CODASPY’13
Proceedings of the Third ACM
Conference on Data and Application Security
and Privacy

Sponsored by:
ACM SIGSAC

Supported by:
The Institute of Cyber Security, Center for Education
& Research in Information Assurance & Security,
and the Cyber Center at Purdue University
# Table of Contents

CODASPY 2013 Conference Organization, Reviewers and Sponsors .......................... ix

## Session 1: Social Networks and Location-based Privacy
Session Chair: Lujo Bauer (Carnegie Mellon University)

- **For Some Eyes Only: Protecting Online Information Sharing** ........................................... 1
  Iulia Ion (ETH Zurich), Filipe Beato (KULeuven & iMinds), Srdjan Ćapkun (ETH Zurich),
  Bart Preneel (KULeuven & iMinds), Marc Langheinrich (University of Lugano)

- **Do Online Social Network Friends Still Threaten My Privacy?** ................................. 13
  Sebastian Labitzke, Florian Werling, Jens Mittag, Hannes Hartenstein (Karlsruhe Institute of Technology)

- **Geolocation of Data in the Cloud** ................................................................................. 25
  Mark Gondree, Zachary N. J. Peterson (Naval Postgraduate School)

- **Exploring Dependency for Query Privacy Protection in Location-based Services** .......... 37
  Xihui Chen, Jun Pang (University of Luxembourg)

## Session 2: Privacy-preserving Techniques and Usage Control
Session Chair: Mike Reiter (University of North Carolina at Chapel Hill)

- **Expression Rewriting for Optimizing Secure Computation** ........................................ 49
  Florian Kerschbaum (SAP Research)

- **Efficient Discovery of De-identification Policy Options Through a Risk-Utility Frontier** 59
  Wei Yi Xia, Raymond Heatherly (Vanderbilt University),
  Xiaofeng Ding, Jiuyong Li (University of South Australia), Bradley Malin (Vanderbilt University)

- **Data Usage Control Enforcement in Distributed Systems** ............................................ 71
  Florian Kelbert, Alexander Pretschner (Technische Universität München)

## Session 3: Usable Security and Privacy
Session Chair: Gabriel Ghinita (University of Massachusetts, Boston)

- **The Usability of TrueCrypt, or How I Learned to Stop Whining and Fix an Interface** .......... 83
  Sumeet Gujrati, Eugene Vasserman (Kansas State University)

- **Privacy by Design: A Formal Framework for the Analysis of Architectural Choices** .... 95
  Daniel Le Métayer (INRIA - University of Lyon)

- **Comparative Eye Tracking of Experts and Novices in Web Single Sign-on** ............... 105
  Majid Arianezhad (Simon Fraser University), L. Jean Camp, Timothy Kelley (Indiana University Bloomington),
  Douglas Stebila (Queensland University of Technology)

## Session 4: Web Security
Session Chair: Elisa Bertino (Purdue University)

- **JStill: Mostly Static Detection of Obfuscated Malicious JavaScript Code** ................... 117
  Wei Xu, Fangfang Zhang, Sencun Zhu (Pennsylvania State University)

- **TamperProof: A Server-Agnostic Defense for Parameter Tampering Attacks on Web Applications** ................................................................. 129
  Nazari Skrupsky, Prithvi Bisht, Timothy Hinrichs, V. N. Venkatakrishnan, Lenore Zuck
  (University of Illinois at Chicago)

- **Cross-Layer Detection of Malicious Websites** ......................................................... 141
  Li Xu, Zhenxin Zhan, Shouhuai Xu, Keying Ye (University of Texas at San Antonio)

## Session 5: Poster Session
Session Chair: Gabriel Ghinita (University of Massachusetts, Boston)

- **A File Provenance System** ......................................................................................... 153
  Salmin Sultana, Elisa Bertino (Purdue University)
• Enhancing Performance of Searchable Encryption in Cloud Computing ............................................ 157  
Razvan Rughinis (University of Bucharest)

• A Fine-grained Access Control Model for Key-value Systems ...................................................... 161  
Devdatta Kulkarni (Rackspace)

• Emulating Internet Topology Snapshots in Deterlab ........................................................................ 165  
Graciela Perera, Nathan Miller, John Mela (Youngstown State University),  
Michael P. McGarry (University of Texas at El Paso), Jaime C. Acosta (U.S. Army Research Laboratory)

• Persea: A Sybil-Resistant Social DHT ................................................................................................. 169  
Mahdi N. Al-Ameen, Matthew Wright (The University of Texas at Arlington)

• A Study of User Password Strategy for Multiple Accounts ............................................................... 173  
S M Taiabul Haque, Matthew Wright, Shannon Scielzo (University of Texas at Arlington)

• Authenticating Spatial Skyline Queries with Low Communication Overhead ...................................... 177  
Hans Lo, Gabriel Ghinita (University of Massachusetts, Boston)

• An Efficient Certificateless Cryptography Scheme without Pairing ................................................ 181  
Seung-Hyun Seo, Mohamed Nabeel, Xiaoyu Ding, Elisa Bertino (Purdue University)

Session 6: Mobile-device Security and Privacy  
Session Chair: Alexander Pretschner (Technische Universität München)

• Fast, Scalable Detection of “Piggybacked” Mobile Applications .................................................... 185  
Wu Zhou, Yajin Zhou, Michael Grace, Xuxian Jiang (North Carolina State University),  
Shihong Zou (Beijing University of Posts & Telecommunications)

• Sweetening Android Lemon Markets: Measuring and Combating Malware in Application Marketplaces ................................................................................................................................................. 197  
Timothy Vidas, Nicolas Christin (Carnegie Mellon University)

• AppsPlayground: Automatic Security Analysis of Smartphone Applications ..................................... 209  
Vaibhav Rastogi, Yan Chen (Northwestern University), William Enck (North Carolina State University)

• AppProfiler: A Flexible Method of Exposing Privacy-Related Behavior in Android Applications to End Users ............................................................................................................................................. 221  
Sanae Rosen, Zhiyun Qian, Z. Morley Mao (University of Michigan)

Session 7: Access Control for Applications  
Session Chair: Adam Lee (University of Pittsburgh)

• Smart Keys for Cyber-Cars: Secure Smartphone-based NFC-enabled Car Immobilizer .................. 233  
Christoph Busold, Ahmad-Reza Sadeghi, Christian Wachsmann (Technische Universität Darmstadt),  
Alexandra Dmitrienko (Fraunhofer SIT),  
Hervé Seudié, Majid Sobhani, Ahmed Taha (Technische Universität Darmstadt)

• FENCE: Continuous Access Control Enforcement in Dynamic Data Stream Environments ........... 243  
Rimma V. Nehme (Microsoft Jim Gray Systems Lab), Hyo-Sang Lim (Yonsei University & Purdue University),  
Elisa Bertino (Purdue University)

• Mining Parameterized Role-Based Policies ......................................................................................... 255  
Zhongyuan Xu, Scott D. Stoller (Stony Brook University)

Keynote Address  
Session Chair: Ravi Sandhu (University of Texas at San Antonio)

• I See We Still Like C .......................................................................................................................... 267  
Ronnie L. Killough (Southwest Research Institute®)
Session 8: Short Papers — Access Control and Usage Control for Distributed Systems
Session Chair: Jaehong Park (University of Texas at San Antonio)

- A New Approach for Delegation in Usage Control .................................................. 269
  Xiaoliang Hu, Sylvia L. Osborn (The University of Western Ontario)

- Towards Secure Provenance-Based Access Control in Cloud Environments .......... 277
  Adam Bates, Ben Mood, Masoud Valafar, Kevin Butler (University of Oregon)

- Engineering Access Control Policies for Provenance-aware Systems .................. 285
  Lianshan Sun (Shaanxi University of Science & Technology),
  Jaehong Park, Ravi Sandhu (University of Texas at San Antonio)

- Linking Anonymous Location Traces Through Driving Characteristics ............... 293
  Bin Zan (Rutgers University), Zhanbo Sun (Rensselaer Polytechnic Institute),
  Marco Gruteser (Rutgers University), Xuegang Ban (Rensselaer Polytechnic Institute)

Session 9: Short Papers — Users and Security Economics
Session Chair: Anna Squicciarini (Pennsylvania State University)

- Insured Access: An Approach to Ad-Hoc Information Sharing for Virtual Organizations .................................................. 301
  Naoki Tanaka (University of Illinois at Urbana-Champaign, Institute for Infocomm Research & Advanced Digital Science Center),
  Marianne Winslett (University of Illinois at Urbana-Champaign & Advanced Digital Science Center),
  Adam J. Lee (University of Pittsburgh),
  David K. Y. Yau (Purdue University & Advanced Digital Science Center),
  Feng Bao (Institute for Infocomm Research)

- Mediums: Visual Integrity Preserving Framework ................................................. 309
  Tongbo Luo, Xing Jin, Wenliang Du (Syracuse University)

- Effect of Grammar on Security of Long Passwords ............................................. 317
  Ashwini Rao (Carnegie Mellon University), Birendra Jha (Massachusetts Institute of Technology),
  Gananand Kini (Carnegie Mellon University)

- Accepting the Inevitable: Factoring the User into Home Computer Security ........ 325
  Malgorzata Urbanska, Mark Roberts, Indrajit Ray, Adele Howe, Zinta Byrne (Colorado State University)

- All Your Browser-saved Passwords Could Belong to Us: A Security Analysis and a Cloud-based New Design .................................................. 333
  Rui Zhao, Chuan Yue (University of Colorado, Colorado Springs)

Session 10: Cloud and Distributed Computing Security and Privacy
Session Chair: Lujo Bauer (Carnegie Mellon University)

- iBigTable: Practical Data Integrity for BigTable in Public Cloud ......................... 341
  Wei Wei, Ting Yu (North Carolina State University), Rui Xue (Chinese Academy of Sciences)

- Multi-User Dynamic Proofs of Data Possession Using Trusted Hardware ............ 353
  Stephen R. Tate, Roopa Vishwanathan, Lance Everhart (University North Carolina, Greensboro)

- Adaptive Data Protection in Distributed Systems ................................................. 365
  Anna Cinzia Squicciarini, Giuseppe Petracca (Pennsylvania State University),
  Elisa Bertino (Purdue University)

- Towards Self-Repairing Replication-Based Storage Systems Using Untrusted Clouds .. 377
  Bo Chen, Reza Curtmola (New Jersey Institute of Technology)

Author Index ................................................................................................................. 389
