-Sieminski (Franklin W. Olin College of Engineering)

Session 21: Special Session

• Demystifying Computing with Magic, continued ................................................................. 207
  Daniel D. Garcia (University of California, Berkeley), David Ginat (Tel-Aviv University)

Session 22: Paper - Tools
  Session Chair: Laurie King (College of the Holy Cross)

• Reading Mobile Games Throughout the Curriculum ................................................................. 209
  Jennifer Bayzick, Bradley Askins, Sharon Kalafut, Michael Spear (Lehigh University)

• Hairball: Lint-Inspired Static Analysis of Scratch Projects ................................................................. 215
  Bryce Boe, Charlotte Hill, Michelle Len, Greg Dreschler, Phillip Conrad, Diana Franklin (University of California, Santa Barbara)

• GSK: Universally Accessible Graph SKetching ................................................................. 221
  Suzanne Balik, Sean Mealin, Matthias Stallmann, Robert Rodman (North Carolina State University)

Session 23: Paper - Student Behaviors and Experiences
  Session Chair: Martha Kosa (Tennessee Technological University)

• Collaborative Learning and Anxiety: A Phenomenographic Study of Collaborative Learning Activities ................................................................. 227
  Katrina Falkner, Nickolas J. G. Falkner, Rebecca Vivian (The University of Adelaide)

• Life’s a Game and the Game of Life: How Making a Game Out of It Can Change Student Behavior ................................................................. 233
  Adrienne Decker, Elizabeth Lane Lawley (Rochester Institute of Technology)

• A Student Perspective on Prior Experience in CS1 ................................................................. 239
  Anya Tafliovich (University of Toronto, Scarborough), Jennifer Campbell (University of Toronto), Andrew Petersen (University of Toronto, Mississauga)

Session 24: Paper - Introducing CS in High School
  Session Chair: Chris Hundhausen (Washington State University)

• The Role of Teachers in Implementing Curriculum Changes ................................................................. 245
  David Thompson, Tim Bell (University of Canterbury), Peter Andreae (Victoria University of Wellington), Anthony Robins (University of Otago)
• Computer Science Principles: Analysis of a Proposed Advanced Placement Course .......................... 251
  Andrea Arpaci-Dusseau (University of Wisconsin, Madison), Owen Astrachan (Duke University),
  Dwight Barnett (Virginia Tech), Matthew Bauer (Illinois Institute of Technology),
  Marilyn Carrell (Springdale High School), Rebecca Devi (Patrick Henry High School),
  Baker Franke (Chicago Lab High School), Christina Gardner (Georgia Tech), Jeff Gray (University of Alabama),
  Jean Griffin (University of Pennsylvania), Richard Kiek (Newbury Park High School),
  Andy Kuemmel (West High School), Ralph Morelli (Trinity College),
  Deepa Muralidhar (North Gwinnett High School), R. Brook Osborne (Duke University), Chinma Uche (GHAMAS)

• A More Formal Approach to “Computer Science: Principles” .................................................. 257
  Rex Page (University of Oklahoma), Ruben Gamboa (University of Wyoming)

Session 25: Paper - Socio-Cultural Issues
Session Chair: Allison Elliott Tew (University of Washington, Tacoma)

• Building Equitable Computer Science Classrooms: Elements of a Teaching Approach .......................... 263
  Niral Shah (University of California, Berkeley), Colleen M. Lewis (Harvey Mudd College),
  Roxane Caires, Nasar Khan, Amirah Qureshi, Danielle Ehsanipour, Noopur Gupta
  (University of California, Berkeley)

• Bringing Computer Science Back into Schools: Lessons from the UK ........................................... 269
  Neil C. C. Brown, Michael Kelling (University of Kent), Tom Crick (Cardiff Metropolitan University),
  Simon Peyton Jones (Microsoft Research), Simon Humphreys (BCS), Sue Sentance (Anglia Ruskin University)

• Cultivating a K12 Computer Science Community: A Case Study ................................................. 275
  Sarah Hug (University of Colorado at Boulder), Richard Guenther (St. Vrain Valley School District),
  Michael Wenk (University of Colorado at Boulder)

Session 26: Panel Session

• Teaching Secure Coding- The Myths and the Realities ............................................................... 281
  Matt Bishop (University of California at Davis), Elizabeth Hawthorne (Union County College),
  Kara Nance (University of Alaska Fairbanks), Blair Taylor (Towson University)

Session 27: Special Session

• Alternatives to Lecture: Revealing the Power of Peer Instruction and Cooperative Learning .................. 283
  Scott Grissom (Grand Valley State University), Beth Simon (University of California, San Diego),
  Leland Beck, Alexander Chizhik (San Diego State University)

Session 28: Special Session

• ACM/IEEE Computer Science 2013 Exemplar-Fest ................................................................. 285
  Andrea Danyluk (Williams College), Steve Roach (ITT Exelis), Elizabeth K. Hawthorne (Union County College),
  Henry M. Walker (Grinnell College), Ruth E. Anderson (University of Washington),
  Christa M. Chewar (U.S. Military Academy)

Session 29: Paper - Student-Centered Approaches
Session Chair: Durell Bouchard (Roanoke College)

• Studio-Based Learning and App Inventor for Android in an Introductory CS Course for Non-Majors .......... 287
  Khuloud Ahmad, Paul Gestwicki (Ball State University)

• Impacts of Adaptive Feedback on Teaching Test-Driven Development ............................................. 293
  Kevin Buffardi, Stephen H. Edwards (Virginia Tech)

• Adding a Contributing Student Pedagogy Component to an Introductory Database Course .................... 299
  Henry A. Etlinger (Rochester Institute of Technology)
Session 30: Paper - Underserved Populations
Session Chair: Eric Aaron (Wesleyan University)

- On the Nature of Fires and How to Spark Them When You're Not There ...........................................305
  Sarah Esper, Stephen R. Foster, William G. Griswold (University of California, San Diego)

  Yasmin Kafai, Kristin Searle (University of Pennsylvania), Eliot Kaplan (The Westminster Schools),
  Deborah Fields (Utah State University), Eunkyoung Lee, Debora Lui (University of Pennsylvania)

- Workifying Games: Successfully Engaging African American Gamers with Computer Science ..................................................317
  Betsy DiSalvo, Mark Guzdial (Georgia Institute of Technology), Charles Meadows (Morehouse College),
  Tom McKlin (The Findings Group), Ken Perry (Morehouse College), Amy Bruckman (Georgia Institute of Technology)

Session 31: Paper - Architecture and Hardware
Session Chair: Timothy Stanley (Utah Valley University)

- Emumaker86: A Hardware Simulator for Teaching CPU Design ..................................................323
  Michael Black, Nathaniel Waggoner (American University)

- Helping Students Understand the Datapath with Simulators and Crazy Models ..................................329
  Michael B. Gousie (Wheaton College), James D. Teresco (The College of Saint Rose)

- Step-by-Step Design and Simulation of a Simple CPU Architecture ..................................................335
  Derek C. Schuurman (Reederer University College)

Session 32: Paper - Teaching CS1
Session Chair: Jian Zhang (Texas Woman's University)

- Introducing Computer Science in an Integrated Science Course ..................................................341
  Barry Lawson, Doug Szajda, Lewis Barnett (University of Richmond)

- Teaching the Security Mindset to CS1 Students ..............................................................................347
  Vahab Pournaghshbhand (University of California, Los Angeles)

- Constructive Use of Errors in Teaching CS1 ..................................................................................353
  David Ginat (Tel-Aviv University), Ronit Shmalo (Tel-Aviv University & Shamoon College of Engineering)

Session 33: Paper - Assessment
Session Chair: Eric Snow (SRI International)

- Computing Creativity: Divergence in Computational Thinking ..................................................359
  Vicki Bennett, Kyu Han Koh, Alexander Repenning (University of Colorado at Boulder)

- On Plugging “Unplugged” into CS Classes ..................................................................................365
  Renate Thies (Cusanus-Gymnasium Erkelenz and Technische Universität Dortmund),
  Jan Vahrenhold (Westfälische Wilhelms-Universität Münster)

- Assessment of Computer Science Learning in a Scratch-Based Outreach Program .....................371
  Diana Franklin, Phillip Conrad, Bryce Boe, Katy Nilsen, Charlotte Hill, Michelle Len, Greg Dreschler,
  Gerardo Aldana, Paulo Almeida-Tanaka, Brynn Kiefer, Chelsea Laird, Felicia Lopez, Christine Pham,
  Jessica Suarez, Robert Waite (University of California, Santa Barbara)

Session 34: Panel Session

- Growing Female Undergraduate Enrollments in Computer Science: What's the Secret? ..................377
  Wendy DuBow (University of Colorado at Boulder), Ignatios Vakalis (Cal Poly, San Luis Obispo),
  Manuel A. Perez-Quinones (Virginia Tech), Jason T. Black (Florida A&M University)
Session 35: Panel Session
- Rediscovering the Passion, Beauty, Joy, and Awe: Making Computing Fun Again,
  Part 6 .................................................................................................................. 379
  Daniel D. Garcia (University of California, Berkeley), Valerie Barr (Union College),
  Mark Guzdial (Georgia Institute of Technology), David J. Malan (Harvard University)

Session 36: Special Session
- AP CS A Exploration of a Change from GridWorld to Labs ..................................... 381
  Renee L. Ciezki (Estrella Mountain Community College), Lien Diaz (College Board),
  Robert Glen Martin (School for the Talented and Gifted), Henry M. Walker (Grinnell College)

Session 37: Special Session
- Revision of the SE 2004 Curriculum Model ............................................................ 383
  Gregory W. Hislop (Drexel University), Mark Ardis (Stevens Institute of Technology),
  David Budgen (Durham University), Mark J. Sebern (Milwaukee School of Engineering),
  Jeff Offutt (George Mason University), Willem Visser (University of Stellenbosch)

Session 38: Paper - Tools for Teaching the Core
  Session Chair: Marie Bienkowski (SRI International)
- Teaching Garbage Collection without Implementing Compiler Or Interpreters .......... 385
  Gregory H. Cooper (Google, Inc.), Arjun Guha (Cornell University), Shriram Krishnamurthi (Brown University),
  Jay McCarthy (Brigham Young University), Robert Bruce Findler (Northwestern University)
  Steve Hodges, James Scott (Microsoft Research Cambridge), Sue Sentance (Anglia Ruskin University),
  Colin Miller (Microsoft Corporation),
  Nicolas Villar, Scarlet Schwiderski-Grosche (Microsoft Research Cambridge),
  Kerry Hammil (Microsoft Corporation), Steven Johnston (Microsoft Research Cambridge)
- Using FPGAs as a Reconfigurable Teaching Tool Throughout CS Systems Curriculum ................................................................. 397
  D. Brian Larkins, William M. Jones, H. Erin Rickard (Coastal Carolina University)

Session 39: Paper - Parallel Distributed Computing
  Session Chair: Michael Helmick (Google)
- MDAT: A Multithreading Debugging and Testing Tool ........................................ 403
  Eric Larson, Rochelle Palting (Seattle University)
- Pattern Programming Approach for Teaching Parallel and Distributed Computing ........ 409
  Barry Wilkinson (University of North Carolina Charlotte),
  Jeremy Villalobos (Formerly of University of North Carolina Charlotte),
  Clayton Ferner (University of North Carolina Wilmington)
- Parallel from the Beginning: The Case for Multicore Programming in the Computer Science Undergraduate Curriculum ................................................................. 415
  Yousun Ko, Bernd Burgstaller (Yonsei University), Bernhard Scholz (The University of Sydney)

Session 40: Paper - Teacher Preparation
  Session Chair: Shaileen Pokress (Massachusetts Institute of Technology)
- Pair Programming for Middle School Students: Does Friendship Influence Academic Outcomes? ................................................................. 421
  Linda Werner (University of California, Santa Cruz),
  Jill Denner, Shannon Campe, Eloy Ortiz (Education, Training, Research Associates),
  Dawn DeLay, Amy C. Hartl, Brett Laursen (Florida Atlantic University)
• CS4Impact: Measuring Computational Thinking Concepts Present in CS4HS Participant Lesson Plans ...............................................................427
  Heather Bort, Dennis Brylow (Marquette University)

• Going Mobile with App Inventor for Android: A One-Week Computing Workshop for K-12 Teachers ......................................................433
  Jiangjiang Liu, Cheng-Hsien Lin, Phillip Potter, Ethan Philip Hasson, Zebulun David Barnett, Michael Singleton (Lamar University)

Session 41: Paper - Diversity
Session Chair: Ruth Anderson (University of Washington)
• A Large-Scale Quantitative Study of Women in Computer Science at Stanford University .................................................................439
  Katie Redmond, Sarah Evans, Mehran Sahami (Stanford University)

• From Difference to Diversity: Including Women in the Changing Face of Computing .................................................................445
  Carol Frieze, Jeria L. Quesenberry (Carnegie Mellon University)

• Are IT Interventions for Girls a Special Case? .................................................451
  Annemieke Craig, Jo Coldwell-Neilson, Jenine Beekhuyzen (Deakin University)

Session 42: Panel Session
• The Revolution Will Be Televised: Perspectives on Massive Open Online Education .................................................................457
  Mehran Sahami (Stanford University), Mark Guzdial (Georgia Institute of Technology), Fred G. Martin (University of Massachusetts, Lowell), Nick Parlante (Stanford University)

Session 43: Special Session
• Engaging Mathematical Reasoning Exercises .............................................459
  Joseph Hollingsworth (Indiana University Southeast), Joan Krone (Denison University), Jason O. Hallstrom, Murali Sitaraman (Clemson University), Bruce Weide (The Ohio State University)

Session 44: Special Session
• How AP CS A Matches College Courses .........................................................461
  Renee L. Ciezki (Estrella Mountain Community College), Lien Diaz (College Board), Frances E. Hunt (Educational Testing Service), Henry M. Walker (Grinnell College)

Session 45: Special Session
• Stories from the Scratch Community: Connecting with Ideas, Interests, and People .................................................................463
  Karen Brennan (Harvard University), Mitchel Resnick (Massachusetts Institute of Technology)

Session 46: Paper - Assessment in Programming Courses
Session Chair: Karl Schmitt (University of Maryland, College Park)
• Measuring Increased Engagement Using Tablet PCs in a Code Review Class .................................................................465
  Wade Fagen, Samuel Kamin (University of Illinois)

• What Are We Thinking When We Grade Programs? .........................................................471
  Sue Fitzgerald (Metropolitan State University), Brian Hanks (BFH Educational Consulting), Raymond Lister (University of Technology, Sydney), Renée McCauley (College of Charleston), Laurie Murphy (Pacific Lutheran University)

• Automated Online Grading for Virtual Machine-Based Systems Administration Courses .................................................................477
  Lewis Baumstark, Edwin Rudolph (University of West Georgia)
Session 47: Paper - Active Learning
Session Chair: Richard A. Brown (St. Olaf College)

• Building Knowledge and Confidence with Mediascripting: A Successful Interdisciplinary Approach to CS1
  Samuel A. Rebelsky, Janet Davis, Jerod Weinman (Grinnell College) .............................................483

• The Inverted-Lecture Model: A Case Study in Computer Architecture
  Edward F. Gehringer, Barry W. Peddy cord III (North Carolina State University).................................489

• Learning Computer Science in the “Comfort Zone of Proximal Development”
  Nicole Anderson, Tim Gegg-Harrison (Winona State University)......................................................495

Session 48: Paper - Tools to Support Novice Programmer
Session Chair: Brad Richards (University of Puget)

• The Simulation Creation Toolkit: An Initial Exploration into Making Programming Accessible While Preserving Computational Thinking
  Ashok Basawapatna, Alexander Repenning, Clayton H. Lewis (University of Colorado at Boulder) .......501

• Middle School Students Using Alice: What Can We Learn from Logging Data?
  Linda Werner, Charlie McDowell (University of California, Santa Cruz),
  Jill Denner (Education, Training, Research Associates).................................................................507

• BugCatcher: A System for Software Testing Competitions
  Renée Bryce, Quentin Mayo (University of North Texas),
  Aaron Andrews, Daniel Bokser, Michael Burton, Chelynn Day, Jessica Gonzalez, Tara Noble
  (Utah State University) .........................................................................................................................513

Session 49: Paper - SE and Professional Practice
Session Chair: Colleen Lewis (Harvey Mudd College)

• Analyzing PHP Frameworks for Use in a Project-Based Software Engineering Course
  Lisa Lancor, Samyukta Katha (Southern Connecticut State University) ..............................................519

• Gaps Between Industry Expectations and the Abilities of Graduates
  Alex Radermacher, Gursimran Walia (North Dakota State University) ..............................................525

• A Mid-Career Review of Teaching Computer Science I
  Amruth N. Kumar (Ramapo College of New Jersey) .............................................................................531

Session 50: Special Session

• Designing and Supporting Collaborative Learning Activities
  Katrina Falkner, Nickolas J.G. Falkner (The University of Adelaide) ..................................................537

Session 51: Special Session

• Nifty Assignments
  Nick Parlante, Julie Zelenski (Stanford University), Michelle Craig (University of Toronto),
  David J. Malan (Harvard University), John DeNero (Google), Mark Guzdial (Georgia Institute of Technology),
  Aditi Muralidharan (University of California, Berkeley), Eric Roberts (Stanford University),
  Kevin Wayne (Princeton University) ......................................................................................................539

Session 52: Special Session

• Expanding Access to K-12 Computer Science Education: Research on the Landscape of Computer Science Professional Development
  Baker Franke, Jeanne Century, Michael Lach (University of Chicago), Cameron Wilson (ACM),
  Mark Guzdial (Georgia Institute of Technology), Gail Chapman (University of California Los Angeles),
  Owen Astrachan (Duke University) .........................................................................................................541
Session 53: Paper - Curricular Innovations
Session Chair: Kurt Eiselt (University of British Columbia)

- Two Models of a Cryptography and Computer Security Class in a Liberal Arts Context
  Suzanne Fox Buchele (Southwestern University) .......................................................... 543

- The Entrepreneur’s Bootcamp: A New Model for Teaching Web/Mobile Development and Software Entrepreneurship
  Timothy Hickey, Pito Salas (Brandeis University) ......................................................... 549

- Growing a Computer Science Program with a Focus on Game Development
  Timothy E. Roden (Lamar University), Rob LeGrand (Angelo State University) ............ 555

Session 54: Paper - Improving Student Learning in Courses
Session Chair: Pamela Cutter (Kelhamoozoo College)

- Trace-Based Teaching in Early Programming Courses
  Matthew Hertz (Canisius College), Maria Jump (King's College) ................................. 561

- Teaching Cyber-Physical Systems to Computer Scientists via Modeling and Verification
  Kostadin Damevski, Bredlenin Altayeb, Hui Chen, David Walter (Virginia State University) 567

- A Derivation-First Approach to Teaching Algorithms
  Ran Libeskind-Hadas (Harvey Mudd College) ............................................................... 573

Session 55: Paper – Working the Web
Session Chair: Timothy Fossum (SUNY College at Potsdam)

- Online Python Tutor: Embeddable Web-Based Program Visualization for CS Education
  Philip J. Guo (Google, Inc.) ............................................................................................... 579

- Facilitating Code-Writing in PI Classes
  Daniel Zingaro (University of Toronto), Yuliya Cherenkova, Olessia Karpova, Andrew Petersen (University of Toronto Mississauga) 585

- CS Circles: An In-Browser Python Course for Beginners
  David Pritchard (Princeton University), Troy Vasiga (University of Waterloo) .............. 591

Session 56: Paper - Computational Thinking
Session Chair: Catherine Lang (Swinburne University of Technology)

- Will It Stick? Exploring the Sustainability of Computational Thinking Education Through Game Design
  Kyu Han Koh, Alexander Repenning, Hilarie Nickerson, Yasko Endo, Pate Motter (University of Colorado at Boulder) 597

- The Social Turn in K-12 Programming: Moving from Computational Thinking to Computational Participation
  Yasin B. Kafai (University of Pennsylvania), Quinn Burke (College of Charleston) .... 603

- Accelerating K-12 Computational Thinking Using Scaffolding, Staging, and Abstraction
  David S. Touretzky (Carnegie Mellon University), Daniela Marghitu (Auburn University), Stephanie Ludi (Rochester Institute of Technology), Debra Bernstein (TERC), Lijun Ni (Georgia Institute of Technology) 609

Session 57: Paper - Camps and Mobile Computing
Session Chair: Jakita Thomas (Spelman College)

- Girls on the Go: A CS Summer Camp to Attract and Inspire Female High School Students
  Janet E. Burge, Gerald C. Gannod (Miami University), Maureen Doyle (Northern Kentucky University), Karen C. Davis (University of Cincinnati) 615
• Using App Inventor in a K-12 Summer Camp ........................................................................621
  Amber Wagner, Jeff Gray, Jonathan Corley (University of Alabama), David Wolber (University of San Francisco)

• No Sensor Left Behind: Enriching Computing Education with Mobile Devices .................627
  Matthew H. Dabney, Brian C. Dean (Clemson University), Tom Rogers (Southside High School)

Session 58: Panel Session

• Panel: Textbook Pricing, Present and Future ......................................................................633
  Edward F. Gehringer (North Carolina State University), Beth Lang Golub (John Wiley & Sons),
  Randi Cohen (Taylor & Francis), David M. Arnow (Brooklyn College), Clifford A. Shaffer (Virginia Tech)

Session 59: Special Session

• CS Principles: Development and Evolution of a Course and a Community .................635
  Owen Astrachan (Duke University), Amy Briggs (Middlebury College), Lien Diaz (College Board),
  R. Brook Osborne (Duke University)

Session 60: Special Session

• Addressing 21st Century Skills by Embedding Computer Science in K-12 Classes ........637
  Debra S. Goldberg, Dirk Grunwald, Clayton Lewis, Jessica Feld (University of Colorado at Boulder),
  Kristin Donley, Odette Edbrooke (Boulder Valley School District)

Session 61: Paper - Classroom Management
  Session Chair: Sarah Heckman (North Carolina State University)

• Git on the Cloud in the Classroom ..................................................................................639
  Joseph Lawrance (Wentworth Institute of Technology), Seikyung Jung (Bridgewater State University),
  Charles Wiseman (Wentworth Institute of Technology)

• Creating Effective Student Groups: An Introduction to groupformation.org ................645
  Tyson R. Henry (California State University, Chico)

• The Effectiveness of Live-Coding to Teach Introductory Programming .........................651
  Marc J. Rubin (Colorado School of Mines)

Session 62: Paper - Music and Computing Education
  Session Chair: Laurie Murphy (Pacific Lutheran University)

• Tackling Engagement in Computing with Computational Music Remixing ..................657
  Brian Magerko, Jason Freeman (Georgia Institute of Technology), Tom McKln (The Findings Group, LLC),
  Scott McCoid, Tom Jenkins, Elise Livingston (Georgia Institute of Technology)

• Computer Science “Big Ideas” Play Well in Digital Sound and Music .........................663
  Jennifer Burg (Wake Forest University), Jason Romney (University of North Carolina School of the Arts),
  Eric Schwartz (Sound Designer and Audio Engineering)

• Form, Function and Performances in a Musical Instrument MAKers Camp ..................669
  Blake Sawyer, Jason Forsyth, Taylor O’Connor, Brennon Bortz, Teri Finn, Liesl Baum, Ivica Ico Bukvic,
  Benjamin Knapp, Dane Webster (Virginia Tech)

Session 63: Paper - Security and Secure Programming
  Session Chair: David Stucki (Otterhein University)

• Learning Mobile Security with Android Security Labware ..............................................675
  Minzhe Guo, Prabir Bhattacharya (University of Cincinnati),
  Ming Yang, Kai Qian (Southern Polytechnic State University), Li Yang (University of Tennessee at Chattanooga)

• A Method for Incorporating Usable Security into Computer Security Courses ............681
  Binto George, Martha S. Klems, Anna Valeva (Western Illinois University)

• Interactive Support for Secure Programming Education ..............................................687
  Jun Zhu, Heather Richter Lipford, Bill Chu (University of North Carolina at Charlotte)
Session 64: Paper - Capstones
Session Chair: Haklin Kimm (East Stroudsburg University)

- **A Case for Course Capstone Projects in CS1** ................................................................. 693
  Saquib Razak (Carnegie Mellon University, Qatar)

- **Empirical Evaluation of Periodic Retrospective Assessment** ............................................ 699
  Paul Gestwicki (Ball State University), Brian McNely (University of Kentucky)

- **Software Security Testing of an Online Banking System: A Unique Research Experience for Undergraduates and Computer Teachers** .................. 705
  Dianxiang Xu (Dakota State University)

Session 65: Paper – Educational Research
Session Chair: James Maher (Colorado School of Mines)

- **Ce21–Maryland: The State of Computer Science Education in Maryland High Schools** .................................................................................................................. 711
  Marie desJardins, Susan Martin (University of Maryland, Baltimore County)

- **How Students Estimate the Effects of ICT and Programming Courses** ......................... 717
  Michail N. Giannakos (Norwegian University of Science and Technology (NTNU)),
  Peter Hubwieser (Technische Universität München), Nikos Chrisochoides (Old Dominion University)

- **Using a Discourse-Intensive Pedagogy and Android’s App Inventor for Introducing Computational Concepts to Middle School Students** ............... 723
  Shuchi Grover, Roy Pea (Stanford University)

Session 66: Poster Session 1

- **A Combat Robotics Course: Programming Meets Computer-Aided Design and Fabrication** ................................................................................................. 729
  Lewis Baumstark (University of West Georgia)

- **Communication Patterns: A Tool for Analyzing Communication in Emerging Computer Science Educational Practices** ................................................. 729
  Charles Wallace, Shreya Kumar (Michigan Technological University)

- **Control-Alt-Hack™: A Card Game for Computer Security Outreach and Education** ...... 729
  Tamara Denning, Tadayoshi Kohno (University of Washington), Adam Shostack (Independent)

- **K12 Outreach: Motivating K12 School Counselors to Embrace the Changing Face of Computing** ......................................................................................... 730
  Sarah Hug (University of Colorado at Boulder),
  Jane Krauss (National Center for Women & Information Technology)

- **Sustainability Improves Student Learning (SISL) in Computing** ................................... 730
  Robert E. Beck, Daniel Joyce (Villanova University)

- **Creation of Interdisciplinary Programs in Computational Science** ............................... 730
  Steven I. Gordon (Ohio Supercomputer Center)

- **Curriculum Collaboration, Customization, and Reuse: Creating Communities in Digital Repositories** ................................................................. 731
  Scott Briell, Lois Delcambre (Portland State University), Edward Fox (Virginia Tech),
  Randy Steele (Olympia School District)

- **Evaluation of the Emerging Scholars Program at Columbia University** ....................... 731
  Rita Powell, Christian Murphy (University of Pennsylvania),
  Adam Cannon, Joshua Gordon, Arthi Ramachandran (Columbia University)

- **Classroom Interventions to Reduce Failure & Course Withdrawal in CS1** ................. 731
  Brian K. Hare (University of Missouri - Kansas City)

- **Using an Alternate Reality Game as a Course Backdrop** ............................................. 731
  Matthew Lang (Moravian College)
Using Sequential Pattern Mining to Increase Graph Comprehension in Intelligent Tutoring System Student Data
Aaron Springer (Eastern Mennonite University), Matthew Johnson, Michael Eagle, Tiffany Barnes (University of North Carolina Charlotte)

MyCS: Middle-years Computer Science
Zachary Dodds, Michael Erlinger (Harvey Mudd College)

Cyberbulling and Game Models
Lila Ghemri, Rattikorn Hewett (Texas Tech University), Colleen Livingston (Bemidji State University)

Enhance Computer Networks Learning with Hands-on Mobile Device Based Labware
Ming Yang (Southern Polytechnic State University), Guillermo Francia (Jacksonville State University), Li Yang (University of Tennessee at Chattanooga), Kai Qian (Southern Polytechnic State University), Minzhe Guo, Prabir Bhattacharya (University of Cincinnati)

Women in Technology: An International Collaborative Celebration
Alison Clear (Christchurch Polytechnic Institute of Technology), Annemieke Craig (Deakin University), Catherine Lang (Swinburne University of Technology)

Creating an Educational Robot by Embedding a Learning Agent in the Physical World

Teaching Software Engineering with an Open-Source Humanitarian Software Project
Cameron Macdonell (Grant MacEwan University)

Computing in Context
Robert E. Beck (Villanova University), Edward Carr (North Carolina A&T University), Wingyan Chung (Fayetteville State University), Edward Fox (Virginia Tech), Christine Nass (Villanova University)

Integrating Computer Science into Middle School Mathematics
Susan H. Rodger, Dwayne C. Brown Jr., Michael Hoyle, Michael Marion (Duke University)

OpenDSA: Using an Active eTextbook to Teach Data Structures and Algorithms
Eric Fouh, Daniel Breakiron, Mai Elshehaly, T. Simin Hall (Virginia Tech), Ville Karavirta (Aalto University), Clifford A. Shaffer (Virginia Tech)

Making Images by Hand and by Code: Motivating Students with Multi-Language Interactive Media Application Scripting
Chukwunweike T. Abuah, Rogelio Calderon, Martin Estrada (Grinnell College), Zami Htet (Cornell College), Adriana M. Hurley, Katherine Ingersoll, Hart Russell, Sydney Ryan, Kimberly Spasaro, Prashanna Tiwari, Samuel A. Rebelsky (Grinnell College)

Selecting and Using a Parallel Programming Language
Michael Graf, David Bunde (Knox College), David Ely (The Ohio State University), David Lucas (Knox College), Jens Mache (Lewis & Clark College), Chris Mitchell (CloudBolt Software), Andrei Papancea (Knox College), Miriam Robinson, Ben White (Lewis & Clark College)

A Comprehensive Software Engineering Education Program for Grades 6 to 12 in NYC Public Schools
Cameron L. Fadjo (New York City Department of Education)

Teaching Data Structures with BeSocratic
Sam Bryfczynski, Brian C. Dean, Roy P. Pargas, Melanie M. Cooper (Clemson University), Michael Klymkowski (University of Colorado Boulder)

Robobuilder: A Computational Thinking Game
David Weinthrop, Uri Wilensky (Northwestern University)

Modeling Student Programming with Multimodal Learning Analytics
Joseph F. Grafsgaard, Joseph B. Wiggins, Kristy Elizabeth Boyer, Eric N. Wiebe, James C. Lester (North Carolina State University)
Session 67: Poster Session 2

- **Embracing the Digital Humanities: A Course on Computing in the Humanities for Undergraduate Computer Science Minor Students** ........................................... 737  
  Deena Engel (New York University)

- **A Cloud Computing Curriculum for Undergraduate CS Majors** ........................................... 737  
  Edward Walker (Whitworth University)

- **Using the Atmel AVR (Arduino Microcontroller) as the Foundation of Beginning Computer Organization Course** ........................................... 737  
  Susan M. Haynes (Eastern Michigan University)

- **Technovation Challenge: Teaching Girls Computer Science & Entrepreneurship** ................. 737  
  AnnaListe Hoopes, Tara Chklovski, Dara Olmsted (Iridescent)

- **Making Programming Contest Practice Worthy of Academic Credit** ................................. 738  
  Julie Johnson (Vanderbilt University)

- **Interdisciplinary Computing, Successes and Challenges** ........................................... 738  
  Lillian N. Cassel (Villanova University), Ursula Wolz (Montclair State University)

- **How Students Learn: Ripples in the Computer Science/Software Engineering Curriculum** ........................................... 738  
  Alison Clear, Michael Lance, Amitrajit Sakar (Christchurch Polytechnic Institute of Technology)

- **Kodu, Alice and Lego Robotics: A Three-Step Model of Effective Introducing Middle School Students to Computer Programming and Robotics** ........................................... 738  
  Daniela Marghitu, Taha Ben Brahim, John Weaver, Yasmeen Rawajfih (Auburn University)

- **A Multi-Level Video Game for Teaching Security** ........................................... 739  
  Mario A. M. Guimaraes, Huwida Said (Zayed University)

- **Computing Foundations for the Scientist** ........................................... 739  
  Catherine Bareiss, Larry Vail (Olivet Nazarene University)

- **Girls in IT: The Facts – A Comprehensive Look at the Latest Research on Gender and Technology in K-12 Contexts** ........................................... 740  
  Catherine Ashcraft (University of Colorado)

- **Introducing Privacy in a Data Mining Course** ........................................... 740  
  Lila Ghemri (Texas Southern University), Ping Chen (University of Houston-Downtown)

- **“Dictionary Wars”: An Inverted Leaderboard-Driven Project for Learning Dictionary Data Structures** ........................................... 740  
  Kuba Karpierz, Joel Kitching, Brendan Shillingford (University of British Columbia), Elizabeth Patitsas (University of Toronto), Steven A. Wolfman (University of British Columbia)

- **Computer Science-Education Outreach: An Interdisciplinary Collaboration** ..................... 740  
  Jennifer Rosato, Chery Takkunen (College of St. Scholastica)

- **Improving Hispanic High School Student Perceptions of Computing** ...................................... 741  
  Marvin Andujar, Lauren Aguilara, Yerika Jimenez, Farah Zabe, Patricia Morreale (Kean University)

- **Developing Game-Like Instructional Modules to Enhance Student Learning in Lower Level Core Computer Science Courses** ...................................................... 741  
  Jinghua Zhang, Mustafa Aty, Rebecca Caldwell, Elva J. Jones (Winston-Salem State University)

- **Geospatial Intelligence as a Context for Computing Education** ...................................... 741  
  Sambit Bhattacharya, Bogdan Czejdo, Rakesh Malhotra (Fayetteville State University)

- **CloudCoder: Building a Community for Creating, Assigning, Evaluating and Sharing Programming Exercises** ...................................................... 742  
  David Hovemeyer (York College of Pennsylvania), Matthew Hertz (Canisius College), Jaime Spacco, Andrei Papancea (Knox College), Paul Denny (University of Auckland), John Stamper, Kelly Rivers (Carnegie Mellon University)
• DISSECT: Integrating Computational Thinking in the Traditional K-12 Curricula Through Collaborative Teaching .......................................................................................................................... 742
Sarah Hug (University of Colorado at Boulder), Josh Sandry, Ryan Vordermann, Enrico Pontelli, Ben Wright (New Mexico State University)

• Ant Colony Simulation as an Engaging, Extendable, and Easily Gradable Programming Project .......................................................... 742
Roger West (University of Illinois at Springfield)

• An Experiment to Test Bug Density in Students' Code .......................................................................................................................... 742
Zalia Shams, Stephen H. Edwards (Virginia Tech)

• A Project Spine Framework for Software Engineering Education .................................................................................................. 743
Kevin A. Gary, Srividya K. Bansal, Arbi Ghazarian (Arizona State University)

• Student Development of Board Game Strategies in a Web-Based Graphical Infrastructure .................................................................................. 743
Adam Oest, Ivona Bezáková, James Heliotis, Sean Strout (Rochester Institute of Technology)

• Green Computing in the Introductory Curriculum .............................................................................................................................. 743
Susan Eileen Fox (Macalester College)

• Interactive Exploration of Huffman Coding .............................................................................................................................. 744
Nicholas Brown, Michael H. Goldwasser (Saint Louis University)

Session 68: Birds of a Feather - Flock I

• Teaching Computer Science Principles with Digital Sound and Music ........................................................................................................ 745
Jennifer Burg (Wake Forest University), Susan Reiser (University of North Carolina, Asheville)

• Test-First Java for Beginners ................................................................................................................................................ 745
Viera K. Proulx (Northeastern University)

• Where Is Computing in General Education? ........................................................................................................................................... 745
Catherine Bareiss, Larry Vail (Olivet Nazarene University)

• Automated Generation and Grading of Programming Assignments ................................................................................................................. 745
Steven C. Shaffer (Pennsylvania State University), Cliff Shaffer (Virginia Tech)

• CSTACS K-12 Instructional Standards and CS Curriculum ...................................................................................................................... 746
Deborah Seehorn (North Carolina Department of Public Instruction), Chris Stephenson (Computer Science Teachers Association), Tammy Randall Pirmann (School District of Springfield Township), Kelly Powers (Advanced Math and Science Academy Charter School)

• Birds of a Feather: Teaching with Alice .............................................................................................................................................. 746
Donald J. Slater, Wanda Dann (Carnegie Mellon University), Steve Cooper (Stanford University)

• Nifty Computing in Society Case Studies ........................................................................................................................................... 746
Jim Huggins (Kettering University), Alfreda Dudley (Towson University), Karla Carter (Bellevue University), Netiva Canfora (Northeastern Illinois University), Dee Weikle (Eastern Mennonite University in Harrisonburg)

• Integrating Communication Skills into the Computer Science Curriculum ......................................................................................................... 746
Mark E. Hoffman (Quinnipiac University), Janet Burge, Jerry Gannod (Miami University), Mladen Vouk (North Carolina State University)

• The Future of the ABET Computer Science Program Criteria ........................................................................................................ 747
Allen Parrish (The University of Alabama), Cary Laxer (Rose-Hulman Institute of Technology)

• Bringing Security into Traditional Computer Science Courses: Challenges and Support .............................................................................................. 747
Ambareen Siraj (Tennessee Tech University), Blair Taylor (Towson University), Stephen Cooper (Stanford University)

• Technovation Challenge: Teaching Girls Computer Science & Entrepreneurship ................................................................................................ 747
Tara Chklovski, AnnaLise Hoopes, Dara Olmsted (Iridescent)

• Replicating "Exploring Computer Science" (ECS) ........................................................................................................................................ 747
Dale Reed (University of Illinois Chicago), Dan Yanek (Northside College Prep High School), Gail Chapman (University of California, Los Angeles)
• Teaching Track Faculty in CS
  Mark Sherriff (University of Virginia), Daniel Garcia (University of California, Berkeley), Jody Paul (Metropolitan State University at Denver)

• Starting and Sustaining an Undergraduate Research Program in Computer Science
  Adam Anthony (Baldwin Wallace University), Marie desJardins (University of Maryland Baltimore County)

• Technology That Educators of Computing Hail (TECH): Come, Share Your Favorites!
  Daniel D. Garcia, Daniel Armendariz (University of California, Berkeley)

• Brainstorming CS Principles Big Idea III: Data and Information
  Suzanne W. Dietrich (Arizona State University), Don Gocelman (Villanova University)

• A Town Meeting: SIGCSE Committee on Expanding the Women-in-Computing Community
  Gloria Childress Townsend (DePauw University)

Session 69: Birds of a Feather - Flock II

• Trends in CS Enrollments at Small, Liberal Arts Institutions
  Barbara Anthony (Southwestern University), Lisa Bender (Concordia College), Christine Chung (Connecticut College), Mark Lewis (Trinity University)

• Logistics of Moving from Computer Fluency to Computational Thinking
  Monika Sobolewsk (Michigan State University)

• Computer Scientists Put the Informatics into Bio, Health, and Medical Informatics Education
  Bonnie MacKellar (St John's University), Margaret Menzin (Simmons College), Marc L. Smith (Vassar College), Tammy VanDeGrift (University of Portland)

• Encouraging Faculty & Student Involvement in Humanitarian Free and Open Source Software (HFOSS)
  Gregory W. Hislop (Drexel University), Heidi J. C. Ellis (Western New England University), Darci Burdge (Nassau Community College), Sean Goggins (Drexel University), Lori Postner (Nassau Community College), Stoney Jackson (Western New England University)

• CSTA Chapters: Supporting Your Local Computer Science Educators
  Frances P. Trees (Rutgers University), David Reed (Creighton University), Tammy Pirmann (Springfield High School)

• How PhD Students at Research Universities Can Prepare for a Career at a Liberal Arts College
  Ann Irvine (Johns Hopkins University), Darakhshan Mir (Rutgers University), Michael Hay (Colgate University)

• Computer Science Principles: Necessary for All Students' Success?
  Diane Baxter, Elizabeth Simon (University of California San Diego)

• Broadening Mathematical Reasoning in Computing
  Douglas Baldwin (SUNY Geneseo)

• Using Version Control in the Classroom
  John Britton, Tim Berglund (GitHub)

• Including HCI and User Experience (UX) Methodologies in Computing Curriculum
  Debra Lee Davis, Kip Irvine (Florida International University), Dave Berque (DePauw University), Janet Davis (Grinnell College), Brian Dom (University of Hartford), Matt Jadud (Berea College)

• Taking Studio-Based Learning Online
  Yolanda Jacobs Reimer (University of Montana), Christopher Hundhausen (Washington State University), Phillip Conrad (University of California)

• Using POGIL Activities in Computer Science Classes
  Helen H. Hu (Westminster College), Clifton Kussmaul (Muhlenberg College), Matthew Lang (Moravian College)

• Teaching Security Using Hands-On Exercises
  Richard Weiss (The Evergreen State College), Michael E. Locasto (The University of Calgary), Jens Mache (Lewis and Clark College), Blair Taylor (Towson University), Elizabeth Hawthorne (Union County College)
• Computational Literacy for Everyone: Opening a Dialogue Between Stem and the Digital Arts and Humanities ......................................................... 754
  Nick Senske (University of North Carolina at Charlotte)

• Dual Degree Tracks for Computer Science Majors ................................ 754
  Joanne F. Selinski (Johns Hopkins University), Kathie A. Yerion (Gonzaga University)

• Universal Access to Computing Education ........................................ 754
  Richard E. Ladner (University of Washington)

• Multi-Course Approaches to Curriculum 2013’s Parallel and Distributed Computing .... 755
  Richard A. Brown (St. Olaf College), Joel C. Adams (Calvin College), David P. Bunde (Knox College), Jens Mache (Lewis & Clark College), Elizabeth Shoop (Macalester College), Michael A. Smith, Paul F. Steinberg (Intel Corporation), Matthew Wolf (Georgia Institute of Technology)

• The Joy of Word Games: Or, Putting the “Text” Back into Context .................. 755
  Michael P. Rogers (Northwest Missouri State University)

Session 70: Wednesday Workshops

• ROS at Every Level: Using the Robot Operating System in CS 0, 1, 2, and Beyond .......... 757
  Julian Mason (Duke University), Zachary Dodds (Harvey Mudd College), William D. Smart (Oregon State University)

• Making Mathematical Reasoning Fun: Web-Integrated, Collaborative, and “Hands-On” Techniques ................................................................. 757
  Jason O. Hallstrom (Clemson University), Joe Hollingsworth (Indiana University Southeast), Joan Krone (Denison University), Murali Sitaraman (Clemson University)

• Alice 3.1 ................................................................. 757
  Wanda Dann (Carnegie Mellon University), Steve Cooper (Stanford University), Don Slater (Carnegie Mellon University)

• Creative Computing: Introductory Programming Concepts with Processing.js ............. 757
  Semmy Purewal (University of North Carolina at Asheville)

• Computer Science Unplugged, Robotics, and Outreach Activities ......................... 758
  Tim Bell (University of Canterbury), Daniela Marghita (Auburn University), Lynn Lambert (Christopher Newport University), Paul Curzon (Queen Mary University of London)

• Making the Most of Undergraduate Research ........................................... 758
  Andrea Danyluk (Williams College), Nancy Amato (Texas A&M University), Ran Libeskind-Hadas (Harvey Mudd College), Lori Pollock (University of Delaware), Susan Rodger (Duke University)

• Learn about Effective Proposal Writing via the Review Process .......................... 758
  Guy-Alain Amoussou, Suzanne Westbrook (National Science Foundation)

• CSinParallel: Using Map-Reduce to Teach Parallel Programming Concepts Across the CS Curriculum ............................................................ 758
  Richard Brown (St. Olaf College), Elizabeth Shoop (Macalester College), Joel Adams (Calvin College)

• Hands-on CyberSecurity Exercises and the RAVE Virtual Environment .................. 759
  Richard Weiss (The Evergreen State College), Vincent Nestler (California State University at San Bernardino), Michael Locasto (The University of Calgary), Jens Mache (Lewis and Clark College), Brian Hay (The University of Alaska, Fairbanks)

• Re-Imagining CS1/CS2 with Android Using the Sofia Framework ....................... 759
  Stephen H. Edwards (Virginia Tech)

• SNAP! (Build Your Own Blocks) ......................................................... 759
  Brian Harvey, Daniel D. Garcia (University of California, Berkeley), Tiffany Barnes (North Carolina State University), Nathaniel Titterton, Daniel Armendariz (University of California, Berkeley), Luke Segars (Google, Inc.), Eugene Lemon (Ralph J Bunche High School), Sean Morris (Albany High School), Josh Paley (Henry M. Gunn High School)

• Incorporating Version Control into Programming Courses ............................... 759
  Tommy MacWilliam (Harvard University)
Session 71: Friday Workshops

- **Computational Art and Creative Coding: Teaching CS1 with Processing** .................................................. 761
  Ira Greenberg (Southern Methodist University), Deepak Kumar, Dianna Xu (Bryn Mawr College)

- **AP CS Principles and the Beauty and Joy of Computing Curriculum** .................................................. 761
  Daniel D. Garcia, Brian Harvey (University of California, Berkeley),
  Tiffany Barnes (North Carolina State University),
  Nathaniel Titterton, Dan Armendariz (University of California, Berkeley),
  Luke Segars (Google, Inc.),
  Eugene Lemon (RAL J. Bunche High School),
  Sean Morris (Albany High School),
  Josh Paley (Henry M. Gunn High School)

- **Introducing Secure Coding in CS0 and CS1** ............................................................................. 761
  Matt Bishop (University of California at Davis), Blair Taylor (Towson University),
  Elizabeth Hawthorne (Union County College),
  Diana Burley (The George Washington University),
  Siddharth Kaza (Towson University)

- **Experimenting with and Integrating Alice 2.3 into Many Disciplines** ................................................. 761
  Susan H. Rodger (Duke University), Steve Cooper (Stanford University),
  Wanda Dann (Carnegie Mellon University),
  Dwayne C. Brown Jr. (Duke University),
  Jacobo Carrasquel (Carnegie Mellon University)

- **How to Plan and Run Computing Summer Camps for 4th–12th Grade Students** ....................... 762
  Barbara Ericson (Georgia Institute of Technology),
  Christopher Michaud (Marist School),
  Nannette Napier (Georgia Gwinnett College),
  Krishnendu Roy (Valdosta State University)

- **Pedagogy for Engaging Diverse Students in Computing: Four Effective Methods** .................. 762
  Joanne McGrath Cohoon (University of Virginia & NCWIT),
  James P. Cohoon (University of Virginia),
  Seth Reichelson (Lake Brantley High School),
  Susan Horwitz (University of Wisconsin - Madison),
  Laura Reasoner Jones (Fairfax County Public School)

- **Teaching the CS Principles Curriculum with App Inventor** ...................................................... 762
  Ralph Morelli (Trinity College),
  David Wolber (University of San Francisco),
  Shaileen Pokress (Massachusetts Institute of Technology),
  Franklyn Turbak (Wellesley College),
  Fred Martin (University of Massachusetts, Lowell)

- **Using Scala Strategically Across the Undergraduate Curriculum** ............................................... 763
  Mark Lewis (Trinity University),
  Konstantin Laufer, George K. Thiruvathukal (Loyola University Chicago)

- **NetLogo: Teaching with Turtles and Crossing Curricular Boundaries** ....................................... 763
  Forrest Stonedahl (Centre College),
  David Weintrop (Northwestern University),
  Paulo Blikstein (Stanford University),
  Christine Shannon (Centre College)

- **Implementing the Inverted Classroom** ...................................................................................... 763
  Kate Lockwood, Jeff McCall, Barbara Beckmeyer, Marc Oehlman (Cal State, Monterey Bay)

- **LittleFe Buildout Workshop (Parts 1 & 2)** ..................................................................................... 763
  Charles Peck (Earlham College),
  Tom Murphy (Contra Costa College),
  Skylar Thompson (University of Washington),
  Aaron Weeden (Shodor Education Foundation, Inc)

- **Peer Instruction in CS: Introduction and Recent Developments** ............................................... 764
  Daniel Zingaro (University of Toronto),
  Cynthia Bailey Lee (University of California, San Diego),
  John Glick (University of San Diego),
  Leo Porter (Skidmore College),
  Beth Simon (University of California, San Diego)

Session 72: Saturday Workshops

- **Android+Sphero: Teaching Mobile Computing and Robotics in a Single Course** ..................... 765
  Stan Kurkovsky (Central Connecticut State University)

- **Computer Science via Digital Sound and Music: A Hands-On Introduction to Open Source Tools and New Curriculum Material to Introduce Computer Science Concepts** ........................................................................... 765
  Jennifer Burg (Wake Forest University),
  Susan Reizer (University of North Carolina Asheville)

- **Test-First Design in Introductory Java Programming** .......................................................... 765
  Vien K. Proulx (Northeastern University)
• Experiments with Network Security Threats in a Safe, Easy Sandbox .................................................. 765
  Michael J. Jipping (Hope College), Acshi Haggenmiller (Yale University), Matthew Koster (Calvin College),
  Eric Ostrowski (Grand Valley State University)

• Developing a Hands-on Undergraduate Parallel Programming Course with Pattern Programming ....................................................................................................................................................................................... 766
  Barry Wilkinson (University of North Carolina, Charlotte),
  Clayton Femer (University of North Carolina, Wilmington)

• LINQ from a Database Perspective: Querying Relations and XML ......................................................... 766
  Suzanne W. Dietrich (Arizona State University)

• Catalyzing & Sustaining Change in Computing Education ........................................................................ 766
  Lynn Andrea Stein (Franklin W. Olin College of Engineering)

• Drawing Machines: Exploring Embedded System Programming and Hardware with an Artistic Flair ......................................................................................................................................................... 766
  Erik Brunvand, Paul Stout (University of Utah), Jennifer (Ginger) Reynolds Alford (Trinity Valley School)

• Using POGIL to Help Students Discover CS Concepts and Develop Process Skills ......................... 767
  Clifton Kussmaul (Muhlenberg College), Helen Hu (Westminster College), Matthew Lang (Moravian College)

• Augmenting Introductory Computer Science Classes with GameMaker and Mobile Apps ................. 767
  Tiffany Barnes, Acey Boyce, Veronica Catete (North Carolina State University), Katelyn Doran (Microsoft),
  Drew Hicks (North Carolina State University), Leslie Keller (North Carolina Virtual Public School)

Session 73: Back Matter

• SIGSCE 2013 SRC Undergraduate Student Research Abstracts .............................................................. 769

• SIGSCE 2013 SRC Graduate Student Research Abstracts ...................................................................... 772

Author Index .................................................................................................................................................. 774
